The Secretary of the Treasury and Public Works of the United States of Colombia, duly authorized by the Executive, on one part, and George M. Totten, Chief Engineer and General Agent of the Panama Railroad Company, with full powers and authorization from the proprietors of said company on the other part—having in consideration the stipulations of Article 2 of the contract entered into with said company, approved by legislative decree of June 4, 1850, and desirous of providing for the perfection of the work of said railroad, in order that it might better answer the necessities of the commerce of the world, and at the same time secure a sure and permanent income to the Treasury of the Republic—have agreed to amend and reform said contract in the terms set forth in the following stipulations:—

ARTICLE 1. The Government of the United States of Colombia grants to the Panama Railroad Company the use and possession, for ninety-nine years, of the railroad constructed by the same which actually exists between the cities of Colon and Panama. This grant includes not only the road itself, but also the edifices, storehouses, wharves, docks, the telegraph between Colon and Panama connected with the road, and in general all its dependencies and other works of which said company is now in possession, which are necessary for the development of the enterprise, and those which in future they may establish with the same object.

ART. 2. The Government of the republic binds itself, during the period that this exclusive privilege granted to the company for the working of the railroad remains in force, not to construct itself, or concede to any person or company, in any way whatever, the right of constructing any other railroad on the Isthmus of Panama; and it is also stipulated that while the aforesaid privilege exists, the Government cannot undertake nor permit any person whatever to undertake, without the permission or consent of said company, the construction or working of any ocean canal that may put in communication the two oceans across the Isthmus of Panama, to the westward of a line from Cape Tiburon on the Atlantic and Point Garashine on the Pacific. But it is stipulated that the right granted to the company to give its consent does not extend to the opposing the construction of a canal across the Isthmus of Panama (except on the actual route of said railroad,) but only to exact an equitable price for said privilege and as an indemnification for the losses which the railroad company might suffer from the opposition or competition of the canal. If the Government of the United States of Colombia should consider the sum exacted by the company not equitable, then it shall be fixed by arbitrators in New York or Panama, one of them appointed by the Government and the other by the company, and in case of non-agreement the two shall name a third, whose decision shall be without appeal. In making their decision the arbitrators shall take into consideration the grounds on which the company rests and the report that will be given by the Government on the matter; and having these in view they shall decide, without appeal, what they believe just and equitable. The sum, whatever it may be, that may be definitively decided on, shall belong, one-half to the railroad company and the other half to the Government.

ART. 3. In compensation and as the price of these concessions, the railroad company obliges itself to pay to the Government of the United States of Colombia one million of dollars in American gold coin, or in drafts payable in New York in the same, as the Government may choose, on the day on which this contract is approved by Congress, and to pay from now until the expiration of the present privilege an annual rent of two hundred and fifty thousand dollars in American gold coin. The payments shall be made by the company quarterly in New York to the agents named by the Government of the United States of Colombia, or, if convenient for the Government, the company shall place the money in London or Panama on the Government giving the necessary advice to the company in New York. These quarterly payments shall commence to count from the day of approval of this contract by Congress. From the rent which the Republic gets by this contract, there shall be deducted annually, during twenty years, twenty five thousand dollars, which the company shall deliver to the Government of the State of Panama.

ART. 4. The company binds itself to extend the railroad on the Pacific side to the islands of Nao, Calebra, Perico and Flamenco, or to any other place in the bay where there may be permanent depth of water for large vessels.

ART. 5. During the whole term of this privilege the company shall have the exclusive right of establishing across the Isthmus of Panama, within the zone expressed in Article 2, any kind of carriage road from one ocean to the other. The Colombian Government binds itself not to undertake itself, or to permit any other company or person to undertake within said zone, any other carriage road, macadamized, of plank, or any other kind suitable for the use of wheel carriages, between the two oceans across the Isthmus of Panama. It is, however, well understood that the privilege of which this article treats, cannot and must not in any manner prevent the construction of roads of any system in a direction different from the above stated, or the completion, preservation and improvement of roads which already exist or which are actually being constructed on the said Isthmus.

ART. 6. The company shall for the whole term of this privilege have the following rights:—First. To regulate and direct the use of the ports, places of embarking and disembarking, wharves, anchorages, &c., &c., at the termini of the railroad, and to establish agents with power to enforce the regulations which it may make in this respect, in conformity with the laws of the republic. These regulations shall be submitted to the approval of the Executive, without which they shall have no effect. The Executive may refuse its approbation of them, reform them and revoke them whenever it deems this convenient; Second, to use the places for embarking and disembarking, wharves, &c., &c., which it has constructed or may construct in the ports situated at both termini of the road; Third, to use all stations necessary and especially designated for the storage and free deposit of all goods and merchandise admitted for transit across the Isthmus on the railroad built by the company. By virtue of said privilege the company may collect, for the use of the line of communication, means of transportation, stations, stores and establishments of all kinds belonging to the company, such tolls, wharfage, storage and carriage as it may see fit to establish.

ART. 7. The Executive shall determine the forms to be observed in the landing of goods on either shore, and the interference which the employes of the republic are to have in it, in order to prevent that goods destined for transit from one ocean to the other be left on the road or fraudulently introduced for internal consumption. Said precautions shall be such as to avoid all frauds to the injury of the public revenue, without delaying or embarrassing the rapid despatch and transit of passengers and packages of merchandise, baggage and goods of all kinds which may belong to lawful commerce.

ART. 8. The company may give to the actual railroad a different direction from that which it

now has, such as it may deem more favorable to the enterprise; and there will remain at its option the points of starting and termination which it may consider most advantageous and convenient for the entrance and anchorage of vessels, or for the ports properly so called, and for wharves, dry docks, landings, stations, warehouses, hotels, and establishments of all kinds; and this without prejudice to what is provided in the fourth article of this contract.

ART. 9. The Government of the United States of Colombia ratifies the concession made to the Panama Railroad Company in the contract of April 15, 1850:—First, of the lands it has required and may require for the establishment of the line of the railroad in its whole extension, providing they belong to the Government; Second, of the lands it may require for posts, dry docks, river ports, stations, shipping places, landings, warehouses, stations, hotels and generally for all the necessities of the service of the railroad, providing said lands are the property of the Government: Third, of the concession made gratuitously and in perpetuity of sixty-four thousand hectares of vacant land in the territory of the State of Panama, excepting the islands in both oceans and the districts which on the 1st of January, 1849, formed the Territories of Bocas del Toro and Darien, the limits of which are set down by the law of June 9, 1855. This concession may be extended to ninety-six thousand hectares, if they should be found disposable within the limits of the old provinces of Panama and Veragnas, and so that the Government may adjudicate them as vacant lands; and the company shall be at liberty to select them on the continental part of said provinces wherever it may deem most convenient, it being stipulated that in those which are selected on the line of the road and in its vicinity, exact intervals shall be left of equal extent to those which are given to the company, in order that the Government of the republic may make grants or sales of lands for other establishments which may be made on the line and in the vicinity of the road. The lands granted to the company by clauses 1 and 2 of this article shall be returned to the republic on the expiration of the present privilege, in the terms and with the formalities prescribed in this contract.

ART. 10. In the grant of vacant lands made in perpetuity to the company by the contract of 1850, and ratified in the third clause of article 9 of this contract, there is not comprised the number of hectares contained in the island of Manzanillo, in the bay of Limon; but this is comprised in the grants spoken of in the clauses one and two of said article, with the exception of four hectares which the Government reserves to itself as a lot for the erection of buildings for public offices, school houses, a jail or other purposes of public use, which shall be delivered by the company, duly filled in and in condition to be built upon. But it is understood that the Government in selecting the place or places where it wishes to locate the four hectares reserved by this article, cannot choose such as are necessary for the construction or service of the road and its dependencies or such as are already occupied by buildings either finished or to be rebuilt. This selection can be made by the Government in advance according to its wishes, in conformity with the plan of the city, in order that the lots may be delivered to it, as the nature of the ground will allow them to be filled in.

ART. 11. The lands granted to the company by article 9, clause 3, shall be delivered as they are asked for, and after the legal formalities established for such cases have been fulfilled, and it remains for the company to prove their character as vacant lands, have them surveyed and the respective plans made out. The adjudication of said lands shall be made by the Executive, and from the time the due declaration is made they will be considered as adjudicated to the company in full dominion and property; but the provisional adjudication shall be made by the President of the State of Panama, always subject to the examination and approval of the national Executive; and as long as it is not disapproved it will only have the effect of preventing any subsequent grant of the same lands to a third party. The republic is in no case obliged to give security or guarantee of proof of the vacant lands to be adjudicated to the company. The Executive shall fix a term, with consent of the company, within which it shall be obliged to declare those lands to which it has a right.

ART. 12. When the lands required for the prolongation of the line of the railroad which is spoken of in the fourth article of this contract, or for the change in the direction of the line, or for the laying of a second line of rails, are the property of private individuals, the company shall have the right to obtain them after a valuation and just indemnification to the proprietor, in conformity with the provisions of May 22, 1866, "about procedure in civil suits which come before the tribunals of the Union."

ART. 13. The railroad is considered an enterprise of public utility.

ART. 14. The company is authorized to propose to the Executive such regulations as it may deem expedient for the police, security and preservation of its ways of communication, ports, works and establishments of all kinds; but such regulations shall not be carried into effect without the express approval of the Executive, which even after having approved, may annul or amend them, if it thinks proper, always proceeding in conformity with the laws of the republic.

ART. 15. The rates of transportation and freight of specie, carrying of merchandise and conveyance of passengers over the railroad, housing and storing in the depots and establishments of the company, shall be established by company the itself, and modified as the same may judge proper to its interests; but it shall be obliged to bring said rates and modifications to the knowledge of the local authorities at least thirty days previously.

ART. 16. The company binds itself to transport gratis over the railroad the mails of the nation and of the States, that may be carried from one ocean to the other, or to any intermediate point; and it may make the pecuniary arrangements that it may deem convenient for the transportation of foreign mails, the passage of which over the Isthmus is declared free of all nations; but the government of the republic may prohibit the transit over the railroad of the mails of those nations which may be at war with it, in which case the company shall refuse to carry them over the railroad.

ART. 17. The company may introduce free, without paying duties or taxes of any kind, all implements, machines, tools, materials, provisions and manufactured articles intended for the construction, working and preservation of this railroad and the feeding of the workmen employed on the same.

ART. 18. The company is exempt from paving any taxes or contributions, national, municipal, of the State or any other kind, on the railroad, its warehouses, wharves, machines or other works, things and effects of all descriptions belonging to it, and which, in the opinion of the Executive, are necessary for the service of the railroad itself and its accessories.

ART. 19. In compensation for these exemptions, the company binds itself to transport over the railroad gratis and without charging the government anything for freight or on any other account, the troops, commanders and officers, their baggage, the ammunition armament, clothing and all other similar effects belonging, being or destined for the immediate service of the government of the republic or that of the State of Panama, as also their employes in service or on a mission, and persons who with their families and baggage may come to the country as emigrants and new settlers with a permanent character as such, for account of the government, up to the number of two thousand annually. The Executive shall order the steps which it may deem convenient in such cases, in order to avoid that such passengers whose entrance into the Territory of Colombia is purely accidental make use of this concession.

ART. 20. Colombian produce shall be transported by the railroad in the first twenty years of this contract on payment of only one-half of the freight or transportation money fixed by the company for foreign produce of the same kind; but at the end of this period they shall pay a duty on freight that shall not exceed the two-third parts of that fixed by the tariffs of the company, and those tariffs cannot be raised in future in regard to Colombian produce.

ART. 21. Passengers, treasure, merchandise and effects of all kinds, destined for the interoceanic transit over the railroad, shall be exempt from taxes and imposts, national, municipal, of the State or any other description whatever, as long as they remain in the storehouses and depots of the company or in the hands of the latter. In like manner the vessels that enter the ports at both ends of the railroad, as also their officers, crews and agents, shall be exempt from the payment of tonnage dues and of all other taxes or contributions on account of their services rendered directly to the interoceanic transit.

ART. 22. Passengers passing from one sea to the other by the railroad shall not require any passport to go through, except in cases of foreign war or internal commotion, when the government may think the presentation of passports conducive to the security of the country or the preservation of public order. Persons, however, who have been expelled from the territory of the Republic, and all other individuals whom the laws have forbidden the entrance into the country, cannot pass over the railroad.

ART. 23. In case the competent tribunal should decide that the present privilege granted to the company is forfeited, the latter shall return to the republic the lands granted as property and gratis which are not yet transferred to a third party, and shall have no right to exact any indemnification on account of improvements or any other plea.

ART. 24. The company is obliged to make a demarcation of its land after having cited the owners of adjoining lands, and to draw up a topographical plan of the road and its assessories, such as bridges, aqueducts, viaducts and all other works constructed for the service of the railroad, in order that by this plan it may be clearly known what the company possesses as property, and to what the granted exemptions apply.

ART. 25. The company enters into an obligation to execute constantly, with all possible care, promptness and despatch, the transportation of passengers, cattle, merchandise goods and all kinds of materials that may be confided to it, for payment of the charges and freight of the transport which may be established in the respective tariff. The provisions of this article are, however, no obstacle to the company making special agreements for the transportation of such articles, the bulk, weight or nature of which do not allow their freight to be fixed beforehand.

ART. 26. Vessels of nations which are at war with the United States of Colombia shall not be admitted into the ports at either end of the railroad, nor shall the produce, effects and properties of said nations enjoy free transit across the Isthmus of said road.

ART. 27. It is obligatory for the company to constantly have at Panama or Colon a representative with sufficient authorization and powers, wherever it should be necessary, to treat personally with the government on matters relating to the enterprise.

ART. 28. The present privilege cannot be ceded or made over to any foreign overnment, that is to say, to any government existing outside of Colombian territory, under the penalty that the same privilege is forfeited by the mere fact of attempting or carrying into effect such cession or transfer, which act is even now declared to be absolutely null and of no force or effect. This privilege is also forfeited in case the railroad company should not perform transportation for a period of more than four months in succession (except cases of accidents). This privilege shall also be forfeited for non-payment of the rent for more than a year

after becoming due. Delay in the payments for less time subjects the company to payment of interest at the rate of seven per cent. per annum.

ART. 29. In case that for any reason this privilege should be forfeited, the property and full possession of the railroad, with all its dependencies, appurtenances and accessories, shall revert to the republic, and the company shall have no right to any indemnification or remuneration whatever.

ART. 30. The government of the republic binds itself to protect and maintain in full the rights of the company under this contract; but to this end it is necessary that the company, on its part, fulfills punctually the duties and obligations which it takes upon itself, and further, that the privilege remains in force.

ART. 31. As the right which the republic reserved to itself by the contract of April 15, 1850, to redeem the privilege of the company, is especially hypothecated as an additional security for the loan contracted by said republic in London, under date October 1, 1863, it is hereby stipulated that the income from the railroad, which by this contract belongs to the government, is subsidiarily applicable to the payment of the obligations of the government of the republic in respect to that loan, either to complete the annual instalments which the latter is obliged to pay in London on account of interests and amortization of capital, or by redeeming the bonds of the loan at par, if in 1874 its amortization should not have been completed.

ART. 32. In consequence of the stipulation of article 3, the government renounces the benefit or participation of three per cent., which by article 55 of the original contract it had in the net proceeds of the undertaking, and also the quota of five per cent. which it also had reserved in its favor by article 30 of the same contract for the transport of mails, which quota, it had been stipulated, should not be less than $10,000 a year. The account of these revenues shall be settled immediately, according to the terms set down in article 55, up to the day on which the present contract shall commence to be in force and to take effect, and the payment of the balance which may appear in favor of the republic shall be made by the company in New York, to the order of the government.

ART. 33. Controversies which may arise between the government of the republic and the railroad company in respect to the meaning or execution of this contract shall be decided by the courts and tribunals of the Colombian Union according to the constitution and laws of the republic.

ART. 34. The ninety-nine years of the duration of the privilege granted by this contract shall be counted from the date of its approval by Congress.

ART. 35. On the expiration of the privilege and by the mere fact of its expiration the government of the Colombian Union shall be substituted to the company in all its rights, and shall immediately enter into the possession of the road, of all its fixtures and movables of all its accessories and of all its products. The company shall be bound to deliver to the government in good order the roads the works composing them and their dependencies, such as landings, discharging places, offices, machines, and in general every object moveable or immoveable, whether destined especially for the service of transportation or applicable to any other object connected with the undertaking.

ART. 36. The present contract contains all the grants and privileges that the actual Panama Railroad Company has acquired for the future. It is therefore declared, and in this the parties expressly agree, that at no time can the company claim any rights or privileges which are not clearly contained in this contract, unless they be granted by subsequent acts.

ART. 36. The contract of April 15, 1850, approved by legislative decree of the 4th of June of the same year, is reformed in the terms of the present contract, and drawn up as it is in thirty-seven articles, it will be submitted to the approval of the Executive of the republic, and when obtained it will be presented to Congress, whose sanction is required in order that, receiving force as a law, it may be carried into effect. In faith whereof the present has been drawn up in duplicate, sealed with the private seals of each part, and signed, after reading and comparing them, in Bogota, on the 5th of July, 1867.

JORGE GUTIERRER DE LARA,
Secretary of Treasury and Public Works.
G. M. TOTTEN, for the Company.

BOGOTA, July 5, 1867.—Approved.

SANTOS ACOSTA.
JORGE GUTIERREZ DE LARA,
Secretary of Treasury and Public Works.

The following is the decree by which the contract has become a law of the country:

The Congress of the United States of Colombia decrees:

ARTICLE 1. That the contract made at Bogota on the 5th of July, 1867, between the Secretary of the Treasury and Public Works, Mr. Jorge Guiterrez de Lara, with the approval of the Executive, and George M. Totten, General Agent and Attorney of the Panama Railroad Company, reformatory of that of April 15, 1850, on the construction of a railroad from one ocean to the other, across the Isthmus of Panama, with the following modifications [here follow the alterations and amendments inserted in the above translation of the complete contract] be approved.

Done at Bogota, on the 15th of August, 1867.

PEDRO CORTEZ HOLGUIN,
President of the Senate.
M. PLASA AZUERO,
President of the House of Representatives.

ENRIQUE CORTES, Secretary of the Senate.

FRANCISCO A. VELA, Secretary of the House of Representatives.

BOGOTA, August 16, 1867.

Publish and execute the above.

[L. S.] SANTOS ACOSTA,

JORGE GUTIERREZ DE LARA, Secretary of Treasury and Public Works.

OFFICE OF THE TREASURY AND WORKS, BOGOTA, August 16, 1867.

The above is a true copy.

JORGE GUTIERREZ DE LARA, Secretary.

☞ The Central Pacific Railroad Company have purchased, under a foreclosure sale, all the rolling stock of the California Central and Yuba Railroads.

Taxation in the State of New York.

The following is an extract from the Report of the Committee on Finance in the Constitutional Convention:

The financial condition of the State, and the excessive taxation now being imposed upon the people, furnish to the minds of the committee conclusive reasons, if there were no other, against the creation of additional indebtedness. This condition, and the amount of taxes upon the people of the State will be briefly stated:

The outstanding debts of the State amount to	$48,351,682
The debts of the cities, villages and towns	85,000,000
Making a total of State indebtedness of	$133,351,682
The proportion of the national debt belonging to this State to pay is not less than	500,000,000
Making a total of	$633,351,682

Saying nothing of the unascertained national indebtedness, which high authority has placed at the same amount.

The highest assessed valuation of all the property in the State is $1,639,432,615; from which it will be seen that the State is permanently indebted to considerably more than one-third of the assessed value of the property therein.

The annual taxation is very much larger than the permanent debt would indicate,

DIRECT TAXES.

Direct taxation by the State	$12,800,000
Direct taxation by counties and towns	32,000,000
Direct taxation by cities and villages, estimated	18,000,000
Total	$62,800,000

INDIRECT TAXES.

The whole amount of internal revenue received by the United States government during the fiscal year ending the 1st of July, 1866, was $310,-900,894, of which this State paid in fact one-fourth, but say one-fifth	$62,181,398
The amount collected by the tariff was nearly $200,000,000, of which the people of this State must have paid, as consumers, one-fifth, amounting in the aggregate to $40,-000,000 in gold, which is equal in currency to	56,000,000
Making an aggregate of annual taxation of	$180,981,398

which is more than 11 per cent. on the assessed valuation of property, and equals a tax of $45 upon every man, woman, and child in the State, and more than $200 upon every voter.

If this excessive annual taxation should be capitalized, it would require the sum of $3,000,-000,000 at 6 per cent. to pay it, which is $1,400,-000,000 more than the assessed value of the whole property.

If, therefore, the present amount of taxation is to be regarded as permanent, and cannot be materially reduced, the unwelcome truth must be acknowledged, that the property of the State is mortgaged to more than the amount of its full value.

It is estimated that 3½ per cent. upon the value of property is a liberal allowance for the net profits of the people.

This brief statement shows that taxation has reached a point largely beyond the entire net earnings of the whole people, and is absorbing the capital with fearful rapidity. No argument is needed to establish the fact that such an extent of taxation cannot be permanently endured. It is no longer a matter of choice, but of ability. The people have borne these exactions with an unexampled patriotism and patience; but they have a right to demand, and your committee believe do demand from this convention, some alleviation from present, and protection against future burdens.

Finance Committee of the Constitutional Convention.

Mississippi, Ouachita and Red River R. R.

A meeting of the stockholders of this road will be held at Camden, Ark., on the 21st inst., to take into consideration propositions from certain persons for the purchase of the road. The Little Rock *Gazette*, in noticing the above, says:

It will undoubtedly be much to the advantage of the citizens of south Arkansas to sell the road to parties who will obligate themselves to build it. The veto by the Governor of the bill for the relief of this road, renders it improbable that the present company will be able to construct the road in any reasonable time, and considering the gloomy prospects of the future, it is plain that stockholders along the proposed route will find it to their interest to even lose their investments, if thereby the immediate building of the road is secured. We trust that such action will be taken as will hasten the construction of this important road,

St. Paul and Pacific Railroad.

A communication has been received at the General Land Office from the Governor of Minnesota, enclosing maps showing the completion of the first section of the St. Paul and Pacific Railroad, commencing at St. Paul and ending in section 13, township 117, range 22, near Minnetonka, being an advance of twenty miles due west from St. Paul, and the completion of twenty miles of the Winona and St. Peter's Railroad, terminating about quarter of a mile west of Goose Lake, in section 15, township 107, range 22. This latter route gives a completed line of road in operation for 100 miles west of Winona, Minnesota.

Charleston and Savannah Railroad.

Step by step have the directors of the Charleston and Savannah Railroad gone forward in the noble work of reconstruction, until to day they are enabled to announce the working of the road as far as Pocotaligo, and to give the public good grounds to hope that the road is about to fulfill the destiny marked out for it by its early friends. When completed it will form a link in the shortest route between New York and Savannah and points farther South, and even in its present condition it is the principal and almost the only avenue to the valuable rice and cotton plantations of a great part of the coast of South Carolina. By means of it planters are enabled to live in Charleston, and visit their plantations and return the same day, and to procure from them regular supplies, whereas formerly they were compelled either to absent themselves entirely from their plantations during the summer, or else to resort to pine land residences, always isolated, and not always healthy.

The great feature of the road, however, from a Charleston point of view, is a contemplated connection with the Georgia Road at Millen, which would give Charleston almost an air line connection with central Georgia, Alabama, and Mississippi, and increase her trade to an incalculable degree, and we would then only need the completion of the Blue Ridge Railroad, or some other direct connection with Cincinnati and the Northwest to make Charleston a great commercial city. —*Charleston Mercury, Sept.* 23.

$500,000
STATE OF GEORGIA
Seven per Cent. Coupon Bonds,

SECURED BY A FIRST MORTGAGE ON THE WESTERN AND ATLANTIC RAILROAD.

THE undersigned will receive bids until the 12th day of October next, for five hundred thousand dollars seven per cent. Coupon Bonds of the State of Georgia, which are part of an issue of $3,030,000 made on the first of July 1866, and payable 1st July 1886, in New York, with Coupons payable the 1st of July and 1st of January of each year in New York.

They are issued in pursuance of certain acts of the General Assembly of the State of Georgia, approved March, 1866.

These Bonds are a security of the highest order, and of which there is none better in the country, or a more secure investment of capital.

Besides the faith of the State of Georgia, they are secured by a first Mortgage on the Western and Atlantic Railroad, which, although it is exclusively the property of the State, yet it is by authority a Chartered Corporation which can sue and be sued, and contracts by its Officers are as binding as can be made by any other Corporation. The Mortgage is executed to three Trustees, viz: George B. Carhart, Esq., and Robert H. Lowry, Esq., of New York, and Jeremiah Beall, Esq., of Georgia.

On failure of the State to pay any half-year's interest on any of said Bonds, and such default shall continue for the period of six months after the said Coupons shall become due and payable, then and thereupon, the principal of all the Bonds secured thereby, shall become immediately due, and the Trustees may proceed to foreclose and enforce said Mortgage lien at the request of the holders of said Bonds.

The Western and Atlantic Railroad is 137 miles long, running from Atlanta, Georgia, to Chattanooga, Tennessee, connecting at each end with several important Railroads, making this Railroad an exceedingly valuable and productive piece of property.

So valuable is this road, that purchasers can readily be had that will pay cash for it, more than double the amount of the Mortgage lien. I give herewith the Treasurer's statement of the assets, resources, and liabilities of the State, to which I respectfully beg reference.

CONSOLIDATED STATEMENT

Of the Public Debt of the State of Georgia, on the 1*st July* 1867, *showing date of issue and maturity of outstanding Bonds, Annual Interest on each issue, and Total Annual Payments.*

When due.	When Issued.	Amounts.	Annual interest on each issue.	Total interest due each year.	Total Amounts due each year.

1886	1866	134,500 00	Atlantic and Gulf Railroad 6 per cents.	220,070 00	354,570 00
1887	1867	*3,030,000 00	W. and Atlantic mortgage 7 per cents.	9,900 00	9,900 00
Total Public Debt		$5,812,000 00		3,394,070 00	3,394,070 00

* This amount is not yet all sold, there being on hand about $990,000 00, of which about $140,000 00 will be applied to the funding of bonds and coupons falling due previous to July, 1866, yet outstanding. It will be seen, therefore, that the State is paying interest now on little over five millions, of which nearly one-half is at 6 per cent. :—the 7's amounting to about $2,700,000 00.

The Assets and Resources of the State of Georgia are, 1*st, the Property of the State, consisting of*—

The Western and Atlantic Railroad, now paying into the Treasury as net profits, $50,000 per month, or $600,000 per annum, being 6 per cent. on	$10,000,000
100,000 shares of stock in the Atlantic and Gulf Railroad Co., (connecting Savannah with the waters of the Gulf at Bainbridge, Ga., and the Gulf shore at St. Marks, Fla.,) promising in the early future handsome dividends, at $100 per share	1,000,000
186 shares stock in the Georgia Railroad Co., paying annual dividends of 10 to 15 per cent., at $100 per share	18,600
Total value of property belonging to the State	$11,018,600
From which deduct total public debt.	5,872,000
	$5,136,600

Leaving available property assets over and above all liabilities five million one hundred and thirty-six thousand six hundred dollars.

2d. The taxable property of the State, exclusive of Railroads, Banking, Express and Insurance Companies, from returns in the Comptroller General's office, is two hundred millions dollars, upon which a tax is levied this year of one-fourth of one per cent.	$500,000
Estimated receipts from specific taxes on polls, professions, &c	150,000
Estimated receipts from tax on Banks, Railroads, Express, Home and Foreign Insurance Companies, &c.	33,000
Estimated receipts from miscellaneous sources	10,000
Estimated receipts from net earnings of the Western and Atlantic Railroad	600,000
Estimated receipts from dividends on stocks	2,000
Annual income	$1,295,000
The estimates by Governor Jenkins, of the necessary usual and probable disbursements for the year 1867, are	$375,000
Miscellaneous appropriations	100,000
Interest on the public debt	375,000
	850,000
	$445,000

Leaving a balance of net revenue of four hundred and forty-five thousand dollars for annual reduction on Public Debt.

JOHN JONES, Treasurer of Georgia.

Milledgeville, Ga., July 1, 1867.

This amount of $500,000 of its bonds, now offered by the State of Georgia, is to pay a debt due the United States, now approaching maturity, which was for the purchase of locomotives, railroad cars, and other machinery from the Government to organize and restock the Western and Atlantic Railroad at the close of the war.

The right is reserved to accept or reject any part or all the bids that may be made, and parties bidding at a higher rate than may be accepted, will be placed upon an equality with the lowest accepted bid.

Parties who may desire to make further investigations, are referred to printed pamphlets, with more detailed particulars, which can be had at the

National Bank of the Republic, New York.

National City Bank, New York.

J. Edgar Thomson, Esq., President Penn. Central Railroad, Philadelphia.

Joseph S. Fay, Esq., No. 13 Exchange Street, Boston.

John W. Garrett, Esq., President Baltimore and Ohio Railroad, Baltimore.

Address WILLIAM B. JOHNSTON,
Agent of the State of Georgia,
Care National Bank of the Republic, New York.

New York, 28th Sept., 1867.

Washington County Railroad.

The work on the bridge over the Antietam, near Keedysville, cannot possibly be completed as soon as was anticipated, by ten days, and we cannot look for the opening of the Washington County railroad before the 25th of October. The bridge will be passable about the end of the first week in October, and as half a mile of rails can be laid per day, and the distance is nine miles to Hagerstown, we may look for the cars here on the day above mentioned, but not before.—*Hagerstown Mail.*

☞ The President has appointed the following gentlemen as government directors of the Union Pacific Railroad: Jesse L. Williams, of Indiana; Timothy J. Carter, of Illinois; James S. Rollins, of Missouri, and George Ashman, of Massachusetts.

American Railroad Journal.

Saturday, October 5, 1867.

Stock Exchange and Money Market.

We have had a comparatively close and active Money Market, all through the week. The speculative and mercantile calls have been brisk, and accommodation has been granted, even to the most responsible borrowers, only at the full legal rate of 7 per cent. on call, and 7@7½ per cent. per annum in the best discount form. Private lenders have been most liberal of aid. The banks have been rather reserved in their advances, pending the completion of their quarterly exhibit next Monday. The remittances of currency to the West have been again on an extensive scale. The Sub-Treasury negotiations in the way of sales of gold and new Five-twenty bonds, and of purchases of Seven-thirty notes have been quite heavy. The cash reserve of the office was reduced nearly four millions, during the week. The city banks, in their last weekly return, showed an increase of $878,665 in their specie reserve, with a reduction of $4,164,529 in their deposits, and $1,717,859 in their legal tender board. The loans were cut down $2,875,316, and their circulation was augmented $90,827. The specie reserve of the banks is now $9,496,163, against $7,643,960 same time last year. The city bank deposits are now $181,439,410, against $223,336,785 week ending Sept. 29, 1866. The legal tender reserve amounts to $55,991,526, against $87,826,021 same time last year. The circulation now stands at $34,147,269, against $29,213,950 same time last year. The loans are now $251,918,751, against $269,807,383 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $100,114,785 a day, against a daily average of $98,690,393 the preceding week, and $85,681,445 the week ending with Sept. 14. The current week's exchanges average about $91,500,000 a day. At the annual meeting of the Clearing House Association on Tuesday, the following officers were elected: John Q. Jones, Chairman; Alexander Masterson, Secretary; William A. Camp, Manager. The General Committee is composed of the following gentlemen: J. D. Vermilye, Cashier Merchants' National Bank; James M. Morrison, President Manhattan Company; E. D. Brown, President Mechanics' and Traders' National Bank; S. R. Comstock, President National Citizens' Bank; C. P. Leverick, President Bank of New York. The transactions of the institution for the past year amounted to $29,520,122,921 35, and the average daily transactions to $96,818,580 91. The total transactions since the organization of the Clearing House on the 11th October, 1853, a period of fourteen years, reach the immense aggregate of $187,890,467,794 68, all of which transactions have been done without loss or error.

National Bank notes to the amount of $38,125 were issued last week, making the total issue to 1,671 banks thus far, $303,985,971, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,884,975, leaving, with the existing 1,648 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $299,100,996. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,695,000; and for the public deposits, $38,373,950—making a total of $379,068,950. The Treasury Department last week redeemed and destroyed $407,800 of worn and mutilated fractional currency, and issued $603,110 of new.

The Croton National Bank, of this city, with a capital of $200,000, and a circulation of $180,000, together with other liabilities, chiefly in the deposit line, amounting to over $350,000, failed on Monday, and passed into the charge of the Government Bank Examiner, on Tuesday. Cause of embarrassment, of course, gross mismanagement.

The Philadelphia Bank movement the past week shows an increase in loans, of $115,068; an increase of $44,007 in specie; a decrease in legal tenders of $331,688; a decrease of $174,598 in deposits; and an increase of $1,322 in circulation. The Bank Clearings show a decrease of $2,130,400, and the balances, an increase of $416,632.

Under the official notice from Secretary McCulloch, Assistant Treasurer Van Dyck announces his readiness to issue the authorized three per cent. certificates in exchange for compounds of October and December. Interest is allowed on the notes to the 15th of October, and the certificates bear interest from that date. The certificates are payable on demand in legal tenders, and can be used by the bank as legal tender reserve, with the qualification that forty per cent. of their reserve must be held in United States notes.

The U. S. Sub-Treasury receipts, week ending with Sept. 28, were $16,552,080, including $2,858,305 from customs duties; payments, $20,259,419; balance at the close of the week, $114,989,483, against $118,696,882, at the close of the preceding week, showing a decrease of $3,707,339. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $4,917,147 including $354,885 from customs; and payments, $8,135,776; on Tuesday, receipts, $1,065,759 including $477,507 from customs, and payments, $508,033. The balance at the close of business on Tuesday stood at $112,318,580, against $120,656,631 a week previous. The aggregate receipts of the office in September, were $82,131,817, including $11,967,825 from customs, payments, $12,474,077.

Government revenues were rather light, during the week. The income from excises amounted to only $2,502,098 last week, and $13,183,607 last month. As above stated, the excises, last week, yielded $2,502,098, against $1,868,822 the preceding week; customs at the port of New York $2,858,305, and at the outports, about $900,000 (in coin) more, making the grand total income for the week equal about $7,951,640 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $57,000,000.

Government received $5,382,583 from customs, through the port of San Francisco, from Jan. 1, to Sept. 6, 1867.

Gold has been in more active demand, since our last, especially toward the close of the week, chiefly on speculative account, and though the Government sales have been continued to a moderate extent, the price has rallied considerably closing at 144@144⅛. The customs and export calls have not been as urgent. Washington advices state that the coin reserve of the Treasury Department is now up to $107,000,000, including private deposits. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,481,220. The customs demand for Gold last week, averaged $476,384 a day; thus far, this week, it has been equal to $419,000 a day, or equal to a weekly aggregate of $2,514,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $64,194, and from California, $819,128. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $94,639,655, against $104,696,636 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $23,444,598, against $31,612,256 same time last year, showing a decrease this year, of $10,167,658. The exports of specie from this port, last week, were $657,347. The total outflow of specie from the port, since Jan. 1, 1867, has been $43,151,819, against $54,300,790 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $86,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $43,258,765, against $31,806,589 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to Sept. 7, reached $29,163,088, against $31,549,864 same time last year, showing a decrease, in 1867, of $2,386,776.

A more abundantly supplied and heavy market has been noted for foreign exchange, which has been in very moderate request, closing with a downward tendency as follows: Bankers' 60 day bills on London closed at 109⅛@109⅜, and on Paris to 5.17½; sight bills on London to 109½@109⅞; and on Paris to 5.15. The offerings of produce bills have been up to a full average this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,330,163, making the total value of exports since Jan. 1, 1867, $136,902,503, against $145,328,783 same time in the preceding year.

Government securities have been more freely offered for sale, and in most instances, at a fractional reduction in prices. The investment demand has been quite moderate. The speculative inquiry has nearly ceased. Washington advices state that the next debt statement, to be published about Friday, "will show some reduction in the debt, but there is a corresponding reduction in the Treasury, and, therefore, the aggregate reduction of debt, as compared with last month, will be small. The Secretary authorizes a flat denial of the report published in some papers that there has been an over issue of fractional currency. He is certain, on the contrary, that the Government has gained something by the wearing out and destruction of currency. The Department has determined to at once issue three per cent. temporary loan certificates sufficient in amount to redeem the compound interest notes falling due in October and December. The law requires the use of this loan, and provides that no more than $50,000,000 shall be outstanding at any one time." U. S. sixes of 1881 closed here on Wednesday at 110⅞@111⅛; U. S. Five-twenties of 1862, 112⅞113; U. S. Five-twenties of 1864 at 108⅛@109; U. S. Five-twenties of 1865 at 109⅛@109⅜; U. S. Five-twenties of 1865, consolidated, 107½@107¾; U. S. Five-twenties of 1867, 107⅝@107¾; U. S. Ten-forties at 99¾@99⅞, and U. S. Seven-thirties at 106½@106⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

October, 1864	119⅛	August, 1865	116⅛
December, 1864	118⅛	September, 1865	115⅝
May, 1865	117⅛	October, 1865	115⅛

A more confident speculative movement has been noted in railway and miscellaneous share property, particularly during the latter half of the week, and higher prices have been made on the general list, though the latest dealings on Wednesday showed a slight reaction from the highest figures.

General business has been more active, particularly in the domestic produce line. Prices of breadstuffs and provisions have favored sellers decidedly. Cotton continued plenty, and heavy at reduced figures closing with middling grades on Wednesday at 21½@23½ cents per lb. as extremes. The stock of cotton now here is estimated at about 36,000 bales. The receipts at the port this week, have averaged about 900 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from September 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales last year; estimated stock at close of year, 80,296 bales, against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 25,000 bales; exports, same time, 7,200 bales; stock on hand at latest dates, 125,000 bales. On Wednesday, 20,000 tons of Pittston coal were sold at auction at from $4.45@4.75 per ton of 2,240 lbs., deliverable at Newburgh. The bidding lacked spirit. Foreign merchandise has been fairly active in the grocery line, but otherwise rather tame, at irregular prices. Dry Goods were heavy, and less sought after. The total imports of foreign dry goods, last week, were $1,534,226, and the total amount marketed $2,478,347. The value of foreign merchandise imported last week, was $2,252,212—making the grand total specie value of last week's imports of dry goods and merchandise, $4,114,806, and since Jan. 1, 1867, $190,011,111, against $226,460,263 same time in the preceding fiscal year. The ocean freight market has been fairly active, since our last, closing firmly with 485 vessels of all classes in port. For Liverpool we quote flour at 1s. 9d. per bbl.; grain at 5½c.@6d. per bushel; cotton at ⅛d.@$\frac{3}{16}$d. per lb.; and heavy goods at 15s.@25s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 18.	Sept. 25.	Oct. 1.
Consols	94 13/16	94 7/16	94 7/16
U. S. 5-20's of 1862	72⅞	73	72½
Erie	41¼	41¼	42
Ill. Central	77½	77¼	77½

The New York exports, exclusive of specie, for the week ending Oct. 1st, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,042,566	$3,330,163
Prev. reported	143,286,217	133,572,340
Since January 1	$145,328,783	$136,902,503

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,931,364	$1,862,594
Gen. merchandise	2,644,602	2,252,212
Total for the week	$4,575,966	$4.114,806
Previously reported	221,884,297	185,896,305
Since January 1	$226,460,263	$190,011,111

The balance in the Sub-Treasury on Wednesday was $114,206,540 72.

☞ The Rockford, Rock Island, Warsaw and St. Louis Railroad Company have entered into a contract with responsible persons for the construction of that road through its entire length. The road will be built and operated in sections, beginning at Sterling, possibly at Rockford also, and working toward Rock Island; then at Warsaw, thence north.

Baltimore and Ohio Railroad.

This company have recently issued a complete map of their road, showing all its branches and immediate connections. The road has now one thousand miles of completed track, and sixty-six miles (included in the Metropolitan Branch, the Washington County Branch, and the Winans' Cut off,) in progress of construction. The map is especially interesting for showing the line of the new branches from the Point of Rocks to Washington, and Sandy Point to Hagerstown, and the connections at Cumberland with the Connellsville Railroad, and at Harper's Ferry with the Winchester and Potomac Railroad, the extension of which will give to us the preferred route through Southwestern Virginia to East Tennessee, and thence with the whole interior South. By the completion of the Metropolitan Branch and of the Connellsville road, the distance from Washington to Pittsburg will be reduced to three hundred miles, and from Baltimore to Pittsburg to three hundred and twenty-seven miles.

Albany and Susquehanna Railroad.

This road is completed, and in operation, to Bainbridge, in Chenango Co., a distance of 108 miles. The grading and ties are ready between that point and Afton, a distance of 6 miles, and workmen are busily engaged laying the track. It is thought the road will be opened to Afton, 114 miles from Albany, about the 20th inst. The grading is being pushed vigorously between Afton and Ninevah, 5 miles, and between Ninevah and Harpersville, 2 miles; the last 7 miles will not, however, be completed before the 1st of January next. The Tunnel, distant from Harpersville 4 miles, is completed. Between that and Binghamton, a distance of about 15 miles, very little work has been done.

Atlantic and Gulf Railroad.

We learn from the Bainbridge *Argus* that the track has been laid and the cars are now running on the Bainbridge Extension of this road to the Oclockonee river, 14 miles beyond Thomasville, or 214 miles south west from Savannah. Thence to Bainbridge is 21 miles, on which the cross-ties and iron are being rapidly laid. Major A. J. Maxwell is Chief Engineer. The track is smoothly and substantially laid, and the trestle and bridge thoroughly repaired. Much difficulty and delay have been caused at the Oclockonee by the continuous rains and high water, but the river is now passed, and the utmost energy is displayed in laying down the track thitherward.

☞ A special meeting of the stockholders of the Cleveland, Painesville and Ashtabula Railroad, will be held in Cleveland on the 8th inst., to vote upon the question of leasing the railroad of the Cleveland and Toledo Railroad Company; also, to vote upon an increase of the capital stock of this company.

☞ We learn that the work is progressing well on the road now in course of construction from Montgomery to Selma, and that Mr. Pollard, the President, engages to have engines running to Selma by the first of April next.

☞ Ground was broken at Plattsburg, N. Y., on the 1st inst., for the Whitehall and Plattsburg Railroad. A large concourse of citizens were present, and spirited addresses were made by Hon. John A. Griswold, of Troy; Hons. T. Hoyle and N. Lapham, Senator Platt and others.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in Sept., 1867, were . $111,379 08
Corresponding week of previous year.. 99,987 09

Increase $11,391 99

The earnings of the Atlantic and Great Western Railway for the third week in Sept., 1867, were $133,530 00
Corresponding week previous year... 116,804 00

Increase..... .... $26,726 00

The earnings of the Western Union Railroad for the 3d week in Sept., 1867 .... .. $31,456 39
Corresponding week previous year.... 21,535 15

Increase $9,921 24

The earnings of the Marietta and Cincinnati Railroad the 3d week in Sept., 1867 .. $30,042 00
Corresponding week previous year.... 24,041 00

Increase $6,001 00

The earnings of the Detroit and Milwaukee Railroad for the week ending September 26, 1867, were $44,973 00
Corresponding week of 1866..... ..... 41,356 00

Increase..... .... $3,617 00

The earnings of the Chicago and Alton Railroad for the week ending Sept. 23, 1867, were $112,505 06
Corresponding period previous year.. 71,122 77

Increase..... .... $41,382 29

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 3d week in September, 1867, were $50,057 77
Corresponding week of previous year. 42,635 84

Increase $7,421 93

The earnings of the Chicago and Rock Island Railroad for the 4th week in Sept., 1867, were.... .... $136,300 00
Corresponding week of previous year.. 104,730 00

Increase..... .... $31,520 00

The earnings of the Virginia and Tennessee Railroad for the third week of Sept., were $26,983, an increase of $7,002 on the same week last year. Total for the fiscal year commencing 1st of July, $212,470, an increase of $53,991 on same time in 1866.

Kansas Pacific Railroad.

Gen. Palmer, Treasurer of the Kansas Pacific Railroad, and Capt. Colton, arrived at Santa Fe on the 16th ult., and were received by the Territorial authorities. The surveying parties were examining three routes from Fort Union to the Rio Grande. At Albergurque and Fort Craig the country was favorable for the construction of a railroad. Gen. Palmer found extensive deposits of anthracite coal, large beds of iron ore, and an abundance of timber for cross-ties, near the proposed line of the road.

☞ The Central Pacific Railroad Company of California are preparing for winter, by roofing in the most exposed portions of their track. Large quantities of freight are now crossing the mountains.

☞ An Oregon and California Stage Company has been organized at San Francisco, with a capital of $170,000. They will transport mails and passengers from Sacramento to Portland—a distance of 700 miles.

Journal of Railroad Law.

RIDING ON PLATFORM NOT NECESSARILY PROOF OF NEGLIGENCE—OVERCROWDING CARS.

We present this week the case of Sheridan *vs.* The Brooklyn and Newtown R.R. Co., just decided by the Court of Appeals, in which the court were of opinion that it was negligence on the part of the company to so overcrowd their car as to compel a passenger to stand on the front platform, from which he was thrown and injured.

The action was brought by the administrator of a boy nine years of age against the defendants, a company running a horse railroad in Brooklyn, for causing the death of the boy by the negligence and misconduct of the defendants. On the 15th of September, 1864, the deceased having paid his fare was seated with a companion of his own age in the interior of a car of the defendants. The car began to fill up with passengers, and the conductor ordered the boys to get up and make room for adult passengers. They went forward in the car and took other seats, and were again ordered up, and objecting to give up their seats were "put out" of their places by the conductor. The car had by this time become very full "very crowded." The deceased was crowded and pushed by the passengers in the car, out on the front platform, which as well as the inside of the car was full of people. While there, the car being in motion, there was a rush of another passenger to get off, and the deceased was thrown off the car, was run over, and received injuries from which he died. At the close of the evidence the defendants moved for a nonsuit. The court denied the motion, and the defendants excepted.

HUNT, J.—Upon the facts, there was a conflict of evidence, and the jury by their verdict, adopted the view claimed by the plaintiff on the trial, and we are to take the same view on this appeal. It is this view which I have given above. The defendants insist that the motion for a nonsuit should have been granted, urging that there was negligence on the part of the deceased, in occupying a position on the platform, and that the defendants were no more responsible, than if the boy had been shot with a revolver or struck with a club by a fellow passenger. The question of the negligence of the deceased, in remaining upon the platform was submitted to the jury, under the instructions hereafter to be considered.

For the present we are to assume that the deceased was upon the platform, by the express requirements of the defendants, and against his own remonstrances, properly so far as the defendants are concerned. If, by a motion of the car he had been thrown from this dangerous position, or by the continued pressure of the large crowd which the defendants had permitted upon their cars, he had been pushed from his standing place, the defendants would have been liable. It does not alter this liability that the wrong of a third party concurred with their own in producing the injury. It may well be, that the young man was not justified in rushing through the crowd, and in aiding in throwing the deceased from the cars, but this does not relieve the defendant's wrong. If they had not removed the deceased from his seat, and compelled him to stand upon the platform, he would have been unaffected by this illegal act of the young man. It was his violence, concurring with the defendant's illegal conduct in overcrowding their car, and in placing the deceased upon the platform, that produced the disastrous result. It is no justification for the defendants that another party, a stranger, was also in the wrong. Upon the evidence, the jury would also have been justified in finding the defendants guilty of negligence, in that the car was not stopped when the strap was pulled for that purpose On this branch of the case or on the other, there was no conflicting evidence. There was testimony on which the jury might have found that the bell was rung twice, before the young man reached the platform, and that the driver should have stopped the car. It was quite clear that if the car had been stopped, the accident could not have happened to the deceased in its full extent, as it appears that he was run over by the rear trucks, and there received the injury which resulted in his death. On both branches of the case it was the duty of the court to leave the question of negligence to the jury, and there was no error in denying the motion for a nonsuit. At the close of the evidence, the defendants' counsel requested the court to charge the following:

First. That the fact that the deceased was a child, makes no difference in the application in the rule of law as to the question of negligence. If not of years of discretion he should have a protector.

Second. The evidence showing that the deceased was knocked off the car while the car was in motion, and that none of the defendants' servants contributed to the act the plaintiff cannot recover in this action.

Third. That the deceased was in fault in going on the front platform, and that although the defendants may have been guilty of negligence, yet when each party is guilty there can be no recovery.

The court declined to charge otherwise, than is set forth to which the defendants excepted. The second and third of their requests do not require much consideration. Each of them is open to the objection of assuming as matter of fact, what is not such, and what the jury found to be otherwise.

Thus the second proposition, assumes that none of the defendants' servants contributed to the deceased being knocked from the car, and the third assumes that the deceased was in fault in going upon the platform.

The jury having found that it was the very act of the conductor, in placing him upon the platform, that produced the result, and that he was not in fault at being there. If the second proposition was intended to be limited to the immediate act of throwing the deceased from the car, it was not sound in any respect. The defendants cannot claim more seriously that there was error in refusing to charge the proposition first requested, to wit: "That the fact that the deceased was a child makes no difference in the application of the rule of law, as to the question of negligence, if not of years of discretion he should have a protector." The question of negligence, as here set forth, arises upon the conduct of the deceased in taking care of himself, and also upon the conduct of the defendants in regard to the deceased. In the latter view the rule asked for would not have been correct. A sick or aged person, a delicate woman or lame man, or a child, is entitled to

more attention and care from a railroad company, than one in good health and under no disability. They are entitled to more time in which to get on or off the cars, they are entitled to more consideration when crossing a street to the end that the cars shall not run over them. All of these classes are entitled to use the streets and to ride in the cars, and such haste in starting up or such speed in driving as would be reasonable care toward others, might well be carelessness and neglect towards them. The proposition in question also embraces the degree of care necessary to be used by the deceased in taking care of himself. It embraces too much in any aspect, when it requested a charge as matter of law that "if not of years of discretion he should have had a protector." This would be a rule quite too rigid. There was no pretense that this boy was so young as to require a protector. The court did charge, that if the jury were of opinion that the lad was negligent in any way, and his negligence contributed to the injury, the plaintiff could not recover, but if there was no negligence on the part of the boy, and there was on the company, then he could recover. The rule of law was laid down generally, and the deceased, although a lad only, was required to conform to the standard—no exception of discrimination was made in favor of the youth. It was not the province of the court to say, whether what the boy actually did, or omitted, constituted negligence; that was for the jury exclusively. The court could only submit the general question of negligence to the jury, with instructions as to the law applicable to it. No one, whether sick, lame, imbecile, or vigorous and youthful, is bound to exercise all the skill and all the care that the most capable and ready-witted person could command. Ordinary capacity and ordinary care and attention in protecting themselves, is all that the law requires. This each is bound to give whatever his age or condition, and if he fails, he cannot call upon others to supply his dificiencies, or to compensate him for losses arising from its absence. For the general principles that I have laid down, see Ernst against The Hudson River Railroad Company, 35, N. Y. Willis in L. I. R. R. Co., 32 Barb. 398 affirmed in court of Appeals 34, N. Y. Rep. 670. Benigst against New York Central Railroad Company. I think the case was correctly tried, and that the judgment below should be affirmed.

All concur.

Minnesota Lands.

The Commissioner of the General Land Office has received through the local officer at St. Peter two lists of lands selected by the agent of the Minnesota Valley Railroad Company as enuring to the State of Minnesota under the act of Congress approved May 12, 1864, to aid in the construction of said road. The aggregate selections embrace 195,753 acres.

☞ The survey of the railroad from Schenectady to Ogdensburg is completed. It was authorized by the Legislature of 1866, and $15,000 was appropriated to pay the expense. The route selected is said to be much shorter than any heretofore selected from the Hudson to the St. Lawrence. The route commences at Schenectady, runs through Fulton, Hamilton and St. Lawrence Counties.

Huntingdon and Broad Top Mt. Railroad.

The committee appointed by the several classes of bondholders to examine the affairs of this company, have made a report recommending the funding of two coupons of the first mortgage bonds, three coupons of the second mortgage bonds, four coupons of the consolidated mortgage bonds, and four coupons on the mining loan—the certificates covering the amount of detached coupons to be free of tax and to mature as follows: Those arising out of the 1st mortgage bonds, on October 1st, 1870, and those issued to the other loanholders on the 1st of November, 1872. The detached coupons are to be placed in the hands of Trustees, and will be held unimpaired in right until the certificates covering them mature; and, as additional security for the prompt payment of the coupon scrip, thirteen hundred shares of the common and preferred stock of the company are to be in like manner placed in the hands of Trustees, who may at any time exchange the stock on par for the certificates—Judge Ellis Lewis and S. Morris Waln being named as the Trustees. A resolution was passed recommending the adoption of the report. The Investigating Committee report the road in good condition and the trains running with great regularity. A statement was submitted by the Treasurer, showing the number of consolidated bonds deposited by the Trustee in the Fidelity Insurance Company, for the redemption of the 1st and 2d mortgage bonds and coupon scrip, and the disposition made of the remainder, of which the following is a brief synopsis:

Total amount of consolidated mortgage		$1,500,000
Deposited by the Trustee in the Fidelity Insurance Co.'s safe for the redemption of first and second mortgage bonds	$551,000	
Exchanged for 1st and 2d b'ds	216,500	
Exchanged for coupon scrip	92,500	
Out as collateral	217,000	
Stolen	1,000	
		1,078,000
		$422,000

The balance, $422,000, were sold at an average of about 70 per cent., and the proceeds used in the payment for the Bedford Railroad and new road on Six Mile Run, in purchase of machinery for machine shop and road, erection of new engine house, increase of sidings, reduction of floating debt, &c.

☞ The Camden and Burlington County Railroad, between Camden and Mt. Holly, N. J., was opened on the 1st inst. The road between the points named is about 20 miles long, and is intended as a connecting link in a through line between Philadelphia and New York.

☞ The Albany *Journal* says that the contract for grading the Whitehall and Plattsburgh Railroad, from Plattsburgh to the Ausable River, has been made, and the work will commence in a few days. It must be completed by the first of October, 1868.

☞ We learn from Austin that the track layers of the Iowa and Minnesota Division of the Milwaukee and St. Paul Railway, are only seventeen miles apart. It is confidently expected that the connection will be made on the 20th of this month.

New York, Providence and Boston R. R.

At the annual meeting of the stockholders of this company, held at Providence, R. I., on the 24th ult., the following gentlemen were elected directors for the ensuing year:—S. D. Babcock, Henry Morgan, Paul Spofford, Wm. F. Cary, S. Sloan, James B. Johnston, Charles Morgan, of New York; N. F. Dixon, of Waverly, R. I.; John A. Burnham, of Boston. At a subsequent meeting of the directors, Mr. S. D. Babcock was elected President, and Mr. Henry Morgan, Treasurer.

The receipts for the year ending August 31, 1867, were $484,125 88; expenditures, $374,305 24; net earnings, 1867, $109,820 59. Paid dividends, interest on bonds, and expenses extraordinary, $99,462 05; surplus, $10,358 54. The directors have made satisfactory arrangements for the opening of steamboat connection with New York, under the authority granted them by the stockholders and the Legislatures of Rhode Island and Connecticut, they have increased the capital of the company to $2,000,000, and have subscribed for $255,000 of the stock of the Stonington Steamboat Company, which has organized with a capital of $500,000, and which company has purchased two new boats of great strength and sufficient capacity and power to cover the line in such a manner as will command the confidence of the public throughout the year. They are now being fitted up and will probably be ready by the first of December.

Central Pacific Railroad.

The earnings of this road during the month of September were $200,400; and the operating expenses $38,762—leaving as net earnings, in gold, the sum of $161,638. This is upon 94 miles of road only—freight and passengers still being transferred to stages at Cisco. It is expected that the track will be carried to the foot of the mountains, 35 miles further, during the present month, which will bring it fairly into the Salt Lake Basin, and thus add materially to its local traffic.

☞ The Nashville *Banner* says that a gentleman who has just been among the mountains on the line of the proposed Tennessee and Pacific Railway, to connect Nashville and Knoxville, brought back with him iron ore containing ninety per cent. of pure metal, a piece of pure alum, and several particles of black oxide of manganese, which exists in abundance. He declares the entire region of Cumberland County to be rich in coal, iron, lead and alum.

☞ The special correspondent of the Mobile *Times*, writing from Selma, Ala., says: Judge Helfin and others of the Board of Directors of the Selma, Rome and Dalton Railroad, have just returned from the North, where they completed negotiations to finish at once the gap between Blue Mountain and Rome, a distance of sixty miles. The road is well managed, is in excellent condition, and promises to do an immense business.

☞ A meeting, to take place in Leesburg, October 23d, has been called of those favorable to the construction of a branch of the Alexandria, Loudoun and Hampshire Railroad to Georgetown and Washington, and a branch of the same railroad to the southern and southwestern part of Loudoun County.

☞ Messrs. Bowen & Fox, 13 Merchants' Exchange, Philadelphia, issue monthly a Circular giving the fluctuations in the Philadelphia Stock Market during the month. This comprises United States, State and City bonds, Railroad and Canal bonds and stocks, Bank stock, Passenger Railroad stocks, etc., showing the highest and lowest prices, with the date of each and the amount sold.

☞ Engineers are now engaged in running the line for the extension of the Catasauqua and Fogelsville Railroad to Topton, on the East Pennsylvania road. The work, we understand, is to be put under way this fall.

☞ The St. John *Telegraph* says that contracts have been concluded for the construction of the whole of the eighty-eight miles of the International Railway between St. John and the Maine boundary.

NOTICE TO CONTRACTORS,

PROPOSALS will be received until Nov. 1st, for the Grading, Masonry, Bridging and Iron of the Wallkill Valley Railroad, from Montgomery to Newpaltz, about 20 miles, or so much thereof as may be deemed expedient. Maps, plans and specifications will be ready for inpection on the 15th of Oct., at the office of the Chief Engineer, Levi Bruyn, Shawangunk Village, Ulster Co., N. Y.

All other information needed will be furnished at my office.

Dated Bruynswick, N. Y., Oct. 2d, 1867.

AUCTION SALE.

3 LOCOMOTIVES,

4-81-2 GAUGE,

At Monument Foundry, Baltimore, Md.,

Thursday 12 M., Oct. 17, 1867.

No. 1 Engine and Tender complete. Cylinders 15x20. Link Motion. 4-56 in. Drivers connected. Copper Flues. Weight about 23 tons. Tender 8 wheeled. Capacity, 1800 gallons.

No. 2. Engine and Tender complete. Cylinders 15x20, Hook Motion. 4-66 in. Drivers connected. Copper Flues. Weight about 24 tons. Tender, 8 wheeled.

Both the above, thoroughly REBUILT by one of the best makers, and ready for immediate use.

No. 3. Without Tender, as it stands without repairs. Cylinders 18x22. 8-41 in. Drivers connected. Weight about 33 tons.

These Engines or any of them are offered at PRIVATE SALE at low figures, subject to inspection, any time prior to date above mentioned, on which day, unless so disposed of, they will be POSITIVELY SOLD AT AUCTION to the highest bidder, on account of whom it may concern.

For further particulars, address

KASSON & CO.,
62 Broadway, New York.

FIRST MORTGAGE BONDS.

ST. LOUIS AND IRON MOUNTAIN

RAILROAD COMPANY.

Seven Per Cent. Interest, Payable February and August.

These Bonds cover a Road of 91 miles, finished from St. Louis to Pilot Knob, and in first-class order, and an extension of about the same length from Pilot Knob to Belmont, now rapidly constructing, for which the proceeds of these bonds are to be used, making a through route from Saint Louis to New Orleans by rail.

The earnings of the 91 miles are $600,000 a year; the net profits now are sufficient to pay the interest on the entire amount of bonds, were they all issued.

The basis of security is believed to be beyond that of any other bonds now offered.

IRON MANUFACTURE

OF GREAT BRITAIN.

Theoretically and Practically Considered, Including Descriptive Details of the Ores, Fuels, and Fluxes employed, the Preliminary Operation of Calcination, the Blast, Refining, the Puddling Furnaces, Engines, and Machinery, and the various Processes in Union, etc., etc. By W. TRURAN. Second Edition. Revised from the Manuscripts of the late Mr. Truran, by J. ARTHUR PHILLIPS, Author of "A Manual of Metallurgy," and WM. H. DORMAN, C. E. 1 vol., large 8vo. Illustrated with 84 Plates. Price, $10 00.

Mr. Truran's work is really the only one deserving the name of a treatise upon and text-book of the Iron Manufacture of the kingdom. It gives a most comprehensive and minute exposition of present practice, if the term may be applied to iron manufacture as distinguished from strictly professional subjects. The author does not go out of his way to theorize upon how iron should be or may be made, but he describes how it is made in all the iron districts of the kingdom.—*Engineer.* 4t37

ACROSS THE SIERRA NEVADAS.

THE

CENTRAL PACIFIC RAILROAD,

THE WESTERN HALF OF THE

GREAT NATIONAL TRUNK LINE

Across the Continent,

Being constructed WITH THE AID AND SUPERVISION OF THE UNITED STATES GOVERNMENT, is destined to be one of the most important lines of communication in the world; as it is the *sole link between the Pacific Coast and the Great Interior Basin*, over which the immense Overland travel must pass, and the

Principal Portion of the Main Stem Line between the two Oceans.

Its line extends from Sacramento, on the tidal waters of the Pacific, eastward across the richest and most populous parts of California, Nevada and Utah, contiguous to all the great Mining Regions of the Far West, and will meet and connect with the roads now building east of the Rocky Mountains. About **100** miles are now built, equipped and in running operation to the summit of the Sierra Nevada. Within a few days **35** miles, now graded, will be added, and the track carried entirely across the mountains to a point in the Great Salt Lake Valley, whence further progress will be easy and rapid. Iron, materials and equipment are ready at hand for **300** miles of road, and **10,000** men are employed in the construction.

The local business upon the completed portion surpasses all previous estimate. The figures for the quarter ending August 31 are as follows in GOLD:

GROSS EARNINGS,	OPERATING EXPENSES,	NET EARNINGS,
$487,579 64	**$86,543 47**	**$401,031 17**

or at the rate of two millions per annum, of which more than three-fourths are net profit on less than 100 miles worked This is upon the actual, legitimate traffic of the road, with its terminus in the mountains, and with only the normal ratio of government transportation, and is exclusive of the materials carried for the further extension of the road.

The Company's interest liabilities during the same period were less than $125,000.

Add to this an ever-expanding through traffic and the proportions of the future business become immense.

The Company are authorized to continue their line eastward until it shall meet and connect with the roads now building east of the Rocky Mountain ranges. Assuming that they will build and control half the entire distance between San Francisco and the Missouri River, as now seems probable, the United States will have invested in the completion of **865** miles **$28,592,000**, or at the average rate of **$35,000** per mile—not including an absolute grant of **10,000,000** acres of the Public lands. By becoming a joint investor in the magnificent enterprise, and by waiving its first lien in favor of the First Mortgage Bondholders, THE GENERAL GOVERNMENT, IN EFFECT, INVITES THE CO-OPERATION OF PRIVATE CAPITALISTS, and has carefully guarded their interests against all ordinary contingencies.

The Company offer for sale, through us, their

First Mortgage Thirty-Year Six Per Cent. Coupon Bonds,

Principal and Interest Payable in Gold Coin,

in New York City. They are in sums of $1,000 each, with semi-annual gold coupons attached, and are selling for the present at **95** per cent. and accrued interest from July 1st added, in currency, at which rate they yield nearly

Nine Per Cent. upon the Investment.

These Bonds, authorized by act of Congress, are issued only as the work progresses, and to the same amount only as the Bonds granted by the Government; and represent in all cases the *first lien* upon a completed, equipped and productive railroad, in which have been invested Government subsidies, Stock subscriptions, donations, surplus earnings, etc., and which is worth more than three times the amount of First Mortgage Bonds which can be issued upon it.

The Central Pacific First Mortgage Bonds have all the assurances, sanctions and guaranties of the Pacific Railroad Act of Congress, and have in addition several noticeable advantages over all other classes of railroad bonds.

First—They are the superior claim upon altogether the most vital and valuable portion of the through line.

Second—Beside the fullest benefit of the government subsidy, (which is a subordinate lien,) the road receives the benefit of large donations from California.

Third—Fully half the whole cost of grading 800 miles eastward of San Francisco is concentrated upon the 150 miles now about completed.

Fourth—A local business already yielding three-fold the annual interest liabilities, with advantageous rates payable in coin.

Fifth—The principal as well as the interest of its Bonds being payable in coin, upon a legally binding agreement.

Having carefully investigated the resources and prospects of the Road, and the management of the Company's affairs, we cordially recommend these Bonds to Trustees, Executors, Institutions and others as an eminently *sound, reliable and remunerative form of permanent investment.*

CONVERSIONS OF GOVERNMENT SECURITIES INTO CENTRAL PACIFIC FIRST MORTGAGE BONDS,

THE ELNATHAN SAMPSON

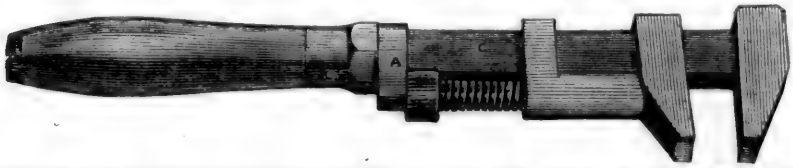
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

TO IRON FOUNDERS.

BY USING THE WASTE HEAT FROM A CUpola Furnace, connected with a Harrison Boiler, a saving of the entire cost of fuel for the blast can be guaranteed.

As thus applied, it may be seen daily in operation from 2 to 5 o'clock, p. m., at the Harrison Boiler Works, Gray's Ferry Road, Philadelphia, Pa.

Renewals of Permanent Way.

A series of tabular statements, founded on an analysis of the half-yearly accounts of some of our principal railways, has just been prepared by Mr. Price Williams, and printed in *Engineering*. They show in a concise form the cost per mile of each particular item usually included under the head of permanent way, works, stations, &c., and complete a long series of calculations to the same effect which formed the subject of an able paper read by Mr. Williams at a meeting of the Institution of Civil Engineers a short time since. We have not space to give the whole of the data upon which the conclusions of the writer are based; but it appears to be tolerably clear that railway proprietors must be prepared to meet in future a very considerable increase of expenditure under these heads, especially so, as the closing of capital account must render it more difficult to place to capital account that proportion of charges for maintenance which it has hitherto borne on every railway in the country.

We learn from the tables to which we have referred that the total separate and collective expenditure in renewals of way, in the short space of twenty years, has been no less a sum than six and a half millions. This sum has been swallowed up in reconstructing at least 4,693 single miles of the worn-out portions of nine railways, a length equivalent to fully one-third of the existing double mileage maintained by these railways, and requiring in its reconstruction something like 560,000 tons of iron rails and 280,000 tons of chairs. Towards this large amount the London and North Western alone contributes a third, and the 2,152,000 it has expended represents about 1,500 miles of single line entirely renewed.

The North-Eastern, with an almost equal mileage and a considerably larger annual tonnage than the London and North-Western, follows next with its 950,000; the Midland, with a much smaller mileage, next contributing the same amount very nearly; while the Lancashire and Yorkshire, with only a third of the mileage of the North-Eastern, with its quota of £900,740 exactly, makes a good fourth. The Great Northern and South Eastern appear next for nearly half a million each, followed, at a great distance in point of amount, by the London and South Western, with its long mileage of 554¼ miles, and the mysterious-looking figures, £333.111, or very nearly a third of a million. The balance is accounted for by the amounts for renewals on the London and Brighton and Manchester and Sheffield railways.

If (says Mr. Williams) we suppose the cost of renewals in future years to amount at least to the average of the last twenty years (and we think we could readily show that not only it will do so, but most certainly very considerably exceed this average), it follows that the London and North Western will annually have to provide for renewing something like 79 miles of single line, at an average expenditure of £110,000, which expenditure, if it could be in any way dispensed with, would be quite sufficient to pay a dividend of nearly a half per cent. per annum on its immense ordinary share capital of £29,820,604. The North Eastern, unparalleled as it is among our railways for the economical administration of its permanent way, would have to provide an annual amount of £61,292, which, if applied in the same way, would enrich the ordinary share dividends to the extent of between ¼ to ½ per cent. per annum. The Midland, to renew its 35 miles annually, will have to provide an annual sum of £48,885, just sufficient to pay ½ per cent. per annum on its ordinary £10,24 ,012 consolidated stock. While the Great Northern ordinary shareholders ought to be very contented indeed if, during the next eight years, they are not called upon to contribute more than is just sufficient to relay the average 32.21 miles of single line, which figures in the table at the estimated expenditure of £45,088 annually, which, modest as the amount is, just represents ¾ per cent. annually on the whole amount of its ordinary A and B stock of £6,517,265. Altogether, the aggregate renewals on these nine principal railways will, looking merely to the experience of the past, require an expenditure of nearly £400,000 per annum in renewing about 300 miles of railway, a length of line which would reach continuously from London to Newcastle, entirely broken up, removed, and reconstructed in the course of a single year.

The mileage annually renewed on the 12,600 miles we now have in this country may be safely estimated at twice what we have here given for the nine railways; taking it therefore at 600 miles (which would make the average life of a rail a little over 30 years), this would necessitate an annual expenditure of £840,000 in laying down about 72,000 tons of new rails and 36,000 tons of chairs. These facts are of grave significance, and ought not to be lost sight of in estimating the future of the railways of this country.—*London Railway News, Sept. 7.*

Frederick & Pennsylvania State Line R. R.

We are indebted to JOSEPH S. GITT, Esq., Civil Engineer, Baltimore, for a copy of his report on the surveys of this proposed road. From this we learn that the entire length of the road from Frederick city, Md., to Littlestown, Pa., is about 30 miles—the aggregate cost of which, independent of right of way, will be $604,752, or something over $20,000 per mile. This road will connect with the Littlestown Railroad at Littlestown, and thence to Hanover, 7 miles, and over the Hanover Branch Railroad, 13 miles, to its junction with the Northern Central Railway, 46 miles north of Baltimore and 11 miles south of York.

It is stated that the ultimate design of the roads interested in the construction of the Frederick and Pennsylvania Line Railroad is to build a road from a point on the Hanover Branch road, some 8 miles west of its present junction with the Northern Central Railway, direct to York, and thus shorten the distance some 7 or 8 miles. At York it will connect with and cross the Northern Central Railway, and take the York and Wrightsville Railroad to the latter place, where it will cross the Susquehanna, either on the bridge about being erected by the Pennsylvania Railroad Company or higher up the river by a seperate bridge. At Columbia it will connect with the Columbia and Reading Railroad, and with all roads North, East and West. The distance from Frederick city to Reading, Pa., by these connections is 113 miles.

The great advantages claimed by the engineer for this road are the facilities it will afford for the conveyance of the anthracite coal and lumber of

Pennsylvania to Western Maryland and the South at a much less distance than *via* the present routes. The distance from Hanover Junction to Frederick, by the Frederick and Pennsylvania Line Railroad, is 59 miles less than from the junction *via* Baltimore to Frederick. The bituminous coal from the Cumberland mines in Maryland, which is known to be superior to the Broad Top coal for generating steam, would be transported over this road, thus affording mutual advantages to those sections of country. The iron ore along the line traversed by the road is abundant, of the most superior quality for the manufacture of iron without the agency of other ores to neutralize it. This fact the engineer thinks is important to the iron manufacturers of Pennsylvania and elsewhere. The report is elaborate, and contains much valuable information. The grades at no point on the road will exceed sixty feet to the mile.

Terre Haute and Indianapolis Railroad.

The earnings of this road for the years ending November 30, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$563,800 87	$462,865 09
" U. S. troops	80,578 34	21,707 45
" freight	502,613 08	854,672 39
" coal	62,061 12	61,078 91
" mail, exps. etc.	39,672 57	49,396 44
	$1,248,725 88	$1,049,720 28
Expenses, viz:		
Running road	$146,046 64	$162,927 05
Road repairs	197,904 36	166,908 53
Machine shops	149,057 37	149,083 35
General expenses	122,648 59	137,196 73
U. S. taxes	34,398 13	22,893 76
	$650,055 09	$639,099 42
Net earnings	$598,670 79	$410,620 86
Additional expendit'res	260,977 14	113,494 28
Balance	$337,693 65	$297,126 58

Compared with 1865 the gross earnings of 1866 show a decrease of $199,005 60; with a decrease in expenses of $10,955 67—making a decrease in net earnings of $188,049 93. The report says:

The gross receipts for the year were $1,083,-694 80; and the total expenditures for working the road, and improvements were $752,593 70. The gross income has been less by $190,899 25 than it was the previous year; yet we are gratified in the fact that the decrease is very much less than was estimated one year ago. This decrease is in part owing to the almost entire failure of the wheat crop for the past two years in our section of the country, and the termination of military transportation since the closing of the war.

The general business of the road has been satisfactory, while the local business as a whole, is developing and increasing constantly, particularly the traffic in coal. New shafts, and mines are continually being opened on the line of the road, and a large trade in the article of coal may be relied on. It is found to be of superior quality to any in the country for all iron furnace purposes.

The coal is sought after and transported to distant cities for such uses.

The road bed and track are in good condition.

A new heavy Iron Bridge of Fink's Patent has been erected over White River 428 feet long, to take the place of a Howe wooden structure erected at first, at a cost of about forty thousand dollars. This makes seven iron bridges in place of the same number of wooden bridges, and leaves only three wooden structures on the road, which have all recently been rebuilt. Besides we have six Iron Plate Girder Bridges, spanning smaller streams and road crossings.

There has also been added to the Union Passenger Depot at Indianapolis an addition, 420 feet long, by near 40 in width, for the accommodation of passengers, and the different offices, at a cost of about seventy thousand dollars. This has been done by the five railroads, equal owners in the tracks and property.

The gross receipts from transportation were		$1,049,720 28
From other sources		33,974 52
Total		$1,083,694 80
Operating expenses	$616,115 66

Surplus		$83,755 87
U. S. tax on surplus		4,187 80
Net surplus		$79,568 07

The capital stock was increased during the year $55,000 by the surrender of bonds to that amount, due March 1, 1866, which were paid and converted into stock in the name of the company, making the capital stock November 30, 1866, $1,-983,150. This, together with the bonds then outstanding, $5,000 is represented by the cost of the road, ($1,988,150,) as shown in the annexed balance sheet.

The road is 73 miles in length, extending from Terre Haute to Indianapolis. The following statement will show the cost, capital, gross and net earnings, and dividends since commencement of operations in the spring of 1852.

	Capital stock.	Cost of road.	Gross earn'gs.	Net earn'gs.	Divi-d'ds.
	$	$	$	$	p. c.
1852.	632,387	1,324,898	105,944	71,446	4

Superintendent.—J. D. Herkimer.

The Port Royal Railroad.

A meeting of the stockholders of the Port Royal Railroad was to have been held at Augusta, Ga., on the 7th inst. This road forms a junction with the Charleston and Savannah Railroad at a point two miles south of the Saltkahatchie River, about 53 miles from Charleston. By an air line, it gradually leaves the Saltkahatchie and inclines towards the Coosawhatchie, the head waters of which stream it crosses at Allendale in Barnwell district. It then deflects towards the Savannah River, reaching its north bank at a point where one of the streams which form the Lower Three Runs enters the river. From this point to Augusta is less than 40 miles. From the Runs, in Barnwell, to the junction near Saltkahatchie, is about 43 miles. The whole of this is graded with the exception of a few miles near the junction, and a comparatively small amount of money would suffice to put it in operation between those points. From the Lower Three Runs in Barnwell to Millen, on the Central Railroad of Georgia, is about 32 miles. From Pocotaligo to Millen is estimated at 60 miles. By the route proposed the same points may be reached at 70 miles, with the advantage on the side of the longer route of passing through a country much more fertile, and having nearly 40 miles of road bed already graded. The distance from Charleston to Savannah would be 102 miles, to Millen 130 miles, and

to Augusta 135 miles. The late Wm. Gregg thought this enterprise so important to both Charleston and Augusta, that he was of the opinion that the whole amount necessary to construct the road could be raised in those cities.

North Eastern (S. C.) Railroad.

This road is 102 miles in length, extending from Charleston to Florence. At Charleston it connects with the South Carolina and Charleston and Savannah Railroads; and at Florence with the Wilmington and Manchester and Cheraw and Darlington Railroads. The gross earnings of this road for the year ending February 28, 1867, were as follows:

From passengers	$120,018 40
" freight	177,629 28
" express	12,355 75
" mails	7,771 92
	$317,775 35

And the expenses were:

Maintenance of road	$83,861 57	
" motive power	66,012 72	
" cars	45,379 50	
Conducting transportation	39,069 65	
General expenses	16,764 60	
		251,088 04
Earnings less expenses		$66,687 31
Interest		10,780 59
Balance		$55,906 72
Add net proceeds of transportation in 1865–'66 (8 months)		63,989 75
Sales of iron, material, etc.		94,278 56
Total		$214,175 03
Expended in reconstruction in 1865–'66	$119,166 12	
Do. in 1866–'67	86,548 64	
		205,714 64
Leaving a balance of		$8,460 27

—which balance will be further diminished by work in progress and approaching completion at the end of the year. The President, in his report, says:

The current expenses have been swelled by many items which, had it been practicable to have separated them with accuracy, would properly have been chargeable to reconstruction; and also by the unavoidable expense attending the transaction of our business under circumstances, through much of the year, which were adverse to its economical management. We are confident, however, that they can be materially reduced the coming year.

At your last meeting, you were advised that the Board of Directors were considering some process for settling the interest of the company, then due and unpaid. It was finally determined to issue certificates of indebtedness for the same, and also that to accrue, during the year 1866, to an extent not exceeding $250,000 payable 1st January, 1875, bearing 7 per cent. interest, payable semi-annually. No other alternative remained to them, and it is, substantially, the same, as has been adopted by other roads and corporations, under similar circumstances. While the strongest monied institutions of the country had been swept away by the war, these had survived, though in a wrecked and crippled condition, and time was absolutely essential to their recuperation from its calamitous results. The equity, and necessity of the above mode of settlement, or compromise, have been so generally admitted, that we trust, it will, eventually, prove sufficient for the purpose in view. The whole amount to be funded was $233,249 50, of which $5,163 27 was retired in settlement of freights, $52,818 50, closed by certificates of indebtedness, leaving $175,267 73 still to be funded. In the readjustment of the company's accounts on the 1st of June, 1865, in order to show its actual condition at the close of the war, so much of this interest as had then accrued ($125,118 85) was represented as among our liabilities, and therefore considered as forming a part of the cost of the road on that date $2,040,000. That which has since become due ($108,130 65,) was charged to the same account, making this cost $2,148,130 65. All interest maturing since 1867, has been paid as applied for.

The amount of interest for which the company will be annually responsible, assuming that which is outstanding to be funded is, $87,500. Now, if the road can be operated for about $175,000, making its total expenditures $262,500, and its receipts can be maintained even at their present level of $317,500, a surplus of $55,000 will appear, which can be appropriated to the extinguishment of the company's certificates of indebtedness, or to such purposes, as those then in the direction of your affairs shall submit to you. As soon as the circumstances of the company will permit, some provision should be made for the payment of these certificates at their maturity.

The road, generally, is in excellent condition. During the last year, large amounts of timber and cross ties have been placed in the track, all defective rails removed—two permanent bridges put up at Black River and Lynch's Creek, and all depots, tanks, etc., thoroughly repaired. Our new freight and passenger depots in the city have been completed, and jointly with the Wilmington and Manchester Railroad, a commodious passenger shed has been put up at Florence.

The machinery of the road consists of twelve locomotives, eight of which are in good order, three under or requiring repair, and one to be rebuilt. No additions have been made to this stock since the close of the war. By a judicious system of repair, it has fulfilled the demands of the past season, and we believe can be made to answer those of the next. Our rolling stock consists of sixty-four box and thirty-one platform cars, eight passenger cars, four second class, three baggage, and three mail express cars. It should be remarked, that the whole of this equipment is on a smaller scale than is desirable, especially, as much of it, from its advanced age, is liable to frequent repair, but no additions to it are proposed, until such are warranted by our actual, or prospective necessities.

There have been transported over the road during the year 1866–'67, 21,589 bales cotton, 22,080 bbls. Naval stores, and 1,996,000 feet lumber, against 58,401 bales cotton, and 59,150 bbls. Naval stores in 1859–'60, and 40,281 bales cotton and 59,800 bbls. Naval stores in 1860–'61. In 1865–'66, 14,341 bales cotton and 6,966 bbls. Naval stores were transported.

At the commencement of the fiscal year 1856–'57, 29½ miles of road were in operation, and at its close 48¼—making the average mileage operated within that year about 38¾. The whole road was opened August 5, 1857. The receipts and expenses from commencement to the close of the past fiscal year have been as follows:

	Total Receipts.	Current Expenses.	Net Earnings.
Feb. 28, 1857	$32,344 45	$.....	$.....
" 1858	99,403 55	61,132 01	38,271 54
" 1859	220,013 74	123,868 93	96,144 81
" 1860	277,113 94	154,850 72	122,263 22
" 1861	263,707 85	159,411 46	104,296 39
" 1862	251,550 15	134,347 72	117,202 43
" 1863	439,514 81	141,992 18	297,522 63
" 1864	859,264 61	337,320 92	521,943 69
" 1865	No Report this year.		
" 1866	202,285 54	131,591 49	70,694 05
" 1867	317,775 35	251,088 04	66,687 31

The number of through passengers carried during the past year was 13,739; local do., 39,084. Total number of miles run by locomotives, 154,496. Average cost per mile run, 26.2 cents.

The Assets and Liabilities of the Company, February 28, 1867, were as follows:

ASSETS.

The road with its equipment, property, &c.		$2,148,130 65
Bills receivable	$8,787 50	
Stock in Cheraw and Coal fields R. R., (par value, $25,400)	4,064 00	
Post Office dues	1,295 18	
Cash	14,571 95	
Property	22,359 96	
		51,078 59
Total assets		$2,199,209 24

LIABILITIES.

Capital stock	$898,950 00
First mortgage 7 per cent. bonds	700,000 00
Second mortgage 7 per cent. bonds	145,000 00
Preferred 8 per cent. stock secured by second mortgage 7 per cent. bonds, in the same amount	155,000 00
Bonds given in part payment for real estate	28,000 00
Certificates of indebtedness for interest past due and funded	52,818 50
Bills payable, notes, &c.	27,380 79
Interest outstanding	175,267 73
Open accounts due by company	8,331 95
Balance of earnings	8,460 27
Total liabilities	$2,199,209 24

President.—A. F. Ravenel.

Directors.—Hon. C. Macbeth, Daniel Ravenel, A. MacFarland, L. D. Mowry, J. R. Dukes, D. B. McLaurin.

Superintendent.—S. S. Solomons.

Treasurer.—C. Williman.

Portland and Ogdensburg Railroad.

A Portland correspondent of the Boston *Journal* writing under date of October 5, says that this project is progressing. Although the company has not been formally organized, yet the committee of corporators have not been idle. Several meetings have been held, and several propositions for the building, equipment, and general management of the road have been considered. The Committee desire to have everything in connection with a successful opening and raising of stock to be done before organizing. Responsible parties have offered to build the whole road from the Portland and Rochester road (either from Sacarappa, or Saco River,) to the Connecticut River, (either to Littleton or Dalton, N. H.,) agreeably to Mr. D. C. Lindsley's first estimates last spring, from $25,000 to $30,000 per mile, White Mountain Notch included. The engineers appointed by the corporators, John F. Anderson and C. J. Noyes have submitted their first report, and are now consulting with Mr. Lindsley as to certain points which will be decided upon in a few days. The grade through the notch will be fixed to the satisfaction of all who are disposed to doubt its feasibility, and the success of the enterprise is confidently asserted by those who have it in charge. The public meeting will take place in about three weeks.

☞ The Middleburg *Post* says that the contractors, McGovern and McMinnis, have commenced and are vigorously pushing forward the work on the Middle Creek Railroad about one-fourth of a mile above Beavertown. Work has also commenced between Middleburg and Selinsgrove at several points, and will soon be in progress along the whole line.

Toledo, Wabash and Western Railway.

At the annual meeting of the stockholders of this company held at Toledo on the 2d inst., the following gentlemen were unanimously elected directors for the ensuing year: Azariah Boody, Le Roy M. Wiley, Wm. A. White, Isaac H. Knox, Abraham B. Bayles, William Kidd, James R. Jesup, Wm. J. Schenck, Theron R. Butler, New York; George Cecil, Logansport; James Spears, Lafayette; James Dunlap, Jacksonville; Warren Colburn, J. N. Drummond, Toledo; E. A. Chapin, Springfield. The Toledo *Commercial* says:

The reports and exhibits of accounts presented to the meeting, showing the condition of the finances of the company, and also a history of the operations of the road in its several departments for the past year, were regarded by the stockholders as being highly favorable and indicative of marked success and prosperity. From these exhibits it appears that the company have not only promptly discharged all its current monthly operating expenses as they have matured, but with like promptness, have met large and important outlays for extraordinary renewals and construction work; also the entire interest upon each and every class of its funded obligations, and still continues in a strong financial condition, and without any floating debt or outstanding liability whatever.

Notwithstanding the fact that the country immediately tributary to the line of the road has suffered very severely throughout the past year from failure of crops and other unusually depressing causes; yet, despite these untoward circumstances, the stockholders have the gratification of finding that the business and revenues of the road have been constantly and steadily increasing over that of any preceding year, from which fact they feel fully assured that with an ordinary harvest and the removal of those embarrassments which cannot operate otherwise than temporarily, the prosperity and remunerative success of the road will be established beyond peradventure.

After the adjournment of the meeting the new board met and elected the following officers: Azariah Boody, President; Warren Colburn, Vice President; J. N. Drummond, Secretary and Treasurer; E. A. Chapin, General Superintendent.

New Railroad in Georgia.

A meeting is to be held in Dublin, Laurens Co., Ga., on the 15th inst., to see if a road can be run through Emanuel and Laurens Counties, to some other point beyond, say Fort Valley, in Houston Co., or Americus, in Sumter Co., as may best suit the convenience of the parties interested. The following synopsis of the programme is from a communication in the Savannah *Republican:*

"We are taking stock in timber at one dollar per acre, also allowing parties to subscribe small amounts of stock payable in work or material. We find no difficulty in getting the citizens to subscribe one-half the timber on his land (and in many cases more,) one dollar per acre. This timber, as soon as the road starts, will increase in value as the road progresses, on the enhanced value of which we hope to be able to build the road, the assets arising from one-half the timber on four miles each side of the road will give us the control of millions of feet that by judicious management can be thrown on the European market at an early day; and will certainly have a net margin of value."

Tomah and St. Croix Railroad.

The Jackson County *Banner* says that the work on this road is rapidly progressing, with a large force of men, and that the main part of the grading between Black River Falls and Tomah will be completed this fall.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of September, were:

ENTERED FOR CONSUMPTION.

	1866.	1867.
Manufactures of wool	$2,952,134	$2,287,098
" cotton	770,189	676,186

Total entered at the port.	$104,488,338	$73,391,102

Wicomico and Pocomoke Railroad.

The Worcester *Shield* says that work is progressing rapidly upon this road between Salisbury and Berlin, and that the whole 26 miles will be completed by Christmas. Five or six miles of the road are already laid with the rails, and the whole is perfectly graded. Mr. Sewall, the road engineer, has located all the depots, and nothing remains now but to push right on with the laying down of the track and the building of the bridges, which are of no great magnitude. Dr. H. R. Pitts is president of the company.

Dubuque and Sioux City Railroad.

The negotiations which have been for some time pending between this company and the Illinois Central Railroad Company have been concluded by a lease of the Dubuque and Sioux City to the Illinois Central for a period of twenty years. The company entered into possession on the 1st inst., and in future will control and operate it. The Illinois Central Company take the line agreeing to maintain it, provide the rolling stock, and pay over monthly to the D. & S. C. Railroad Company, 35 per cent. of the gross earnings for the first ten years, and 36 per cent. for the second ten years, free from all taxes or assessments. The Illinois Central also assumes the lease made by the D. and S. C. Railroad Company, of the Cedar Falls and Minnesota Railroad, running north from Waterloo. The Dubuque *Herald* says:

The causes which have led to this change may all be combined in one, and summed up in want of capital. The stockholders and officers, for the most part, were exceedingly anxious to extend the road to provide better facilities for the carrying of freight, and effect the quicker transit of passengers. They had built and put in operation one hundred and fifty-nine miles of road under many disadvantages. Their capital as well as their credit was employed to such an extent that a rapid extension was impossible. The traffic which was rapidly springing up on either side and beyond was in danger of being diverted. The Illinois Central, with its vast machinery and unlimited capital, proffered assistance. It has been accepted, and in such a spirit that the public are justified in expecting to derive advantages from the change. The capital of the Dubuque and Sioux City, thus released from operating and repairing a long line of road, is pledged to an immediate and active construction of the road west and north until the objective point of each line shall be reached. As fast as constructed, the Illinois Central will equip and include in their lease.

At the date of the contract, the Dubuque and Sioux City Company had funds to pay its floating debt and make a five per cent dividend to the preferred shareholders.

Portland and Rochester Railroad.

The annual meeting of this company was held in Portland on the 2d inst. The President, M. L. Woodbury, Esq., submitted the annual report, which shows a large increase in the business over last year and the prospects for the ensuing year to be highly favorable. The grading to Alfred from Saco River, a distance of 14 miles, is proceeding rapidly and cars are expected to be running to Alfred, a distance of 32 miles from Portland, by December. The old Board of Directors was unanimously re-elected. The project for an union of this road with the Portland and Kennebec Railroad, either by a purchase of its shares, lease or consolidation, is now under consideration by the directors of both roads, a majority of whom are said to be in favor of the idea. The extension of the Portland and Rochester road to Rochester, and the building of the road from Alton Bay, N. H., to Lake Village, on the Boston, Concord and Montreal Railroad, are regarded as sure, and the Portland and Kennebec Company are desirous of securing through these a New York and Western connection; hence the proposed union.

Corrugated Sheet Iron.

The Commissioner of Internal Revenue has decided that corrugated sheet-iron is not taxable as a manufacture, under section ninety-six, if the value is not increased by corrugation more than five per cent.; neither can corrugated domestic sheet iron be taxed on its increased value, under section ninety-five, for there is no excise tax upon sheet iron, and it is only upon the increased value of manufactured articles, goods, wares or merchandise, on which an excise or impost duty has been paid, and which are not specially provided for, that the tax is imposed. Furnaces finished and ready to be put up, are taxable under the general provisions of section ninety-six, at the rate of five per cent. upon their entire value, but the actual expense in setting them up for use forms no part of their real value.

Union Pacific Railway.

The following gentlemen have been elected directors of this company for the ensuing year: T. C. Durant, New York; C. S. Bushnell, Connecticut; John J. Cisco, New York; H. S. McComb, Delaware; Oliver Ames, Massachusetts; John Duff, Massachusetts; Josiah Bardwell, Massachusetts; Sidney Dillon, New York; William H. Macy, New York; John F. Tracy, Illinois; E. Cook, Iowa; John B. Alley, Massachusetts; Wm. F. Gliddon, Massachusetts; F. Gordon Dexter, Massachusetts; Benjamin E. Bates, Massachusetts. The remaining five directors on the part of the Government, are appointed by the President of the United States.

Northumberland and Mufflinburg R. R.

We understand that a project is now on foot in Union Co., Penn., for the construction of a railroad from Northumberland to Mifflinburg, a distance of sixteen miles. The citizens of Bellefonte, Penns Valley, and all between Mifflinburg and Bellefonte, are interested in this enterprise. The people of Mifflinburg, New Berlin and Winfield—three enterprising villages on the line of the road—have undertaken to construct the road themselves, under the present free railroad law, if no better one is enacted next winter.

Lehigh and Susquehanna Railroad.

The early completion of this road to Easton is a foregone conclusion, and the opening of the year, if not before, will give us parallel lines of railroad to the mouth of the Lehigh. At different points on the line the track has been laid for some distance, and as fast as the rails arrive from England they are shipped to different points and laid down. The difficulty heretofore has been the want of rails, the contractor not being able to furnish them as early and rapidly as the advanced condition of the road demanded. A large number have been reshipped from canal boats to cars for use at this end of the line. When completed, we venture to say, there is not a single track railroad in the country which can boast of more compact and complete construction, than can the Lehigh and Susquehanna; no pains, labor or expense have been spared to bring about this important result.—*Carbon Democrat.*

☞ Since the middle of August an important improvement has been effected on the Fredericksburg route (*via* Washington and Aquia Creek). A tunnel has been made through the hill at Richmond, and in place of the former transfer through the city to the depot of the Richmond and Petersburg Railroad, the cars now run through without change, from Aquia Creek to Weldon.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to 30th Sept., inclusive, during the years 1866 and 1867, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1866	120,100	2,261,300	20,180,900	342,600
1867	115,000	1,720,800	11,362,800	150,300
Dec.	5,100	540,300	8,876,600	189,800

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease of 113,200 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of Sept., in the years indicated:

	1865.	1866.	1867.
Canal opened—	May 1.	May 1.	May 6.
Flour, bbls.	37,600	120,100	115,000
Wheat, bushels	230,700	2,261,300	1,720,000
Corn, bushels	1,166,000	20,180,000	11,301,300
Barley, bushels	238,000	342,300	153,300
Oats, bushels	519,500	6,043,800	3,586,700
Rye, bushels	28,000	670,800	255,900
Malt, bushels	11,400	333,100	269,200
Beef, bbls.	7,190	100	.....
Pork, bbls.	14,850	11	782
Bacon, lbs.	1,273,100	.....	34,400
Butter, lbs	107,700	47,300	49,500
Lard, lbs.	1,934,100	58,900	627,000
Cheese, lbs	6,557,100	1,482,900	462,600
Wool, lbs.	426,400	403,200	260,000

Boston, Hartford and Erie Railroad.

The newly elected board of directors of the Erie Railway Co. have already voted to guarantee the construction bonds of the Boston, Hartford and Erie Company to the extent of $4,000,000, which secures to the latter company a loan from the State of Massachusetts to the extent of $3,000,000. The State of Massachusetts gets as collateral for its loan $3,750,000 of the bonds of the Boston, Hartford and Erie Co., and the Erie Railway Company is, we are informed, as thoroughly protected as the State of Massachusetts for what it does. The Boston, Hartford and Erie Co., has now to build a little over 100 miles of road, between Hartford and Fishkill on the Hudson, when a broad gauge will be in operation from Boston to St. Louis.

The Connecting Railroad.

The Pennsylvania Railroad Company, in connection with the Camden and Amboy Railroad Co., have completed their new road around the city of Philadelphia, commencing at the present terminus of the Pennsylvania road in West Philadelphia. In future, through trains will run direct between Jersey City and Pittsburgh, making only a temporary halt in West Philadelphia. By this arrangement Philadelphia is pretty effectually left out, as no through trains, either from New York city to Pittsburgh, or between New York and Baltimore, now touch at Philadelphia.

Richmond and York River Railroad.

This road has been reconstructed to the White House. At present a boat for Baltimore connects with the train to that place twice a week. The road is being completed to West Point, with a view to its extension to the Rappahannock, where it will be forty miles distant across the bay from the terminus of the Delaware Railroad line, or Annamessic route, as it is called.

Illinois Central Railroad.

The statement of this Company for the month ending September 30, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	10,496.73 for	$108,075 22
Acres Int. Fund Lands sold	816.43 for	10,227 88
Acres Free Lands sold	4,239.66 for	56,123 65
Total sales during month of September, 1867	15,552.82 for	$174,426 75
To which add Town Lot Sales		665 00
Total of all	15,552.82 for	$175,091 75
Cash collected in September		$430,275 25

TRAFFIC DEPARTMENT.

Receipts from Freight		$459,535 00
do. Passengers		160,358 96
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		75,000 00
Total Receipts in September, 1867		$705,252 29
Total Receipts in September, 1866		$551,021 31

Personal.

Messrs. Leland Brothers & Co., (successors to Messrs. Limbert & Leland,) Bankers, 22 Nassau street, N. Y., are dealers in Government Securities, Gold, Exchange, Notes, etc. The firm is composed of F. L. Leland, Member Government Security Board; C. H. Leland, Member Gold Exchange; and Wm. Carpender, Member New York Stock Exchange. They buy and sell stocks and bonds on commission, and allow interest on deposits subject to draft at sight.

The firm of Oddie & Co., the former late of the firm of Oddie, St. George & Co., still continue business at their old stand No. 3 Broad street, this city, as Stock, Bond and Gold Brokers. These gentlemen have been long and favorably known on the street, as prompt, energetic and well-posted business men, with much capital, large experience and an extensive acquaintance.

Union Pacific Railroad.

The acting Secretary of the Interior, on the 1st instant, submitted to the President of the United States, the report of the Government Commissioners on the thirteenth section of thirty miles of the road and the telegraph lines of the Union Pacific Railroad Company, with the recommendation that the section be adopted. On the same day the President approved of the recommendation, and directed the issue to the said company of bonds and patents for lands due on account of the section, agreeably to law. This section completes the road four hundred and fifty miles west from Omaha, Nebraska.

☞ At a meeting of the Cleveland, Painesville and Ashtabula, and the Cleveland and Toledo Railroad Companies, held at Cleveland on the 8th inst., to vote on the question of lease and consolidation, a large vote was polled unanimously in favor of the same by both companies.

☞ Mr. Robert F. Taylor has been appointed Receiver and Manager of the Vermont Central and Vermont and Canada Railroads.

☞ Mr. Joseph H. Dulles has been elected president of the Wyoming Valley Canal Company, vice Robert F. Taylor resigned. Mr. Taylor was elected vice president.

Steel vs. Iron Rails.

Mr. Price Williams, in his estimates of the working expenses of the different lines of the kingdom, calculates the annual mileage relaid on the whole of our railways at 600 miles. This estimate is a very moderate one, for according to one authority it is to be taken at 2,000 miles, and others vary from 1,000 to 1,500 miles.

The late Mr. Robert Stephenson, in his address as President of the Institution of Civil Engineers some years since, estimated the actual *waste* of iron rails from wear and tear, oxidation, and loss in remanufacture, at *half a pound per yard*. This, he proceeds to show, amounted on the then existing mileage to about 20,000 tons of rails annually, equivalent to a length of about 166 miles of single line; while the mileage of single line required to be renewed consequent on this waste of material he estimates, in addition, at ten times this amount, viz., 1,666 miles, or about 200,000 tons of rails.

According to the recently published Board of Trade returns, there were altogether in the United Kingdom on the 31st December, 1865, 7,503 miles of double and 5,786 miles of single line, making a total of 13,289 miles of railway, which, taken altogether as single mileage, amounts to 20,792 miles of line and 41,584 lineal miles of iron rails; half a pound per yard on this (without taking into account the mileage of sidings at stations and termini included by Mr. R. Stephenson, and estimated at fully one third of the whole mileage) just amounts to 16,336 tons of rails, or in other words, to about 136 miles of single line entirely wasted or worn away in the course of a year. Multiplying this by 10, the equivalent renewals consequent on the wasted mileage, and adding the results together, we get in all 1,496 miles or just 1-14th of the whole mileage of single line in the kingdom) as the extent of our annual renewals of way; and giving an average of fourteen years only as the general average life of a rail throughout the railway system of this country—a period which it requires a very little reflection to show to be much too short, even if we take into consideration the large increase which has taken place in the weight and amount of traffic since the time when Mr. Stephenson made his estimate.

We will assume, in the first place, that the wear and tear of the rails laid down on the 13,292 miles of railway in the United Kingdom (including as it does about 2,614 miles of single and lightly worked lines both in Scotland and Ireland) to be proportionate to that on the nine principal English railways; in this way we should get something like 692 miles as the proportionate total annual mileage renewed, and giving about *thirty years* as the average life of a rail throughout the kingdom; this, although—as we shall presently show from a comparison of the average cost of maintenance throughout the system—largely in excess of the actual amount, is still much nearer the mark than the result arrived at by Mr. Stephenson's mode of estimating it. The Board of Trade returns show the total amount of the permanent way charges for the year ending 31st of December, 1865, on the whole of the 13,289 miles of railway, to be exactly £3,140,718, giving only £244 as the average cost per mile per annum; while, on the nine principal railways referred to, it has averaged as much as £280 per mile per annum during a period of twenty years, showing most conclusively, if any evidence indeed were needed to show it, that the traffic, and consequently the wear and tear, on these nine railways, was much larger than on the entire railway mileage in this country.

If, however, omitting the Scottish and Irish railways, we compare the relative cost of maintenance of way, &c., on the railways in England and Wales only, with the average cost given in the tables for these nine railways, we find, as a result, that on a total of 9,251 miles it amounted to £2,564,046, or just to £277 per mile per annum, which very closely tallies with the £280, the average given in Mr. William's tables; and we may therefore safely infer that the relative conditions of traffic, and of wear and tear consequent on it, are very similar, and that, consequently, the extent of the annual renewals are proportionate in both cases, giving as a result somewhere about 482 miles of line, equivalent to 1-30th of the whole mileage, or, in other words, giving this the average life and the average extent of the annual renewals on railways in England and Wales; our estimate therefore of 600 miles per annum as the present average mileage renewed throughout the three kingdoms, will, it is believed, within very narrow limits of error, be found correct.

As a concurrent proof of the accuracy of these deductions, it may be mentioned that the average life of iron rails, found by dividing the original cost of constructing a mile of double line (£2,800) by the average annual cost per mile per annum during a period of years, gives nearly the same result—viz., twenty-seven years.

The average life of iron rails on the most severely worked portions of the Great Northern railway are, we believe, as follows:

Three to five years	5 per cent.
Eight years	50 "
Eight to forty years	45 "

the latter including the comparatively light traffic lines of the Loop, East Lincolnshire, and branch lines. Very much the same proportions obtain, we understand, on the London and North Western Railway system, and we therefore feel we are not far wrong in assuming that at least 5,198 miles of single line (or 25 per cent. of the whole mileage in the kingdom) partakes of this short-lived character of eight years.

The large and varied experience we now possess of the extraordinary enduring powers of the Bessemer steel rail, when subject to the excessive wear and tear which characterise our heavy main line traffic, and at such exceptional situations, such as Camden Town station, Crewe, or the Woodhead Tunnel, where the measure of iron-rail life has hitherto been counted by days instead of years, is such as to fully justify the opinion that where ordinary iron rails now only last eight years, steel rails are certainly calculated to last at least three times that period. Their employment, therefore, on so large a portion of our main lines, becomes a question of no ordinary moment, for while the difference in first cost undoubtedly involves a considerably larger outlay up to a certain period (estimated by Mr. R. Johnson at eight years), still that gentleman's calculations convincingly show that, notwithstanding the relaying of 61 miles of steel annually mounts up a debt of £253,000 in that short time, the saving effected in the following twelve years (the life of a steel rail being estimated at twenty years) is such as not only to wipe off this debt, but actually at the end of that period to leave a balance on the credit side of the account of considerably larger amount, equivalent, in fact, to a saving in the entire period of twenty years of fully 50 per cent.

The great improvement to be effected in the value of railway property generally, by the instrumentality of such a large annual saving in expenditure as will undoubtedly be effected by the more general employment of steel rails (amounting, as we have seen in the case of the nine railways, on an average to at least ½ per cent. on the ordinary share dividend), is well worthy of serious consideration, more especially at a time like the present, when railway interests are suffering from such lamentable depreciation.

We feel certain, however, that the benefit arising from the substitution of steel rails for iron will be found not merely to extend to the direct saving effected in the cost of renewals, but that *the annual cost of maintenance* will be proportionately lessened to the extent of full-one half, as has already been proved to be the case on several railways where steel rails have been extensively laid down; while the improved and more durable condition of the road will indirectly, but with equal certainty, operate in the same way in diminishing the enormous amount of wear and tear to which the engines and rolling stock are at present subject solely through the defective condition of the road.

The scheme proposed by Mr. Williams as the readiest and most practicable means of tiding over the financial difficulties which beset the question at the outset is the establishment of a system of annual payments on the terminable annuity principle, of so slight an amount, however, as scarcely to operate at all to the prejudice of the interests of present shareholders. The plan has certainly the great recommendation of being exceedingly simple in its operation, and seems calculated to answer the purpose very effectively.

The table which we publish below shows the amount of annuity required on each of the different railways to repay the difference of cost between iron and steel rails, in a period of eight years, "recouping" the principal outlay, with interest at 5 per cent., at the end of that time. It is well to remember that this period of eight years represents at once the life of the iron rail, and the period during which, on the Great Northern, for instance, the whole of the excessively worked portions of the main line will have to undergo renewal; £8 also represents about the average cost per ton of iron rails; consequently it follows that from year to year there is practically now actually being paid, on railways where this period of eight years rail-life prevails, a constant annuity of £1 per ton, which, so long as iron rails with that duration continue to be used, will remain a constant annual fixed charge. This £1 per ton on the Great Northern is, on the 61 miles of iron rails, shown by Mr. Johnson to be relaid annually, equivalent to an annuity of £7,200 per annum, sufficient of itself to pay interest at the rate of 15 per cent. for twenty years on the principal outlay required to renew 61 miles of line on that railway, besides recouping the principal at the end of that period. It would also suffice to pay interest at the rate of 5 per cent. per annum, for a period of eight years, on the principal outlay required to relay the same mileage of single line, recouping the principal besides at the end of that period.

SUMMARY, showing annuities (recouping the principal with interest at 5 per cent.) required on the undermentioned railways to repay in eight years the additional outlay caused by the substitution of 75 lb. steel in place of the present iron rails.

	Mileage to be annually renewed.	Difference in cost of renewals with 75 lb. steel rails (£6 10s. per ton). £	Annuity to repay difference in cost between iron & steel rails, recouping principal with interest at 5 per cent. in 8 years. £ dec.

Knox and Lincoln Railroad.

At the meeting of the Knox and Lincoln Railroad Company at Waldoboro', Me., on the 27th ult., it was reported that the subscriptions thus far amount to $375,600. The following gentlemen were chosen Directors: Oliver Moses, Edward Sewall, Bath; Francis Cobb, N. A. Farwell, Rockland; Sam'l Watts, Thomaston; B. B. Haskell, Waldoboro'; Edwin Flye, Newcastle. Oliver Moses, Esq., was subsequently chosen President.

☞ Colonel R. E. Becker, late Superintendent of the locomotive department on the Pennsylvania Railroad, has been elected Superintendent of the Central Railroad of New Jersey, vice Josiah O. Stearns, deceased.

American Railroad Journal.

Saturday, October 13, 1867.

Stock Exchange and Money Market.

The Money Market was unusually brisk and stringent up to Saturday last, when the banks finally wound up the quarterly squeezing process, to enable them to make a strong quarterly exhibit of their business standing to the National Currency Bureau. Street borrowers, in several instances, were obliged to pay as much as 7 per cent. in gold, and a fractional commission, for temporary aid. In a few cases, even an ⅛@¼ per cent. a day was exacted of needy parties. Discount applications ceased to meet with any favor. On Monday, however, the City banks made an unexpectedly favorable weekly return, showing an increase of $862,059 in their legal tender reserve, with a decrease of only $2,961,988 in their deposits, $127,560 in their specie hoard, $121,688 in their circulation, and $3,984 382 in their loan and discount averages. Since this statement appeared, the banks have been more liberal of accommodation, and there has been a partial easing up in the open market, though seven per cent. is still the rule of the street on call loans, and 7@9 per cent. per annum on the best discounts, which are becoming more attractive to lenders. The October debt statement of the Treasury Department favorably influenced the market, as it was regarded as an eminently conservative one. The Western drain of currency has been on a less extensive scale for some days past. There has been some call from the South, for funds to be used chiefly in moving the Cotton crop. The U. S. Sub-Treasury reduced its cash balances materially last week. The balances yesterday were full five millions less than a week ago. The Treasury Department, on the 1st inst., held a cash reserve of $135,112,009, including $103,298,659 in coin, and $31,813,346 in currency. Some two millions of coin were added to the reserve of the Department during the month of September; while the currency reserve was diminished nearly sixteen millions. The specie reserve of the banks is now $9,368,603, against $6,263,698 same time last year. The city bank deposits are now $178,477,422, against $224,484,370 week ending Oct. 6, 1866. The legal tender reserve amounts to $56,853,585, against $85,339,679 same time last year. The circulation now stands at $34,025,581, against $29,302,358 same time last year. The loans are now $247,934,369, against $274,210,161 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $95,031,270 a day, against a daily average of $100,114,785 the preceding week, and $98,690,393 the week ending with Sept. 14. The current week's exchanges average about $105,000,000 a day.

National Bank notes to the amount of $43,340 were issued last week, making the total issue to 1,671 banks thus far, $304,029,311, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,934,645, leaving, with the existing 1,648 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $299,094,666. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,641,900; and for the public deposits, $38,373,950—making a total of $379,015,850. The Treasury Department last week redeemed and destroyed $337,000 of worn and mutilated fractional currency, and issued $578,924 of new.

The Philadelphia Bank movement the past week shows a decrease in loans, of $614,459 a decrease of $14,232 in specie; an increase in legal tenders of $43,610; a decrease of $295,138 in deposits; and a decrease of $2,055 in circulation. The Bank Clearings show an increase of $4,829,472, and the balances, an increase of $1,343,186.

The U. S. Sub-Treasury receipts, week ending with Oct. 5, were $18,197,967, including $2,106,283 from customs duties; payments, $27,433,240; balance at the close of the week, $105,754,210, against $114,989,483, at the close of the preceding week, showing a decrease of $11,235,273. The business of the Office during the first two days of the current week, was as follows: Receipts on

Monday, $3,057,090 including $309,926 from customs; and payments, $3,314,317; on Tuesday, receipts, $4,877,042 including $501,591 from customs, and payments, $2,876,074. The balance at the close of business on Tuesday stood at $107,497,591, against $112,318,000 a week previous.

Government revenues have been on a much more liberal scale, since our last, in the lines of both excise and customs. The excises, last week, yielded $6,571,397, against $2,502,098 the preceding week; customs at the port of New York $2,106,282, and at the outports, about $700,000 (in coin) more, making the grand total income for the week equal about $10,432,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $65,000,000.

Government received $5,544,035 from customs, through the port of San Francisco, from Jan. 1, to Sept. 16, 1867.

The Gold Market was quite strong and buoyant up to the forenoon of Wednesday, when there was an unusual pressure, to put out *short* contracts, in view of the election news from Ohio and Pennsylvania, which was interpreted as a practical extinguishing of all impeachment and confiscation projects. The lowest figures of the week were made on Wednesday afternoon, when the price declined to 143¼@143⅜. Government has sold gold to a moderate extent during the week, in all some three millions of dollars, as reported in the street. The export call has been limited. The customs demand has been fair for the season. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,599,726. The customs demand for Gold last week, averaged $351,047 a day; thus far, this week, it has been equal to $405,000 a day, or equal to a weekly aggregate of $2,430,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $118,506, and from California, $431,006. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $96,842,480, against $106,949,636 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $23,875,604, against $32,749,405 same time last year, showing a decrease this year, of $9,873,801. The exports of specie from this port, last week, were $297,393. The total outflow of specie from the port, since Jan. 1, 1867, has been $43,449,212, against $54,270,790 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $58,200, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $43,333,924, against $31,852,589 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to Sept. 16, reached $30,139,284, against $32,473,036 same time last year, showing a decrease, in 1867, of $2,333,792.

Foreign exchange has been less freely pressed on the market, and prices have shown rather more firmness, though the demand has not been remarkably active. Bankers' 60 day bills on London closed at 109⅛@109½, and on Paris to 5.17½@5.16¼; sight bills on London to 109⅝@110; and on Paris to 5.15@5.13¾. The offerings of produce bills have been up to a fair average this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,872,657, making the total value of exports since Jan. 1, 1867, $139,775,160, against $148,258,934 same time in the preceding year.

Government securities have been subject to speculative influences more or less potent, during the week. The stringency in money helped the *bear* interest in the market, and operators for a lower currency pressed their advantage to the utmost. The demand was generally restricted, though on Monday it became momentarily active, under the easing up in money. The later dealings on Wednesday indicated some irregularity, but with pretty general depression in values. The sharp decline in gold temporarily operated adversely to the coin bearing bonds, especially the Five-Twenties of 1862 and 1865, May and November coupons, which were in less request for export. During September, $35,296,925 of Seven-thirties, and $5,189,630 of compound notes were retired by the Treasury Department, while $29,670,250 of Five-twenties were issued. The legal tender circulation was reduced full four millions, and the gold certificate issue, $594,920. The temporary loan was diminished $266,982. The net aggregate indebtedness was increased $2,294,081. A semi-official account says: "This increase is in consequence of the heavy payments on account of the War and Interior Departments (the latter on account of pensions,) and the small receipts from internal revenue during the past month. It is anticipated, however, that the receipts for the present month will be considerably in excess of the payments, and that the statement on the 1st of November will show a reduction of several millions." U. S. sixes of 1881 closed here on Wednesday at 111½@111¾; U. S. Five-twenties of 1862, 112112⅛; U. S. Five-twenties of 1864 at 109@109⅛; U. S. Five-twenties of 1865 at 109@109¼; U. S. Five-twenties of 1865, consolidated, 107¼@107⅜; U. S. Five-twenties of 1867, 107⅛@107⅜; U. S. Ten-forties at 100⅝@100¾, and U. S. Seven-thirties at 105⅞@106. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

October, 1864....1193/8	August, 1865....1161/8
December, 1864..1183/8	September, 1865..1155/8
May, 1865 117	October, 1865....1151/8

Secretary McCulloch repeats the affirmation that Government holds itself bound to redeem all its funded obligations, including the Five twenty bonds, in coin, as follows:

TREASURY DEPARTMENT, Oct. 7, 1867.

DEAR SIR:—Your favor of the 4th inst., is received. Too much importance is attached to the utterance to which you refer. The people of the United States are all sound upon the question of the preservation of the national faith, as they were upon the question of the preservation of the Union. I consider *the faith of the Government pledged to pay the Five-twenty bonds*, when they are paid, *in coin*.

There need be, I think, no apprehension that they will be called in at the expiration of five years from their respective dates, and paid in United States notes.

The United States notes were issued under the pressure of a great necessity, and are, by authority of Congress, being rapidly withdrawn from circulation. No more can be issued under the existing laws, nor can I believe that any considerable number of the members of Congress would favor an additional issue for any purpose whatever, much less for the purpose of paying bonds in violation of the express understanding under which they were negotiated.

The policy of contracting the circulation of United States notes adopted by Congress, and being steadily pursued by the Secretary, should of itself, even if the honor of the nation were not involved in the question, satisfy holders that Five-twenty bonds will not be called and paid before maturity in a depreciated currency.

Very truly yours,

H. McCULLOCH, Secretary.

Railway and miscellaneous stocks have been unusually brisk, through the week, and despite the extraordinary activity in money, prices have been, on the whole, decidedly stronger, closing quite buoyantly. The election of a nearly new Board of Directors for the Erie road on Tuesday tended to foster the *bull* speculation, as it was construed favorably for existing values.

General business has shown decidedly more animation, particularly in the line of breadstuffs, which have been in brisk request, largely on speculative and foreign account, at much higher prices. The sudden and sharp rise in freight toward the close tended to check the export movements. Cotton has been in more demand, opening and closing, however, at lower prices with middling grades on Wednesday at 19@21 cents per lb. as extremes. The stock of cotton now here is estimated at about 35,000 bales. The receipts at the port this week, have averaged about 1,300 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from September 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales last year; estimated stock at close of year, 80,296 bales, against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 41,500 bales, against 35,000 bales same time last year; exports, same time, 9,700 bales, against 46,000 bales same time last year; stock on hand at latest dates, 80,000 bales, against 210,500 bales same date last year. At the live stock market this week beeves have been in better supply and less demand, at reduced prices, closing at from 8c.@17c., as extremes; veal calves, salable and steady, at from 8c.@12½c.; sheep and lambs, dull and heavy at 4½c.@6c., and 6c.@7½c., respectively. Swine, plenty and lower, closing at 5¾c.@7⅝c. per lb., all live weight. The week's receipts include 8,256 beeves, 1,621 calves, 24,416 sheep and lambs, and 28,602 swine. Foreign merchandise has been less freely purchased at irregular, and in instance of Dry Goods, generally lower prices. The total imports of foreign dry goods, last week, were $1,547,195, and the total amount marketed $1,767,872. The value of foreign merchandise imported last week, was $2,479,207—making the grand total specie value of last week's imports of dry goods and merchandise, $4,025,402, and since Jan. 1, 1867, $194,036,513, against $230,867,268 same time in the preceding fiscal year. The ocean freight market has been more active, since our last, closing much more

firmly with 510 vessels of all classes in port. For Liverpool we quote flour at 2s.@2s. 3d. per bbl.; grain at 8c.@8½d. per bushel; cotton at $\frac{3}{16}$c.@¼d. per lb.; and heavy goods at 17s. 6d.@27s. 6d. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 25.	Oct. 1.	Oct. 9.
Consols	94 7/16	94 5/16	94¼
U.S. 5-20's of 1862	73	72½	71 11/16
Erie	41¼	42	43⅛
Ill. Central	77¼	77½	77⅜

The New York exports, exclusive of specie, for the week ending Oct. 8th, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,930,151	$2,872,657
Prev. reported	145,328,783	136,902,503
Since January 1	$148,258,934	$139,775,160

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,867,576	$1,546,195
Gen. merchandise	2,539,429	2,479,207
Total for the week	$4,407,005	$4,025,402
Previously reported	226,460,263	190,011,111
Since January 1	$230,867,268	$194,036,513

The balance in the Sub-Treasury on Wednesday was $108,363,753 95.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

TO CONTRACTORS,

The Walkill Valley R. R. Co. will receive proposals, until November 1, for the grading, masonry, bridging and iron for about 20 miles of their road extending from Montgomery to Newpaltz. Levi Bruyn, Esq., Shawangunk Village, Ulster Co., N. Y., is Chief Engineer.

The Lynchburg and Danville R. R. Co. will receive proposals, until the 1st of November, for the construction of 25 miles of the road extending from Lynchburg to the Staunton River, including Staunton River Bridge. Address Col. Wm. W. Blackford, Chief Engineer, Lynchburg, Va.

The Wilmington and Reading R. R. Co. will receive proposals until the 30th of October, for the graduation and masonry of about 50 miles of road extending from Birdsboro', Penn., to Wilmington, Del. Address N. P. Hobart, Engineer in Charge, Coatesville, Pa.

Union Pacific Railroad.—South Branch.

We learn from the Junction City *Union* that the directors of this company have closed a contract for the construction of the road from Junction City, *via* Council Grove, Emporia, Burlington, etc., to the north line of the Osage lands, a distance of one hundred and thirty miles. The contracting parties have bound themselves to commence the construction at Junction City on or before the 15th of October, 1867, and to complete and equip the road to the Osage lands by the 1st of January, 1872, and, under a certain state of circumstances, which it is believed will exist, to finish it by the 1st of January, 1870.

☞ The Cleveland and Toledo R. R. Co. has decided to increase its capital stock 25 per cent., preparatory to its consolidation with the Cleveland, Painesville and Ashtabula R. R. Co.

☞ The Albany *Argus* says that a connection is soon to be made of the Albany and Susquehanna with the Erie Railway.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Alton Railroad for the week ending Sept. 30, 1867, were $102,210 00
Corresponding period previous year.. 82,527 00

Increase..... $19,683 00

The earnings of the Western Union Railroad for the 4th week in Sept., 1867..... $37,533 58
Corresponding week previous year.... 24,401 07

Increase $13,132 51

The earnings of the Atlantic and Great Western Railway for the fourth week in Sept., 1867, were..... $124,211 00
Corresponding week previous year... 120,160 00

Increase..... $4,051 00

The earnings of the Chicago and Northwestern Railroad for 4th week in Sept., 1867 .$477,646 00
Corresponding week previous year .. 315,850 00

Increase $161,796 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in Sept., 1867..$34,581 00
Corresponding week previous year.... 33,577 00

Increase $1,004 00

The earnings of the Virginia and Tennessee Railroad for the fourth week of Sept., were $17,217, a decrease of $2,764 on the same week last year. Total for the fiscal year commencing 1st of July, $229,677, an increase of $51,227 on same time in 1866.

New Railroad Car.

A novel style of rail car, carrying its own track, and designed for use on common roads or the streets of a city, was recently exhibited in Philadelphia. In this vehicle, the car moves the wheels instead of the wheels moving the car, and the wheels do not touch the ground at all. There are six pairs of wheels, and each pair has a broad flat foot attached. These "feet" rest on the ground and bear up the wheels, while two rails under the body of the car are made to roll along the upper surface of the tire as if it were passing over so many pullies or friction rollers. The feet and wheels are all connected by an endless chain, and as fast as the body of the car passes beyond one of these feet it is lifted from the ground and made to travel along to the front of the car, where it drops on the road again, and the whole is thus kept in continuous motion. The wheel truck in fact "walks" along the road while the car itself rolls along over the wheels.

Railway Locomotives in Germany.

An official return gives some curious particulars relative to the manufacture of railway locomotives in Germany. In 1864 the number of locomotives on the German railways was 4,768, of which 574 were manufactured abroad; while Germany now not only builds her own locomotives, but sent one thousand last year to other countries, such as Switzerland, Italy, France, and Russia. The number of engines now used on the railways of Germany is 5,350, of which 340 have to be replaced every year. The largest of the German factories is that of Borsig, of Berlin, which has built two thousand railway engines since it was first established in 1841. Of the others, the principal are that of Maffei in Bavaria, that of the Austrian railway companies at Vienna, Egerstorff's at Hanover, and Henschl's at Cassel.

Working Expenses.

The series of tables prepared by Mr. Price Williams, and referred to by us last week, showing the cost per mile of each item usually included under the head of maintenance of way, works, stations, &c., during the half years ending June and December, 1866, will be found exceedingly interesting to all persons interested in railway property. The whole question of permanent way, expenditure, and cost of renewals, has become increasingly important now that attention is being so generally directed to the closing of capital accounts, and thus compelling railway boards to charge against revenue solely the whole of the annual expenditure necessary for keeping the railways in working order.

Comparing these tables with those of the nineteen preceding years, it will be observed that the cost per mile is higher in nearly all the various items of permanent way charges. That this is in some measure attributable to the general advance which has recently taken place in the rate of wages is extremely probable. We are disposed, however, to attribute the chief cause of this to the more destructive effects upon the rails due to the increased amount and speed of the traffic.

Taking the London and North Western tables first, it will be noticed that the cost per mile of the aggregate permanent way charges for the December half year stands at a higher figure than has ever previously been attained in a period of twenty years. Notwithstanding the items of maintenance and renewal of way are no longer shown separately in the published half yearly returns of the company (which, we think, is much to be regretted, inasmuch as the absence of these details makes a comparison with similar charges on the other railways more difficult,) it is easy to see from the fact of the cost per mile of maintenance alone so largely exceeding the cost of maintenance and renewal combined during the preceding years, and from its still more largely exceeding the average cost of these two items during a period of fourteen years, that a very considerable expenditure has occurred in renewals during the year, while its gross tonnage is increasing at the rate of a million tons a year. We fear that its expenditure in renewals, instead of having arrived at its average, as is supposed, is destined to increase even in a still more rapid ratio, unless, indeed, recourse is had to a more durable material, such as steel, for its rails. The renewal debt, we notice, is sensibly decreasing by means of the amount annually set aside for the purpose of wiping it off, £12,000 having been specially appropriated last year for this purpose. We also observe charges upon capital to the amount of £8,834 for improvement of permanent way, which makes the total charge upon capital for that purpose up to the end of the year £971,013.

The South Eastern Railway still maintains its pre-eminence as the least expensively maintained of our principal railways. More than usual, however, appears to have been spent during the last year in "maintenance and renewals," the average for a previous period of thirteen years being £172 per mile per annum, while for each of the half years they amount to £161 and £178 per mile respectively, with an almost equal mileage maintained, and a considerably larger annual tonnage than the London and North Western. Its total permanent way charges, including renewals, &c., for the last year, are fully two-thirds less than those of the latter railway, while, during a period of eighteen and a half years, the average comparative cost per mile for these charges is still more disproportionate in the ratio of £211 to £370 per mile. Possibly the fact of a considerable portion of the North Eastern mileage being composed of purely mineral lines may in some measure explain this great disparity; and possibly the curious fact mentioned by its consulting engineer, Mr. T. E. Harrison, that the plate layers in the northern districts do a great deal more work than those in the south, may also have something to do with it. There can be no question, however, as to the fact of its being the much more economically maintained line of the two, and we should be glad to have some explanation of the reason.

On the Midland, where, as on the London and South Western, "Maintenance of Way" and "Works" appear under one head, the cost per mile for the June and December half years figures at £139 and £154 respectively, the average during a period of twenty years being only £115 per mile; similarly, "renewals of way," which during a previous period of eighteen and a half years have averaged only £85 per mile, we observe cost this year £117 and £104 per mile, and bear significant testimony both to increased cost of "maintenance" and the extent to which renewals of way have been going on; the actual length renewed, according to the engineer Mr. Crossley's report, being upwards of 65 miles, or nearly double the average mileage renewed during the last eighteen years.

The cost per mile of the permanent way charges on the London and South Western Railway in both half years is also, we find, proportionately high when compared with the average of previous years, "Maintenance of Way and Works" figuring in the tables for £209 and £187 per mile respectively, as against £170, the average cost during a period of seventeen years. Renewals of way appear during the December half year at about the average of the last twelve and a half years—viz., £71 per mile, and somewhat below this in the first half year. The total cost of permanent way charges, including "station works," &c., amounts, however, to £318 and £315 per mile respectively, which is considerably in excess of the twenty years' average for those charges.

The Great Northern.—The permanent way tables for this line bear unmistakable evidence that no efforts are wanting and no means denied to keep up this severely-worked line in its proverbially first-rate condition. In the report of the chief engineer, Mr. Johnson, M. Inst. C. E., to the directors of that railway, it is stated that "renewals of way" to the extent of 42¾ single miles (including 5 miles of steel rails) have been relaid during the year. This, although largely in excess of the average annual mileage relaid in the eleven previous years, is still somewhat below what Mr. Johnson, during a discussion at the Institution of Civil Engineers, estimated would be required. He there stated eight years to be the average life of a rail on the main portion of that line; this would give 61 single miles (⅛ of the 243 double miles maintained) to be replaced annually, which is nearly double the 32.21 miles given in the tables as the average annual mileage renewed in the eleven previous years. The conviction, we believe, is gradually forcing itself upon the minds of the directors that nothing short of the entire substitution of steel rails on the present overtasked portion of their main line will have any appreciable effect in reducing the present large annual expenditure in renewals of way, which roundly represents a dividend of just 1¼ per cent. on the 6½ millions of original and A B share capital of the company. It is a noticeable fact that the cost of "maintenance of way" on this railway is considerably below that of all the other railways, with the single exception of the Manchester, Sheffield and Lincolnshire, and that it has preserved this uniformly moderate character from 1862 down to the present time—a period, it should be mentioned, from which the energetic and thorough administration of its present chief engineer dates. The cost of maintenance of way had then reached £154 per mile; it has since steadily and rapidly decreased to £115 per mile, and with the more extensive adoption of steel rails on the most severely-worked portions of the line, we are satisfied the average cost of maintenance is destined to fall yet lower.

Lancashire and Yorkshire.—Among our railways there is, considering its mileage, probably no more severely-worked line than the Lancashire and Yorkshire. With a very heavy goods and and mineral traffic, increasing latterly at the rate of a million tons in three years, with an equally large and important passenger traffic, plying among the great industrial centres of Lancashire

and Yorkshire, and partaking more than perhaps any other line out of London of the characteristics of the omnibus traffic of our metropolitan railways, with its frequent trains, constant stoppages, and excessive use of brake power, the wear and tear of the permanent way, as might naturally be anticipated, is proportionately high, and we are accordingly prepared to find, during the last year, that the cost of renewal averaged £309 and £212 per mile in the respective half years, and that the large sum of £99,758 has been devoted to the renewal of probably about 75 miles of single line; the cost of renewals during a previous period of eighteen years averaged only £162 per mile. The cost of maintenance alone, as on the Great Northern, is exceedingly low as compared with some of the metropolitan lines.

The cost of maintenance of way both on the South Eastern and London and Brighton appears to be exceptionally high this year when compared with the Great Northern, North Eastern and Lancashire and Yorkshire lines, the London and Brighton, more particularly, heading the list with its £192 per mile. The cost of renewals is, however, proportionately low, and may in some way serve to account for the difference. The cost of renewals in both half years were very uniform on the South Eastern, although rather above the average of a period of seventeen years. The total permanent way charges are also in both cases very much in excess of the average of the last twenty years.

Manchester, Sheffield and Lincolnshire.—The cost per mile per annum of the aggregate permanent way charges on this railway is much below that of any year since 1862, and yet considerably above the average of the last twenty years; and the same remark applies to "renewals," which are still more in excess of the average of the last eleven years. Considering the extent of its mileage, its large and increasing traffic, and the admirable running order in which this railway is always maintained, the only remarkable feature connected with it is how it can all be done at so comparatively small a cost.

The second table gives, in a condensed form, the average annual cost per mile, during a period of years, of the two all-important items in every permanent way account, viz., "maintenance of way" and "renewals of way," the addition of "work of line," in combination with maintenance of way, had been rendered necessary as a means of comparison with these charges in the Midland and London and Southwestern accounts, where they appear in that form; statements showing the combined cost of maintenance and renewal of way, and the average cost of maintenance of way and works and renewals of way, are added with a view to affording the means of comparison with the North Eastern permanent way accounts, where the materials used in "renewals" are included in "maintenance of way," and also as affording a means of comparison with those of the London and North Western, where, as we have before stated, they have recently ceased to make any distinction between "maintenance of way" and "renewals," the reason assigned for this change being, we believe, that a period of general average has been arrived at, which renders such a distinction no longer necessary.

It is to be much regretted that a little more uniformity in the mode of keeping the permanent way accounts does not exist; it could, we feel certain, be easily arrived at by a very little concerted action among the different railway engineers, to whom, as affording a more ready and simple means of comparing the relative expenditure on their respective lines, it would, after all, be of the chief advantage; at the same time supplying the much-wanted materials for a valuable and reliable record of the progressive growth and development of one of the most interesting and important branches of our railway economy.

The question naturally suggests itself whether this enormous expenditure, now annually required to make good the effects of the wear and tear of our permanent way, and notably to the rail itself, cannot in some way be mitigated, and to a great extent done away with, by the substitution of a more durable material for the present iron rail, such, in fact, as steel rails have proved themselves to be. The great difference between the price of the iron and steel rail is, we are aware, the one chief obstacle which at present prevents their more general adoption on all our main lines of railway. We are disposed to think, however, that a very little consideration of the subject will show that on all the railways referred to the entire renewals of the main lines, at least, with steel rails, might be so financially arranged and provided for as not to operate against the interest of the existing shareholders, while it will certainly act to the great advantage, both to the future shareholders and to the safe and more economical working of the traffic.—*London Railway News, Sept.* 14.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States September 1, and October 1, 1867:

	Sept. 1, 1867.	Oct. 1, 1867.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$198,431,350.00	$198,431,350.00
Six per cent. bonds of 1867 and 1868	14,869,791.80	14,707,941.80
Six per cent. bonds of 1881	283,676,100.00	283,676,100.00
Six per cent. Five-twenty bonds	1,205,710,500.00	1,235,380,750.00
Navy pension fund	13,000,000.00	13,000,000.00
Total	$1,715,687,741.80	$1,745,196,141.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$16,346,000.00	$16,746,000.00
Three-year compound interest notes	78,839,600.00	78,839,580.00
Three-year seven-thirty notes	400,786,025.00	365,489,100.00
Total	$495,971,625.00	$461,074,680.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 15, 1867	$	$4,250,000.00
Compound interest notes matured June 10th, July 15th, and August 15, 1867	$12,672,730 00	7,483,100.00
Bonds of Texas indemnity	263,000.00	262,000.00
Treasury notes, acts July 17, 1861, and prior thereto	165,311.64	164,511.64
Bonds, April 15, 1942	64,768.68	54,061.64
Treasury notes, March 3, 1863	959,380.00	959,380.00
Temporary loan	5,279,185.55	5,012,203.55
Certificates of indebtedness	36,000.00	36,000.00
Total	$19,440,375.87	$18,221,256.83
DEBT BEARING NO INTEREST.		
United States notes	$365,[illegible]4,844.00	$361,164,844.00
Fractional currency	29,392,172.97	29,864,713.37
Gold certificates of deposit	15,462,700.00	14,867,820.00
Total	$410,019,716 97	$405,897,377.37
Total debt	$2 641,119,459.64	$2,630,389,456.00
AMOUNT IN THE TREASURY.		
Coin	$101,263,020.00	$103,298,659.69
Currency	47,073,074.59	31,813,349.55
Total	$148,336,094.59	$135,112,009.24
Amount of debt less cash in the Treasury	$2,492,783,365.05	$2,495,277,446.76

By comparing this with the statement of September 1, it is shown that the debt bearing coin interest has increased $29,508,400; the debt bearing currency interest has decreased $34,896,945; the matured debt not presented for payment has decreased $1,219,119 04, and the debt bearing no interest has decreased $4,122,339 60—making the decrease in the total debt since September 1, 1867, $10,730,093 64. The amount of coin in the Treasury during the same period has increased $2,035,639 69, and the amount of currency has decreased $15,259,725 04—leaving the amount of debt less cash in the Treasury on October 1, $2,494,081 71 more than on September 1st.

Erie Railway.

The annual election for directors of this company was held at their office in this city on the 8th inst. The following gentlemen were chosen: John S. Eldridge, Boston; Josiah Bardwell, Boston; J. C. Bancroft Davis, Newburg; Alexander S. Diven, New York; William Evans, England; James Fisk, Jr. New York; Eben D. Jordan, Boston; J. Gould, New York; Dudley S. Gregory, Jersey City; George M. Groves, New York; Frederick A. Lane, New York; Homer Ramsdell, Newburg; William B. Skidmore, New York; Henry Thompson, New York; James S. Whitney, Boston; Frank Work, New York; Levi Underwood, Vermont.

Mr. Levi Underwood declining to serve on the board, Mr. Daniel Drew was elected in his place.

At a subsequent election for officers, the following gentlemen were chosen: President, John S. Eldridge; Vice President, Alexander S. Diven; Treasurer, Daniel Drew.

Post Route Map of the New England States.

We have received from Geo. Wm. McLellan, Esq., Second Assistant Postmaster General, a copy of a new post route map of the New England States, exhibiting the postoffices and the mail service therein at date of December 29, 1866. This map is to be followed by a series of others, embracing, in succession, the other States, separately or in groups. Those of New York and the middle Atlantic States are in progress and will shortly appear. Besides the distribution to postmasters for the service of the department, these maps are on sale, and may be procured at the Postoffice Department, (Second Assistant Postmaster General,) or from the sale agents in Philadelphia, New York, Boston and Portland.

Albemarle and Chesapeake Canal.

The receipts at Norfolk by this canal during the years ending September 30, 1866 and 1867, have been as follows:

	1866.	1867.
Lumber, feet	3,137,360	6,399,777
Cotton, bales	6,977	16,057
Fish, bbls.	16,561	21,276
Corn, bushels	220,453	268,190
Shad, fresh, No	84,917	162,280
Shingles	3,086,502	27,682,717
Staves, hogshead	1,173 237	2,162,913
do. barrels	34,000	105,300
Timber, cubic feet		63,289

This canal runs from Norfolk to North River, and furnishes water communication between that city and all points on Albemarle and Currituck Sounds and the Roanoke and Chowan Rivers.

Savannah, Skidaway and Seaboard R. R.

At a meeting of the Commissioners of this road recently held in Savannah, Wm. R. Symons was appointed Chairman, and E. J. Purse, Secretary. It was resolved that books of subscription to the capital stock of the company be opened on the 11th of November, and that 4[illegible] per cent. upon the amount of cash subscription be paid at the time of subscribing; that [illegible] preliminary survey of the road, and an approximate estimate of the cost be immediately made, and that no contracts shall be valid until sanctioned by the board. The

amount of subscriptions reported to date is $53,-500.

AUCTION SALE.

3 LOCOMOTIVES,

4-81-2 GAUGE,

At Monument Foundry, Baltimore, Md.,

Thursday 12 M., Oct. 17, 1867.

No. 1 Engine and Tender complete. Cylinders 15x20. Link Motion. 4-56 in. Drivers connected. Copper Flues. Weight about 23 tons. Tender 8 wheeled. Capacity, 1800 gallons.

No. 2. Engine and Tender complete. Cylinders 15x20, Hook Motion. 4-66 in. Drivers connected. Copper Flues. Weight about 24 tons. Tender, 8 wheeled.

Both the above, thoroughly REBUILT by one of the best makers, and ready for immediate use.

No. 3. Without Tender, as it stands without repairs. Cylinders 18x22. 8-41 in. Drivers connected. Weight about 33 tons.

These Engines or any of them are offered at PRIVATE SALE at low figures, subject to inspection, any time prior to date above mentioned, on which day, unless so disposed of, they will be POSITIVELY SOLD AT AUCTION the highest bidder, on account of whom it may concern. For further particulars, address

KASSON & CO.,
62 Broadway, New York.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. LICENSES GRANTED.

PLASTIC SLATE

FOR

Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEBRUARY 21st, 1865.

It is a combination of

Pulverized Slate and Viscous Matter,

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

NOTICE TO CONTRACTORS,

PROPOSALS will be received until Nov. 1st, for the Grading, Masonry, Bridging and Iron of the Wallkill Valley Railroad, from Montgomery to Newpaltz, about 20 miles, or so much thereof as may be deemed expedient. Maps, plans and specifications will be ready for inspection on the 15th of Oct., at the office of the Chief Engineer, Levi Bruyn, Shawangunk Village, Ulster Co., N. Y.

All other information needed will be furnished at my office.

Dated Bruynswick, N. Y., Oct. 2d, 1867.
4t40 F. S. McKINSTRY, Pres't.

FIRST MORTGAGE BONDS.

ST. LOUIS AND IRON MOUNTAIN

RAILROAD COMPANY.

Seven Per Cent. Interest, Payable February and August.

These Bonds cover a Road of 91 miles, finished from St. Louis to Pilot Knob, and in first-class order, and an extension of about the same length from Pilot Knob to Belmont, now rapidly constructing, for which the proceeds of these bonds are to be used, making a through route from Saint Louis to New Orleans by rail.

The earnings of the 91 miles are $600,000 a year; the net profits now are sufficient to pay the interest on the entire amount of bonds, were they all issued.

The basis of security is believed to be beyond that of any other bonds now offered.

NOTICE TO CONTRACTORS.

LYNCHBURG AND DANVILLE RAILROAD,
CHIEF ENGINEER'S OFFICE,
LYNCHBURG, July 12, 1867.

At a meeting of the Board of Directors of the Lynchburg and Danville Railroad Company, held at the office of the Company on the 11th day of July, 1867, it was ordered that the Chief Engineer be directed to proceed at once to locate the road on the route adopted, near Pittsylvania Court House, and that he advertise FOR SEALED PROPOSALS for the construction of Twenty-five miles of the road, (from Lynchburg to Staunton River,) including Staunton River Bridge, near the Pocket Ford. Said proposals to be opened and examined on the FIRST DAY OF NOVEMBER, 1867. And that he prepare, as soon as practicable, before the FIRST OF NOVEMBER, plans, profiles and specifications of the work for the inspection and information of all persons concerned.

In obedience to the above order, on and after the 15th day of October next, plans, profiles and specifications of the Work will be open for inspection at this office.

Sealed proposals to be addressed to the undersigned,

WM. W BLACKFORD,
Chief Engineer

ACROSS THE SIERRA NEVADAS.

THE

CENTRAL PACIFIC RAILROAD,

THE WESTERN HALF OF THE GREAT NATIONAL TRUNK LINE

Across the Continent,

Being constructed WITH THE AID AND SUPERVISION OF THE UNITED STATES GOVERNMENT, is destined to be one of the most important lines of communication in the world; as it is the *sole link between the Pacific Coast and the Great Interior Basin*, over which the immense Overland travel must pass, and the

Principal Portion of the Main Stem Line between the two Oceans.

Its line extends from Sacramento, on the tidal waters of the Pacific, eastward across the richest and most populous parts of California, Nevada and Utah, contiguous to all the great Mining Regions of the Far West, and will meet and connect with the roads now building east of the Rocky Mountains. About **100** miles are now built, equipped and in running operation to the summit of the Sierra Nevada. Within a few days **35** miles, now graded, will be added, and the track carried entirely across the mountains to a point in the Great Salt Lake Valley, whence further progress will be easy and rapid. Iron, materials and equipment are ready at hand for **300** miles of road, and **10,000** men are employed in the construction.

The local business upon the completed portion surpasses all previous estimate. The figures for the quarter ending August 31 are as follows in GOLD:

GROSS EARNINGS,	OPERATING EXPENSES,	NET EARNINGS,
$487,579 64	**$86,543 47**	**$401,031 17**

or at the rate of two millions per annum, of which more than three-fourths are net profit on less than 100 miles worked This is upon the actual, legitimate traffic of the road, with its terminus in the mountains, and with only the normal ratio of government transportation, and is exclusive of the materials carried for the further extension of the road.

The Company's interest liabilities during the same period were less than $125,000.

Add to this an ever-expanding through traffic and the proportions of the future business become immense.

The Company are authorized to continue their line eastward until it shall meet and connect with the roads now building east of the Rocky Mountain ranges. Assuming that they will build and control half the entire distance between San Francisco and the Missouri River, as now seems probable, the United States will have invested in the completion of **865** miles **$28,592,000,** or at the average rate of **$35,000** per mile—not including an absolute grant of **10,000,000** acres of the Public lands. By becoming a joint investor in the magnificent enterprise, and by waiving its first lien in favor of the First Mortgage Bondholders, THE GENERAL GOVERNMENT, IN EFFECT, INVITES THE CO-OPERATION OF PRIVATE CAPITALISTS, and has carefully guarded their interests against all ordinary contingencies.

The Company offer for sale, through us, their

First Mortgage Thirty-Year Six Per Cent. Coupon Bonds,

Principal and Interest Payable in Gold Coin,

in New York City. They are in sums of $1,000 each, with semi-annual gold coupons attached, and are selling for the present at **95** per cent. and accrued interest from July 1st added, in currency, at which rate they yield nearly

Nine Per Cent. upon the Investment.

These Bonds, authorized by act of Congress, are issued only as the work progresses, and to the same amount only as the Bonds granted by the Government; and represent in all cases the *first lien* upon a completed, equipped and productive railroad, in which have been invested Government subsidies, Stock subscriptions, donations, surplus earnings, etc., and which is worth more than three times the amount of First Mortgage Bonds which can be issued upon it.

The Central Pacific First Mortgage Bonds have all the assurances, sanctions and guaranties of the Pacific Railroad Act of Congress, and have in addition several noticeable advantages over all other classes of railroad bonds.

First—They are the superior claim upon altogether the most vital and valuable portion of the through line.

Second—Beside the fullest benefit of the goverument subsidy, (which is a subordinate lien,) the road receives the benefit of large donations from California.

Third—Fully half the whole cost of grading 800 miles eastward of San Francisco is concentrated upon the 150 miles now about completed.

Fourth—A local business already yielding three-fold the annual interest liabilities, with advantageous rates payable in coin.

Fifth—The principal as well as the interest of its Bonds being payable in coin, upon a legally binding agreement.

Having carefully investigated the resources and prospects of the Road, and the management of the Company's affairs, we cordially recommend these Bonds to Trustees, Executors, Institutions and others as an eminently *sound, reliable and remunerative form of permanent investment.*

CONVERSIONS OF GOVERNMENT SECURITIES INTO

CENTRAL PACIFIC FIRST MORTGAGE BONDS,

now *realize for the holders from*

Twelve to Eighteen per Cent. Advantage,

WITH THE SAME RATE OF INTEREST.

The following are the current rates (September 9th,) subject, of course, to slight variations from day to day. We receive in exchange:

THE ELNATHAN SAMPSON

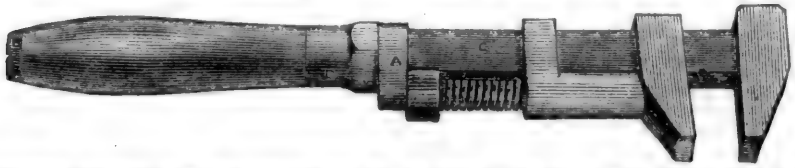
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.

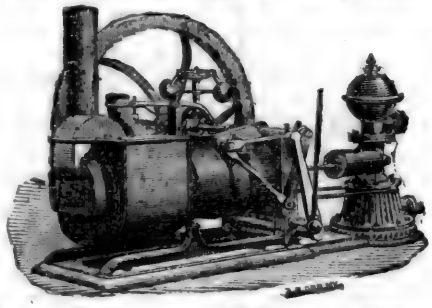


Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.



THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

New York, Saturday, October 19, 1867.

Newark and New York Railroad.

This road, now in process of construction, will be about 7½ miles in length, between the Newark terminus and that in Jersey City.

Two bridges are now nearly ready to cross the Hackensack and Passaic Rivers. That for the former will be 3,500 feet long. It will consist of two spans across the river, 50 feet each. The river abutment will consist of a large iron cylinder 28 feet in diameter, filled in with heavy mason work, and concrete in courses, with a top course of granite two feet thick. An iron tube will be built in the centre to receive the turn-table pivot. The draw will be set at an angle of 20 degrees from the railroad line.

The bridge across the Passaic River will have a clear span of 90 feet, with abutments on either side somewhat similar to the above. These bridges are what is known as the Mosely Iron girder pattern. Workmen are now making a cut through Bergen Hill, with an easy grade of 21 feet to the mile. The heavy, bad weather of the past Summer has greatly retarded work on this road, but the company hope to be ready to run trains upon it about next April. The estimated cost of the entire road is about one million dollars.

The directors of the road are: John McGregor, Theodore P. Howell, Philetus W. Vail, Herman Schalk, Frederick Kolb, Francis Mackin, James B. Boylan, Robt. L. Smith and Edgar B. Wakeman, of whom Mr. McGregor is the President, and Mr. Howell the Treasurer.

Uniforms for Railway Officers.

Under the new railroad law of this State, which will take effect on the 22d instant, all persons employed by the railway companies are required to wear a distinguishing uniform. The different companies have issued instructions accordingly. The uniforms are thus described by the *Herald*:

NEW YORK AND HARLEM RAILROAD.

Conductors' Uniform—A dark blue. Coat, short sack; vest, single breasted, buttoned high. Pants and navy cap of same material, with the usual badge on the cap.

Station Agents—A blue navy cap, with station agent badge on same.

Baggage Masters of Trains—A short dark blue flannel blouse, and blue navy cap, with badge on same.

Station Baggage Men—The same uniform as conductors, with station baggage badge.

Brakemen—Light blue blouse and navy cap, with badge.

Flagmen and Switchmen—With blue navy cap and badge.

HUDSON RIVER RAILROAD.

Conductors—Blue cloth sack coat, blue cloth vest, buttoned up to the throat, and blue cloth pants, plain buttons; blue navy cap, with the rank of the wearer in silver letters on the badge.

Brakemen—Brown blouse or coat, blue pants and black leather belt around the waist, with badge.

Train Baggagemen—Blue cloth jacket and cap.

Station Baggagemen—Same uniform.

Station Men, Flagmen, &c.—Blue navy cap, with white leather badge, with the position of the wearer in gilt letters.

NEW YORK CENTRAL RAILROAD.

Conductors—Blue cloth or flannel coat; coat to be cut sack pattern, single or double breasted; gilt regulation buttons on coat and vest; uniformity in color and cut will be required; blue cloth cap, regulation pattern (gold bullion stripe at top and bottom of band, with ribbon badge to be worn between the stripes.)

Brakemen—Woollen blouse and overalls of blue denims, and regulation badge to be worn on hat or cap.

Train Baggagemen, Depot Masters, Station Agents, Station Baggagemen, Station Men—Regulation badge to be worn on hat or cap.

Badges or buttons to be furnished by the company.

ERIE RAILWAY.

Conductors—Blue coat and vest, with plain buttons; gray pants and blue cap, with badge.

The dress of the other employees will be determined on in a few days.

LONG ISLAND AND HUNTER'S POINT AND FLUSHING RAILROADS.

The uniform worn by the employees of these two roads will be similar, as follows:

Conductors—Full suit of blue cloth; blue navy cap, with badge.

Baggage Master—Short blue blouse.

Brakemen—Blue blouse and suitable badge.

Flagmen, Switchmen, &c.—Blue navy cap and badge.

NEW YORK AND NEW HAVEN RAILROAD.

No uniform will be worn by the employees of this road. The President communicated with the Attorney-General of this State on the subject, and he has given his opinion that as the line is nearly altogether in the State of Connecticut they would not be required to conform to the law. The employees wear badges on their caps, in accordance with the law of Connecticut.

Chesapeake and Ohio Railroad.

The vote lately on the question whether the city of Richmond should subscribe to $2,000,000 of the stock of the Chesapeake and Ohio Railroad was determined largely in the affirmative. This work was commenced as a State enterprise years ago, and much money laid out upon it. The State now subscribes $2,000,000 more, and the various counties through which it passes are called upon to unite with Richmond to complete the subscription. The road will be about 200 miles long, having for its eastern terminus Covington, on the Virginia Central Railroad, and striking the Big Sandy River at its junction with the Ohio. None of the grades will exceed twenty feet to the mile, and the total distance from the Ohio to Richmond will be less than 400 miles. By the completion of the proposed road on the south shore of the Ohio, from the Big Sandy to Covington, Ky., opposite Cincinnati, with a branch to Lexington, the immense mineral resources of the western part of Virginia, in the most valuable kinds of petroleum, bituminous coal and iron,

will find outlets to both the eastern and western markets by rail.

Western Union Railroad.

The annual meeting of the stockholders of this company was held at Racine, Wis., on the 9th inst. The directors elected for the ensuing year were as follows:

Richard Irvin, S. P. Nash, R. G. Rolston, Jacob S. Wetmore, New York; Edward P. Barton, Freeport, Ill.; D. W. Dame, Lanark, Ill.; G. A. Thomson, Henry T. Fuller, Darwin Andrews, John Wilson, Racine, Wis.; William Shannon, Shannon, Ill.; H. A. Mills, Mount Carroll, Ill.; E. Northey, Shannon, Ill.

At a meeting of the new Board of Directors the officers of the previous year were unanimously re-elected, consisting of G. A. Thomson, President; H. F. Fuller, Vice President, and W. V. Baker; Secretary and Treasurer.

Hartford and New Haven Railroad.

The earnings of this road for the years ending August 31, 1866 and 1867, have been as follows:

	1865.	1866.
From passengers	$909,352 21	$941,536 18
" freight	630,911 69	625,992 72
" expresses	47,401 39	114,007 61
" rents etc.	4,138 84	3,798 08
	$1,591,804 13	$1,685,334 59
Expenses, viz:		
Repairs of road and bridges, including new bridges	$297,885 93	$255,780 32
Wood coal and oil	151,517 31	117,382 08
Material and labor on engines and cars, including new	189,118 75	257,347 31
Transp. account and general expenses	281,156 27	286,669 80
Station repairs and improvements, including new structures	31,889 35	62,786 95
Lost and damaged goods, gratuities, etc	6,753 91	2,552 44
	$958,321 52	$982,518 90
Interest	52,480 92	48,285 81
Taxes, State and National	121,805 08	110,532 99
	$1,132,607 52	$1,141,337 70
Balance of earnings	$459,196 61	$543,996 89

The gross earnings of the past compared with those of the preceding year, show an increase of $93,530 46; with an increase in operating expenses of $24,197 38—making the increase in net earnings $69,333 08. The balance remaining, after the payment of interest and taxes, is $84,800 28 in excess of the previous year.

The number of miles run by passenger trains during the year was 299,120; by freight trains, 203,778; by other trains, 43,215—total, 546,113, an increase over the previous year of 48,111 miles, 25,856 of which is attributable to the new night express train, and a portion of the remainder to the new train between Meriden and New Haven.

The total number of passengers carried on the road during the year was 951,628, which exceeds by 22,171 the number carried during the preceding year.

The total number of tons of freight carried was 354,240, which is 1,319 tons more than during the previous year.

The receipts from passengers are $32,183 97 larger than those of the preceding year. The receipts from expresses also show an increase of $66,966 21. The receipts from freight are $4,918 97 less. The President in his report, says:

Our ordinary freight earnings have, undoubtedly, been somewhat reduced, in consequence of the largely increased facilities which have been accorded to the express companies, not only on our passenger accommodation trains, but by running, in connection with the other roads between New York and Boston, a through night train, solely for the business of the two express companies, whose competition has diverted considerable quantities of freight from our regular trains, at prices which can hardly be remunerative or permanent. It may become a serious question with the officers of the company, how far they are called upon to encumber passengers, stations and trains, with common freight, for the purpose of subserving a competition of this character, which, although it may be of temporary advantage to the public, is of very doubtful permanency.

We are gratified to be able again to report to the stockholders, that the operation of the road during the year past has been unattended by any serious accident; and in this connection, to acknowledge the obligation of the Board, as well as of the stockholders, to the Superintendent, for the ability, fidelity and industry with which he has so long discharged the duties of his responsible position, and to the other employees in his department, who have aided in the successful results of the operation of the road.

We have continued, during the year, to make additions to the equipment of the road, to meet its increasing business with economy and without embarrassment. Twenty freight cars and one baggage car have been built in our shops, which, with twenty mentioned in our last report as just delivered, but paid for during the year just ended, make an addition of forty during the year. One switching engine for the Springfield station, and one first class passenger engine, built in our own shops, and one first class freight engine purchased, have been added to our rolling stock, and their cost, as well as that of the cars, are included in the accounts of current operating expenses.

The very rapidly increasing business at Meriden station made it necessary to enlarge our accommodations in depot grounds, side tracks, and other conveniences at that point, and we have consequently been subjected to a very considerable expenditure for that purpose, including the construction of a new engine house and turn-table, besides extensive grading and construction of new side tracks; and, with a view to the better accommodation of this active business community, we have placed an engine there, which makes two daily round trips between Meriden and New Haven, one for passengers and one with freight, which affords desirable conveniences to the people of Meriden, and at the same time relieves our through freight trains of a large amount of freight, which, under the old arrangement, was left by them there, the trains then proceeding north, in many cases with only a partial load. The expenses of these, as well as all other additions or improvements to the road and its equipment during the year, have been included in the accounts of the current charges against the gross income for the year.

A neat and commodious passenger building has been erected at North Haven station, upon the ground previously occupied by a building belonging to other parties, recently burned, in which the company had rented rooms for the accommodation of passengers.

The freight house at Springfield, affording very inadequate accommodations for the business so largely increased since its construction, and its condition being dilapidated and its location inconvenient, a new building, in a better location, and more suited to the present business of the company, has been under construction during the present summer, and is now nearly completed. The building is three hundred feet in length, with a two story elevation at the end, furnishing convenient offices for the agent and other employees, and, when ready for occupancy, will afford greatly improved facilities for the transaction of the company's business at that important station.

The long continued high water in the Farmington River during the early part of the season delayed the commencement of the work at the new bridge over that stream at Windsor till late in July, and the frequency of rains since that date has greatly retarded the progress, and somewhat increased the cost of that work. It is now, however, far advanced towards completion; all the arches except two are closed, and it is expected that those will be closed during the present week. The finishing work will then be pushed forward vigorously, and it is confidently expected that the trains will pass over the bridge by the first of November next.

We have not as yet succeeded in making any satisfactory arrangement with the General Post Office Department, for compensation for mail service, and are therefore without pay for that service from July 1st, 1865, to the present time.

Our relations with the New York and New Haven Railroad Company remain without change. Our suit is awaiting its turn in the Court of Appeals of the State of New York.

It becomes our melancholy duty to announce formally in this report to the stockholders an event, which has, through other sources, already come to their knowledge, to wit., the decease on the 10th day of May last, after a lingering illness of more than two years, of our late President Charles F. Pond, Esq., who for more than twenty years had presided over the affairs of this company. That period forms an era in the history of this corporation. To trace its progress from its position in 1844, with its $99,632 70 of gross annual receipts, to its more than $1,680,000 of gross earnings during the past year, would be an interesting study, but its details would exceed the limits of this brief report. It is sufficient for the present purpose to call attention to the almost unexampled growth of a business of this character under the administration of one individual, and no stockholder will hesitate to unite with us, in ascribing to the constant supervisory care, the wise foresight, the energetic will, and the eminent ability of Mr. Pond, a large portion of the ever increasing prosperity of this corporation, from the day on which he first assumed the charge of its interests to the day when Providence saw fit to remove him from them. Those who succeed him may well be thankful, if they are so fortunate as to maintain for the company its present condition of prosperity, without diminution. The stockholders of the company owe to the memory of Mr. Pond a large debt of gratitude for his eminent services in their behalf.

At the regular meeting of the Board holden on the 19th day of June last, W. P. Burrall who, as Vice President, had during the long illness of Mr. Pond, practically discharged the duties of the Presidency, was elected President to fill the vacancy occasioned by the decease of Mr. Pond.

The income of the company from all sources during the past year has been as follows:

Cash on hand September 1, 1866	$115,992 76
Earnings of the road	1,685,334 59
Sales of real estate	2,605 00
Total	$1,803,932 35
Disbursed as follows, viz:	
Dividends	$368,267 00
Interest	48,285 81
Operating and repairing road	975,530 51
Real estate	7,300 00
State and National taxes	110,532 99
Steamboat "Orient"	4,120 50
Contingent fund—Fire damage	4,220 81
180 shares N. B. & M. R. R. Co	9,000 00
Balance due from do	66,265 72
Increase of debts due the Co	48,515 95
Cash on hand	166,963 06
Total, as above	$1,803,932 35

The following from the Ledger presents a general statement of the affairs of the company September 1, 1867:

Capital stock	$3,000,000 00
Bonds	927,000 00
Contingent fund	490,846 95

Treasurer.—C. M. Pond.

Secretary.—S. P. Conner.

Superintendent.—E. M. Reed.

New York and Boston Air-Line Railroad.

The New Haven *Courier* says that the great Air-Line route, which shortens the distance between New York and Boston 27 miles, is the most important route in the State which is yet unbuilt. On the 11th inst., the citizens of Middltown voted, in town meeting, by 371 yeas to 92 nays, to loan the road $200,000, and this vote, it is said, will secure the construction of the road from the New Haven depot to the east bank of the Connecticut at Middletown, where it will await the action of the next Legislature for permission to cross the river and proceed on its way to Willimantic and Boston.

Central Park, North and East River R. R.

The annual meeting of the shareholders of this company was held on the 15th inst. From the report which was presented and accepted, it appears that the total number of passengers carried was 9,026,890—of which 8,671,153 were adults, and 355,787 children. The total number of trips made, 151,407. Average number of cars per day, 73. Average earnings per trip, $3.49.

Total amount received from pass	$528,092 75
Sales of manure	3,199 87
Sales of old iron, &c	622 59
Total	$531,915 21
Deduct amount paid for running exp.	440,692 89
Amount of running profit for the yr..	$91,222 32
Amount paid during the year other than running expenses	$120,743 79
Deduct amount of running profit	91,222 32
Which gives a loss over all of	$29,521 47

The total number of horses on hand at the commencement of the year 1866 was 988; during the year 261 were bought; 279 were lost, and on September 30 of this year there was on hand a total of 970. The total cost of the horses now owned by the company was $186,780. The average price paid for horses has been $156 51, and the average price received for horses sold $31.65.

The following gentlemen were elected directors: Isaac Bell, James Bowen, A. Curtiss, P. G. Washington, A. L. Brown, Thurlow Weed, C. C. Clark, W. B. Anthony, C. H. Tucker, Lucien Birdseye, H. W. Smith, Wm. M. Tweed, W. R. Stewart.

Franklin Railroad Extension.

A corps of engineers, of which Maj. Edward Watts, of this place, is chief, commenced on Monday the experimental survey of the route between Hagerstown and Williamsport, for an extension of the Franklin Railroad to that place. The fine weather favors the operations of the engineers and we may reasonably look for the permanent location of the road and commencement of the work at an early day. Within less than a year from now the cars will, in all probability, be running to Williamsport. This extension is designed to be chiefly a coal road.—*Hagerstown Mail.*

British Iron Trade for 1866.

The quantity of iron ore produced in this country last year, was 9,665,012 tons, about 300,000 tons less than the quantity returned in 1865. In the same period the quantity of pig iron made was 4,530,051 tons, or 289,203 tons less than the production of our blast furnaces in the previous year.

The following is a general summary of our iron ore produce during the year 1866:

	Quantities. Tons.	Value. £
Cornwall	18,683	6,786
Devonshire	40,671	12,504
Somersetshire	35,323	17,061
Gloucestershire	162,129	72,982
Monmouthshire	69	15
Herefordshire	115	54
Wiltshire	75,645	30,258
Oxfordshire	1,552	543
Northamptonshire, &c	476,981	118,940
Lincolnshire	175,720	41,733
Shropshire	285,907	71,477
Warwickshire	18,750	4,687
Staffordshire, North	612,243	206,530
do. South	599,000	164,726
Derbyshire	329,500	82,375
Yorkshire { North Riding	2,809,061	741,197
Yorkshire { West Riding	357,000	89,250
Lancashire	685,727	342,863
Cumberland	838,047	538,153
Northumberland and Durham	195,000	27,250
Wales, North	56,682	17,005
do. South	368,692	130,041
Scotland	1,587,000	396,750
Ireland	25,525	5,313
Total	9,665,013	3,119,093

Pig Iron Manufacture.—Iron Ore.—The total quantity of iron ore raised in the United Kingdom amounted to 9,665,013 07 cwts.; estimated value, £3,119,128 19s. 6d.

Foreign ore imported, 56,689 tons; Custom House value, £49,081, making a total quantity of 9,721,701 tons converted into iron.

Furnaces.—The number of furnaces in blast were 618.

Pig iron produced—	Tons.
In England	2,576,928
In Wales	959,123
In Scotland	994,000
Total production of pig iron in Great Britain	4,530,051

This quantity, estimated at the mean average cost at the place of production, would have a value of £11,309,742.

The following is a summary of pig iron produce in 1866:

	No. of iron works active.	No. of furnaces built in district.	No. of furnaces in blast.	Tons of pig iron produced.
England.

Dutchess and Columbia Railroad.

Proposals will be received by R. F. F. Moore, Engineer in Charge, at his office in Fishkill Village, Dutchess Co., N. Y., until the 24th inst., for the graduation and masonry of that portion of the Dutchess and Columbia Railroad extending from the terminus on the Hudson River, near Fishkill Landing, to Pine Plains, a distance of 43 miles. The work is light, and will be let in mile sections.

Journal of Railroad Law.

The Hanover Branch Railroad Company *vs.* William S. Coyle. Writ of Error to the Court of Common Pleas of York County, Pa. The plaintiff in error was the Hanover Branch Railroad Co., which was defendant below; and the defendant in error was William S. Coyle, who was plaintiff below.

The plaintiff below, brought his action in trespass on the case, against the Hanover Branch Railroad Co., for alleged negligence on the part of the employees of said Co., while running an engine and train of cars on the Gettysburg Railroad, by which the wagon and horses of the plaintiff were struck and injured, his goods destroyed, and himself hurt. The suit was brought on the tenth day of August, 1864. The defendants pleaded not guilty, upon which issue was joined. The case was tried before Hon. R. J. Fisher the President Judge of the District, and occupied some days. The trial commenced on the 4th December, 1865. A motion for a new trial was made in the court below and overruled after full argument.

The jury rendered a verdict for the plaintiff, for $1,524, on 13th December, 1865.

The following is a history and statement of the case:

The plaintiff below, William S. Coyle, lived in Carlisle, Penna., and traveled as a pedler, with a wagon and two horses, selling merchandise of various descriptions. He was engaged in this business for some years; was frequently at Hanover, Penna.; knew all the railroads in the neighborhood, and the usual times for arrival and departure of the cars.

The Hanover Branch Railroad Co. was incorporated to make a branch road, extending from the Northern Central Railway, at a point called the Junction, to the town of Hanover, a distance of about twelve miles. This road was made by the company some years ago, and has been in operation since, connecting the town of Hanover with the Junction by daily trains both ways. The time of arrival at Hanover depended on the time of departure from the Junction, and this again depended, within certain extreme limits, upon the time of the arrival of the trains of the Northern Central Railway.

Some years after the Hanover Branch Railroad had been in operation, a company was incorporated, to make a railroad from Hanover to Gettysburg, a distance, by the surveyed route, of about seventeen miles. This road was constructed, equipped, and worked by the Gettysburg Railroad Co., having its regular stations, warehouses and agencies on the road, and its trains of cars running in connection with the trains on the Hanover Branch Road.

The Gettysburg Railroad Co. became much embarrassed, and a Sequestrator was appointed, who was also the President of the company.

Reasons of economy and convenience induced the Sequestrator, and the Gettysburg Railroad Co. to make an arrangement with the Hanover Branch Co., by which they engaged the use of the engine and cars on the latter road, to do the transportation on the Gettysburg road. It had been the practice, of course, at the terminus of the Branch Road, at Hanover, to unload passengers and freight, and such as were to pass over the Gettysburg Road were put into their cars. Both companies, however, were in the habit of getting cars, on many occasions, from the Northern Central Railway Co. Under the arrangement referred to, the trains carrying passengers and freight stopped at Hanover, and after necessary changes, the engine and cars, with the same employees on it, moved on to the Gettysburg Road, doing the transportation on that road, under the orders of that company, or its sequestrator and president, they receiving all the emoluments at their ticket offices or stations, and the way fares directly from the conductor, and keeping full possession and control of their road. The agreement referred to is in writing, bearing date the 26th March, 1863.

It was a cold day, the 6th of January, 1864—snow on the ground—the wind blowing from the northwest, and spirting snow in the air—not quite clear nor cloudy, that the plaintiff below, muffled up in his wrappings, sitting back under the front cover of his pedlar wagon, drove at a slow pace out of Hanover, northward, on Carlisle street, to the crossing of the Gettysburg Railroad, at the hour of the passing of the train at that point, on its way to Gettysburg. The train started from the station on the east of the traveller, about 575 yards from the crossing. There were various openings between the houses on his right, through which the station house, the trains there, and large parts of the railway, might be seen by him from the street, if he chose to look.

There was evidence that the usual amount of noise was made before starting, and the accustomed signals were given before reaching the crossing; and there were also witnesses produced who stated that they did not hear them. The concurrent testimony on both sides, however, showed that the plaintiff sat leisurely back in his wagon, approaching the crossing without stopping, and without paying the least attention to the cars, having his face inclined another way. His first witness in chief, who was near the crossing as he approached it on the opposite side, said: "I saw the cars coming at the distance of about one hundred yards. I also saw Mr. Coyle coming along the Carlisle road. He was so muffled up with his coat, comfort and buffalo robe that I supposed he could not see my signal, which I made with my hand. He, Mr. Coyle, was sitting on his box or seat in the wagon. He was sitting with his face inclined to the left."

The plaintiff drove directly upon the track, and his wagon was caught by the locomotive and carried about 90 steps. Some of the goods were scattered on the road; one of the horses was injured; the wagon was partially broken, and the plaintiff was slightly hurt; but no bones were broken, and he was able to give directions about his goods. The great preponderance of the testimony showed that the cars were going at their usual speed at that point, being about 6 or 8 miles an hour.

The defendants below contended that there was no evidence of negligence in the management of the train, but that there was conclusive evidence of negligence on the part of the plaintiff. They also contended that they were not the proper parties to be sued, but the action, if any, should have been against the Gettysburg Railroad Co. Some questions of evidence also arose in relation to the declarations of the engineer on the subject of the collision, and to other matters.

Several points were submitted by the company, on which the court charged as stated below. There was no other charge given, beyond, perhaps, a mere statement of the names of the parties, and what the suit was about, and no other was filed.

The plaintiff presented no points. The following are the defendant's points:

The court is respectfully requested to charge the jury, and to file the charge in writing, upon the following points:

1. That if the jury believe that the want of proper care and caution on the part of Coyle, the plaintiff, in attempting to cross the railroad, had anything to do in bringing about the accident of which he complains, he cannot recover in the suit, and their verdict must be for the defendants.

2. That in order to enable a plaintiff to recover in a suit for being struck by a railroad engine on the track, he must show a case of unmixed negligence on the part of the railroad company or its engineer, without any negligence on his own part mingled with the negligence of the company or its engineer.

3. That the jury are not to consider as the sole or the decisive inquiry, whether there was negligence on the part of the railroad company, or of its hands on the engine, at the time of the accident, but if even they should think that there was any such negligence, they must go further and inquire whether Coyle, the plaintiff, was wholly free from negligence on his part, and if they believe from the evidence that Coyle, the plaintiff, was wholly free from negligence on his part, and if they believe from the evidence that Coyle, the plaintiff, contributed by his own carelessness, to his injury, the law will not adjust the balance between them, nor award damages to either for the result of their compound negligence, and the verdict must be for the defendants, although they or their agents may have been in fault, and in greater fault than Coyle himself.

4. That it was the duty of Coyle, the plaintiff, in driving up to the crossing, to use all reasonable care and opportunity to find out whether a train of cars was also approaching it at the same time. It would have been proper for him to have stopped his wagon at the first point from which he might have had a view of the railroad, as stated in the testimony, on both sides within a few hundred feet of the crossing; to have listened to hear the whistle or noise of the engine or cars, and to look to see if an engine or train was coming; if he neither heard nor saw anything to indicate the approach of either, it was proper that he should not have ceased his efforts, but should have continued them at each of the points of view of the railroad mentioned in the testimony as nearer to the crossing; and if the jury believe that he neglected to take all or any of these precautions, but drove carelessly on to the crossing without stopping—paying no attention to any warnings which may have been given him, until his wagon was struck by the engine; and this conduct, on his part helped in any degree to occasion the accident, their verdict must be for the defendant.

5. That if the jury believe that Coyle, the plaintiff, was somewhat deaf, there was a necessity on his part to pay greater attention to any warnings which he might have heard, or seen before the collision, and the misfortune of his deafness is

not to be visited on the defendants; nor were their duties any greater on his account in this case, than their duties to any other person in any similar case.

6. That if the plaintiff could sustain any action at all, it would be against the Gettysburg Railroad Co., on which the collision occurred, and not against the Hanover Branch Railroad Co., the defendants.

7. That if the Gettysburg Railroad Co., was at the time of the collision under the management of themselves, or their trustee, or their sequestrator, they or he receiving all the profits of passengers and freight, while hiring by the month, or otherwise, their motive power from the Hanover Branch Railroad Co., and their freight cars from the Northern Central Railroad, if there be any liability for the alleged collision, the Gettysburg Railroad Co., and not the Hanover Branch Railroad Co., are responsible for it; and, therefore, the plaintiff cannot recover in this suit.

8. That upon the evidence in the cause the plaintiff is not entitled to recover.

The following is the charge of the court:

Answer to 6th point: The court cannot answer this point in the affirmative. We say if plaintiff is entitled to recover for the injury complained of, he can recover against the defendants in this action.

Answer to 7th point: If the facts stated in this point are sustained by the evidence, taken in connection with the article of agreement between the Gettysburg R. R. and the Hanover Branch Railroad, they cannot prevent the recovery of the plaintiff if he is otherwise entitled to recover.

Answer to 1st point: This point is correct. We answer it in the affirmative.

Answer to 2nd point: We answer this point in the affirmative.

Answer to 3d point: We answer this point in the affirmative.

Answer to 4th point: We answer this point in the affirmative. But in so doing, we do not affirm the facts stated to be proved; whether they are or are not is for the jury to decide from the evidence. It is their duty to decide from the whole evidence all the facts, which are made and are disputed. Negligence is a fact to be decided by the jury from the whole evidence, and all the circumstances attending the case. Negligence is the want of that care which men of common sense and common prudence ordinarily exercise in their employments and business of life.

Answer to 5th point: The court answer this in the affirmative.

Answer to 8th point: We cannot answer this point in the affirmative. The evidence is for the jury, and they must decide what the facts are, and what credence is to be given to the witnesses.

The errors assigned were to the charge upon the 4th, 6th, 7th and 8th points of the defendant below, and to the admission of certain evidence noticed in the opinion of the Supreme Court.

The opinion of the Court was delivered by AGNEW, J.

Upon a careful examination of the testimony in this case, it is impossible to shut our eyes to the fact that the jury were permitted to find a verdict for the plaintiff contrary to the evidence, and the instruction of the learned Judge. But the remedy was by granting a new trial and not a writ of Error. Whatever may have been the negligence of the Railroad Co., (and it is a question upon the evidence whether there was any,) it seems to be very clear that Coyle, the plaintiff, approached the crossing of the railroad muffled up, sitting within the covered top of his wagon taking no notice of the railroad, which he well knew, for he had often crossed it before, and drove slowly upon the track without stopping, or looking out, so far as anything in the evidence discloses the fact to us. It also shows that at this point a traveler passing in the direction Coyle was going cannot see up and down the track in consequence of the position of Kohler's house until he has gotten within sixteen feet of the track. It is very manifest therefore, that Coyle was guilty of negligence in omitting to stop and look out for the cars.

But the Court answered the first five points of the defendant, all bearing on the negligence of Coyle, in the affirmative and giving to the jury proper instructions which under the evidence ought to have led to a verdict for the defendants. The error was not that of the Court but of the jury, which ought to have been corrected by setting aside the verdict. This, however, admits of no remedy here.

The defendants complain, however, that the Court qualified the answer to the 4th point in such manner as to mislead the jury. We cannot perceive any error. The Judge did not qualify the instruction, but merely submitted the fact upon which the instruction rested. It is true, that he also added that negligence is a fact to be decided by a jury from the whole evidence and from all the circumstances, and is the want of that care which men of common sense and common prudence ordinarily exercise in their employment and business of life. But this is in no wise qualified by the instruction already given, especially that part of the answer to the 4th point, which assumed that if the jury believed Coyle neglected to take all or any of these precautions, but drove carelessly by on to the crossing without stopping, paying no attention to any warning which may have been given him, until his wagon was struck by the engine, and this conduct on his part helped in any degree to occasion the accident, their verdict must be for the defendant.

The paper book discovers* no bill of exceptions to the testimony referred to in the fifth assignment of error. But if it did we cannot say that the declaration of the engineer was no part of the *resgesta*. It was made at the time of the accident in view of the goods strewn along the road by the breaking up of the boxes; and seems to have grown directly out of, and immediately after the happening of the fact. The negligence complained of being that of the engineer himself, we cannot say that his declarations made upon the spot at the time, and in view of the effects of his conduct, are not evidence against the company as a part of the very transaction itself. The same remarks apply to the evidence contained in the sixth error.

That portion of the evidence admitted as stated in the seventh error, to wit., the annual amount of Coyle's sales and the profit he made thereupon, bore directly upon the question of damages, as affording a means of computing his loss for the time he was confined by his injuries and prevented from carrying on his business. It tended to show the amount he might have earned by his employment if he had been able to attend to it.

The action was properly brought against the defendants. The train was theirs, and the engine their servant, and they were the carriers. The division or appropriation of the profits could furnish no criterion of liability in such a case, especially when, as here, by the very terms of the agreement between the two companies, the defendants were to suffer any loss which would be incurred by such an accident. Finding no error in the record the judgment is affirmed.

And now, to wit., July 3, 1867, the judgment of the Court of Common Pleas of York County in the above stated case is affirmed.

* This is erroneous, See 3 and 4 page appendix to paper book.

Central Pacific Railroad.

The United States Commissioners have finished the inspection of the section of the Central Pacific Railroad, west of Cisco. They carefully examined the grade, culverts, bridges, &c., and pronounce the section twenty-five per cent. better constructed than any portion of the road previously accepted. Over the section there is already four miles of roofing, and two and a-half additional will be built this fall. The Commissioners recommend its acceptance by the Government. The Commissioners have commenced a primary inspection of the road two miles east of Cisco. From Coburn's Station, east the cars are running 8½ miles, and construction trains are laying the track at the rate of 1½ miles daily. The section will be completed in thirty days. The intermediate section over the summit will not be completed for transportation purposes until early spring, although the company expect to lay the track before winter. By August next cars will be running to Truckee river, near Crystal Peak, while a considerable portion of the road will be graded towards Humboldt.

Lake Shore Railway.

The consolidation of the Cleveland, Painesville and Ashtabula and the Cleveland and Toledo Railroads has been consummated on the basis of

$5,000,000 Ashtabula stock at 175 .... $8,750,000
$5,000,000 Toledo stock at 125..... 6,250,000

Making for the "Lake Shore Railway" $15,000,000 in capital stock, with a combined (original) mortgage debt of $4,372,861.

☞ We learn from St. Louis that the Fund Commissioners of Missouri have directed the officers of the Bank of Commerce, of New York, to apply the State funds now in their hands to the payment of the past due coupons on the State bonds. The balance to the credit of the State in the Bank of Commerce is over two and a half millions.

☞ The bids for the $500,000 State of Georgia 7 per cent. bonds were opened on the 12th inst. The amount bid for was $924,000—at prices ranging from 80c. to 85c., except one bid of $5,000 at 75c. and one of $20,000 at 75c. and interest. The accepted bids were 82c. and above.

☞ The preliminary work on the Costa Rican Inter-Oceanic Railway is said to be progressing favorably.

American Railroad Journal.

Saturday, October 19, 1867.

Stock Exchange and Money Market.

Money was comparatively easy and in less urgent request up to Monday at the rates named in our last; during the last two days of the week, under review, however, the speculative demand became quite brisk, and call loans closed up sharply at 7 per cent. as the minimum rate of the street. The discount applications were quite extensive, likewise. Only the very best names met with favor at bank at 7½@9 per cent. per annum, scarcely anything passing as low as the legal rate. The cash balances of the Sub-Treasury are increasing again. They are now some six millions higher than they were a week ago. Part of this increase has been derived from regular sources of income, part of it also from further sales of coin on account of the Government. The Assistant Treasurer announces that the Department is prepared to accept Seven-thirty notes of the June or July issues in even exchange for the Five-twenties of 1867, or if preferred the Five-twenties of 1865, charging interest upon the bonds from July 1, to date of conversion, at 6 per cent. in currency, and allowing the accrued interest on the Seven-thirties. The city banks, in their last week exhibit, showed a decrease of $101,236 in loans and discounts, $738,663 in legal tenders, $19,540 in circulation, $1,341,788 in net deposits, and an increase of $235,168 in specie. The specie reserve of the banks is now $9,603,771, against $5,576,092 same time last year. The city bank deposits are now $177,135,634, against $226,858,897 week ending Oct. 6, 1866. The legal tender reserve amounts to $56,114,922, against $83,180,422 same time last year. The circulation now stands at $34,006,041, against $30,176,908 same time last year. The loans are now $247,833,133, against $276,443,219 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $97,922,045 a day, against a daily average of $95,031,270 the preceding week, and $100,114,785 the week ending with Sept. 21. The current week's exchanges average about $101,500,000 a day.

National Bank notes to the amount of $66,600 were issued last week, making the total issue to 1,671 banks thus far, $304,095,911, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $4,969,345, leaving, with the existing 1,648 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date, of $299,126,566. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,643,250; and for the public deposits, $38,318,450—making a total of $378,961,700. The Treasury Department last week redeemed and destroyed $407,800 of worn and mutilated fractional currency, and issued $606,974 of new.

The Philadelphia Bank movement the past week shows a decrease in loans, of $521,043; a decrease of $11,589 in specie; a decrease in legal tenders of $529,986; a decrease of $513,525 in deposits; and an increase of $475 in circulation. The Bank Clearings show a decrease of $2,217,912, and the balances, a decrease of $755,088.

The U. S. Sub-Treasury receipts, week ending with Oct. 12, were $18,251,349, including $2,219,156 from customs duties; payments, $14,805,539; balance at the close of the week, $109,200,019, against $105,754,210, at the close of the preceding week, showing an increase of $13,445,809. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,940,799 including $339,659 from customs; and payments, $3,421,326; on Tuesday, receipts, $3,395,424 including $450,000 from customs, and payments, $1,427,322. The balance at the close of business on Tuesday stood at $111,647,493, against $107,497,591 a week previous.

Government revenues have been on a restricted scale, since our last. The excises, last week, yielded $2,600,000, against $6,571,397 the preceding week; customs at the port of New York $2,219,156, and at the outports, about $650,000 (in coin) more, making the grand total income for the week equal about $6,976,000 in currency. The

total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $67,000,000.

Government received $5,544,035 from customs, through the port of San Francisco, from Jan. 1, to Sept. 16, 1867.

Gold has been more abundant in the open market, and has fallen to 143. The latest sales on Wednesday were at 143⅜. The speculative call has been less confident. The demand for Custom House and mercantile purposes has been lighter. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,627,800, against $8,253,183 same time last year. The customs demand for Gold last week, averaged $369,859 a day; thus far, this week, it has been equal to $432,000 a day, or equal to a weekly aggregate of $2,592,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $128,074, and from California, none. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $99,039,480, against $109,638,636 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $23,855,604, against $33,923,655 same time last year, showing a decrease this year, of $10,968,051. The exports of specie from this port, last week, were $473,478. The total outflow of specie from the port, since Jan. 1, 1867, has been $43,922,690, against $54,113,933 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $35,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $43,868,924, against $31,905,489 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to Sept. 16, reached $30,139,284, against $32,473,036 same time last year, showing a decrease, in 1867, of $2,333,792.

A much more liberal supply of foreign exchange has been available to buyers, and sterling drafts have been quoted lower, on a less active market. Bankers' 60 day bills on London closed at 108⅞@109¼, and on Paris to 5.17½@5.16¼; sight bills on London to 109⅜@109¾; and on Paris to 5.15@5.13¾. The offerings of produce bills have been this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,134,082, making the total value of exports since Jan. 1, 1867, $142,909,242, against $150,544,644 same time in the preceding year.

Government securities have been expressed by forced sales, partly on speculative account, and prices have given way considerably. The lowest figures of the season were made on Tuesday. Wednesday witnessed a partial revival of the demand from investment sources, and there was a slight rally in values, the market closing somewhat buoyantly. U. S. sixes of 1881 closed here on Wednesday at 111¾@112; U. S. Five-twenties of 1862, 112@112½; U. S. Five-twenties of 1864 at 108¾@109; U. S. Five-twenties of 1865 at 109@109⅛; U. S. Five-twenties of 1865, consolidated, 106⅝@106¾; U. S. Five-twenties of 1867, 106⅝@106¾; U. S. Ten-forties at 100⅜@100½, and U. S. Seven-thirties at 105@105⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864	118⅝	September, 1865	115¾
May, 1865	117¼	October, 1865	115⅝
August, 1865	116⅜		

Government is now retiring the October 1864 compounds, which matured on Tuesday, the 15th inst., partly by direct purchases, and partly by the exchange of the three per cent. certificates, recently authorized for this special purpose.

Much excitement was occasioned by the discovery of counterfeit thousand dollar notes of the June Seven Thirty series, some days since. Thus far some eighty of these notes have reached the Treasury Department, in the retiring process. The Department claims reclamation from the bankers, who sent them in for redemption, but who decline to comply with the demand.

The general Stock Market has been decidedly active, but variable in price, with rather wide fluctuations chiefly on Erie. The closing transactions on Wednesday indicated a feverish and irregular market.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 1.	Oct. 9.	Oct. 16.
Consols	94 7/16	94¼	93⅞
U. S. 5-20's of 1862	72½	71 11/16	71¼
Erie	42	43⅛	46¼
Ill. Central	77½	77⅜	78

General business has been quite brisk, in a few branches, chiefly in the line of breadstuffs, prices of which have advanced, on an active export and speculative call. Provisions have been depressed in price. Cotton has been more freely offered and purchased opening at lower, and closing at firmer prices with middling grades on Wednesday at 19½@21½ cents per lb. as extremes. The stock of cotton now here is estimated at about 40,000 bales. The receipts at the port this week, have averaged about 2,500 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales last year; estimated stock at close of year, 80,296 bales, against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 65,000 bales, against 59,000 bales same time last year; exports, same time, 13,500 bales, against 51,300 bales same time last year; stock on hand at latest dates, 82,500 bales, against 198,000 bales same date last year. Foreign merchandise has been less in moderate demand at irregular, and in instance of Dry Goods, generally depressed prices. The total imports of foreign dry goods, last week, were $1,665,807, and the total amount marketed $1,533,588. The value of foreign merchandise imported last week, was $2,256,193—making the grand total specie value of last week's imports of dry goods and merchandise, $4,191,500, and since Jan. 1, 1867, $198,228,013, against $234,801,422 same time in the preceding fiscal year. The ocean freight market has been quite active, since our last, and decidedly firmer with 571 vessels of all classes in port. For Liverpool we quote flour at 3s.@3s. 3d. per bbl.; grain at 11c.@11¾d. per bushel; cotton at ¼@⅜d. per lb.; and heavy goods at 30s.@40s. 6d. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Oct. 15, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,285,710	$3,134,082
Prev. reported	148,258,934	139,775,160
Since January 1	$150,544,644	$142,909,242

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,995,336	$1,665,307
Gen. merchandise	1,938,818	2,526,193
Total for the week	$3,934,154	$4,191,500
Previously reported	230,867,268	194,036,513
Since January 1	$234,801,422	$198,228,013

The balance in the Sub-Treasury on Wednesday was $113,230,799 09.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Galena and Chicago 2d mort., 100; Long Dock bonds, 98; Ohio and Mississippi 1st mort., 88½; N. Y. State 6s, 1873, 100; do., 5s, 1875, 90; do., 7s, Bounty Loan, 107¼; Brooklyn 6s, W. L., 95½; Tennessee 5s, 60; Georgia 7s, 82½; Boston, Hartford and Erie, 15½; Sixth Avenue R. R., 125; Chicago and Great Eastern, 17; N. J. Central, 120½; Hannibal and St. Joseph, pref., 63; Adams' Express, 63; Am. North Carolina Railroad Co.

At the annual meeting of the stockholders of this company held at Goldsboro', N. C., on the 12th of July, 1867, a resolution was adopted authorizing the President and Directors to mortgage the franchise and real and personal property of the company for the sum of $1,500,000, for the purpose of raising money for paying off the present liabilities, and making such future improvements as may from time to time be required; and authorizing the president and directors to issue coupon bonds signed by the president, and under the seal of the corporation, to an amount not exceeding $800,000, in sums of $500 and $1,000 each, and payable in 5, 10, 15 and 20 years, bearing interest at the rate of 8 per cent. per annum, payable semi-annually at the office of this company, and that no further issue of bonds be made under said mortgage except with the consent, and by the express order and resolution of the stockholders. We give elsewhere an abstract of the report of this company for the fiscal year ending May 31, 1867.

☞ Subscriptions to the amount of $213,000 having been made to capital stock of the Woodstock Railroad, the stockholders have instructed the directors to put the road under contract at once, and proceed with its construction as rapidly as possible. The road will be 13 miles in length, extending from Woodstock, Vt., to White River Junction.

☞ The Savannah *Republican* says that the affairs of the Selma, Rome and Dalton Railroad Company are improving. It is promised that the road shall be completed to Rome, by the first of December, 1868, and as speedily thereafter to Dalton, as possible. This link will complete the most direct connection between New York and New Orleans.

☞ The Pit Hole, Reno and Oil Creek Railroad was sold at auction at Philadelphia on the 15th inst., for the benefit of the creditors of the late firm of Culver, Reno & Co. It cost originally $1,053,000 and was purchased by Hon. Galusha A. Grow, for New York parties, for $121,000.

☞ A survey has been made for an extension of the Great Falls and Conway Railroad to Wolfboro', N. H.

☞ The Kansas Pacific Railway was completed to Hayes City on the 11th inst.

New British Railway Law.

An act was passed on the day of prorogation of Parliament designed to protect the rolling stock of railways from creditors. Where judgment has been obtained an application may be made for the appointment of a receiver, and if necessary of a manager, on application by petition in a summary way to the Court of Chancery, and all money collected by the receiver, after due provision for the working expenses of the railway, and other expenses, to be applied and distributed under the direction of the Court in payment of the debts of the company. Where a company cannot pay their debts, the directors may prepare a "scheme," and apply to the Court of Chancery. The scheme is to act as a stay to legal proceedings, and on certain assents the Court may confirm said scheme, and it is to have the same force as if sanctioned by Parliament. Alterations have been made as to loan and share capital, and, as to the purchase of land, the surveyor to value the same is now to be appointed by the Board of Trade, and a valuation to include the amount of compensation for damage and injury.

Plastic Slate Roofing.

Wa invite attention to the Advertisement of the Plastic Slate Roofing Joint Stock Co., in another column. Plastic Slate is made of very finely pulverized Slate rock, mixed to a paste with raw coal-tar, and spread with a trowel. It solidifies by solar heat, and becomes real slate again without any change in its dimensions. It is not combustible at any time, is a bad conductor, and requires intense heat from other bodies to raise it to a red heat. It is being used in nearly every State of the Union for all kinds of buildings. A variety of specimens of this Slate are now on exhibition at the Fair of the American Institute.

☞ The earnings of the different Express Companies in 1867 and 1866, from Jan. 1 to Aug. 31, eight months, have been as follows:

	1867.	1866.
Wells-Fargo (7 months)...	$671,772	$595,782
Adams	2,329,558	2,595,133
United States.....	1,480,136	2,429,670
American	1,431,848	2,249,495
Merchants' Union	2,382,044	New.

☞ We learn that work on the Paterson and Newark Railroad, which has been suspended for several months, has been again resumed, the Board of Directors having obtained a cash subscription of over $300,000 from a firm in New York. Sealed proposals are called for the grading and masonry work of the road from Second River, in Belleville, to Paterson.

☞ The New Haven *Journal* says that the recent action of the Erie Railway Company ought to insure the continuation of the Boston, Hartford and Erie Railroad from Waterbury to Newburgh, and its connection with the Erie, thus opening a new route through Western Connecticut, and developing the resources of Litchfield county.

☞ The Augusta, Ga., *Constitutionalist* says that a meeting of the stockholders of the Port Royal Railroad was held in that city on the 8th inst., and that "there is every prospect of an early completion of this road. Northern capitalists have invested, and it is advisable that stockholders in the South, who are able, should retain there shares."

Railroad Earnings.--Weekly.

The earnings of the Chicago and Alton Railroad for the first week ending Oct. 31, 1867, were $98,194 00
Corresponding period previous year... 82,996 00

Increase..... $15,198 00

The earnings of the Western Union Railroad for the first week in Oct., 1867..... $27,322 95
Corresponding week previous year.... 20,503 96

Increase $6,818 99

The earnings of the Atlantic and Great Western Railway for the first week in Oct., 1867, were..... $103,764 00
Corresponding week previous year... 114,696 00

Decrease $10,932 00

The earnings of the Chicago and Northwestern Railroad for first week in Oct., 1867 .$356,749 70
Corresponding week previous year .. 265,033 25

Increase $91,716 45

The earnings of the Detroit and Milwaukee Railroad for the week ending October 10, 1867, were $47,508 00
Corresponding week of 1866..... 46,124 00

Increase..... $1,384 00

The earnings of the Chicago and Rock Island Railroad for the first week in Oct., 1867, were..... $144,600 00
Corresponding week of previous year. 118,191 00

Increase $26,409 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Oct. 1867, were..... $111,932 00
Corresponding week of 1866..... 105,550 00

Increase $6,382 00

The earnings of the Michigan Central Railroad for the 1st week in Oct., 1867, were.. $103,704 94
Corresponding week of previous year. 101,191 12

Increase $2,513 82

The earnings of the Marietta and Cincinnati Railroad the 1st week in Oct., 1867..$29,227 00
Corresponding week previous year.... 24,366 00

Increase $4,861 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for the 1st week in October, 1867, were $53,387 44
Corresponding week of previous year. 52,186 18

Increase $1,701 26

The earnings of the Toledo, Wabash and Western Railroad for the 1st week of Oct., 1867, were..... $88,776 38
Same week in 1866.. ..... 88,361 46

Increase..... $414 92

The earnings of the Milwaukee and St. Paul Railway for the 1st week in October, 1867, were..... $125,206 00
Corresponding week of previous year 116,907 00

Increase $8,299 00

The earnings of the Milwaukee and Prairie du Chein Railway for the 1st week in October, 1867, were..... $85,319 00
Corresponding week of previous year. 58,545 00

Increase $26,774 00

The earnings of the McGregor Western Railway for the 1st week in Oct., 1867, were... $19,075 00
Corresponding week of previous year. 8,698 00

Increase $10,377 00

The earnings of the Minnesota Central Railway for the 1st week in Oct., 1867, were... $12,456 00
Corresponding week of previous year. 9,729 00

Increase $2,727 00

Coal Product in Great Britain in 1866.

The following is a summary of the returns of coal produced in the various colliery districts of Great Britain and Ireland during the year 1866:

	Tons.	Collieries.
Durham & Northumberland	25,194,550	297
Cumberland	1,490,481	30
Yorkshire	9,714,700	447
Derbyshire	4,750,520	150
Nottinghamshire	1,600,560	25
Leicestershire	866,560	11
Warwickshire	775,000	15
Staffordshire and Worcestershire	12,298,580	512
Lancashire	12,320,500	346
Cheshire	895,500	39
Shropshire	1,220,700	63
Gloucestershire and Somersetshire	1,850,700	114
Monmouthshire	4,445,000	100
South Wales	9,376,443	512
North Wales	2,082,000	
Scotland	12,625,000	470
Ireland	123,750	39
Total produce of the United Kingdom	101,630,544	3,170

This gives an increase of 3,479,957 tons in 1866, over the production of the previous year, and Mr. Hunt justly remarks, that this regularly continued increase in the quantity of coals raised from the collieries of the United Kingdom is a remarkable feature of the year 1866. It must be remembered that the year was marked by great commercial disturbances, and that several kinds of manufacture, and that of iron especially, were suffering from a severe depression. Notwithstanding this, it has been ascertained that upwards of 101,000,000 tons of coals were produced.

The progress of our coal extraction during the last nine years will be seen by reference to the following table, in which the total output of the collieries during each year is estimated:

Year.	Tons.	Increase as compared with preceding year.
1858	65,008,649	.....
1859	61,969,765	6,971,115
1860	84,042,698	2,062,933
1861	83,635,214	.....
1862	81,638,338	.....
1863	88,292,515	6,654,177
1864	92,787,873	4,495,358
1865	98,150,587	5,127,145
1866	101,630,544	3,479,957

The exports during the nine years have been as follows:

Year.	Tons.	Year.	Tons.
1858	6,529,483	1863	8,275,212
1859	7,006,949	1864	8,809,908
1860	7,321,832	1865	9,189,021
1861	7,855,115	1866	9,916,244
1862	8,301,852		

The foreign demand for British coal has thus been greatly extending for the last nine years, notwithstanding the increase of supplies from Belgium, France (especially the department of the Pas-de-Calais), the Ruhr, and Sarrebruck basins, &c. But, great as has been the growth of the external demand for British coal, the advance in home consumption during the last nine years has been still more remarkable. Thus, deducting the exports from the total amount of coal extracted, we arrive at the following figures as representing our domestic supplies:

Year.	Tons.	Year.	Tons.
1858	58,479,166	1863	80,017,303
1859	64,971,816	1864	83,977,965
1860	76,720,866	1865	88,961,566
1861	75,780,099	1866	91,714,300
1862	73,336,486		

The home consumption would thus appear to have increased in the nine years to the extent of 56.83 per cent.—a result attributable, no doubt, to the development of steam power, and the progress of the population in numbers, wealth and comfort. In six years the progress of coal consumption in London alone has been as follows: 1861, total quantity brought within the limits of the coal duty radius 5,232,082 tons; 1862, 4,973,823 tons; 1863, 5,127,106 tons: 1864, 5,476,426 tons: 1865, 5,909,940 tons; and 1866, 6,020,182 tons.—*London Colliery Guardian.*

North Carolina Railroad.

The earnings of this road for the years ending May 31, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$280,183 52	$201,761 82
" freight	510,214 23	301,930 37
" mails	7,993 81	14,866 66

Interest account	32,440 30	54,573 73
Maintenance of build'gs	25 048 24	28,668 76
Maintenance of bridges	35,093 63	23,774 91
Purchase of R. R. iron.	137,290 44	92,850 75
Purchase of engines & cars	65,826 20	16,623 20
Totals	$984,375 79	$690,456 33
Expenses more than earnings	$93,895 75	$92,257 33

Compared with the previous year the earnings from transportation in 1866–'67, show a decrease of $279,832 71. The earnings from all sources during the same time show a decrease of $292,281 04. The expenses are also less by $293,919 46 than those of the previous year, showing an improvement of $1,638 42.

Included in the above statement of expenses is the sum of $244,323 49 designated as "old," being for debts contracted in previous years. Excluding these, the net earnings would be $152,066 16.

The cash receipts from all sources during the year, including $10,089 94 from the previous year, and $249,082 57 from temporary loans, were $972,640 34; and the disbursements, including $76,443 57 on temporary loan account, were $954,013 19—leaving a balance of cash on hand, May 31, 1867, of $18,627 15. The net amount received from temporary loans during the year was $172,639.

The earnings of the road, exclusive of old iron sold, were $551,262 98; and the expenditures, exclusive of amounts paid for iron and equipment, $580,982 38—showing an excess of expenditure (including amounts from previous years,) of $29,719 40. Excluding "old" accounts, the excess of receipts would be $214,604 09.

The following is a condensed exhibit of the business of the company for the fiscal year ending May 31, 1867:

Assets on hand, May 31, 1866	$445,579 11
Old draft collected	405 05
Deduction on negro bonds and other war claims passed to profit and loss	24,820 24
Receipts, as above	598,199 00
Increased liabilities	27,401 67
Total	$1,096,405 07
Expenses, as above	$690,456 33
Old construction account	2,381 35
Right of way	1,000 00
Worthless debts passed to profit and loss	246,565 51
Balance on cotton account passed to profit and loss	86,166 94
Assets, as per annexed statement	69,834 94
Total, as above	$1,096,405 07

The passenger arrangements are represented as being very satisfactory both to the company and the public; and the transportation of freight has been accomplished with dispatch, safety and cheapness. The passenger cars are comfortable and some of them elegant, the engines are equal to the best, and the freight cars in good order; and so regular do the trains run that the inhabitants of the country set their time-pieces by the whistle of the engine. The road bed is in admirable condition. The work of ditching and ballasting has been carried on during the year. About 20 miles of the road bed have been graveled. Six and a half miles of new iron have been put in the track. The number of sills used has been 87,600; and of spike, 446 kegs. In the opinion of the Superintendent, about 25 miles of new iron should be put down this year, and as much more every succeeding year. The President, in his Report, says:

In the last annual report you were told that "The damaged iron and cotton will about relay the road with new iron and pay for all engines bought and other extraordinary expenses," and again "There are few or no claims of this year unadjusted, when a claim is ascertained to be due it is promptly paid." When in July, 1865, the road was occupied and controlled by the Provisional Government, there was on hand over 700 bales of cotton and a large amount of other supplies. No road in the South came out of the war in better condition, either in material or financially. And the earnings of the road during the year ending 1st June, 1866, were very large exceeding the highest estimate of its most sanguine friends. 'Tis true there were debts owing, as there are now, and will always be the case, and if anything like prudence had been exercised, you would be gratified by receiving dividends.

When in July last, I was by your renewed and continued partiality restored to my old position (for which I can never sufficiently thank you,) I found that the hands upon the road had not been paid for three months; that the claims of those who had furnished sills and wood and other supplies were daily being presented for payment; that we owed heavy debts in New York, more than $48,000, to one house alone, and that in fact several hundred thousand dollars were due, and that the most of these debts were urgent, and that suits were threatened.

The locomotive and a large portion of the iron purchased last year have been paid for this, much of the old iron was sold, and the proceeds applied to payment of debts due in New York. And all the proceeds of over 700 bales of cotton netted the paltry sum of $66,028 38, and which could have been sold at home without risk and without cost for about $140,000. Many claims for losses and overcharge were laid aside, and payment is frequently demanded upon claims, which no one at the office now, ever heard of before. Not only was spent all that was on hand, and all that was made during the year, but debts were contracted for Posterity to settle.

I was forced to raise money or your road would fall into the hands of the Sheriff, and thus you would have been bereft of this small remnant of your fortunes saved from the wreck left you by the war.

I therefore borrowed in New York city $50,000, at thirty and ninety days at the rate of one and a half per cent. a month.

With this amount the most pressing debts were discharged, and the notes promptly paid as they matured.

For this act I was mildly censured by the Legislative Investigating Committee. And I am proud to say, that this is the only thing they could lay to my charge, after investigating my official acts for over four years.

I can sufficiently demonstrate to any one who desires to know, that never was there a loan made more timely, or advantageously to the borrower.

This sum though large was but a drop in the bucket, as compared with our necessities. The Board of Directors authorized me to borrow two hundred and fifty ($250,000) thousand dollars more. A large part of it was obtained at 8 per cent. from personal friends of mine, who were also among the best friends this road ever had. And I would name them, that they might be held in everlasting rememberance by the stockholders, but fear lest they should be offended thereby.

The money thus obtained was expended in paying off our pressing liabilities. I immediately commenced a system of economy and retrenchment, discharging over 200 hands, and in every way diminishing the expenses of the road. And by pursuing the system of paying cash for everything as it was purchased (which has been almost always done) and never buying anything except what was absolutely necessary, I believe a great improvement has been effected.

An order book is now kept in the office, also a contract book, and by order of the Board of Directors no one can make a contract to bind the company unless the same is approved by the President or Board of Directors. This road should prove profitable to its owners, and by prudent management and strict economy will become so, but to effect this, some disposition must be made of your floating debt.

No president can so manage this road as to give dividends while large liabilities are pressing him. Unfortunately this is the case with this road. But there is no reason why this should continue.

I therefore recommend to the stockholders that all the outstanding liabilities of the company be funded.

By reference to the statement of the financial condition of the company, as made by your Secretary and accompanying this report the amount is $693,831 74.

There are other claims against us which do not appear upon our books, principally claims of loss and damage to persons and property. Unfortunately, there are many of these; and there is no means of judging the amount we will have to pay therefor, but estimate them at $50,000 which will make, say $750,000 of debt.

Issue coupon bonds in the sums of $500 and $1,000 each, running from five to twenty years, either mortgage bonds or not as you dictate. But I would suggest the former, for capital is timid and likes security, and you lose nothing thereby. These bonds bearing eight per cent. per annum, interest payable semi-annually, will certainly be sought after, and instead of being vexed with debt, you will only have to meet the interest which will be $60,000 per annum. This amount of debt will be trifling, compared with your property, two hundred and twenty-three miles of main track, with its equipments costing $4,950,755 68, and is not as much, by half, as many other roads owe which are near you. The prospects of paying the interest and also dividends, I think very good. This year, the most unfavorable by long odds, of any we have ever known, your receipts have reached the sum of $518,558. With anything like a fair crop and a supply of money in the land next year, they will continue to increase. Your expenses with fair receipts, should not exceed 50 per cent., or at the outside, 60 per cent. of your gross earnings. Thus the interest on your debt, a six per cent. dividend, and a surplus fund to purchase your own bonds, will be provided.

Our connections and relations with other roads are convenient and agreeable. Nothing unpleasant has occurred during the year, and we hope the same kindly feeling will continue. The completion of the Columbia and Hamburg Road, which is confidently anticipated during the coming year, will be of great advantage; shortening the line of travel, and opening up to us a larger field from which freight shall be carried to and fro. But no connection in value to us can be compared to the extension and completion of the Western North Carolina Railroad, and we hope that the fond anticipations of eminent men who have long desired the sight, may speedily be accomplished.

The company have 25 locomotives, 15 passenger, 4 mail, 10 baggage and express, 134 box, 7 flat and 5 bridge cars. Miles run by locomotives 371,012 at a cost for labor and material of $38,554 17; and for supplies, $6,889 57. The whole number of passengers conveyed was 68,672, of which 7,440 were through, 57,748 way and 3,484 government.

The financial condition of the company May 31, 1867, is exhibited in the annexed statement:

Cost of road and equipment	$4,950,755 68
Amount of sinking fund	204,000 00

President.—Thomas Webb.

Directors.—On the part of the Stockholders.—John L. Morehead, D.A. Davis, Thomas Webb, and Wm. Murdock. On the part of the State.—W. C. Means, J. M. Coffin, J. W. Thomas, Peter Adams, Josiah Turner, Jr., R. S. Tucker, Jas. E. Allen, and O. G. Parsley.

Superintendent.—James Anderson.

Treasurer.—Peter B. Ruffin.

Secretary and Auditor.—F. A. Stagg.

☞ In December, 1865, 24 steel rails were laid on the Boston and Providence Railroad. At least 100 locomotives have passed over them daily, since that time, and the rails show no signs of wear.

☞ The Atlantic and Gulf Railroad Extension has been opened to "Hayesville," 14 miles west of Thomasville, and trains commenced running to that point on the 10th inst.

Commerce of New York.

The foreign imports at New York for the month of September, are officially stated as follows:

	1866.	1867.
Entered for consumpt'n.	$13,228,489	$13,149,846
Do. for warehousing	7,817,045	6,676,707
Free goods	840,082	854,987
Specie and bullion	5,193,473	345,669
Total entered at port...	$27,079,089	$21,027,209
Withdrawn fr. wareh'use	11,091,194	9,928,471

The foreign imports at New York for the nine months from January 1st, were:

	1866.	1867.
Entered for consumpt'n.	$130,852,815	$102,707,255
Do. for warehousing...	93,668,192	91,314,804
Free goods.....	9,708,103	8,442,128
Specie and bullion	6,988,841	2,499,215
Total entered at port..	$241,217,951	$204,963,402
Withdrawn fr. wareh'se	80,699,883	87,466,808

The following statement will show the revenue from Customs at New York for the month of September, and for the nine months ending September 30:

	1866.	1867.
In Sept..... .....$	12,248,144 66	$11,712,164 78
Previous 8 months.	91,405,137 20	81,483,422 29
Total 9 months...	$103,653,281 86	$93,195,587 07

The exports from New York to foreign ports in the month of September, were:

	1866.	1867.
Domestic produce	$11,635,610	$11,102,100
Foreign free goods.....	29,373	9,498
Do. dutiable.....	306,240	890,851
Specie and bullion	834,550	2,201,958
Total exports.....	$12,805,773	$14,204,407
Do. exclusive of specie.	11,971,223	12,002,449

The exports from New York to foreign ports for nine months from January 1, were:

	1866.	1867.
Domestic produce.....	$141,593,226	$128,032,152
Foreign free goods....	566,156	341,000
Do. dutiable	3,960,787	6,202,151
Specie and bullion.....	54,026,290	42,032,108
Total exports	$200,146,409	$176,607,411
Do. exclusive of specie	146,120,119	134,575,303

Pittsburg, Ft. Wayne & Chicago Railway.

The earnings and expenses of this road for the months of September, 1866 and 1867, have been as follows:

	1866.	1867.
Earnings	$654,925 77	$685,067 90
Expenses.....	414,680 05	394,348 63
Net earnings.....	$240,245 72	$290,719 27

This shows an increase in earnings of $30,142 13; with a decrease in expenses of $20,331 42—making the increase in net earnings, $50,473 55.

The earnings and expenses from January 1, to September 30, 1866 and 1867, were:

	1866.	1867.
Earnings	$5,474,619 50	$5,202,234 60
Expenses	3,879,731 00	3,623,498 78
Net earnings.....	$1,594,888 50.	$1,578,735 82

This shows a decrease in earnings, during the nine months, of $272,384 90; in expenses of $256,232 22; and in net earnings of $16,152 68.

☞ A party of French engineers, invited by General Dix, our minister to France, to visit this country have gone West from St. Louis with a view of gaining information of the country, railroads, mines, &c. They are in charge of Col. Hein, Secretary of Legation at Paris.

☞ Ground was broken and work commenced on the Southern Branch of the Union Pacific Railroad at Junction City, Kansas, on the 15th inst. The work will be pushed forward vigorously. A surveying party, under Major Beach, started for Fort Gibson on the 16th, to initiate work on that part of the road. Col. Gross is President of the company.

☞ It is said that Eastern capitalists have made propositions to take the Southwest Pacific Railroad on the terms of Fremont's contracts, and build it at once.

NOTICE TO CONTRACTORS.

LYNCHBURG AND DANVILLE RAILROAD,
CHIEF ENGINEER'S OFFICE,
LYNCHBURG, July 12, 1867.

At a meeting of the Board of Directors of the Lynchburg and Danville Railroad Company, held at the office of the Company on the 11th day of July, 1867, it was ordered that the Chief Engineer be directed to proceed at once to locate the road on the route adopted, near Pittsylvania Court House, and that he advertise FOR SEALED PROPOSALS for the construction of Twenty-five miles of the road, (from Lynchburg to Staunton River,) including Staunton River Bridge, near the Pocket Ford. Said proposals to be opened and examined on the FIRST DAY OF NOVEMBER, 1867. And that he prepare, as soon as practicable, before the FIRST OF NOVEMBER, plans, profiles and specifications of the work for the inspection and information of all persons concerned.

In obedience to the above order, on and after the 15th day of October next, plans, profiles and specifications of the Work will be open for inspection at this office.

Sealed proposals to be addressed to the undersigned,

WM. W. BLACKFORD,
6t38 Chief Engineer

MEAD & MANNING,

June 8th, 1867.

Universal Exposition, Paris, 1867.

STEINWAY & SONS

TRIUMPHANT,

Having been Awarded

The FIRST GRAND GOLD MEDAL

for American Grand, Square, and Upright Pianos: this Medal being distinctly classified *first* in order of Merit, *over* all other American exhibitors, and *over* more than 400 Pianos entered by nearly all the celebrated manufacturers of Europe.

In proof of which the following

OFFICIAL CERTIFICATE

of the President and Members of the International Jury on Musical Instruments (Class X) is subjoined:

PARIS, July 20, 1867.

I certify that the FIRST GOLD MEDAL for American Pianos has been unanimously awarded to Messrs. Steinway by the Jury of the International Exposition. First on the list in Class X.

MELINET, President of International Jury.

GEORGES KASTNER, AMBROISE THOMAS, ED. HANSLICK, F. A. GEVAERT, J. SCHIEDMAYER. } Members of the International Jury.

This *unanimous* decision of the International Class Jury, *endorsed* by the Supreme Group Jury, and *affirmed* by the Imperial Commission, being *the final verdict* of the *only tribunal* determining the rank of the awards at the Exposition, places THE STEINWAY PIANOS AT THE HEAD OF ALL OTHERS.

The "Societe des Beaux Arts,"

(Society of Fine Arts, of Paris, known throughout Europe as one of the highest authorities on Music and Art Matters) *unanimously* awarded their *only* annual Testimonial Medal for 1867 to STEINWAY & SONS for the highest degree of perfection, most valuable inventions, and as exhibiting the greatest progress in the art of Piano-making, above all other exhibitors, at the Universal Exposition in Paris.

STEINWAY & SONS

Were also awarded a FIRST PRIZE MEDAL at the great International Exhibition, London, 1862, for powerful, clear, brilliant, and sympathetic tone, with excellence of workmanship as shown in Grand and Square PIANOS, in competition with 269 Pianos from all parts of the world.

STEINWAY & SONS, in addition to the above, have taken thirty-five First Premiums, Gold and Silver Medals, at the principal Fairs held in this country from the year 1855 to 1862 inclusive, since which time they have not entered their Pianofortes at any Local Fair in the United States.

EVERY PIANO is WARRANTED for FIVE YEARS.

Warerooms, First Floor of Steinway Hall,
Nos. **109** and **111** East Fourteenth Street,
(Between 4th Ave. and Irving Place,) NEW YORK.

NOTICE TO CONTRACTORS,

PROPOSALS will b received until Nov. 1st, for the Grading, Masonry, Bridging and Iron of the Wallkill Valley Railroad, from Montgomery to Newpaltz, about 20 miles, or so much thereof as may be deemed expedient. Maps, plans and specifications will be ready for inpection on the 15th of Oct., at the office of the Chief Engineer, Levi Bruyn, Shawangunk Village, Ulster Co., N. Y.

All other information needed will be furnished at my office.

Dated Bruynswick, N. Y., Oct. 2d, 1867.

MANUFACTURERS OF

HAND CUT FILES OF THE BEST QUALITY, WARRANTED EQUAL TO ANY BRAND IN MARKET.

Railroad Companies, Machine Shops and Locomotive Works supplied on the lowest terms. 3m34

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS.** Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

RAILWAY BUILDINGS AND FIRE PROOF CONSTRUCTION.

E. T. LITTELL & CO.,
ARCHITECTS AND CIVIL ENGINEERS,
111 Broadway, New York.

Plans and specifications prepared for all classes of Railway and other buildings.

Iron and wooden bridges and roofs of all practicable spans, Station Buildings, Depots, Warehouses, Fire Proof and other constructions generally, designed and superintended.

PLASTIC SLATE ROOFING

JOINT STOCK COMPANY.

OFFICE 157 (Room 19) BROADWAY,
NEW YORK.
W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

—o—

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

PUMPS.

STEAM, POWER AND HAND PUMPS,
OF ALL SIZES FOR
Railway Stations, Factories of all descriptions, Public and Private Water Works, &c., &c.
The Steam Ram for Feeding Boilers.
THE STEAM SIPHON FOR RAISING WATER.

Also, BLOWING ENGINES, AIR PUMPS, and all kinds of Hydraulic and Pneumatic Machinery. Send for circulars to

PHILAD. HYDRAULIC WORKS,
No. 247 South 3d Street,
Philadelphia, Penn.

PHELPS, DODGE & CO.,

Importers of Metals,
AND RUSSIA SHEET IRON,
NOS. 19 AND 21 CLIFF STREET, NEW YORK.
OFFER FOR SALE:

Tin Plates of every description.	Terne Plate for Roofing.
Sheet Iron, R. G., 12 to 18.	Sheet Iron, Nos. 12 to 18.
Russia Sheet Iron.	Galvanized Sheet Iron.
Sheet Zinc and Spelter.	Iron Ware.
Block Tin, Banca and Straits.	Pig and Bar Lead.
Sheet Brass Kettles.	Regulus Antimony.
Sheathing Copper.	Copper Bottoms.
Extra-sized sheets Copper, rolled to order.	Braziers' and Bolt Copper.
	Rivets, Kettle Ears, etc.

THE ELNATHAN SAMPSON

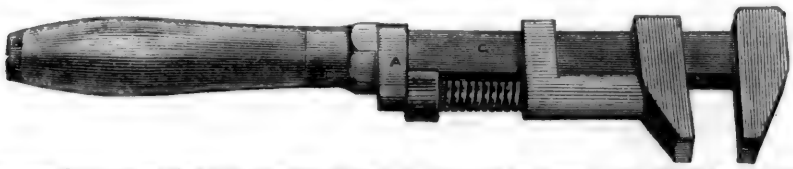
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.

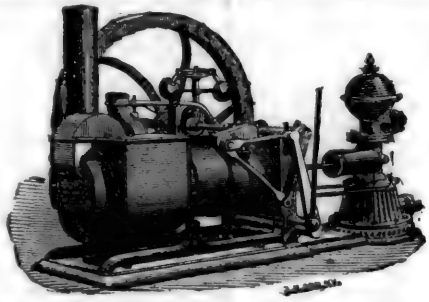


Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.



THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

ERICSSON
Caloric Pumping Engines.

FOR economy, durability, and efficiency unequalled. Have been in use on the Erie, Central, Hudson River, Harlem and other roads for eight years. Recommended by all Superintendents in the highest terms.

JAMES A. ROBINSON,
164 Duane St., cor. Hudson, New York.

TO IRON FOUNDERS.

BY USING THE WASTE HEAT FROM A CUpola Furnace, connected with a Harrison Boiler, a saving of the entire cost of fuel for the blast can be guaranteed.

As thus applied, it may be seen daily in operation from 2 to 5 o'clock, p. m., at the Harrison Boiler Works, Gray's Ferry Road, Philadelphia, Pa.

J. B. HYDE, Agent,
119 Broadway,

Democratizing the Railway.

This wonderful machine of English origin, and hitherto conducted on principles of English management, is now threatened with an improvement that promises to add as much to its efficacy as the American improvement added to the Printing Press. The application of the paddle-wheel to the steamboat was an American idea. The practical adoption of the principles of telegraphing, whereby it was brought into public use was American. Sewing by machinery is American. The planting of grain, reaping, harvesting and thrashing, mowing, raking, and pitching by machinery are American. Agriculture, intercourse, commerce and manufactures have advanced on American ideas, and now, last of all, the railway is absolutely to be placed on the democratic platform of "Equal Rights," and opened to the public like a turnpike road with manifold efficiency over present management.

We have heretofore explained and advocated through the columns of our JOURNAL the "Equal Speed," "Equal Rights" plan for a freight railway. It rejoices us to see our contemporary of the London *Railway News* falling into line, and approving as a measure of necessity, the democratizing of the railway. It has been demonstrated to the world that the strongest form of Government on earth must have its foundation on Equal Rights, and we shall soon demonstrate that Equal Rights in the management of the railway will not only secure a manifold degree of efficiency and cheapness in performing the business of the country, but in all probability, add one-half to the actual development of our vast resources.

The subject of democratizing the railway, which is now fairly before the people of this country and Europe, is the most important subject of material economy ever presented to the world. It grows upon the mind by investigation. It increases in magnitude as its co-relative results are traced through the ramifications of business and again centered in the combination of results, vastly increased production.

Few persons, at first sight, comprehend the immense effect of an improved system for the rapid and cheap handling of the agricultural, mining, and manufacturing resources of the country. It was stated by an intelligent farmer of the West, a few days since, that the "cheap freight railway system," if accomplished, would add three-fourths to the average net profits of agriculture, after deducting the cost of production, to the whole country west of Utica. It has been clearly pointed out that Pennsylvania, in consequence of expensive freights, is suffering under a yearly deficiency of production of more than one hundred millions as compared with some other States, and that Ohio and the West generally stand in nearly the same category, while the Southern States exhibit a still more meagre production. It was well remarked by an experienced railway financier of England, lately in this country, that "the great West is strangled by illiberal railway policy, while the South is starved," and concludes that "cheap freights and very numerous trains is the remedy."

We do not precisely agree with our contemporary of the London *Railway News*, wherein he declares, in connection with his admiration of the plan for cheap freight railways under the Congressional Bills, that the proposal is a "bold and novel one." The idea of putting the operation of the railway on a democratic footing is neither *bold* nor *novel*. It is only American. It is simply going back to the principles that underlie the Canal State System of New York, which was inaugurated by the most eminent Statesmen and political economists that America has produced. It is in entire accordance with the principles that were originally engrafted on the charters for railway enterprises in Massachusetts. The proposal to open the railway to free competition in transportation merely indicates a return to the simple principles of common justice and good sense.

It may be assumed, as an undeniable proposition, that neither the rights nor interests of the people will be guarded or protected until the railway is operated on the Equal Rights plan. Exclusive privilege on the highways of commerce is the most odious and offensive arrangement possible to be conceived, and when traced to its uniform results, the most paralyzing and injurious. There is no excuse for it, unless such excuse can be found in absolute necessity. When it can be demonstrated that *tenfold* freight power can be added to the present work of the railway, and freights, by a combination of economic incidents may be reduced to one-third of present charges, it does not speak well for the monopoly principle in transportation. Our railway management is now brought face to face with the popular requirement of doing much more work for a much less price per ton. Unless this is accomplished without unreasonable delay we are confident, that, on the great natural freight routes, present managers will be obliged to leave the track.

Grand Rapids and Indiana Railroad.

The contractors are now vigorously at work grading and track laying at various points between Fort Wayne, Indiana, the southern terminus of the road, and a point sixty miles north of Grand Rapids, Michigan. Fifty miles have been graded and eleven ironed. The contractors are to finish the road by the end of the year 1869. It is designed ultimately to extend this road as far north as Mackinac. The heaviest part of the work now in progress is the construction of a bridge across Grand River, at Grand Rapids, the cost of which will be between $45,000 and $50,000. This road will be of great importance to

Cincinnati when the projected link between Richmond, Indiana, and Fort Wayne is finished.

Maintenance of Rolling Stock.

At the present time, when the attention of shareholders in almost every railway has been directed to the possibility of closing capital accounts, the question of the actual cost at which railways can be worked and maintained assumes a degree of importance which has not hitherto attached to it. Every person in the slightest degree conversant with railway accounts, must be aware of the part that the capital of almost every company has been made to bear, more or less, of the burden of the cost of renewals and maintenance. No fixed rule has been laid down as to the proportion of the cost to be applied to capital and revenue, the amount being decided according as the exigencies of any particular company may appear to require. It is most important for the interest of railway property that some uniform principle should be acted upon, as in the present state of railway accounts it is absolutely impossible to estimate with accuracy the true financial position of any undertaking. We have already directed attention to the very useful and elaborate letter of Mr. Price Williams, bearing on the cost of the permanent way. Another important branch of railway expenditure, that connected with the rolling stock, recently formed the subject of discussion at the Institution of Civil Engineers. The figures given by Mr. Fletcher on that occasion, are known among railway officials as "Fletcher's data," and they will form a very useful standard by which to test railway accounts presented from time to time to the public. Mr. Fletcher states as the result of his best consideration "that the improved rolling stock of the present day—built of carefully selected and well-seasoned timber, and of the materials of the best quality—superior in all respects to that built twenty years ago, may be fully calculated to have a life of from twenty-five to thirty years; assuming always that the stock is of such a character that it will not be necessary to break it up for any other cause than that of decay." After making various allowances, he comes to the conclusion that carriage stock may be fully maintained by an outlay of about 12 per cent. on its cost, wagon stock by an outlay of 6½ per cent., and locomotives by an outlay of 12½ per cent.

Adopting this as the standard, we find the charges to revenue on the North Eastern Company nearer than those of any other line to the figures we have given. In one of the items, indeed, it is slightly in excess. The company's rolling stock consists of 504 engines of an average cost of £2,-100; 1,370 carriages, each about £220; and 17,-429 wagons, valued at £80 each, the whole amounting to £2,754,120. The renewal of this stock has cost £262,977, or at the rate of about 9.55 per cent. on the original cost. In the case of the South Eastern, however, with 243 engines, 1,-765 carriages, and 3,641 wagons, the whole of the value of £1,189,889, only £108,599 is charged for renewals, or 9.11 per cent. on the cost. This amount, according to the North Eastern system, should have been £126,110 or 10.51, and the deficiency, £17,511, has therefore been charged to capital.

The case of the North British, judged by the standard which we have adopted, shows very great deficiency. Their rolling stock consists of 373 engines, 976 carriages, and 16,759 wagons, which, at the prices obtaining with the North Eastern, would amount to £2,338,740. The cost stated, however, is £2,419,198. The sum that should have been charged for the renewal of this stock during the half-year was £106,507, whereas only £63,938 is entered in the accounts. The deficiency charged to capital on this line is therefore £42,569. The proportion which should have been charged to engines was £48,956, the sum actually charged is £34,978, or only 8.90 per cent. instead of 12½ per cent. On carriages and wagons the expenditure, instead of being £57,551, was only £28,391, or 4.72 per cent. During the last half-year the amount charged to capital account for rolling stock is £21,000, the total amount brought against revenue being little over 5 per cent. per annum.

An analysis of the Brighton accounts shows that £35,800, or £144 per engine, is required to keep in repair and renew about 248 engines in each half-year, while in the case of the North British just cited, the same money, suffices to keep in repair 373 engines. On the Caledonian, 504 engines are maintained and renewed at a cost of £28,000, or at the rate of about £55 10s. per engine. In the case of the Great Northern, however, 453 engines require a total outlay of £73,-500, or not less than £162 per engine.

There are evidently some discrepancies here which require explanation, and that explanation is to be found in the fact that these different companies place to capital account expenses which ought to be made a charge against revenue, in order to ascertain with anything like accuracy the actual net earnings of these undertakings.

Some statistics are given in a review of the financial position of the Caledonian Railway, just published, under the signature of a "Public Accountant," and which challenges the strictest investigation. The writer says: "In the year ending January last the Caledonian Railway Company ran 7,751,529 train miles, and expended £231,254 on locomotives, working, renewals, and repairs, being at the rate of 7.16d. only per train mile, or 3.84d. less than the average. If we multiply the latter figures by the number of train miles run, it gives us the sum of £124,033 as the difference between the amount actually charged to revenue for working and upholding the rolling stock, and the amount which ought to have been expended to work and maintain it efficiently. In the last published report of the Great Northern Railway, we find the cost stated at 12.39d. per mile train, and that during the half-year eighteen engines and eight tenders had been renewed at the expense of revenue, the total number of engines on that line being 437. During the year ending January, 1867, the Caledonian Company did not renew a single engine at the expense of revenue, although its number of engines is in excess of that of the Great Northern, being 479. It has, however, charged to capital for additions to rolling stock during the year the sum of £305,-123."

In the last report of the Brighton Company the auditors say:—"We think that revenue should be charged for maintenance of way at the rate of £300 per mile for quadruple lines, £200 per mile on double, and £150 per mile on single lines, half-yearly, instead of £370 per mile per annum on the whole mileage of the company's roads. For locomotive power, in our opinion, a fixed charge of not less than 12½ per cent. on locomotive engines and tenders, and of 9 per cent. on carriages and wagons, calculated on their original cost as they stand in the company's books, should be made annually for depreciations, renewals, and repairs."

This is, no doubt, the correct principle to adopt; and shareholders will do well to bear in mind the timely warnings of Mr. Laing and Mr. Watkin, that with the closing of capital accounts and all expenditure charged to revenue, a reduction in the rates of dividend will be inevitable.—*London Railway News.*

Wilmington and Manchester Railroad.

The Wilmington and Manchester Railroad Co. of North Carolina have put a loan upon the London market of £200,000 sterling. Security, 100,-000 of their first, and 100,000 of their second mortgage bonds. They offer to sell them at seventy-five cents, and will accept payment either in all cash or fifty cents in cash and twenty-five cents in Confederate States cotton bonds, ex-overdue coupons at twenty-five cents on the dollar. The second mortgage bonds are offered at seventy cents—forty-five in cash, and twenty-five in Confederate bonds, as above. The President of the company, in his circular announcing the loan, makes the following statement:

The undersigned, in offering the sterling bonds of the Wilmington and Manchester Railroad at a price which will pay investors over eight per cent. on a first security, and in fixing twenty-five per cent. for the cotton loan bonds, does not do so without reason in respect to them which, while beneficial to the Wilmington and Manchester Railroad, will be equally so to the cotton loan bondholders.

☞ The Connecticut Western Railroad, from Springfield to Collinsville, is said to be in strong hands, and the extension of the Collinsville branch of the Canal road to Lee and North Adams, Mass., is regarded as almost certain. These two latter enterprises will be of mutual benefit to the Canal Railroad, and will draw a large trade to New Haven that now seeks its market elsewhere.

South Western (Ga.) Railroad.

The earnings of this road for the years ending August 1, 1866 and 1867, have been from the following sources:

	1866.	1867.

Appropriated for revenue tax.....		6,407 80
Surplus		10,065 46
Total, as above.....		$408,959 26

The gross earnings show an increase over the previous year of $150,107 60, or about 17½ per cent.; with an increase in ordinary expenses of only $22,410 42, or 4⅓ per cent. The total number of miles in use at the close of the year was 207½. The average number of miles in use during the year was 193. The earnings per mile were: passenger and mail, $1,624 72; freight and miscellaneous, $3,592 65—total, $5,217 37. The current expenses were $2,774 87 per mile; including tax and annuity, they were $2,903 98; and the net earnings, $2,313 39. The gross earn-

ings per mile run by engines were $2.28; current expenses, $1.82; net earnings, $1.45.

The total number of bales of cotton transported during the year was 137,696, of which 81,666 bales were from the South Western Railroad proper, and 56,030 from the Columbus and Muscogee Railroad. The number transported in 1866 was 87,250—making a total increase for the year of 50,446 bales. From the South Western Railroad to Macon there were 24,136 bales; from Columbus and Muscogee Railroad to Macon, 115 bales—total to Macon, 24,251—a decrease from the previous year of 4,882 bales.

The number of through passengers for the year was 12,003; way do., 97,454—total, 109,457, being an average per day of 300, against 317 in 1866, and 353 in 1860. Total number of passengers carried over the road since it was opened in July, 1851, 2,127,744.

The company had 22 locomotives, of which 12 were in good order, 3 were in shops for repairs, 4 wanting repairs, and 3 were out of use. The stock of cars consisted of 13 first-class and 7 second-class passenger and baggage, 5 baggage and mail, 1 express, 2 provision, 9 conductor's, and 240 for freight, stock, etc. The number of miles run by passenger and mail trains was 154,682; by freight and other trains, 151,653—total, 306,335. The President, in his report, says:

Since my last annual report, we have purchased 1,100 tons of iron T rail for repairs of road—500 tons of which have been received and placed upon the track. Six hundred tons were delivered in Savannah within the past ten days, and we are now receiving the same on our road. The cost of the whole being upwards of $100,000, and about two thirds of that amount has been paid out of the earnings of the road. This will enable us to put our main line of road in good working condition; and when the old and worn rails are taken off and re-rolled, as we propose to have them, either at Atlanta or some other point, it is believed that we will not be subjected to the necessity of purchasing more new rails within eighteen months, or two years. We have also purchased two new locomotive engines from Rogers' Locomotive and Machine Works, at Patterson, New Jersey. Cost and expenses about $31,000. These engines have just arrived and will doubtless prove as satisfactory as former purchases from that company. We further propose to order two more, so as to have them reach us in the months of October and November. These, in addition to our present motive power, will enable us to do the business offering the approaching season, with dispatch and promptness.

We have likewise increased our freight cars, having fifty new ones up to the present time added to our former stock; and hope to double that number for our winter's operation.

By reference to the balance sheet of the Treasurer, you will find the bonded debt of the company to be $437,000. None of these fall due before 1875. All of those that fell due during the years of 1862 to 1865, inclusive, and held up without presentation when due, have been paid. There was only one due during the present year, of five hundred dollars, and it has been paid by conversion, at it was convertible into stock at the option of the holder.

The branch road from Cuthbert to Fort Gaines has been reconstructed at a cost of $38,555 80, and trains are making daily visits to the latter place. The prospect of good crops along the entire line of road, including everything connected with the agriculture of that section of country, was never more flattering or promising. So far as the crop of corn is considered, it is beyond doubt reliable and safe, and notwithstanding the gloom and despondency that hover around our people, on account of their peculiar condition, and the political status of our section of country, the prospect of an abundant harvest will go far toward mitigating these evils, and reproduce in some measure that cheerfulness and elasticity of spirit, that formerly characterized them in their halcyon days. As to the crop of cotton, we cannot speak with the same degree of certainty, as it is subject to many casualties, but at the present time, the prospect of a bountiful yield is very encouraging to the Agriculturists. During the past winter, an unusual amount of Fertilizers has been transported over the line of road to different parts of South-Western Georgia, and the result of its application to the cereals, as well as cotton, is so apparent in their increased production, that not only those who have used it the present year to a limited extent, will greatly increase its quantity, but others, who have not done so, will be induced to use it, having seen it practically demonstrated in their immediate neighborhoods.

The price of transportation is merely nominal, as our chief object was its introduction and application, believing that its results in the end would more than compensate us for the low tariff of freight. In my last annual report I remarked, that I saw no reason why regular dividends of eight per centum per annum should not be paid the stockholders for the future; and would take this occasion to reiterate the same sentiment, believing at the same time that it would be a wise and judicious policy, to appropriate the surplus earnings beyond this amount, for some time to come, in the improvement of our road and appurtenances, and in the enlargement of our warehouses, as well as workshops, which are so contracted, that we find our operations materially retarded.

It is generally conceded, that our line of road penetrates a section of country unsurpassed by any other in the State for the production of cotton, and although we cannot with certainty predict the result of the growing crop, still we cheerfully congratulate our planting friends upon the flattering prospects of an abundant yield of that great staple. The prices of material, labor and everything else connected with the operations of the road continue so high, that we are compelled to arrange our tariff of freights to some extent correspondingly; and whilst they do not bear the same ratio in proportion, they are apparently high when compared to the tariff of 1860. We believe the stockholders should receive a reasonable interest upon their investment, and that the road and appurtenances should be kept in good order, so as to insure a safe and speedy transit of freight and passage. In order to do this effectually, we are compelled to arrange our tariff of freights and passage to correspond with our expenditures.

The following is a statement of the receipts and disbursements of the company to August 1, 1867:

Received for capital stock		$3,203,900 00
Bond account issued for twenty years	$328,000 00	
Bond account issued for ten years	58,000 00	
Bond account issued for twenty years, endorsed	51,000 00	
		437,000 00
Fare tickets issued		6,579 65
Freight earnings since August 1st, 1866	$677,805 68	
Passenger earnings since August 1st, 1866	302,091 02	
Post office department mail service	10,804 26	
		990,700 96

President.—William S. Holt.

Directors.—William A. Black, Timothy M. Furlow, John McNab, John E. Jones, William M. Wadley, Virgil Powers, Alex. R. Lawton.

Treasurer.—John T. Boifeuillet.

Engineer and Sup't.—Virgil Powers.

Virginia and Tennessee R. R.

The earnings of this road for the year ending June 30, 1867, have been $764,147 93, and the running expenses $478,130 13, giving a net balance of $286,017 80, or 38 per cent. of the gross earnings. During the year an additional and extraordinary expense of $209,538 09 was incurred for ballasting the road, rebuilding bridges, and erecting new depots and other structures. Seventy miles of the road were ballasted with broken stone one foot deep, leaving now only about twenty-five miles to be ballasted. All of the bridges except Elk, Ivy and Otter, (which are under contract, and will be completed during the present year,) have been rebuilt, and are in excellent condition. A number of new depot buildings have been erected, as well as a large number of houses for the use of the road employees. Nearly one-half the road has been furnished with new cross-ties, and hereafter it will require probably not more than 60,000 cross ties per annum.

The increase in earnings from passengers has been $61,312 75, and from freight $148,054 01.

The receipts of the road in 1860, were $740,486 88. This year they have been $764,147 93. This amount would have been still greater but for a suspension of business for several weeks, caused by the heavy floods over the whole of Tennessee and Western Virginia. The receipts for the present year, it is estimated will reach $1,000,000. The floating or current expense debt of the company is stated to be $333,590 53, and the funded debt $2,393,381 96. In addition to this latter amount there is due upon matured coupons $203,000—which will make the whole funded debt of the company $2,586,381 66; and this added to the floating debt will show the whole indebtedness of the company to be $2,929,872 49. Against this there is a balance in the hands of the treasurer and other agents and cash resources amounting to $174,231 07—which would leave the entire indebtedness of the company, apart from its cash resources, $2,755,741 42.

The report shows that since 1860 the debt of the company has been decreased $1,066,985 70, notwithstanding the devastation of war.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JULY 31, 1867.

The receipts on capital account during the half year amounted to £13,703 0s. 2d., and the total receipts to July 31, 1867, to £5,256,086 12s. 4d. The aggregate expenditure to the same period amounted to £5,360,011 7s. 0d. From this amount £19,479 9s. 1d. had been deducted, being a portion of the amount to be received under agreement from American lines as contribution to the narrow gage system, making the actual charge to capital account at July 31, 1867, £5,340,531 17s. 11d., and leaving a balance to the debit of capital account of £84.445 5s. 7d.

The outlay on capital account during the half year has been £18,758 11s. 11d. This expenditure includes additional works on the car ferry boat the Great Western, and slip dock at Windsor; further narrow gage siding accommodation and signals; additions to rolling stock for blue line; proportion of cost of rebuilding bridge over Twenty Mile Creek at Jordan; cost of a new heating furnace, and two additional boilers for the rolling mill; sundry additions to stations and platforms; ballasting station yard and furnishing buildings and platforms at Petrolia, and one additional telegraph wire and poles between Hamilton and London, a distance of 76 miles.

The receipts and expenditure on revenue account were as follows:

Gross receipts		£365,704
Working expenses, including renewals		182,768
		£182,936
From which there has to be deducted—		
Interest on bonds, loan, &c.	£51,717	
Loss on conversion of American funds	52,820	
Amount charged on account of Detroit fire claims	4,110	
Erie and Niagara Railway, deficiency in working	1,169	
		109,816
Profit on half year's operations		£73,120
Add surplus from last half year		1,129
Welland Railway Co., old debt received		159
Available for dividend		£74,408

From this amount the Directors recommend a dividend at the rate of 4 per cent. per annum, free of income tax, which will absorb £70,726 5s. 0d., and leave a surplus of £3,681 7s. 11d. Fully concurring in the views expressed at the last meeting as to the expediency of providing a reserve for the renewal of the ferry steamers, the Directors propose to appropriate £2,000 of the surplus for this purpose, leaving a balance of £1,681 7s. 11d. to be carried to the credit of the current half year.

The loss on the conversion of American funds for the half year amounts to £52,820 10s. 0d., as compared with £39,806 7s. 5d. for the corresponding half year of 1866. The average rate of conversions made during the half year was 136⅝, the average price of gold for the same period having been 137¼.

The following table exhibits the receipts and expenses for the last five corresponding half years:

	Receipts.					Expenses.	
Half year. July.	Pass., mails, and sundries. £	Freight. and live stock. £	Rents. £	Total. £	Including renewals. £	Per centage of gross rcpts. £
1863.	111,671	180,772	625	293,067	171,262	58.44
1864.	125,282	189,081	577	314,940	171,452	54.44
1865.	139,821	144,028	716	284,565	158,804	55.81
1866.	172,731	169,577	854	343,162	175,747	51.21
1867.	165,367	199,221	1,116	365,704	182,768	49.98

Notwithstanding the traffic returns of American connecting lines have been less during the past half year than for the corresponding period, it will be seen that this company's gross receipts for the half year amount to £365,704 4s., against £343,162 7s. 5d. for the corresponding half year of 1866, being an increase of £22,541 16s. 7d. The increase has been entirely in the through or American traffic, which shows an excess of £37,437 7s. 10d. over the corresponding period, while the local traffic shows a decrease of £15,157 8s. 5d. An increased amount of £261 12s. 2d. has been received for rents. The working expenses, including renewals, are at the rate of 49.98 per cent. of the receipts against 51.21 for the corresponding half year; but the aggregate expenses for the half year exceed those of the corresponding period by £7,021 16s. 4d. This arises partly from the extra mileage and additional labor consequent upon the increased traffic, but a considerable portion of the excess is owing to the general advance in the cost of labor and in the price of stores used by the company. There are also other special charges against the past half year, viz.: the proportion charged for the Detroit fire claims, £4,109 11s. 9d., and the deficiency in working the Erie and Niagara Railway, £1,168 15s. 5d.

The Directors have the satisfaction of being able to announce the entire success that has attended the opening of the narrow gage system over the main line between Suspension Bridge and Windsor, and to which is attributable the increased traffic of the past half year. It will also be seen by the engineer's report that the success of the car ferry boat on the Detroit River has been complete.

In the last report reference was made to the completion of the Petrolia Branch to the Oil Wells at a cost of about £10,000. The result of the opening of the line has amply justified the expenditure, the earnings from traffic in and out of Petrolia station during the half year having amounted to £8,451 10s. 4d. It will be seen from the engineer's report that an additional outlay of £501 6s. 9d. for extra siding and station accommodation has been found necessary.

The Proprietors are aware that negotiations were entered into with the Grand Trunk Company for the purpose of putting an end to undue competition. The Directors are happy to announce that an agreement (copy of which is annexed) has been concluded between the companies, which provides for a division of traffic between local competitive places, and binds the two companies to charge equal rates and fares for all competitive traffic. This agreement will be submitted to the Proprietors at the meeting.

The gross earnings of the Detroit and Milwaukee Railroad for the half year ending June 30th, 1867, were £158,509 16s. 4d., and the working expenses amounted to £96,852 12s. 10d., leaving a net revenue of £61,657 8s. 6d.; of this surplus, the sum of £41,299 18s. 7d. was absorbed in the payment of interest on all descriptions of prior mortgage bonds of the company, leaving a net surplus of £20,357 4s. 11d., as against £3,805 8s. 4d. in the corresponding period last year, which has been applied, as heretofore, towards capital outlay.

The arrangement referred to in the last report for the settlement of the various claims on the Detroit and Milwaukee Company, including that of the Commercial Bank of Canada, has been completed. The indenture defining the position of all parties was executed in November last; in pursuance of which the Great Western Company have received additional Detroit and Milwaukee securities to the amount of $595,000 on account of interest. The total securities of that company now held in respect of the original loan and on account of accrued interest amount to $2,095,000.

Reports from various points in Canada and the United States represent the harvest of the present year to be most bountiful as well as excellent in quality. The Directors, therefore, trust that both the local and through traffic of the company will be materially augmented during the ensuing half year.

Signed on behalf of the Board of Directors,
THOMAS DAKIN, President.
London, Sept. 27, 1867.

COPY OF AGREEMENT WITH THE GRAND TRUNK RAILWAY COMPANY.

An agreement made the twelfth day of June, 1867, between the Grand Trunk Railway Company of Canada (hereinafter called the Grand Trunk Company) of the one part, and the Great Western Railway Company of Canada (hereinafter called the Great Western Company) of the other part. Whereas the Grand Trunk Company are, by means of their various lines of railway, carriers of passengers, goods, and other traffic from various places in the districts accommodated by those several lines of railway to various places accommodated by the railways of the Great Western Company, and in like manner the last named company are carriers from various places in the districts accommodated by their several lines of railway to various places in the districts accommodated by the railways of the Grand Trunk Company. And whereas with a view to avoid undue competition and to facilitate and encourage the interchange of traffic between the systems of the two companies to the extent the circumstances of both will conveniently admit of, to establish uniform and remunerative rates and fares, and generally to place and continue the relations of the two companies upon a perfectly friendly footing, the said two companies have agreed to co-operate as hereinafter mentioned, and to secure to each other such rights and facilities, and to enter into such arrangements as are hereinafter contained. Now, therefore, it is hereby mutually agreed between the two companies parties hereto as follows:

1. Equal fares, rates and charges (to be from time to time agreed upon between the two companies) shall be charged by the said companies in respect of traffic between all competitive places which the two companies can respectively command, that is in respect of traffic to or from stations in Canada, the principal of which are as follows:

London and Toronto; Sarnia and Toronto; Paris and Toronto; Guelph and Toronto; Paris and Buffalo; Paris and Suspension Bridge; London and Buffalo; London and Suspension Bridge; Guelph and Buffalo; Guelph and Suspension Bridge; Sarnia and Buffalo; Sarnia and Suspension Bridge; Detroit and Toronto; Detroit and Buffalo; Detroit and Suspension Bridge; Detroit and London; Detroit and Guelph; Detroit and Paris.

All traffic between London, Guelph, Sarnia, Paris, and Detroit and Hamilton for places beyond, which enter into competition with the traffic of the Grand Trunk Railway, is to be included in the division mentioned in the next succeeding article.

2. The gross receipts received by each of the companies in respect of all local passenger and freight traffic between the above competitive points off the lines of either of the two companies to the east, shall be divided between the two companies in such proportions as may be mutually agreed upon between the respective managers of the two companies upon their return to Canada, or in case of difference may be settled by the Hon. Samuel Sloan, of New York, the present acting Commissioner of the American trunk lines, who is hereby nominated and appointed to be arbitrator between the two companies for the above purpose.

3. The Grand Trunk Company are to be permitted to sent their loaded cars from any station on their lines of railway east of Toronto, to any station on the lines of the Great Western Company west of Toronto, such cars being handed over to the Great Western Company at Toronto. The said cars to be returned loaded with freight from stations on the Great Western Company's line, to any station of the Grand Trunk Railway Company east of Toronto.

4. In like manner the Great Western Company are to be permitted to send their loaded cars from any station on their railways except Toronto to any station upon the section of the Grand Trunk line, west of and including the Buffalo and Gode-

rich line, such cars to be handed over to the Grand Trunk Company at Paris. The said cars to be returned loaded with freight for stations on the Great Western line, Toronto excepted.

5. The rates to be charged for freight from local stations on the Great Western railway to Toronto for places east thereof on the Grand Trunk railway are to be the same as those charged for traffic carried on the Great Western railway, from the same points to the Suspension bridge at Niagara, but, where the above will not apply, equal rates per ton per mile are to be charged for all traffic of a similar character exchanged between the two companies, and where the mileage of one company is less by one-third than that of the other company, a terminal allowance is to be made to the company having the shorter mileage, such terminial allowance, together with the through rate, to be from time to time settled between the general freight agents of the two companies, or, failing agreement, to be settled by arbitration in the manner hereinafter mentioned.

6. The rates to be charged by the companies respectively in respect of traffic from and to local competing stations west of Toronto to and from the terminal stations of Toronto and Hamilton Wharf are to be the same, whether carried over the Grand Trunk system or the Great Western system.

7. The through rates to be charged for traffic from Montreal to stations on the Grand Trunk and the Great Western lines west of Toronto and Hamilton, and *vice versa* respectively, shall be such as shall from time to time be mutually agreed upon between the two companies, or, failing agreement, as shall be fixed and settled by arbitration as hereinafter provided. The Great Western Company hereby agree not to quote less through rates *via* Hamilton Wharf in connection with the boats (including insurance and other charges) than the through all rail rates mutually agreed upon by the two companies, but should the boats to and from Hamilton at any time charge less than the all rail rates agreed between the two companies, then the Great Western Company are to be at liberty to charge local rates for traffic to and from Hamilton Wharf.

8. Teaming of freight traffic to and from competing places is to be henceforth entirely abolished by both Companies.

9. So far as can be, the passenger trains of both Companies at Toronto and Paris are to be so timed as to run in connection with one another.

10. The rates and fares to be charged in respect of through traffic shall from time to time be agreed upon and settled between the respective managers for the time being of the two companies, and in case any difference shall arise between such managers every such difference shall from time to time be referred to the boards of the two companies in England, and should the said boards be unable to adjust and settle any such difference, either company may by giving three calender months' previous notice in writing, under the hand of their chairman or secretary (such notice to be given by delivering the same at the principal office of the other company in England), determine this agreement, which shall at the expiration of such three months cease to have effect, except as to any act, matter, or thing done or omitted to be done in accordance with the terms hereof, prior to the expiration of such three months.

11. And in order to prevent all unnecessary or duplicate outlay of capital by the two companies, any projected new competing line of railway west of Toronto shall be either undertaken and constructed jointly by the two companies, or the option shall be given by the one to the other company to occupy and work the same jointly, upon such terms and conditions as may be mutually agreed upon, or, failing agreement, as may be determined by arbitration in manner hereinafter mentioned. The object of the two companies being, whilst meeting the just wants of the country, to keep the outlay of further capital within the smallest amount.

12. Wherever the lines of the two companies are connected with each other, and in the opinion of the two companies it would be for the convenience of the companies, and a saving of expense, that arrangements should be made for the joint working of any station or stations at such points of connection, such arrrangements shall accordingly be made by the two companies, and the terms and conditions thereof shall be such as may be mutually agreed upon.

13. Subject to the sooner determination thereof under article 10, this agreement shall remain and continue in force for a period of seven years from the 1st day of August next.

14. Each of the said companies parties hereto will from time to time make, do, execute, and perform all such acts, deeds, matters, and things as may be necessary for carrying into effect the terms of this agreement which may be necessarily required by the other of them.

15. Except as is hereinbefore specially provided, all matters and questions hereinbefore referred to arbitration, and all questions in difference which may arise between the two companies as to this agreement, or the construction or effect thereof, or as to any matter or thing connected therewith or arising thereout, shall, as and when they respectively arise, or as soon thereafter as conveniently can be, be referred to and determined by an arbitrator to be mutually agreed upon between the two companies, or, him failing, an arbitrator to be appointed, upon the application of either company, by the Chief Justice for the time being of the Court of Queen's Bench of the Province of Ontario, heretofore called the Chief Justice of Upper Canada, and the decision of such arbitrator shall be final and binding upon both parties, and the costs of and incident to every such reference and award under this agreement shall be in the discretion of the arbitrator.

In witness whereof the Grand Trunk Company and the Great Western Company have caused their respective common seals to be hereunto affixed the day and year first above written.

Seal affixed this 21st June, 1867, by
ALEXANDER HOYES.
Witness, BLACKSTONE BAKER, Secretary.
Seal affixed by order of the board,
JOHN M. GRANT, Secretary.

Central Railroad of New Jersey.

The President and Directors of this company, accompanied by a few invited guests, made an excursion over their road on the 18th inst., from Jersey City to Easton, to inspect the improvements that have been made on the line during the past year. There are few roads leading from New York on which the improvements have been so liberal and extensive as on this road during the last two years. Commencing with the new wharves, ferry house and depot of the company recently completed on the made land south of Jersey City, the company has extended its improvements all along the line of the road to Easton, constructing everything with an eye to permanence and durability, and without regard to expense. At Fort Johnson, Bergen Point, a large coal depot has been built, which, when completed, will have a capacity of a million tons, and combine every facility for unloading and storing freight. The famous high bridge, twenty miles this side of Easton, has been all filled in with earth and stone, at an expense of $250,000, and now presents a broad and solid roadway over the entire chasm. The same thing has been done with the bridges at Bloomsbury and Springtown, further on, and three miles this side of Easton one of the finest viaducts has been constructed over the Lorpetcong Creek to be found in the country. It is built of solid stone; has five arches, each of seventy-five feet six inches span, and cost upward of $100,000. The road has a double track the entire distance, and arrangements are making for the construction of two more tracks the entire length of the road, to accommodate the immense coal freight from the Lehigh and Lackawanna coal regions, all of which is destined to come over this road. While thus providing for the future freighting business of the road, the company has not been unmindful of the traveling public, whose patronage over the first half of the road has more than doubled in the last two years. They have built three of the finest ferry boats to be found in our harbor, exclusively for the use of the road, and the passenger cars of the road are unsurpassed in elegance and comfort. The road passes through the richest and pleasantest part of New Jersey, including in its route the town of Bergen Point, twenty minutes from the City, Roseville, a new and charming spot, forty minutes' ride; Scotch Plains, with its new Fanwood Park, fifty minutes; Plainfield, one hour; Somerville, one hour and twenty minutes, and so on through the beautiful Raritan and Musconetcong Valleys, dotted here and there with charming villages, whither our city population, driven out of the metropolis by dirty streets, inconvenient locomotion and high rents, are flocking every year by thousands. Frequent trains are run by the company to accommodate the increasing travel—no less than fourteen trains per day passing each way at present between this city and Bergen Point. Under the present management the road has become one of the most favorite outlets for the overcrowded population of New York, which is rapidly making the eastern half of New Jersey a thickly settled suburb of the metropolis.

Western Maryland Railroad.

The annual meeting of this company was held at Westminster, Carroll Co., Md., on the 16th inst. David Zellar and Samuel Zeigler, of Washington County, G. S. Haines, of Carroll County, James McDougal, of Baltimore City, and Joshua Biggs, of Frederick County, were elected directors on the part of the stockholders. These, with John W. Randolph and Samuel Mackubin, appointed by the Mayor and City Council of Baltimore, constitute the board of directors for the ensuing year. The board unanimously re-elected John Lee Chapman, Esq., as President, J. B. Boyle as Secretary and Treasurer, and P. H. Irwin, Superintendent. The report of the President and Directors of the company of the operations of the road for the past year will be published in a few days. The meeting of the stockholders was characterized by a unanimous sentiment of feeling in favor of the early completion of the road to Hagerstown.

☞ The City Council of Vicksburg has ordered the collection by taxation of the unpaid balance of that city's stock in the Vicksburg, Shreveport and Texas Railroad, amounting to $57,000, to be collected in three installments, the last falling due 1st January next. This will nearly complete the road to Vicksburg.

☞ At the annual meeting of the stockholders of the Savannah, Griffin and North Alabama Railroad, at Newnan on the 1st inst., H. J. Sargent was elected President, and John I Whitaker, Benjamin F. Milner, C. H. Johnson, G. J. Drake, Glenn O. Wynn and W. W. Thomas were elected Directors for the ensuing year.

☞ The double track on the Western, Mass., Railroad will be completed to Chester in about two weeks. Between that place and Becket—nine miles—there will be only a single track during the winter, and this will be the only break in the double track between Boston and Albany.

American Railroad Journal.

Saturday, October 26, 1867.

Stock Exchange and Money Market.

Money has been fairly active, since our last, chiefly in the line of call loans, for which lenders have generally shown most partiality. The governing price of accommodation has been 7 per cent. per annum. At this rate the supply available to responsible borrowers, in a temporary form, has been gradually increasing from day to day. The increase has been most apparent in the offerings of capital on private account, both home and foreign. Large amounts of foreign capital continue in this market, in quest of secure and profitable employment. The country drain of currency continues, showing its effects most perceptibly in the notable modifications of the city bank averages. Discount applications have been numerous and urgent, but have not met with much favor, either at bank or through private channels. The extreme, and unexpected dullness and depression in legitimate business, together with the violent speculative movements in progress in produce, chiefly in breadstuffs, and the reports of financial disturbance in Europe, tend to lessen the disposition of lenders to place their means beyond their control, for any considerable period, even in the discount form. Best commercial paper has been quoted at from 7 to 10 per cent. per annum, as extremes; but the volume of completed negotiations on this basis, and within this range, is unusually limited. Some of the strongest city banking institutions decline to take produce paper at all, and most of those, who deal in it, shave it keenly, and severely, exacting very high rates for accommodation. Government has been again a seller of bonds and gold, and a purchaser directly or indirectly of maturing Seven-Thirties, and Compound Interest Notes, through the local office. Yet the cash balances of the Sub-Treasury, here, were augmented by over four and a half millions, last week. No further important developments have been made in the Seven-Thirty counterfeit case. Government has demanded reclamation from the parties, who had sent in for redemption some eighty of the counterfeit notes, received by them in the regular order of business. These parties refuse to recognize the claim, or to comply with the demand. Washington advices state that Assistant Treasurer Van Dyck here, writes, that in all cases the distinct understanding between the party sending in the notes and himself has been that he only received the bonds for transmission and conversion, and to that effect he requires all parties to indorse the notes as a means of their identification, so that if found to be spurious or *cavcated*, they may be returned to the owner without difficulty. On the other hand, the bankers claim that the payment which Mr. Van Dyck makes when he receives the notes is a complete transaction, and that the Government becomes responsible for the notes after that time just as fully as they, the bankers, would become responsible for a counterfeit received over their own counters. The business public generally sympathizes with the bankers, and concurs in their view of mutual obligations. The specie reserve of the banks is now $7,319,010, against $7,371,487 same time last year. The city bank deposits are now $173,438,375, against $225,085,853 week ending Oct. 13, 1866. The legal tender reserve amounts to $54,845,832, against $78,625,460 same time last year. The circulation now stands at $34,037,450, against $30,415,240 same time last year. The loans are now $247,553,911, against $279,735,793 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $98,027,118 a day, against a daily average of $97,722,045 the preceding week, and $95,031,270 the week ending with Sept. 28. The current week's exchanges average about $96,500,000 a day. The city banks, last week, lost $3,697,259 of deposits, $2,284,761 of specie, and $1,769,000 of legal tender. They reduced their loans, $279,222; and augmented their circulation, $51,409.

National Bank notes to the amount of $84,080 were issued last week, making the total issue to 1,671 banks thus far, $304,129,991, against $282,555,440 at the close of the fiscal year ending June 30 1866. From the total issue is to be de-

ducted the currency returned, including worn out notes, amounting to $4,988,245, leaving, with the existing 1,639 banks, (having an aggregate capital of $422,913,861,) an actual circulation at this date of $299,141,746. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,646,250; and for the public deposits, $38,270,450—making a total of $378,916,700. The Treasury Department last week redeemed and destroyed $503,800 of worn and mutilated fractional currency, and issued $423,757 of new.

The Philadelphia Bank movement the past week shows an increase in loans, of $34,223; a decrease of $9,589 in specie; a decrease in legal tenders of $80,416; an increase of $7,338 in deposits; and an increase of $6,619 in circulation. The Bank Clearings show an increase of $1,100,899, and the balances, a decrease of $520,864.

The Commercial Bank of Canada, the failure of which was reported on Tuesday morning, had a capital of £1,000,000. The bank had a branch in this city, through which it did a considerable business in exchange.

The U. S. Sub-Treasury receipts, week ending with Oct. 19, were $17,238,243, including $2,037,259 from customs duties; payments, $12,659,117; balance at the close of the week, $113,779,145, against $109,200,019, at the close of the preceding week, showing an increase of $4,579,126. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $8,354,489 including $286,969 from customs; and payments, $9,552,783; on Tuesday, receipts, $1,147,414 including $302,000 from customs, and payments, $907,581. The balance at the close of business on Tuesday stood at $112,820,683, against $111,647,493 a week previous.

Government revenues have been quite limited since our last. The excises, last week, yielded $1,683,000, against $2,600,000 the preceding week; customs at the port of New York $2,037,259, and at the outports, about $680,000 (in coin) more, making the grand total income for the week equal about $5,623,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $67,500,000.

Government received $5,954,640 from customs, through the port of San Francisco, from Jan. 1, to Sept. 27, 1867, against $5,600,315 same time in 1866.

Gold has been quite variable, during the week, though the extreme figures have not been radically different. The speculation has been less vigorous, in the absence of anything like an active export or customs call; and of the later and more pacific news from Europe, Government has been selling gold, moderately; while it has been absorbing less specie, in the customs line. The customs call thus far in the current week, have fallen below the recent daily average. There has been no foreign inquiry of moment. The liberal produce exports, not only serve to prevent any considerable outflow of treasure, but tend to foster the belief in early imports of coin, to pay for as much of our breadstuffs, provisions, cotton, tobacco, &c., as will be required by the European nations, over and above the aggregate of our diminishing imports of foreign goods. The extremes of gold, during the week, have been 143@144¾; and the closing prices on Wednesday, 143½. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,632,511, against $8,265,926 same time last year. The customs demand for Gold last week, averaged $339,543 a day; thus far, this week, it has been equal to $294,000 a day, or equal to a weekly aggregate of $1,764,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $4,711, and from California, $576,992. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $101,152,480, against $112,370,636 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $24,432,596, against $35,357,013 same time last year, showing a decrease this year, of $10,924,417. The exports of specie from this port, last week, were $119,982. The total outflow of specie from the port, since Jan. 1, 1867, has been $44,042,672, against $54,180,135 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $33,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $43,401,924, against $31,951,989 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to Sept. 27, reached $30,607,453, against $33,587,844 same time last year, showing a decrease, in 1867, of $2,980,391.

A good supply of Bankers' and commercial bills of Exchange on London and Paris, especially the former point, has been offering in the open market, this week, to the depression of rates, in the absence of anything like an active demand. The failure of the Royal Bank of Liverpool, connected with this city, in the Exchange line, has tended to create distrust in commercial bills. The bank's liabilites were over four and a half millions sterling. It was intimately connected with the embarrassed cotton interests of Liverpool, and the manufacturing districts of England. Bankers' 60 day bills on London closed at 108½@109, and on Paris to 5.21¼@5.17½; sight bills on London to 109@109½; and on Paris to 5.16½@5.15. The offerings of produce bills have been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,355,743, making the total value of exports since Jan. 1, 1867, $147,264,985, against $155,224,803 same time in the preceding year.

Government securities were unusually dull and heavy, during most of the week, in the absence of any considerable investment inquiry for either bonds or notes. Within a day or two, however, the demand has partially revived, especially for the six per cent. coin bearing bonds, as also for the Seven-thirties of June and July issues, all that remain now in the hands of the people. The Five-twenties, May and November coupons, are picking up again, in view of the proximate disbursements of the maturing half year's coin interest, payable in about a week. Pending these disbursements, it is believed that Government will not be a seller of gold to any notable extent. Compound interest notes have not been in much request, yet have been quoted a trifle higher, on light offerings. The Government office is exchanging the new three per cent. certificates for maturing compound notes, as freely as they are called for. There has been much less inquiry for Ten-forties, which closed less buoyantly. The general market closed rather in favor of buyers on Wednesday, the demand having fallen off. U. S. sixes of 1881 closed here on Wednesday at 111⅜@111½; U. S. Five-twenties of 1862, 112⅛@112¼; U. S. Five-twenties of 1864 at 109@109⅛; U. S. Five-twenties of 1865 at 109⅛@109¼; U. S. Five-twenties of 1865, consolidated, 106⅝@106¾; U. S. Five-twenties of 1867, 106⅝@106¾; U. S. Ten-forties at 100⅛@100⅜, and U. S. Seven-thirties at 104¾@105⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864..118¾	September, 1865..115¾
May, 1865 .....117¼	October, 1865 ....115½
August, 1865....116⅜	

Railway and miscellaneous share property has been in fairly active demand, through the week, mainly on speculative account, but prices have been quite variable, and at the close, weak and depressed, though money has been working in favor of the speculators for a rise.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 9.	Oct. 16.	Oct. 22.
Consols.....	94¼	93⅞	93⅛
U.S. 5-20's of 1862....	71¼	71¼	69¼
Erie.....	43⅛	46¼	45¾
Ill. Central.....	77⅜	78	78¼

General business has been less animated. The breadstuff movement has been less confident, and prices of the leading articles in the line close less buoyantly. The export inquiry has been checked by the stringency in the freight market, and the depression in foreign exchange, as well as by the less favorable market reports from the other side. There has been considerable local speculation in corn and oats, which have been quite variable in price. Provisions have been less active; hog products have been depressed. Cotton has been quite freely offered and purchased opening at advancing, and closing at declining prices with middling grades on Wednesday at 19@20½ cents per lb. as extremes. The stock of cotton now here is estimated at about 32,500 bales. The receipts at the port this week, have averaged about 2,900 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1,1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; last year; estimated stock at close of the year, 80,296 exports, 1,554,664 bales, against 1,557,054 bales bales, against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 95,000 bales, against 88,000 bales same time last year; exports, same time, 18,900 bales, against 56,400 bales same time last year; stock on hand at latest dates, 123,000 bales, against 275,000 bales same date last year. At the live stock markets this week beeves ranged from 10@17½c., and veal calves, at 8@12½c., on a less active business; sheep from 3@6½c., and lambs from 5@

7⅛c., on a moderate demand. Swine from 5@7¾c. per lb., live weight, on a livelier market. The week's receipts have been 6,342 beeves, 1,312 calves, 28,063 sheep and lambs, and 26,449 hogs.

Foreign merchandise has been in comparatively light request, though holders have been more eager to realize, and have shown more willingness to meet the wants of buyers, on their own terms. Dry goods have been pressed for sale, and have been generally depressed in price, while the inquiry even for seasonable fabrics, has been extremely moderate. We have never known a time when the "hand to mouth" system was more generally adopted by purchasers than it has been thus far this season. Nobody seems disposed to buy more than will meet pressing calls. The total imports of foreign dry goods, last week, were $1,451,270, and the total amount marketed $1,314,222. The value of foreign merchandise imported last week, was $3,830,007—making the grand total specie value of last week's imports of dry goods and merchandise, $5,281,277, and since Jan. 1, 1867, $203,509,290, against [$239,863,403 same time in the preceding fiscal year. The ocean freight market has been less active, since our last, and less firm with 530 vessels of all classes in port. For Liverpool we quote flour at 3s. per bbl. grain at 10½c.@11d. per bushel; cotton at ¼d. per lb.; and heavy goods at 27s. 6d.@37s. 6d. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Oct. 22, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$4,680,159	$4,355,743
Prev. reported	150,544,644	142,909,242
Since January 1	$155,224,803	$147,264,985

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,100,437	$1,451,270
Gen. merchandise	2,961,544	3,830,007
Total for the week	$5,061,981	$5,281,277
Previously reported	234,801,422	198,228,013
Since January 1	$239,863,403	$203,509,290

The balance in the Sub-Treasury on Wednesday was $113,368,118 07.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Grand Trunk (Ca.) Railway.

The half-yearly general meeting of this company, to be held in London on the 31st inst., for the purpose of receiving the half-yearly report of the directors, etc., is to be made special for the purpose of considering and, if so determined, of authorizing and approving an agreement between this company and the Great Western Railway Company of Canada, a copy of which is published elsewhere in our present issue in connection with the report of the latter company.

☞ The Northport Branch of the Long Island Railroad, from Huntington to Northport, a distance of four and a half miles, has been contracted for, and the work will be immediately commenced.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Alton Railroad for the second week in October, 1867, were $115,839 00
Corresponding period previous year.. 88,384 00

Increase..... $27,455 00

The earnings of the Western Union Railroad for the second week in Oct., 1867 .... $25,860 04
Corresponding week previous year.... 22,495 63

Increase $3,364 41

The earnings of the Atlantic and Great Western Railway for the second week in Oct., 1867, were..... $127,951 00
Corresponding week previous year... 145,365 00

Decrease $17,414 00

The earnings of the Chicago and Northwestern Railroad for second week in Oct., 1867. $347,549 11
Corresponding week previous year .. 279,412 04

Increase $68,137 07

The earnings of the Detroit and Milwaukee Railroad for the week ending October 17, 1867, were $45,400 00
Corresponding week of 1866..... 48,498 00

Increase..... $3,098 00

The earnings of the Chicago and Rock Island Railroad for the second week in Oct., 1867, were..... $132,700 00
Corresponding week of previous year. 102,110 00

Increase $30,590 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2nd week in Oct. 1867, were..... $114,760 00
Corresponding week of 1866..... 108,651 00

Increase $6,109 00

The earnings of the Michigan Central Railroad for the 2nd week in Oct., 1867, were. $119,883 72
Corresponding week of previous year. 99,857 05

Increase $20,026 67

The earnings of the Marietta and Cincinnati Railroad the 2nd week in Oct., 1867.. $30,449 00
Corresponding week previous year.... 22,067 00

Increase $8,382 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for the second week in October, 1867, were $51,386 06
Corresponding week of previous year. 50,911 44

Increase $974 62

New York, Housatonic and Northern R. R.

A meeting was recently held at Lewisborough, to take into consideration the present condition of the finances of this road. The following summary of the balance sheet up to September was presented:

Stock subscribed, $215,200; stock issued, $179,900; unpaid installments, $10,000; cost of road exclusive of land, $178,706; actual right conveyed (cost), $11,500; given, not conveyed, 15 miles, $18,000; total, $228,206; outstanding indebtedness from stockholders, which has since been paid in, $13,000. Mr. Luke said that he was convinced that the traffic in the first year after the completion of the road would enable the Board to declare a dividend of at least 12 per cent. The President said, in reply to a question, that the Purchase cutting cost only $15,000 instead of $40,000, as had been stated. The following amounts were subscribed before the close of the meeting; Col. E. Avery, $2,000; M. R. Mead, $2,500; G. W. Mead, $5,000; G. S. Avery, $2,000.

☞ The South Side (L. I.) Railroad was formally opened from Jamaica to Babylon on the 12th inst. The distance is 27 miles.

Journal of Railroad Law.

RAILROAD COMPANIES BOUND TO FENCE TRACK NOTWITHSTANDING COVENANT OF THE INJURED PARTY TO DO SO.

It is decided by the case of Shephard *vs.* Buffalo, N. Y. & Erie R. R. Co. just determined by the Court of Appeals, that a company is required to fence both sides of its track, and are liable for damages done to cattle so long as such fences are not made, notwithstanding that a party whose cattle are killed is bound by covenant between his assignor and the company to build the fence. The facts of the case will be found in the opinion of the court by

PECKHAM, J.—It appeared on the trial of this cause, that the roadway of the defendant, and also of the New York Central, ran through plaintiff's farm, side by side, each of the width of fifty feet. The roads adjoined each other, the west line of defendant's road abutting upon and forming the east line of the Central. That the outside or east line of the defendant's road was always properly fenced with suitable cattle guards at the highway or farm crossings, but there were neither cattle guards or fences on the west line, nor, in fact, on either line of the Central, the fence once built, on its west line, having been destroyed, and the cattle guards filled up. No fence had ever been built on its east line. The plaintiff's cattle were pastured on his meadow, adjoining the Central on the west, and the plaintiff knew that there were no fences except as stated. From this meadow the cattle strayed across the central on to defendant's road, and were killed. The Justice found all these facts and that the damage sustained was $150. The Central road along there, was formerly the Tonawanda Railroad. On the 20th of August, 1842, Josiah Newman a prior owner of plaintiff's farm granted to the Tonawanda road its roadway, and "for himself his heirs, executors and assigns covenanted and agreed to, and thereby did release, discharge and forever acquit said road, its successors and assigns, of and from any and all liability which they now are, or forever hereafter may be under, to erect, maintain or keep in repair any fence or fences along the line of said railroad."

On the 4th of January 1857, the plaintiff granted, to the defendant a roadway through his farm, and in the deed thereof it was provided as follows: "Said party of the second part, (the road) is to erect and maintain a fence upon the easterly line of the lands above described, of the height and strength of a division fence as required by law."

It is insisted on the part of the defence that the plaintiff was bound by the covenants in the deed of his grantor to the Tonawanda Railroad. That those covenants run with the land, and were "a perpetual release to that road, and to its successors and assigns from all obligation to build any fence on the line."

Assuming that these covenants did run with the lands, as they probably did, (Norman *vs.* Wells 17 Wend. 136) they were made in 1842, prior to the passage of the act, requiring railroads to fence on both sides of their roadway. (3 statutes at large by Edmonds, 365 § 44 enacted in 1840.

This covenant must therefore be construed in reference to the rights of the parties, and their liabilities as then existing. The Tonawanda Railroad, as the proprietor of adjoining land, was not bound under the then statutes, to make all the fence on both sides of the road, but to make and maintain one half of the partition or division fences. From this obligation, that road was released, and so was its assignee, the Central road, therefore, neither the Tonawanda road nor its assignee, the Central, was bound to make or maintain any part of a division fence.

But suppose the owner of the farm who made the covenant chose to let his land lie open, (1 statutes at large by Edmonds, 326, § 1) as he may, could the railroad compel him to erect fences on both or either side of the railroad under a simple covenant, releasing the company from their erection? Clearly not.

There is nothing in the deed which requires the grantor to erect any fence. The plaintiff therefore is not within the provision of the act which requires "an owner of land adjoining any railroad who or whose grantor has received a specific sum for fencing along the line of land taken for the purpose of said Railroad, and who has agreed to build a lawful fence on the line of said railroad, to build and maintain" the same; and in cases of neglect the railroad may build and maintain it at his expense. (1 statutes at large by Edmonds, § 9 Laws of 1854. The railroad act of 1850 and the act as amended in 1854, section 6, makes the railroad company liable for damages done to cattle, &c., so long as the fences &c., shall not be made and when not in good order.

I do not perceive that the plaintiff's grantor has in any manner released the railroad from any obligations or liabilities imposed by that act. The parties could not have had that act in view, as it was not in existence when the covenants were made, and they did not qualify its obligations.

The act was passed from public considerations, its purpose was to give protection to the traveling public as well as redress to farmers contiguous to the road. (Corwin *vs.* New York Central Railroad Company 13, New York, 112, opinion of Denio, J.) So that if the covenant under consideration related to the defendant's road instead of a road outside and adjoining, I do not think it would have been a defense. But it was not a covenant with this defendant, nor is this defendant an assignee thereof, or in any manner privy to it.

How then can the defendant claim its benefits. If it were a defense to the Tonawanda or Central Railroad, it does not seem to follow that it would also shield the defendant under the circumstances of this case.

But it is said the plaintiff was guilty of negligence in turning his cattle into his meadow when he knew the railroads were not fenced, and hence they could stray thereon and be injured. His negligence therefore contributed to the injury, and he cannot recover upon this ground.

The complaint was dismissed.

If this be true, then the railroads need never fence their roads so far as respects adjoining owners. Landowners could not of course occupy their lands adjoining railroads, but must pasture their horses, cattle, sheep and hogs on some other farm, unless they volunteer to discharge the duties which the statutes impose upon the roads This cannot be law; such a construction was never intended by the Legislature. It virtually nullifies the act. It is not negligence within the meaning

of the rule for an owner to pasture his cattle on his own farm, because a railroad fails to discharge its statutory duties and fence its road. Such a construction as that adopted at the circuit, not virtually, but entirely nullifies the act, so far as regards any protection or relief to farmers adjoining the railroads.

If the railroads neglect to keep the fences in repair, it may be urged that a farmer with ordinary diligence will know it, and send his cattle off from his farm, otherwise if injured he can have no redress; or plainer still if the railroad not partially performs, but wholly omits, its duty and makes no fence at all, then of course the adjoining owner will know it, and should abandon his farm, as his cattle, if they were killed, the wilful refusal or neglect of the railroad to perform its statutory duty is its absolute defense.

The Legislature in declaring the absolute liability of the railroad for all such damages when it omitted to make the required fence, did not intend any such contradiction or qualification, and never would have passed a statute requiring an owner to abandon the ordinary use of his farm, because of the railroads neglect to do its duty; or if he should use it in an ordinary farmer like way he must lose his cattle, without redress, if killed by the railroads neglect. The damages resulting to the owner of a farm from this construction of the statute contended for, I think, were never considered or allowed to him when the railroad obtained the roadway. But it was always assumed that he might continue to occupy his farm substantially as before. The statute does not authorize the owner himself to make the fence, if the railroad neglect or refuse, and recover of the road therefor. But the Legislature obviously intended to put that whole duty upon the railroad.

Hence they enacted, that if the adjoining owner who has received compensation for making the fence, and neglects to do it, the railroad shall build and thereafter maintain such fences, and may recover of the owner the expense thereof, (§ 9 of railroad act as amended in 1854.) Hence if the statute declaring that railroads failing to make and maintain the fences, &c., required shall be liable for damages done to cattle, &c., thereon, it had been proposed to add, provided the owners shall not keep or pasture their cattle, horses, sheep or hogs on any farm adjoining such railroad, so neglecting to make the required fence, I think we may safely say the provision would never have been enacted. It is not well therefore to add it by construction. As to this branch of the case then, I am of opinion first, that pasturing cattle, &c., on a farm contiguous to a railroad cannot be regarded as negligence, though the company has neglected to make the fence required by law. Second, I think the company cannot be allowed to set up that negligence, if it may be so termed, when it has itself omitted to fulfil the requirements of the statute, it should not be permitted to set up its own violation of a statute duty, as a basis of charging negligence upon others. Besides, this objection I think, is substantially disposed of on the authority of this Court. (Corwin *vs.* New York and Erie Railroad Company 18, N. Y., 42.)

This of course does not authorize a recovery when an owner has voluntarily and purposely incurred the damage.

Great Western Railway of Canada.

We give elsewhere the report of the directors of this company for the half year ending July 31, 1867. The Engineer's report states that the expenditures upon maintenance and renewals of way for the half year ending July 31, 1866, was £47,514, and for the half year ending Jan. 31, 1867, £39,682. The principal causes which have united to prevent any large reduction under this head are the increase in wages, averaging about 25 per cent. above the rate which prevailed less than three years ago, and the advance in the cost of timber and sleepers, amounting to an average of about 30 per cent. He then adds:

The light rails in general use on this continent, coupled with the excessive stress to which our severe winters expose them, render the permanent way of Canadian railways much less durable than those of English railways, and therefore the very best material ought alone to be used in the manufacture of rails sent to this country. But instead of this being the case, it has been the unfortunate experience of all the railways on this continent to receive from England, during the past eight or ten years, rails of a decidedly inferior quality, and a similar experience attended us in the re-rolling of our old rails in former years in the rolling mills of Canada and the Northern States. The result of this has, of course, been that the duration of Canadian and American railway tracks has universally fallen far below the standard of England, and even of this continent itself in bygone years, when sounder rails were furnished by the English manufacturers. But we are now independent of foreign markets by our own rail rolling mill, and I have recently effected a great improvement in the quality of our rails by introducing an increased percentage of good hard puddled iron in the heads of the new rails. This improved quality is, of course, only obtained at an increased cost of re-rolling, but the benefit thus accruing greatly outweighs the additional cost. If the quality of a rail can only be improved by twenty-five per cent., or one-fourth added to its life, it is worth accomplishing at a cost of £1 4s. 8d. a ton; but we shall certainly obtain a much better result at a smaller increase of cost.

The report of the locomotive and car superintendent states that the stock of engines comprises 52 passenger, 33 freight, 8 shunting, and 1 locomotive, making a total of 94 engines. During the half year considerable progress has been made towards the construction of 6 locomotives, the first of which is completed, and is giving the utmost satisfaction, being in every respect, without exception, a first class freight engine. Thirty-four engines have received heavy repairs, and 11 light repairs. Sixty-six cast steel tyres, 26 Lowmoor iron tyres, 2 Lowmoor iron crank axles, 11 iron straight engine axles, 5 tender axles, and 1 pair of new cylinders were supplied to the stock. During the half year £7,516 has been expended in renewals, which sum includes the amount laid out during the period on the new engines under construction. The following shows the expenses of the locomotive section for the past six months, compared with the corresponding period of the previous year:

	1866.	1867.
Total locomotive expenses	£40,799	£44,760
Percentage on earnings.....	11.91	12.27
Number of cords of fuel.....	17,586	22,996
Total cost of fuel.....	£9,937	£13,201
Cost of fuel per engine mile...	2.30d.	2.77d.
Ditto. Train ditto.....	3.88d.	3.84d.

To meet the demand of the Blue Line and other through traffic, 8 first class, 16 express baggage, and 100 cattle cars have been converted into narrow gauge cars; also 77 standard narrow gauge freight cars have been completed for that traffic. The sum of £3,287 has been expended during the half year for renewal and repairs, including the revenue share of construction of broad gauge box cars. Two of the palace sleeping cars for Pulman's line were finished and sent to work during the half year, and the remaining two are in a very forward state of completion.

Journal Box and Lining Metals.

The New Jersey National Metal Co., 179 Pavonia Avenue, Jersey City, N. J., are now manufacturing "J. R. Baker's National Anti-friction Journal Box and Lining Metals" for Railroad Car Boxes, Steamships, Rolling Mills, and all other kinds of machinery Journal boxes where brass or Babbitt's Metal has formerly been used in Journal bearings. This composition has achieved so decided a success, as to warrant the manufacturers in commending it to the attention of all who have occasion to use anti friction box metals. Its superior advantages gained and claimed to be, are: durability and unequaled power to resist friction; cheapness, both as regards first cost and the amount of services rendered; capability of resisting heat and non-liability to fuse like other soft metal by friction, except at a great degree of temperature; free from cutting or injuring the journals like soft metals; retaining oil and resisting heavy pressures; advantage in its first cost, saving a large profit to the purchaser, and saving one pound in six in filling cavities; it does not shrink in cooling, is not liable to corode or rust, and is capable of a high polish, rendering it very suitable for steamship pumps, and for ornamental work of various kinds. It may also be substituted for brass plated ware, for piano peddels, safe names, etc. For Trade Mark, see Advertisement in another column.

North Missouri Railroad.

A dispatch dated St. Louis October 17th, says that this company has sold nearly $4,000,000 of its bonds to James B. Eads and associates. Several heavy capitalists of New York and St. Louis are connected with Mr. Eads, and means are now secured to finish the road. Messrs. John J. Roe Barton Bates, Charles K. Dickinson and John G. Copelin go into the directory under the terms of the purchase, and E. W. Fox, of St. Louis, has been elected temporary President.

☞ The people of New Mexico held a meeting at Santa Fe on the 21st of September, to consider measures to secure the extension of the Kansas Pacific Railroad through New Mexico to the Pacific Ocean. Governor Mitchell presided, and speeches were made by General Palmer, Treasurer of the railroad company, Major Calhoun, Chief Justice Slough, C. P. Cleaver, delegate to Congress, and others, all taking strong ground in favor of the enterprise.

☞ The construction of a railroad has been authorized by the Emperor of Brazil, and the plan will at once be carried out. The road will have its terminus in the City of Rio Grande do Sul, and is expected to reach the coal regions of Candista, in the Province of San Pedro.

☞ It is believed that the projected railway from Guelph to Georgian Bay, in Canada, will be commenced next Spring.

Milwaukee and St. Paul.

By the completion of the Iowa and Minnesota divisions of the Milwaukee and St. Paul Railway, continuous railroad communication has been established between St. Paul and Milwaukee, and of course the entire system of railroads radiating from Chicago. The length of the entire road from Milwaukee to St. Paul, including the six mile link of the Valley road, between St. Paul and Mendota, is about 420 miles, of which about 220 is on the west side of the Mississippi. That portion of the road on the east side of the Mississippi, from Milwaukee to Prairie du Chien, about 200 miles in length, is at present called the Milwaukee and Prairie du Chien Railroad, but we believe is to receive the designation of Milwaukee and St. Paul as soon as the Wisconsin Legislature shall authorize the change. The part of the road west of the Mississippi from McGregor to Minneapolis was formed by the consolidation of two enterprises—the Minnesota Central and the McGregor Western—both being auxiliary to the great Wisconsin consolidation, which embraces the Milwaukee and Prairie du Chien Railroad and the Milwaukee and La Crosse, which is now called the Milwaukee and St. Paul. It is expected that regular trains will be running over the whole length of the road by the 1st of November.

Bayside Railroad.

The St. Michael (Md.) *Comet* says: It is rumored that New Yorkers interested in the Maryland and Delaware Railroad, contemplate building a branch road connecting with the main steam at Easton and running through Royal Oak, St. Michaels, and down along the bayside. From Easton to Oxford (the termination of the main line) is about twelve miles, and from Easton to say the Mineral Spring wharf on the bay shore—is about the same distance. The grade from Easton along the bayside is better than on the line to Oxford, and hence a railroad may be very cheaply constructed.

Boston and Albany Railroad.

The first meeting of the Boston and Albany Railroad Company, (formed by the consolidation of the Boston and Worcester, and the Western Railroads,) was held in Boston on the 23d inst. Judge B. F. Thomas presided, and the following gentlemen were chosen directors: Chester W. Chapin, Josiah Stickney, Ignatius Sargent, James D. Colt, Daniel Denny, Ginery Twichell, D. Waldo Lincoln and William Claflin. A meeting of the directors will be held on the 30th inst.

☞ At a recent meeting of the friends of the Kent County, Md., Railroad, it was stated that the citizens of the villages of Sassafras, Warwick and Middletown had determined to raise the sum of $100,000, in order to secure the construction of the road from Massey's Creek to Middletown, Del. The entire amount required is $150,000.

☞ The directors of the Great Western Railway of Canada have decided to recommend a dividend at the rate of four per cent. per annum, free of income tax, reserving £2,000 for the renewal of ferry steamers, and carrying forward to the current half-year the sum £1,681 7s. 11d.

☞ The managers of the Lawrence (Penn.) Railroad contemplate a route into Youngstown on the south side of the river.

Canadian Railway Enterprise.

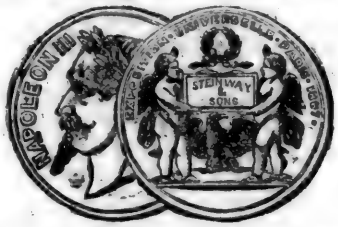
It is reported that the government of the New Dominion has recently negotiated a railway improvement loan in London, which has been guaranteed by the home government in accordance with the act constituting the Dominion. The amount it three million and a half sterling, or about $24,500,000 in our currency, and the Bank of Montreal, as the fiscal agent of the new government, is said to be already drawing through its New York agents against the loan.

Panama Railroad.

This road has been opened eleven years, and during that period 400,000 passengers and 614,535 tons of goods have passed over the line. This year it is expected that 150,000 tons will pass over it. In 1856 the income was $136,741, and the expenditure $530,249. In 1866 the income was $2,423,977, and the expenditure $1,208,364.

☞ The following gentlemen have been elected directors of the Vermont and Canada Railroad: Worthington C. Smith, of St. Albans, John Porter, of Hartford, Edward Blake, Benj. P. Cheney, and Samuel Atherton, of Boston, John W. Newton, of St. Albans, and J. P. Clark, of Milton.

☞ The formal opening of the Dorchester and Delaware Railroad took place at Cambridge, Md., on the 23d inst. That part of the road from Seaford to the Maryland line is now under contract, and will be completed by the first of March next.



☞ The extension of the Lehigh and Mahanoy Railroad to Ashland is in contemplation.

STEINWAY & SONS
TRIUMPHANT,
Having been Awarded
The FIRST GRAND GOLD MEDAL
for American Grand, Square, and Upright Pianos: this Medal being distinctly classified *first* in order of Merit, *over* all other American exhibitors, and *over* more than 400 Pianos entered by nearly all the celebrated manufacturers of Europe.
In proof of which the following

OFFICIAL CERTIFICATE
of the President and Members of the International Jury on Musical Instruments (Class X) is subjoined:
PARIS, July 20, 1867.
I certify that the FIRST GOLD MEDAL for American Pianos has been unanimously awarded to Messrs. Steinway by the Jury of the International Exposition.
First on the list in Class X.
MELINET, President of International Jury.
GEORGES KASTNER, AMBROISE THOMAS, ED. HANSLICK, F. A. GEVAERT, J. SCHIEDMAYER, } Members of the International Jury.

This *unanimous* decision of the International Class Jury, *endorsed* by the Supreme Group Jury, and *affirmed* by the Imperial Commission, being *the final verdict* of the *only tribunal* determining the rank of the awards at the Exposition, places THE STEINWAY PIANOS AT THE HEAD OF ALL OTHERS.

The "Societe des Beaux Arts,"
(Society of Fine Arts, of Paris, known throughout Europe as one of the highest authorities on Music and Art Matters) *unanimously* awarded their *only* annual Testimonial Medal for 1867 to STEINWAY & SONS for the highest degree of perfection, most valuable inventions, and as exhibiting the greatest progress in the art of Piano-making, above all other exhibitors, at the Universal Exposition in Paris.

STEINWAY & SONS
Were also awarded a FIRST PRIZE MEDAL at the great International Exhibition, London, 1862, for powerful, clear, brilliant, and sympathetic tone, with excellence of workmanship as shown in Grand and Square PIANOS, in competition with 260 Pianos from all parts of the world.
STEINWAY & SONS, in addition to the above, have taken thirty-five First Premiums, Gold and Silver Medals, at the principal Fairs held in this country from the year 1855 to 1862 inclusive, since which time they have not entered their Pianofortes at any Local Fair in the United States.
EVERY PIANO is WARRANTED for FIVE YEARS.

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS,** Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

PUMPS.
STEAM, POWER AND HAND PUMPS,
OF ALL SIZES FOR
Railway Stations, Factories of all descriptions, Public and Private Water Works, &c., &c.

THE ELNATHAN SAMPSON

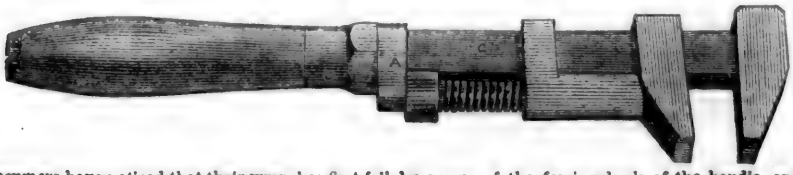
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

New York, Saturday, November 2, 1867.

Toledo, Peoria and Warsaw Railway.

We learn that this company are progressing with great rapidity in the building of the Western Division of their road between Peoria and Warsaw and Keokuk.

Messrs. Henry Hill & Co., will have finished their contract for the division between Warsaw and Bushnell, on the first of December. The rolling stock is all ready and will be placed upon the line at once. The locomotives were made by the Rhode Island Locomotive Works, at Providence, R. I., and are said to be very superior machines,

The opening of this line will be of great benefit to the Des Moines Valley Railroad Co., and will throw a large amount of Southern Iowa business over the Chicago, Burlington and Quincy Railroad until the line is completed to Peoria and the Chicago connection east of that place.

We learn also that all the work between Peoria and Bushnell has been placed under contract to be finished for the rails by the 1st of June next, and that the iron has been purchased, and will be shipped to New Orleans, to be forwarded up the river upon the opening of navigation in the spring.

The Division between La Harpe and Burlington is only 19 miles, and will be built as soon as the road is opened to Warsaw and Keokuk.

We learn further that the company have sold their First Mortgage Bonds on favorable terms to a party of capitalists in Wall st. and the Eastern States.

The Union and Logansport Road will be completed and open for business on the 1st January next, and a connection East will then be made from Peoria over the Columbus and Indiana Central and Pan Handle Railroads.

Iowa and Missouri State Line Railroad.

We have before us a communication from E. Robinson, Esq., President of this company, dated Farmington, Iowa, September 12, 1867, in which he says: I have recently passed over the line of our road to this place. The work is progressing in Van Buren, Davis and Appanoose Counties, Iowa.

I at first thought of organizing a grading party in Wayne County, to do the work through that county this fall; but I believe it will be better to concentrate all our energies on the eastern end, and close up the grading as we go.

The work through Wayne County is light, and the people there will prepare the road bed ready for the iron as fast as it can be laid, after we commence laying iron.

If we had iron for 40 miles, (the distance to Bloomfield,) or even for 20 miles, coming on now, it would create a powerful excitement among the people, to the Missouri River, and they would crowd the work with amazing rapidity, to its final completion. We have not fully determined. We have our location made to Lineville, near the southwest corner of Wayne County, Iowa, 109 miles from Farmington. Our line, so far, is the best that can be found in the west, as we follow for 80 miles a prairie divide, with only two bridges in that distance.

The distance from the Mississippi to the Missouri River, opposite Nebraska City, is 234 miles, and from Nebraska City to Fort Kearney, 168 miles, according to the official report of the Government surveys—making only 1,506 miles from New York to Fort Kearney. Of the distance between the Mississippi and Missouri Rivers, we can have the use of nearly 40 miles of road already constructed—28 of the Des Moines Valley road from Keokuk to Farmington, and 12 of the Council Bluff and St. Joseph road.

A charter has been obtained for a road from Nebraska City to Fort Kearney; and Otoe County, Neb., has voted $200,000 for the road, a portion of which, however, we have had encouragement will be appropriated to the west end of our line.

The west bank of Missouri joint at Nebraska City is a rock bluff, affording an abundance of good rock for abutments. The current of the river at this place passes from the Iowa side and strikes strongly against this rock bluff, forming a natural protection, and making it one of the very best bridging points on that river, which is here narrower than usual, being, I should judge, from ⅓ to less than ½ mile in width. The east bank is ordinary bottom land and will require piling foundation.

Two miles out, we connect with the Council Bluff and St. Joseph Railroad, over the track of which we can, if we choose, run 12 miles to Hamburg.

The seat of Government of Nebraska has been located in the great salt basin of that State, 50 miles west of Nebraska City, directly between there and Fort Kearney. This basin abounds with salt, coal and rock, all of which is a great help to our enterprise. We shall push the work as rapidly as possible, and make vigorous efforts to have nearly or quite 100 miles of grading done by the 25th of December next. Some portions of the grade needs a little dressing up, having stood some time, but we have available subscription to cover all that. The road bed will be prepared for the iron to Lineville, 109 miles, and I believe to Missouri River, as fast as it can be laid, after the people know we have commenced getting iron.

Danville and Wilkesbarre Railroad.

The grading of this road from Sunbury to Boyd's Mills, three miles above Danville has been let to John Bowen and Jeremiah and Samuel G. Savidge, of Sunbury, and the balance to Wm. M. Wiley, of Lancaster, and J. V. Crisswell, of Harrisburg. We understand that Messrs. Wiley & Crisswell have contracted to lay the sills and rails on the whole road.

Winona and St. Peter Railway.

The Chicago *Times* says that the Chicago and Northwestern Railway Company have purchased the Winona and St. Peter Railroad, together with the unfinished link from La Crosse to Winona, as an offset to the lease by the Illinois Central Railroad Company of the Dubuque and Sioux City Railroad. The purchase of this road by the Northwestern Co. assures the speedy continuation of the proposed link from Winona to connect with the Northwestern Railway at Madison, Wisconsin. It also assures the ultimate construction of a bridge across the Mississippi at Winona.

New Railroad in Vermont.

A correspondent of the Boston *Journal*, writing from Montpelier, Vt., October 25th, says that Messrs. H. Burden & Sons, of Troy, N. Y., have made application to the Vermont Legislation for a charter of a short line of railway in the town of Bennington. These gentlemen are the owners and operators of extensive iron works in Troy, and the owners of iron mines in Bennington, Vt. Their two Vermont mines are respectively about two and three miles from the nearest railroad stations, and the way to them leads over hilly roads. It is the purpose of these applicants, in the event of obtaining a charter, to construct a line of road from their Bennington mine to East Bennington, and thence along the Walloomsack river to the State line and connect with the Troy and Boston road at some point in New York. They ask no other aid than a charter, and propose from private funds exclusively to build and operate the road. The application, it is said, meets with considerable opposition from some of the members from that part of the State.

Pacific Railroad of Missouri.

The earnings of this road for the fiscal years ending February 28, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$831,245 11	$1,166,318 31
" freight	924,075 86	1,465,373 25
" mails	39,035 25	44,183 28
	$1,794,356 22	$2,675,874 84
Expenses, viz:		
Repairs of road bed	$83,802 18	$82,652 85
" track	339,490 75	543,216 69

Office exp., stationery, etc.	19,182 88	38,028 53
Telegraphing	9,103 78	10,740 74
Expenses for trains	16,389 39	33,926 16
All other expenses	74,102 68	70,123 00
	$1,393,530 08	$1,956,644 84
Net earnings	$400,826 14	$719,230 00

At the commencement of the fiscal year 1865–'66, the road was completed to Warrensburg, 218 miles from St. Louis; leaving a gap of 65 miles unfinished. On the 28th of May, 1865, trains commenced running to Holden, 232¼ miles; on the 14th of June to Kingsville, 237 miles; on the 26th of July to Pleasant Hill, 248½ miles; and on the 19th of September to Little Blue, 265 miles, where a connection was made with the track which had been laid eastward from Independence, 7.6 miles—the road having been opened and operated from Kansas City to Independence same months previous—and on the 2d of October, 1865, the trains commenced their regular trips over the whole line of road from Kansas City to St. Louis, a distance of 283 miles. The following statement will show the earnings of the road from commencement to February 28, 1867:

Year ending December	31, 1852	$108 15
" "	31, 1853	41,323 29
" February	28, 1855	97,176 39
" "	28, 1856	330,222 34
" "	28, 1857	426,285 97
" "	28, 1858	668,346 59
" "	28, 1859	674,248 95
" "	28, 1860	648,600 00
" "	28, 1861	683,644 28
" "	28, 1862	457,183 69
" "	28, 1863	679,956 06
" "	28, 1864	906,745 95
" "	28, 1865	1,097,967 69
" "	28, 1866	1,794,356 22
" "	28, 1867	2,675,874 84

At the commencement of the last fiscal year, March 1, 1866, the trains had been for some months running to the city depot in Kansas City, and the graduation was nearly completed along the levee of that city to the State line, the track was laid to that point during the month of April, and since that time freight has been regularly delivered there, and transferred to the cars of the Union Pacific Railway, Eastern Division.

The Missouri River Railroad having been constructed from State Line to Leavenworth, a distance of 26 miles, and having been leased by this company, was taken possession of July 2, 1866, and both passenger and freight trains have been run regularly to and from Leavenworth since that date. The earnings for the eight months ending February 28, 1867, were: from passengers, $30,294 87; freight, $13,695 76; mail, $1,733 28—total, $45,823 91.

The Telegraph line, which had been previously built to Kansas City, has been extended to Leavenworth, and the company have now the use of an independent line for the whole distance.

During the year a depot was constructed at Kingsville, and a dining station at Sedalia, in place of one destroyed by fire at Smithton. Arrangements were being made for putting up a Union passenger depot and dining house at the State line, with a view to making the passenger transfer with the Union Pacific Railroad at that point. An engine house holding seven engines has been built at Holden, and a passenger house at the Seventh street depot grounds in St. Louis.

During the year 96,800 new cross ties were put in the track, being equal to about 43 miles of road, at a cost of $61,500, and 10,450 new chairs have also been used in repairs.

There have been re-rolled during the year 2,165 tons of iron, being 21.6 miles of track, and 160 tons of new iron were purchased for repairs, at a cost, including new rails, fish joints and spikes, hauling, re-rolling and relaying, of $165,934, or about 6.3 per cent. of the gross earnings of the road, all of which has been charged to operating expenses.

Ten new locomotives had been received from the Rogers Locomotive Works, and an order for ten more was then in their hands. Eight passenger cars had been purchased, and two built at the company's shop in St. Louis. There had also been built at the shops of the company seven baggage and express, five caboose, one magazine and twenty stock cars; and there had been purchased seventy-five box and twenty platform cars. There had also been rebuilt two passenger and forty-eight freight cars. The President, in his report, says:

The second year of peace, and the fiscal year ending February 28, 1867, has been more fruitful to the company than the preceding one, notwithstanding the visitation of the terrible scourge, cholera; for our receipts show a gross of $2,675,874 84, and net earning of $719,230 00, being 73.1 per cent. for operating expenses, and comparing favorably, it is believed, with the leading roads of the country.

Your road, as you well know, only reached Kansas in October, 1865. All the available resources being absorbed in its repairs and extension, and leaving very little more rolling stock than was in service when the road was operated to Warrensburg, 218 miles, with the additional 91 miles, and, adding the Missouri River Railroad, extending from the State Line to Leavenworth, in the aggregate 309 miles in length. To meet this necessity, the credit of the Directors was invoked, and the same was with unanimity accorded, and it is mainly through this source that ten locomotives and ten passenger coaches were furnished, costing in the aggregate $312,345 18, nearly all of which has been paid; yet at the end of the fiscal year the present Board of Directors are in money and indorsements creditors for a large amount.

It will be seen from the accompanying reports that in addition to the locomotives and coaches, the following have been added: 100 box cars, 20 platform cars, and 2 passenger coaches, made at the company's shops, aggregating in cost $166,345, also at the shops the following: seven baggage and express cars, five caboose cars, one magazine car; twenty stock and forty-eight box cars, and two passenger coaches were rebuilt, the cost being charged to operating expenses.

It will also be seen that the business of the road is largely in advance of any preceding year, and it may be safely estimated, unless unforseen accidents occur, that the ensuing year will show a gross earning of three million of dollars; but it becomes our duty to say that the necessity for new or re-rolled iron in the track east of Jefferson City is *imperative*.

The iron and track between St. Louis and Labadie is in good condition, there being nearly twenty-two miles of new track laid the past year, at a cost of $165,934.

It will appear from the report of the Chief Engineer and Superintendent, that large expenditures have been made, and our indebtedness increased, from the imperative necessities for new iron, locomotives, coaches, box and platform cars, etc., etc.

All these expenditures were a necessity, in order to keep the road bed in repair, and rolling stock to do the business; and it is believed that no additional rolling stock will be needed other than ten locomotives now being finished at the New Jersey shops during the ensuing year. In this connection it becomes our duty to say that large additions of either new iron or re-rolled iron must at an early day be furnished and placed in the track between Labadie and Jefferson City. Where the means to accomplish this end are to come from is a subject of anxious consideration of your Directors. If any considerable part of the floating debt daily maturing, could be postponed for a year or two, it is believed the anticipated net earnings of the road would enable us to furnish this iron; and it is for yourselves to

aid the Directors to devise the ways and means for this necessity.

The bridges west of Franklin are in excellent condition, and some of those east of that station will need replacing the present year. The cost of re-rolling and placing in the road one-half of the entire distance between Labadie and Jefferson City, about forty miles, is estimated by the Chief Engineer at $245,000, and with this iron the road could be put in complete repair.

The ten locomotives ordered from the Rogers Locomotive Works are far advanced, and will be ready the ensuing spring; two of them having been already finished.

The Southwest Branch, on the 1st of March last, became the property of the State, and a satisfactory arrangement made, and the road is daily operated to Rolla as before. A contract has been made with "The St. Louis and Pacific Fast Freight Line," and twenty-five cars during the fiscal year were furnished, and since that date, fifteen more, and the line operated since October last.

The excitement incident upon the sales of the Iron Mountain and Southwest Branch roads has not been without its effects on this road; for at the adjournment of the Legislature there were influences at work with the view of obtaining the State's interest and equity in the road.

It is our duty at this time to attract your especial attention to the financial condition of the road, with the view that you may devise the ways and means of aiding those entrusted with its management. The original seven millions of State bonds is, as you well know, a lien or mortgage on the road, as well as the interest due since January, 1861. The payment of any part of this debt, it is believed, has been postponed by legislation until 1870.

By the terms of the act of February 10, 1864, a lien and mortgage was created from Dresden westward to the State Line, and the same becomes due in 1868, 1869 and 1870.

There is seven hundred thousand dollars of St. Louis county bonds loaned the company to repair the damages incident to Price's raid! not due, however, for a long period. In addition to these incumbrances, there is a debt of "bills payable," and known as the floating debt, incurred for rolling stock, supplies, &c., &c., approximating twelve hundred thousand dollars. The directors, as has been stated, are liable for a large proportion of this debt, and in these excitable times, when the financial future is so uncertain, and legislation so prolific, it ought not to be expected that they alone should incur additional liabilities. In view, then, of the immediate and pressing necessities of the company, you are earnestly solicited to inaugurate some plan which will afford the necessary relief, and we recommend that a committee be appointed from amongst yourselves who shall be instructed to examine into the financial condition of the company, as well as the *material* condition of the track, &c., and report to an adjourned meeting such recommendations as shall be found expedient and necessary. If the lien of the State could be obtained, the remedy is at once made plain; but the Legislature has adjourned until the ensuing January, and until then temporary relief must be provided.

When we review the past, and reflect on the great financial and material benefits that the State has derived in products, immigration, taxables, &c., from the construction of this road, and the damage and destruction of its property during the years of the rebellion, and which the State was powerless to avert, aggregating in millions instead of thousands, it is not unreasonable to expect some liberal legislation affording the necessary relief. Indeed, well informed persons are impressed with the belief that the Legislature would be willing to sell to the stockholders of the road all of the company's indebtedness for three or four millions of dollars, which it is believed could be obtained. If such legislation could be had, little if any embarrassment would be felt in the future. Efforts were made, as you are aware, to effect a sale of the State's interest, and the measure was postponed; and surely some policy ought to obtain amongst our own people to prevent the ownership and management of this road from passing into the hands of parties not citizens of our own State, and who may be inimical to our interests.

The number of locomotives placed on the road since commencement has been 58; of these 33 were in good order, 9 in running order, 2 in shop for repairs, and 3 re-building; 5 have been condemned, and 6 turned over to the S. W. P. R. R.

The rolling stock consists of 41 passenger, 7 mail, 17 baggage and express, 29 caboose, 269 box, 144 stock, 221 flat, 2 magazine, 1 paymaster and 4 tool cars. The company have also 25 stationary engines for pumping water.

The number of miles run by engines with passenger trains has been, 430,008; with freight trains, 671,978; with other trains, 97,674—total, 1,199,660, at a cost for fuel, oil and waste, enginemen, firemen, labor and materials for repairs, of $464,829 82. Average cost per mile run, 38.73 cents.

The receipts from all sources, and expenditures during the fiscal year ending February 28, 1867, have been:

Balance from previous year		$439,156 61
Received for Jackson Co. bonds and balance of subscriptions		27,516 45
Received from Land Notes		68,272 67
Received for transp.	$2,631,469 74	
Less exp. and repairs	1,956,644 84	
		674,824 90
Received for notes granted during the year ending Feb. 28, 1867	$2,810,848 01	
Less paid	2,622,208 04	
		188,639 97
Accounts audited	$5,791,622 22	
Less paid	5,774,569 44	
		17,052 77
Due on pay-rolls		149 37
Total		$1,415,612 74
Paid for construction		$230,640 35
Rolling stock and machinery		500,679 79
Extra sidings, switches, buildings, etc., on Missouri River R. R.		6,511 26
Office expenses and stationery		22,730 21
Interest account		222,691 80
Balance, as per General Statement		432,089 33
Total, as above		$1,415,612 74

The balance ($432,089 33) is accounted for as follows:

Due by Southwest Branch	$62,161 11
Cancelled debts	169,629 91
Suspended debts	53,518 18
Cash in hands of Fund Commissioner	284 04
Material on hand	147,109 70
Due by other companies	13,388 80
	$436,091 74
Less due to Missouri River R. R.	4,002 41
Total	$432,089 33

The General Financial Statement of the company up to March 1, 1867, is as follows:

Capital stock	$3,609,115 23
State bonds	7,000,000 00
Land grant sales	200,102 28
" rents	255 90
Total receipts from transportation	11,092,480 49
Mortgage construction bonds	1,500,000 00
St. Louis county bonds	700,000 00
Bills payable	1,100,328 13
Audited accounts unpaid	255,807 43
	$25,458,089 46

Construction	$11,418,794 14
Rolling stock and machinery	2,049,674 33
Missouri River Railroad	6,511 26
Office expenses and stationery	173,989 89
Contingencies	75,960 84
Interest account	1,176,259 77
Discount on Construction and Anticipation bonds	8,860 00
Commissions on purchases	17,375 95
Interest, discount and commissions	1,238,933 13
Land grant expenses	6,834 61
Total transportation expenses	8,852,806 21
Balance	432,089 33
	$25,458,089 46

President.—GEORGE R. TAYLOR.

Directors.—George R. Taylor, Robert Campbell, Adolphus Meier, George Patridge, Oliver A. Hart, Robert Barth, Hudson E. Bridge, Henry L. Patterson, Daniel R. Garrison, Samuel B. Wiggins, Benjamin Stickney, Charles H. Peck, and Wm. M. McPherson.

Vice President.—DANIEL R. GARRISON.

Secretary and Treasurer.—J. C. PORTER.

Chief Engineer & Sup't.—T. MCKISSOCK.

Graff's Railway Fastening.

Patented 28th August, 1866, for 17 years. Drawings and descriptions in RAILROAD JOURNAL of Sept. 13, 1866. This fastening has been examined by many Engineers, Railroad and practical men, all of whom pronounce it "the perfection of Railway fastenings." With a view to introduce it into use, I will enter into an agreement with any responsible Company or Rolling Mill, who will manufacture this fastening and adapt rails to it, to give the party, *the gratuitous and exclusive right during the term of my patent*, to manufacture the same, and in addition thereto, will allow the party *one-half of all proceeds* to be received by me for the use or sale of the same in the United States. The first Railroad using my fastening will be allowed to do so gratuitously. Its use, will be the saving of millions of dollars annually, in repairs of tracks, rolling stock, labor, &c. Models may be seen at HOY, KENNEDY & Co., No. 111 Liberty st., N. Y., J. W. CLARK & Co., No. 413 Washington Avenue, St. Louis, and at my office,

E. Beatty Graff,
No. 5 St. Paul st. Baltimore, Md.

Dorchester and Delaware Railroad.

This road will be 35 miles in length, extending from Cambridge, Md., to Seaford, Del. The first sod was turned at Cambridge on the 23d ult., by Governor Swann and W. W. Byrn, Esq., the President of the company. The contract for building the road calls for its completion by the 1st of August, 1868. The construction of this road will bring the counties of Worcester, Somerset, Caroline, Dorchester and Wicomico into closer communication with Baltimore, besides enabling the residents of the lower portions of Delaware and the eastern part of Virginia to reach Baltimore at least two hours earlier than Philadelphia and at a much cheaper rate. By the construction of the Delaware Railroad, much of the business and travel of the above section was diverted from Baltimore, and with the aid of steamboats running from Annemesic to Norfolk, Philadelphia was brought into as quick communication as Baltimore with Norfolk. By the aid of this new road, two routes will be established to Norfolk, as persons may leave Baltimore for Cambridge, take the railroad to Seaford, thence to Crisfield, and by boat to Norfolk. When the road is completed

arrangements which have been made to run fast steamboats, so as to make the quickest time between Baltimore and all the points indicated, will be promptly carried out.

Atlantic and Great Western Railway.

REPORT OF COMMITTEE OF INVESTIGATION.

The committee appointed by the bondholders and creditors of the Atlantic and Great Western, at their meeting on 5th March last, with whom Mr. Oewel, on behalf of the Dutch and other continental interests, was subsequently associated, beg leave to report—

That they have made the line, its situation, capabilities, and prospects, and the affairs of the company generally, the subject of careful and continued inquiry and investigation. Two of the committee—Mr. Cave and Mr. Oewel—separately visited America, and were each for several weeks engaged in examining the line or its connections and business; and Mr. F. H. Trevithick, the engineer previously sent out by the committee, has been upon the line about four months, and has given every part of its condition and traffic the most detailed and thorough examination.

Condition of the Line.—Your committee are bound to say, with entire frankness, that they found the condition of the property much worse than had been anticipated. The railway was never thoroughly completed—the earthworks, both embankments and cuttings, were left too narrow, while some of the valleys were only crossed by trestles. The ballast and workshops were very insufficient, and the working equipment too heavy for the superstructure. Doubtless it was better to have opened the line for traffic before it was properly completed, than to have longer deferred putting it into operation. But, with the importance of other connections and works pressing upon the managers, the proper renewal, maintenance, and repairs of the line, after it was opened, were deferred, and it thus rapidly deteriorated, until, at the close of the last winter, it was in a very bad condition.

At the same time the railway is not without great merit, and in the best judgment of your committee, if it were now in complete order, it could at once be made to earn the interest on most of its mortgage debt, with every prospect of a continuous increase of its traffic and profits.

Until, however, the railway can be put in order, it must of course be worked at less profit and with less favorable results than otherwise might be obtained; and your committee regret to say that the sum necessary to complete the line and put it in proper repair, at date of April 1st last, is estimated by Mr. Trevithick to have been about $2,600,000. Your committee would also add that they find the tariff rates of railways in America less in many respects than those charged for like service upon railways in England, and the fares for passengers being limited by law, are now, when paid in a depreciated currency, quite inadequate for fast trains; while the less perfect condition of the lines and the increased cost of labor and much of the materials combine to increase the necessary working expenses of a line in America. Upon 1st April last, the line passed into the hands of the receiver, and with a new administration commenced new results.

Appointment of a Receiver.—In March last parties holding about $6,000,000 of divisional bonds and the coupons upon some $6,000,000 of consolidated bonds instituted actions in the different States in which the railway is situated, to enforce the mortgages on the railway, with the view of obtaining possession of the property for the benefit of all bondholders, in the order of their priority, and, if necessary, of bringing it to sale.

Your committee had nothing to do with initiating these proceedings; but, being satisfied, after careful inquiry and communication with the parties concerned, that such action was in every way for the protection and benefit of all classes of creditors, they gave to the proceedings, and to the selection and appointment of the receiver, their full concurrence.

As the result of these proceedings, to which the trustees of the divisional mortgages are parties, Major-General Robert B. Potter was, at the end of March, appointed receiver. By the terms of his appointment the receiver, after maintaining and working the line and putting it in repair, is to pay for the requisite stores and supplies and the expenses of the proceedings, and is then to bring the remaining moneys to the court, to be distributed among the bondholders in accordance with their respective priorities.

Powers and Duties of the Receiver.—It should be understood that a receiver is an officer of the court, to hold the property for the benefit of all interested. It is believed that the office does not differ essentially from a like office in England. But, inasmuch as the mortgage deeds upon this line convey not only the income of the line, but, by virtue of the American charters, the right also of working the line itself and taking the tolls, the bondholders were entitled to have the receivership extended to the actual possession, control, and working of the railway, as well as to the mere custody of its net earnings. Accordingly the receiver was required by the courts to take the line into his possession and work it himself. To that end he can employ such servants as he finds best, but over the funds resulting he has no control. He must monthly report to the court all the receipts of the line and the disposal thereof. He has no power to apply any moneys except as he may have been directed by the courts. His accounts must be filed monthly among the public records of the courts of each of the three States by which he is appointed—open to every scrutiny—and each month they have to be passed with the vouchers by an official auditor. With great propriety this auditor has been selected from the trustees of the divisional bonds; that is to say, he is a person whose interest and duty it is, as trustee of these bonds as well as auditor, to see that no improper or doubtful disbursement is allowed. Thus it will be observed that while the receiver has absolute power in the mere working of the line, he has positively no discretion over the destiny of the resulting funds and cannot divert a shilling of them to any purpose whatever. Your committee refer to this particularly, because they understand complaint has been made of the expense they are incurring in their investigations; and they beg, therefore, to say that none of their disbursements, whether for officers, engineers, or clerks, or their own expenses, have been paid from the railway; but, on the contrary, all have been borne by the committee, in the confident expectation of being, in due time, remunerated.

When, therefore, a railway is in the hands of a receiver, the disposition of its funds would seem to be as secure as possible. And it is a matter of much satisfaction that this great railway should have been transferred to the protection of the courts with so little delay or litigation.

Your committee refer, indeed, with satisfaction to the present condition of the road as contrasted with its state when the receiver entered upon his duties; and they are bound to say that so far the results of the past six months are of a gratifying character, and strongly evidence the value of an upright and energetic administration.

Proper control of the railway for the present being assured, it is to be considered what action in the future will be the best for the various interests concerned. This, of course, must depend upon the extent and value of the property, and the order and priority of the company's debts.

Property of the Company.—The railway consists of the following lines and branches:

	Miles.
Main line in New York State	49
" Pennsylvania "	92½
" Ohio "	246
Franklin Branch	33
Mahoning, Cleveland, & Hubbard branches, under lease for 99 years	81
Silver Creek Branch	6
	507

The Franklin Branch runs from three miles west of Meadville to Oil City. Some confusion has arisen from its having been confounded with the Oil Creek, running from the main line at Corry to the Oil Regions, and it may be remarked that the latter is an entirely separate undertaking which has never belonged to the Atlantic and Great Western. The Franklin Branch, owing to the present stagnation of the oil trade, is not remunerative, and until this business shall resume its usual activity a satisfactory traffic cannot be anticipated.

The Mahoning, Cleveland and Hubbard branches are under lease from the Mahoning for a period of ninety-nine years from 1863, at an annual rental of $273,072. This lease is a profitable one for the Atlantic and Great Western not only in itself but in the traffic which it throws upon the main line. Indeed, it is one of the most remunerative portions of the company's system.

In connection with this lease your committee would especially direct attention to a projected branch from Niles, on the Youdgstown branch, to New Lisbon, a distance of 35 miles, of which 12 miles from Leetonia to New Lisbon, at the further end of the line have been already completed and are in operation. This branch is an entirely distinct undertaking, but the importance of its completion for the interest of the Atlantic and Great Western cannot be too strongly stated. It will run through a valley abounding in coal and iron, both of which can be worked at moderate cost, and, if economically constructed, it ought to return a handsome profit on its cost besides throwing a large traffic on the main line and on the branches to Cleveland. As the capital required to complete this undertaking is but small, your committee hope that some means may be devised for obtaining so desirable an end without entailing any charge upon the Atlantic and Great Western.

The Silver Creek branch, running a short distance of six miles to certain coalfields, is at present entirely unproductive.

Leases and Connections.—Apart from the leases referred to in the previous paragraph there are certain engagements entered into with a view to obtaining a more direct and independent route to New York, and which consist of leases entered into with the Morris and Essex and Catawissa. It was intended, by the construction of an intermediate link, to form a new and distinct communication with New York over these lines, in addition to the present mode of access over the Erie. The capital requisite to carry out these plans has, however, never been raised, and the connecting links have never been made. As regards the Catawissa lease your committee are informed it is not binding on the company, while the Morris and Essex lease will yield a net revenue nearly or quite equal to the amount of rent to be paid. No charges in respect of these leases can in any event, however, rank before the mortgage debts of the Atlantic and Great Western. The only connections to which reference need now be made are with New York over the Erie, and with the West over the Cincinnati, Hamilton and Dayton and Ohio and Mississippi. Harmonious relations are preserved with all these companies, and there is no reason to apprehend any difficulty thereon.

Traffic.—Your committee have pleasure in reporting that the position of much of the line is very favorable and gives promise of a considerable and constant increase of traffic in the future. Although the gross earnings during the past twelve months have not shown any augmentation, it may be fairly estimated that the growing development of the country alone will add largely to the revenue. In considering this, one of the most serious questions of all, your committee have preferred not to indulge in any very sanguine anticipations, the opinions as to the future of the road being varied and numerous. They feel, however, that when the line is fairly in order—and it is now gradually assuming that condition—a steady and substantial increase in the earnings may reasonably be expected. The completion of

the New Lisbon branch alone would throw a large and profitable coal traffic upon the road. From the 1st April last, the date of the receiver entering into possession, to the 31st March next, the gross traffic will probably reach five millions and three quarters, a very satisfactory amount when the scantiness of last year's harvest and the general stagnation of trade, especially of the oil business, throughout the United States, is taken into consideration. It should be remarked that while the Cleveland and Mahoning branch is one of the most profitable parts of the system, the Western portion of the main line yields the smallest return in the present. The growth of the population, the extension of cultivation in Ohio, and better arrangements for through traffic will in course of time possibly remedy this shortcoming.

Working Expenses.—In considering the rate at which the traffic of the line can be worked, it is needful to remark that the general mode of stating a certain percentage of the receipts as being consumed in this manner is calculated to mislead. The percentage of working expenses must always depend largely on the rates received for carriage, as it is quite possible to carry a large and increasing quantity of material without any increase of net profit. The future policy of the company should be directed to the cultivation of such business only as yields a fair return, and the calculations of your committee are based upon a present working expenditure of 68 per cent., exclusive of rent and taxes, subject to considerable reduction in the future.

Capital.—Having referred generally to the condition and prospects of the railway, it behoves your committee to give a short and succinct account of the various classes of bonds and other securities forming the capital of the company, in the order of their legal priorities.

First Mortgages.—These mortgages, which are charged upon the separate divisions of the line, but with mutual guarantees, are as under:

Having Interest payable in Currency.

Erie and New York City	$14,000
Ohio section	3,740,900
Franklin Branch	349,000
	$4,103,900

Having Interest payable in Sterling.

New York section	$876,000	
Pennsylvania ditto	2,150,500	
		3,026,500
Total first mortgages		$7,130,400

A very small and inconsiderable proportion of the Ohio bonds are payable in sterling.

Second Mortgages.—These mortgages, also charged upon the divisions of the line, are all payable in sterling, and are as under:—

New York section	$740,500
Pennsylvania ditto	757,600
Ohio ditto	2,410,000
	$3,908,100

Consolidated Mortgages.—The amount of these actually outstanding, after providing for exchange of the Buffalo bonds, should be $18,961,500 to complete the bond debt of $30,000,000; but, in point of fact, it may possibly be somewhat larger, owing to an apparent discrepancy which cannot be definitely cleared up at present. The Buffalo Extension bonds, which are dealt with as being represented in this mortgage, are secured upon the branch to Buffalo, on which only a small portion of work has been done. In themselves they are therefore practically worthless; but power was reserved in the deed of trust to issue consolidated bonds in lieu of them, and your committee have assumed, for the purpose of their calculations, that this plan will be adopted.

Certificates of Debenture.—These securities, to a total amount of £2,800,000 (bearing 8 per cent. interest guaranteed by the Consolidated Bank,) were issued in November, 1864, for a term of three years maturing 15th November next, and are secured by a deposit with trustees of the following bonds and shares, with the accruing interest thereon:

Atlantic and Great Western, 1st mortgage bonds	$1,415,900
2d ditto	2,438,700
Buffalo Extension bonds	1,382,000
	$5,236,600
New Lisbon bonds	300,000
Oil Creek bonds	331,000
Ditto shares	50,000
Atlantic and Great Western ordinary shares	7,638,150
Ditto. preference shares	1,919,000
Ditto. Buffalo Extension shares	3,084,000
Erie and Niagara Railway bonds	250,000
Ditto. shares	1,900,000
	$20,708,750

The certificates of debenture do not, however, in any way constitute a mortgage on the road, and the holders have to rely upon the value of the securities deposited, and the probable growth of the railway. Further reference will be made to their position in the plan submitted with this report.

Open Creditors and Share Guaranteed Debentures.—The exact amount of these claims cannot be precisely ascertained. They can, however, only be paid out of any surplus after satisfaction of the prior claims, and really represent advances against shares. Further allusion will be made to them hereafter.

Shares.—The total share capital of the company is $30,000,000, but the greater portion is hypothecated against the claims above enumerated, and for security of the certificates of debentures.

Observations.—While inquiries were being prosecuted in America, Mr. Clarkson Potter, the counsel for the prosecuting bondholders, came to England, and your committee had the opportunity of availing themselves of his valuable advice and assistance. There can be no question that the line is worth considerably more than the amount of the divisional bonds, and at the same time is not now worth the full amount of all the claims against it. If the securities were held in America, where such a method of re organization is not uncommon, it would probably be best at once to sell the line under the mortgages, and form a new company to issue new bonds to the divisionals for their debts and preference shares to the other creditors according to their priorities and interest, requiring each person participating in the new organization to contribute *pro rata* a small percentage of his claims to complete and reform the line. But this proceeding would be so novel to English creditors, and would meet with such objection, that your committee feel unwilling now to propose it, although they entertain a decided opinion that ultimately such a plan may have to be adopted should a voluntary arrangement not succeed. Indeed, they have become satisfied that any scheme for raising the money by contribution from the creditors and shareholders of the company would, under the circumstances, be generally adopted with great reluctance, and could only be very slowly carried out, and that there is no other practicable way but to have the railway put into condition day by day out of its own earnings, and there remains no doubt that these will suffice to complete and repair the property.

The receiver has now been in possession six months. Owing to the bad harvest of previous years this period has been one of exceptionally light traffic. By reason of the competition of other railways, and the stagnation in the petroleum trade arising from an over production of oils, the through goods traffic has been necessarily carried at low rates. The receipts of the line for these six months have only reached $2,658,000, against $2,838,702 for the corresponding period of 1866, and $2,782,044 for 1865. And in addition to this falling off of traffic, the receiver has had to contend with an incomplete and dilapidated railway, and an absence of any capital fund or collateral resources. And yet, in the meantime, from the net earnings of the railway, very considerable and important renewals have been effected, in addition to the maintenance of the railway in safe, regular, and satisfactory working.

Proposed Plan.—As the result of their labors and after careful consideration of the numerous and extreme schemes which have been suggested by various parties, your committee have resolved to submit the following plan for the future for your consideration and adoption.

There have been some complaints of delay in presenting this report, and the committee beg to state that they have delayed it, not only that the examination of the condition of the line by the committee and their engineers might completed, but that they might have the actual experience of the past six months as the basis of any scheme to be proposed, knowing well that no estimates of what is deemed practicable would be so satisfactory to creditors as a statement of what had really been done.

It would probably be cheaper and better if the means to complete and repair the line could at once be raised, inasmuch as it will take somewhat longer and cost somewhat more to do so from its own earnings, and meanwhile it must be worked at a less profit. But there are no creditors of any class who have been consulted who have not indicated their unwillingness or inability to take part in such an advance, nor has there been any reason to believe it would be practicable to agree upon what security could be given for it.

Estimating therefore the total cost or completing and repairing the line at $3,000,000, and the debt for supplies and like contingencies at $1,000,000, gives a total required of $4,000,000.

Assuming that this sum of four millions of dollars for repairs and supplies must be taken from the earnings of the line, it will be necessary to defer the interest on the first divisional bonds for two years, on the second divisional bonds for three years, and on the consolidated bonds for four years from 31st March last.

Possibly the payment of interest could be earlier resumed if the practice of allowing a large floating debt for stores and supplies were continued. But to work the railway with economy all purchases should bo for cash. This, which is true of purchases everywhere, is particularly true of the interior of the United States. Indeed, one great embarrassment of the direction arose from the company's loss of credit.

As declared at the meeting in March, it is not proposed to ask the divisional holders to abate a single shilling of their debt—principal or interest. Indeed, had the line been in the condition the committee supposed, and as was then generally believed in England, payment of their interest would before this have been resumed.

Periods of two, three, and four years are proposed, because it may be treated as fairly certain that payments of interest can then be resumed, and because also it cannot be safely stated that they can be recommended sooner.

Doubtless it would be more agreeable to the divisional bondholders if money could be raised to pay their coupons. But this cannot be effected, and any attempt to enforce it, by bringing the railway to sale, would only result in litigation which must produce for the divisional bondholders, in addition to expenses, at least as great delay as is now asked of their forbearance; and further, it should be observed, that the divisional mortgage deeds provide for the maintenance of the road before the bondholders can be paid their interest.

It is not meant to intimate that the mortgage securities upon this railway are in any way invalid or of doubtful legality, or that the American courts will not be found in every way ready to administer the fullest equity. But a mortgage of lands does not give the creditor an absolute right, at once, to the land, in case of default. Both in this country and in America a debtor is allowed some right to redeem, nor can it be doubted that a court of conscience and equity (into which the

American Railroad Journal.

Saturday, November 2, 1867.

Stock Exchange and Money Market.

Money has been much more freely offered on call, since our last. The banks have gained largely in legal tender and national currency, and have been more liberal of accommodation in a temporary form. The demand has not kept pace with the increasing supplies, and rates have been yielding gradually, until on Wednesday, the governing figures were 5@6 per cent. to the large dealers in the public funds, and 6@7 per cent. to the Stock Exchange firms. The tendency at the close was decidedly in favor of responsible borrowers, for speculative purposes. In the discount line, there has been no noticeable relaxation. Lenders are chary of aid to the mercantile public, giving decided precedence to speculative applications. Business paper passed very reservedly at from 7@10 per cent. per annum, as the extremes, on all grades of commercial paper. The Sub-Treasury cash balance was augmented, last week, and is kept well up, this week, despite the free disbursements, especially in the form of coin interest. The next public debt statement will be made on light revenues, and heavy expenditures, for October, and will show only a very slight reduction in the net aggregate indebtedness. The greenback circulation will show a contraction to nearly the full amount authorized by law, for a single month. The statement will further show a considerable increase of the coin reserve in the Treasury, for the month of October. The coin interest, the payment of which was commenced on the 28th inst., will be formally charged off the books of the Department, on Nov. 1. Some persons unacquainted with the law are finding fault with Secretary McCulloch for anticipating the payment of the November interest, as he has been doing for the last few days, to the extent of probably a third of its entire amount. The fact is, that the Secretary has power, under a joint resolution of Congress, to anticipate, at his discretion, the payment of any interest twelve months in advance of the time at which it may be specifically due. It is under this law that he has now given the public the advantage of a few days in the matter of the November interest. The specie reserve of the banks is now $6,161,164, against $7,848,239 same time last year. The city bank deposits are now $173,064,128, against $223,840,572 week ending Oct. 20, 1866. The legal tender reserve amounts to $56,381,943, against $78,064,925 same time last year. The circulation now stands at $33,959,080, against $30,243,487 same time last year. The loans are now $246,810,718, against $274,725,456 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $85,298,776 a day, against a daily average of $98,027,118 the preceding week, and $97,722,045 the week ending with Oct. 5. The current week's exchanges average about $91,718,000 a day. The city banks, last week, lost $374,247 of deposits, and $1,157,846 of specie, and gained $2,036,111 of legal tender. They reduced their loans, $743,193; and their circulation, $98,370.

National Bank notes to the amount of $24,850 were issued last week, making the total issue to 1,671 banks thus far, $304,154,841, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,046,945, leaving, with the existing 1,630 banks, (having an aggregate capital of $419,500,000,) an actual circulation at this date, of $299,107,896. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,628,250; and for the public deposits, $38,270,450—making a total of $378,893,700. The Treasury Department last week redeemed and destroyed $337,800 of worn and mutilated fractional currency, and issued $572,664 of new. An abstract of the quarterly reports of the National Banking Association up to the first Monday in October shows the resources to be one thousand four hundred and ninety five millions, including over ten millions of specie and nearly fifty-seven millions of compound interest notes. The capital stock is four hundred and nineteen and a half millions; surplus fund sixty-six millions and two-thirds,

and undivided profits thirty-three and a half million dollars.

The Philadelphia Bank movement the past week shows a decrease in loans, of $447,728; a decrease of $21,279 in specie; an increase in legal tenders of $182; a decrease of $798,199 in deposits; and a decrease of $108 in circulation. The Bank Clearings show a decrease of $3,004,262, and the balances, a decrease of $142,757.

The U. S. Sub-Treasury receipts, week ending with Oct. 26, were $17,287,949, including $1,670,948 from customs duties; payments, $16,432,869; balance at the close of the week, $114,634,225, against $113,779,145, at the close of the preceding week, showing an increase of $855,080. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $8,938,427 including $270,000 from customs; and payments, $9,527,975; on Tuesday, receipts, $1,223,556 including $293,000 from customs, and payments, $1,934,715. The balance at the close of business on Tuesday stood at $113,356,517, against $112,820,683 a week previous.

Government revenues have been again quite limited since our last. The excises, last week, yielded $2,290,892, against $1,683,000, the preceding week; customs at the port of New York $1,670,943, and at the outports, about $550,000 (in coin) more, making the grand total income for the week equal about $5,511,342 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $69,000,000.

Government received $5,954,640 from customs, through the port of San Francisco, from Jan. 1, to Sept. 27, 1867, against $5,600,315 same time in 1866.

Under the influence of more liberal offerings of coin, improved financial advices from London, and augmented exports of domestic produce, the price of Gold has fallen full two per cent. from the highest figures of the week. The extreme rates have been 143⅝@140⅝, the lowest quotation having been made on Wednesday. The anticipatory payment of the November coin interest on the public obligations has tended to depress the premium. The latest dealings on Wednesday were on the basis of 140⅞@141. There has been no export call of moment, and only a restricted customs inquiry. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,700,886, against $8,392,249 same time last year. The customs demand for Gold last week, averaged $278,490 a day; thus far, this week, it has been equal to $281,500 a day, or equal to a weekly aggregate of $1,689,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $68,375, and from California, none. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $102,906,480, against $114,827,636 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $24,452,576, against $35,857,013 same time last year, showing a decrease this year, of $10,904,437. The exports of specie from this port, last week, were $214,696. The total outflow of specie from the port, since Jan. 1, 1867, has been $44,275,868, against $54,698,333 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $29,800, and first two days, this week, nearly six millions, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $49,251,000, against $31,977,008 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to Sept. 27, reached $30,607,453, against $33,587,844 same time last year, showing a decrease, in 1867, of $2,980,391.

Foreign Exchange has been in more demand and has been decidedly firmer in price. Quite an active business was transacted on Tuesday for the outgoing steamers of Wednesday on the basis of our revised quotations. Bankers' 60 day bills on London closed at 109⅛@109⅜, and on Paris to 5.18¾@5.17½; sight bills on London to 109½@109¾; and on Paris to 5.17½@5.16¼. The offerings of produce bills have been unusually full this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,946,163, making the total value of exports since Jan. 1, 1867, $152,211,148, against $158,268,667 same time in the preceding year.

Government securities have been in more active demand, since our last, partly for investment purposes, but, to a considerable extent, on speculative account, and prices have improved, though closing irregularly and less buoyantly. On Wednesday, foreign bankers were free sellers of old 1862 and 1865 Five-Trenties, and these realizations tended to weaken the market. The best sales of the week were made on Wednesday forenoon, from which there was a reaction of an ⅛@⅜ per cent. during the afternoon of that day. U. S. sixes of 1881 closed here on Wednesday at 111¾@112; U. S. Five-twenties of 1862, 112⅛@112⅝; U. S. Five-twenties of 1864 at 109½@109⅝; U. S. Five-twenties of 1865 at 109⅞@110; U. S. Five-twenties of 1865, consolidated, 107⅛@107⅜; U. S. Five-twenties of 1867, 107⅛@107⅜; U. S. Ten-forties at 100⅜@100⅝, and U. S. Seven-thirties at 104⅛@105¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864..118¾	September, 1865..115¾
May, 1865 .....117¼	October, 1865....115½
August, 1865....116⅜	

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 16.	Oct. 22.	Oct. 30.
Consols	93⅞	93 5/16	44 5/16
U.S. 5-20's of 1862	71¼	69¼	99 11/16
Erie	46¼	45¾	66½
Ill. Central	78	78¼	79¼

Railway and miscellaneous stocks have been in restricted demand, since our last, almost exclusively on account of regular street operators, and prices have been quite variable, the market having been without vigor or buoyancy, though the operations for a rise were laboring dexterously to uphold values.

General business has been less active, since our last, outside the breadstuff and cotton lines, in which there has been considerable animation, opening at firmer, but closing at easier, and declining prices. The foreign accounts are not as encouraging to shippers. Middling cotton closed on Wednesday at 19&21cts, as the extremes per lb. The stock of cotton now here is estimated at about 28,500 bales. The receipts at the port this week, have averaged about 2,100 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; last year; estimated stock at close of the year, 80,296 exports, 1,554,664 bales, against 1,557,054 bales bales, against 258,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 124,500 bales, against 187,000 bales same time last year; exports, same time, 30,125 bales, against 64,535 bales same time last year; stock on hand at latest dates, 102,000 bales, against 229,500 bales same date last year. At the live stock markets this week beeves ranged from 9@16½c., a reduction; veal calves, at 8@12½c., on a less light business; sheep from 3½@6c., and lambs from 5@7½c., on a moderate demand. Swine from 5¼@7¼c. per lb., live weight, on a moderate active market. The week's receipts have been 7,053 beeves, 1,295 calves, 25,473 sheep and lambs, and 32,789 hogs. At the auction sale of Scranton Coal on Wednesday, 50,000 tons were disposed of at much firmer prices, ranging from 3.65@3.87½ for lump, to $5.15@5.50 for stove, per ton of 2,240 lbs., deliverable at Elizabethport, N. J. In foreign merchandise, business has been very light for the season, at generally lower and irregular prices. Trade in Dry Goods continues on a restricted scale and prices are generally depressed and irregular, though, perhaps, in domestic Cottons less heaviness is noticeable than was the case during last week. The total imports of foreign dry goods, last week, were $1,252,259, and the total amount marketed $1,210,726. The value of foreign merchandise imported last week, was $1,865,595—making the grand total specie value of last week's imports of dry goods and merchandise, $2,617,854, and since Jan. 1, 1867, $203,509,290, against $239,863,403 same time in the preceding fiscal year. The ocean freight market has been moderately active, since our last, but decidedly less firm with 527 vessels of all classes in port. For Liverpool we quote flour at 2s. 9d. @3s. per bbl. grain at 9c.@10d. per bushel; cotton at ¼@⅜d. per lb.; and heavy goods at 25s.@35s. per ton, all by sailing vessel.

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$3,049,937	$1,252,259
Gen. merchandise	2,507,840	1,465,595
Total for the week	$5,557,777	$2,717,854
Previously reported	239,863,403	203,509,290
Since January 1	$245,421,180	$206,227,144

The New York exports, exclusive of specie, for the week ending Oct. 27, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,043,864	$4,946,163
Prev. reported	155,224,803	147,264,985
Since January 1	$158,268,667	$152,211,148

The balance in the Sub-Treasury on Wednesday was $113,723,201 09.

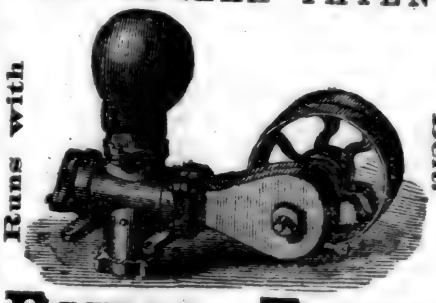
☞ We learn from the Bethlehem *Times* that the Lehigh and Susquehanna Railroad was opened from Providence to Seigfreid's bridge on the 23d ult. It was then expected that the road would be opened from Bethlehem to Mauch Chunk, to connect with the part of the road in operation to Wilkesbarre and Scranton about the first of the present month.



☞ The section of the Troy and Greenfield Railroad from Greenfield to Shelburne Falls was formally opened on the 29th ult.

State of Missouri Interest.

The National Bank of Commerce in this city gives notice that it will pay on presentation the overdue coupons from bonds issued or guaranteed by the State of Missouri in aid of railroads (the Hannibal and St. Joseph Railroad excepted), that matured on the first days of July, 1861, January, 1862, July, 1862, January, 1863, and July, 1863—five coupons in all, of three per cent. each, equal to 15 per cent.; leaving seven unpaid coupons of three per cent. each still attached to the bonds, equal to 21 per cent. The disbursements by the bank on this account, will reach nearly three millions of dollars. The *Tribune* says that the State will probably pay two additional overdue coupons (or 6 per cent.) with the current 3 per cent. coupon due in January, on the 1st of January, 1868, and fund, at the same time, the remaining five overdue coupons, or 15 per cent. in a new 20 years 6 per cent. bond.

FOR RAIL ROADS.

THE EUREKA PATENT

Runs with Belt.

Power Pump,

(NOT A ROTARY,)

Bailey's Improvement,

Gives more Water with less Power than any Pump invented. We *Challange the World.* On sale at the Store of the Company, *42 Dey Street,* New York. Call and see it. A full assortment of the unequaled Eureka Well and House, Ship and Factory, Rail Road and Fire Pump always on hand.

☞ Great activity continues to be displayed in connection with the development of railways in Russia. A line from Riajsk to Morschausk has been traversed by a train from Riajsk as far as Sarai—that is, a distance of sixty versts, or half the line. The whole line is expected to be completed on November 1. Three important sections have been opened of late—viz., from Odessa to Tiraspol, from Warsaw to Terespal, and from Balta to Olviopol.

☞ The Franklin Railroad Company, with a view to the extension of their road from Hagerstown to Williamsport, are now engaged in making the preliminary surveys. It is the intention of the company to build this road for the purpose of opening up a trade with the Cumberland regions, by establishing a depot on the canal at Williamsport, and there transferring coal cars from the boats to their road.

☞ Contracts have been made for the construction of twenty-five miles of the Boston, Hartford and Erie Railroad from Putnam to Willimantic.

☞ About five miles of the Hawley and Honesdale Railroad has been completed, ready for the rails.

☞ The Millville and Glassboro' and West Jersey Railroads have been consolidated.

Railroad Earnings.---Weekly.

The earnings of the Chicago and Alton Railroad for the third week in October, 1867, were $112,361 00
Corresponding period previous year.. 98,041 00

Increase $14,320 00

The earnings of the Western Union Railroad for the third week in Oct., 1867..... $26,046 30
Corresponding week previous year..... 23,623 45

Increase $2,422 85

The earnings of the Atlantic and Great Western Railway for the third week in Oct., 1867, were $122,232 00
Corresponding week previous year... 146,104 00

Decrease $23,872 00

The earnings of the Chicago and Northwestern Railroad for third week in Oct., 1867. $352,840 75
Corresponding week previous year .. 282,236 15

Increase $70,604 60

The earnings of the Detroit and Milwaukee Railroad for the week ending October 24, 1867, were $43,906 00
Corresponding week of 1866..... 45,697 00

Decrease..... $1,791 0€

The earnings of the Chicago and Rock Island Railroad for the third week in Oct., 1867, were $149,500 00
Corresponding week of previous year. 106,327 00

Increase $43,173 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Oct. 1867, were $121,333 00
Corresponding week of 1866..... 113,436 00

Increase $7,897 00

The earnings of the Michigan Central Railroad for the 3d week in Oct., 1867, were.. $103,862 00
Corresponding week of previous year. 106,970 00

Decrease. $3,108 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in Oct., 1867.. $34,093 00
Corresponding week previous year..... 25,439 00

Increase $8,654 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for the third week in October, 1867, were $45,422 78
Corresponding week of previous year. 47,737 69

Decrease..... $2,314 91

Atlantic and Great Western Railway.

(Continued from page 1041.)

creditor must go to enforce his mortgage) would feel called upon to exercise large indulgence as to the redemption of a great property, in default for the first time, and under peculiar circumstances, upon prior mortgages, not approaching in amount to anything near its actual value; when a forced sale under those mortgages could only lead to the loss of millions to innocent subsequent creditors, especially when there can be no doubt of the ultimate payment of the prior claims in full, principal and interest; and when, moreover, every shilling of the earnings meanwhile is applied to the improvement of the property, so as to enable it to meet its duty as a great public highway, and to provide in the future for the prompt payment of these very mortgage debts. Nor can it be doubted that in the complications attending prosecutions in three different States, with all the questions in establishing claims and marshaling assets which contending creditors might raise, and all the delays the laws or practice of the different localities might allow, far more than eighteen months must elapse before this property could brought to sale.

It is not assumed that any person desires to force this great property to sale, with a view to having it swallowed up by the divisional bondholders. But if there be be any such person, it will be sufficient to remind him that the principal of those mortgages is not yet due; and that, by American law, it would be open for the later creditors, up to the actual moment of sale, to terminate the proceedings by the payment of the mere interest moneys then in arrear.

The very fact of peace and unity will do more for the market and intrinsic value of these divisional bonds than any early payment of interest, even if it could be enforced.

There have been some questions raised as to how far any of the divisional bonds can be enforced in sterling; it being claimed that the mortgages given to secure the bonds were for dollars only, and that the agreement to pay some of them in sterling was a subsequent engagement of the company, for which no mortgage was ever executed, and for which, therefore, it is liable only in the same way as for its ordinary unsecured debts. This question your committee have not desired to determine.

But their recommendation is that the coupons on the sterling divisional bonds should be treated as sterling obligations, and that the holders should surrender to the committee, as trustees, all coupons due prior to the 31st March, 1869, on the first, and prior to 31st March, 1870, on the second mortgages, receiving in exchange a certificate for payment of the amount six months after the due date of the last coupon surrendered, either in sterling or in currency, at a fixed rate of exchange, which, in view of the probable course of exchange, the committee have fixed at 133⅓. The option of taking currency or sterling to be determined when the coupons are surrendered. Holders of first mortgage currency bonds will of course receive currency obligations at par.

If at the end of two years the earnings of the line should not suffice, after payment of the current interest, to meet all the deferred coupons of the first mortgages, your committee propose that the deferred coupon certificates should be paid off so far as the moneys available will admit, by public drawings from time to time, and that those not paid off should carry interest at 7 per cent. from the date at which they mature; and that when all the deferred coupons of the first mortgages are paid off, those of the second mortgages should be redeemed in the same manner.

The coupons surrendered are not to be cancelled, but will be held by the committee, as trustees, as security for the due payment of the amount by the company, in default of which the coupons are to be returned in exchange for the certificates, so that the security of the holder may always remain intact.

In reference to the other obligations of the company any plan will be found to be attended with difficulties; but in determining, after much consideration, upon that which they now submit, the committee have been governed both by what seemed just to the holders of the different classes of securities, and most advantageous having regard to the market value and availability of the securities themselves.

It is well known that where a great property is in a condition of steady and prosperous growth its shares will command some confidence and value in the market, even though the property be at the time earning nothing beyond the interest upon its obligations; and that the shares of such a property always command a higher market value than if they were converted into bonds on which no interest could be paid. Let a growing business be represented by a million of debt obligations and a million of shares, and it will be found that, although it may earn interest only on its debt, the shares will command a marketable price, and debt and shares together much more than if the whole concern were represented by two millions of debt obligations, on half of which only it could earn interest.

With this view, your committee endeavored to find the extent to which this line, when put in complete order, might be reasonably expected to earn interest, and to limit the bonded debt to that amount, leaving everthing beyond to be converted into and to be represented by shares, with a preference of dividends thereon as justice might require.

Their expectation is, that the line will be so far repaired out of its earnings as to be able to pay the interest maturing on the first divisional bonds in 1869, and upon all the divisional mortgage bonds in 1870, and interest thereafter on even the whole thirty millions of bonded debt. And their recommendation is, that the deferred coupons of the consolidated bonds, and the balance of the debenture debt reduced by the securities in the Bank of England, as hereafter mentioned, should be paid by 7 per cent. first preference shares. These preferred shares should be taken from the present share capital, and the company should guarantee that out of the first earnings of the line applicable to dividends there shall be first paid thereon, before any other share receives anything, a non-accumulative dividend of 7 per cent. per annum. And they further suggest that other creditors should be paid in 5 per cent. second preference non-accumulative shares; so that in 1871 there might be a complete line, with but $30,000 000 of bond debt, and a share capital of $30,000,000, earning interest upon all its bonds, if not also something toward its shares.

By any other plan, it is believed that the debt will be so accumulated against the company as not only to destroy all value in its shares, but to damage all its securities; for where a company has many classes of securities, some of which are not of appreciable value, the difficulty of distinguishing among them, and their great amount, tend to depreciate those of the obligations which are perfectly secure. And your committee consider that the holders of consolidated bonds, by this plan, will be able speedily to command decidedly more for their bonds, and the shares they receive for their coupons, than if those coupons were turned into additional mortgage bonds; while the whole concern, relieved of a mass of debt upon which interest could not be earned, whould speedily rise in the market toward some fair measure of its value.

On the other hand, it is recommended to the debenture-holders that they should take absolutely the securities now held as collateral in the Bank of England (except the common shares now of no market value), applying them dollar for dollar in liquidation of their certificate debt, receiving from the trustees of their securities new certificates, indicating their respective interest in the same, and upon which, after November (up to which date the Consolidated Bank will pay the interest), their trustees will be able to pay some interest out of the funds in hand and to be collected, inasmuch as, although the bonds deposited will not for the present yield any revenue in cash, they will increase by the accruing coupons the amount of security, and the cash in hand can therefore be applied for interest in the meantime.

And for the residue of their debt, after so applying those securities, they should receive first preference shares of the company, at par, of the same class as paid to the holders of consolidated bonds for their deferred coupons.

By this agreement it will be seen that every holder of 100*l.* certificate of debenture will receive in liquidation of his claim 7 per cent. first preference shares to the amount of $250, and for the remaining $250 a certificate for his share of the bonds and the securities of other companies remaining in the Bank of England and yielding an annual interest of about 7 per cent., although subject to some modification of this rate during the time that the mortgage coupons are deferred.

It may at first seem unjust to the consolidated mortgage holders that the interest on their prior debt should be put upon the same footing as the unpaid capital of the subsequent certificates of debenture. But it is not a question of strict priorities alone that must be considered, but one of practical good; for it is only in this way that the shares to pay the consolidated coupons can be obtained, or the balance of the debenture debt

and interest be extinguished as a claim on the company ranking next after the consolidated bonds and before the first preference shares.

And it should also be remembered that these debenture-holders have themselver nearly one-half of the divisional bonds, being the first charge upon the line, together with more than $1,000,000 of deferred interest thereon, as to which their forbearance is very important to consolidated bond holders. And above all it should be borne in mind that only by reasonable mutual concession and forbearance can all classes of security holders obtain that general harmony which will so soon and so materiatly operate for the common good.

The other debts of this company, known as the open debt in London, and 10 per cent. share debentures, are all of the same class, are mainly in few hands, and are all more or less connected with shares as collaterals.

Mr. M'Henry, who would be entitled to the surplus shares of the company upon the arrangement of these debts, in respect of which various complications and questions exist, has indicated his willingness to have them arranged before he receives any dividends on his shares; hence the suggestion of discharging them in second preference 5 per cent. shares, as may be decided between these creditors and Mr. M'Henry, whom it may be said almost solely to concern.

It will be seen that by this plan the bonded debt of the company will ultimately be kept within its original thirty millions, and the shares within the thirty millions already created, though some of these will have a preference for dividends over others. And for this arrangement no legislation will be required, nor need any delay be incurred. It is believed to be the best practical plan for all parties (having regard to their legal priorities), which the nature of the case admits of, and it leaves the obligations upon the property such that hereafter every one interested can know them, and from the earnings estimate for himself the true security and value of the bonds and shares.

On the future of American railways, and especially of this great line, your committee will not dwell. But they submit herewith the growing earnings of certain leading railways between the years 1862 and 1866. It is well known that every day the rails reach further west, opening to settlement and cultivation new places, which in their turn furnish new products and traffic for the railways leading to the seaboard, while the constant development of wealth and industry along the immediate line of this railway, and the additions that cannot fail to be made to it of valuable feeders from the great Ohio coalfields now projected or in construction, and the daily growth of the whole country, must all combine to add to its traffic, its profits, and its value.

To the scheme now proposed it is hoped that the assent of all interested will not be wanting. So that, with its debts arranged, its line completed and in repair, and its adminstration perfected, the property may realise the reasonable anticipations of the committee.

In concluding their report, your committee would desire to pay a just tribute to the skill and energy of Mr. Clarkson N. Potter, whose promptitude, in conducting the proceedings under which a receiver was appointed has probably saved much litigation and trouble, and has ensured the preservation of the property intact for the benefit of all concerned.

COMMITTEE OF INVESTIGATION.—Col. Sir Wm. Russell, Bart., C. B., M. P., Chairman; Crawshay Bailey, Esq., M. P.; Thomas Cave, Esq., M. P.; John Fildes, Esq., M. P.; F. W. Oewel, Esq., Amsterdam.

☞ It is said that the East Pennsylvania Railroad Company propose, at an early day, to extend their road through from Allentown by way of Butztown, striking the Bushkell Creek about three miles above its mouth, and then along the creek to Easton.

Milwaukee and St. Paul Railway.

The directors of this company have issued a circular to the stockholders in which they announce the completion of the road from Cresco to Owatonna, about 85 miles, and that passenger and freight trains will commence to run from McGregor to Minneapolis and St. Paul, 220 miles, on the 1st of November. This part of the road will hereafter be called the Iowa and Minnesota Division of the Milwaukee and St. Paul Railway. The completion of this 85 miles makes the connecting link between what was formerly known as the McGregor Western and the Minnesota Central Railways. The construction of it was commenced in April of this year; the full 85 miles are now ready for operation, showing it to have been built within the last six months. The Milwaukee and St. Paul Railway Company now owns 825 miles of railway in full operation, every mile of which is productive property. The public have now a connected line of railway from the city of New York, *via* Milwaukee and St. Paul Railway, to Minneapolis, St. Paul and St. Cloud, a distance of more than 1,500 miles, about one-third of which is over the Milwaukee and St. Paul Railway. The Winona and St. Peter, the St. Paul and Pacific, the Minnesota Valley, the Minnesota Southern, the La Crosse, Tremplean and Prescott, and the Tomah and Lake Superior Railroad Companies, which are tributary or connecting roads, are all being constructed with more or less dispatch. They now, in the aggregate, amount to about 265 miles in actual operation. This new line of road opens to market a section of country hitherto but little known to the railroad or commercial world. It passes through the most fertile and densely populated counties of Northern Iowa and Minnesota; is has undisputed possession of the trade of an immense region surpassed for the richness of its soil, and the industry and enterprise of its people, from whose immense granaries will be sent forth, over this railway, a golden stream of wheat and other grain, representing the wealth of that richest of all agricultural districts in this country. The population, in the section of country tributary to this road, is increasing beyond the most sanguine expectations of predictions heretofore had or made by reasonable men. Unimproved lands upon this new line have advanced in market value from $2 50 per acre to $5 and $10 per acre; improved lands have increased from $20 per acre to $40 and $50 per acre. This is caused by their large crops, the ease and comparative cheapness with which they can now get their crops to market, and the good prices obtained for their wheat and other products. The earnings are steadily increasing; in 1866 the same lines, except said 85 miles, earned $5,447,900. This year earnings are estimated at over $6,000,000, with said 85 miles in operation for traffic only 60 days. It is believed the next year, and the future, will show an increase of earnings which will be most gratifying to the shareholders. In the operation of the railway two active organizations are kept up, viz: the Milwaukee and St. Paul and the Milwaukee and Prairie du Chien. Neither of these owe any floating debt that they have not the money already on hand to pay. A claim has been made upon the St. Paul Company for about $237,000 for use of rolling stock; the validity of this claim is denied, and it is not regarded by the directors as of much importance.

The cost of the entire property known as the Milwaukee and St. Paul Railway, including what is known as the Milwaukee and Prairie du Chien Railroad, and what was formerly known as the Eastern Division of the La Crosse and Milwaukee Railroad, the McGregor Western Railway, and the Minnesota Central Railway, has been about $30,500,000, say $37,000 per mile. In general terms the whole property is now represented as follows: $9,000,000 of St. Paul Co.'s mortgage bonds, $8,000,000 of St. Paul Co.'s preferred stock, $5,400,000 of St. Paul Co.'s common stock, $8,100,000 of bonds and shares of the companies above named not now owned by the St. Paul Co.; total, $30,500,000.

Debt of Missouri.

A correspondent of the New York *Times*, writing from St. Louis, gives the following as an accurate and full report of the financial condition of the State of Missouri. He says:

The debt of the State may be comprised under three headings, viz: Old State debt, Railroad debt, and War debt. The old State debt, amounting merely to $402,000, became due in 1862 and 1863, and was retired by the issue of 20-year 6 per cent. bonds taken at par by the holders of the old bonds. The War debt of the State of Missouri originally consisted of three items: Defense warrants, Gamble check and Union Military bonds. The defense warrants amounted to $1,476,575, and were all cancelled and burned last April. The Gamble check for $150,000 has likewise been settled. The Union Military bonds amounted originally to $6,400,000. Of this amount there was redeemed by the 2d of May, 1865, the amount of $1,769,511; and on the 1st of October, 1866, the whole amount of outstanding Military bonds was estimated by the Auditor of the State at $2,902,166, which, according to the Auditor's estimate, ought to have been redeemed by the Military and other taxes of 1866. Nevertheless, the present Treasurer of the State has seen fit to set aside $1,500,000 of the money appropriated by the United States Government for the purpose of redeeming Military bonds still outstanding.

The Railroad debt of the State is as follows:

Pacific Railroad	$7,000,000
Hannibal and St. Joseph Railroad	3,000,000
North Missouri Railroad	4,350,000
Iron Mountain Railroad	3,501,000
South West Pacific Railroad	4,500,000
Platte County Railroad	700 000
Cairo and Fulton Railroad	650,000
Totai	$23,701,000
Which has been diminished by the sale of railroads and bank stock	1,450,000
Leaving the present debt of	$22.251,000

Of this debt the Hannibal and St. Joseph Railroad has always paid, and still continues to pay, its own interest on its own bonds, leaving the actual debt of the State at $19,251,000, bearing a semi-annual interest of $577,530.

It is well known that the State of Missouri stopped payment of the interest on its coupons in 1861, and hence each of the bonds mentioned above has twelve coupons attached to it, making its par value $1,360, or with the January, 1868, coupons counted in, $1,390, which at the rate at which Missouri bonds were quoted in 1860, 85 cents on the dollar, ought to make their present market value at least $1,175, or rather $1,240.

But there is, moreover, this to be considered. The United States Government has appropriated for the payment of moneys advanced by our State during the war the amount of $6,475,851. Of this amount $6,193,968 57 has already been paid into the hands of our State Treasurer.

From this amount the last Legislature ordered to be set aside for school purposes $1,500,000,

and for seminary purposes $108,360; but the Treasurer has moreover seen fit to keep of this appropriation $1,500,000 for the redemption, as he says, of outstanding Military bonds, although the State Auditor estimates that the taxes of last year must have redeemed the whole amount. Hence the Treasurer deducts the amount of $3,108,360 from the appropriation made by the United States Government, leaving the sum, $6,475,851, less $3,108,360, of $3,367,491, to be applied to the payment of back due coupons, and at the date of writing five of those coupons are ordered to be paid.

Beside this amount of $3,367,491, there has been deposited in the State interest fund $600,000 by appropriation of March 12, 1867, and an estimate of $127,000 from taxes since that time. The interest fund of the State has therefore $4,094,491 (less the July, 1867, coupon paid, $557,530, to its credit at the present date of writing, or more than enough to pay seven of the past due coupons. As the revenue for the year 1867-'68 will bring in more than $1,700,000 to the credit of the interest fund alone (the whole assessment amounting to $428,000,000, and the tax to seven mills, of which four mills goes to the interest fund,) the credit to the State interest Sept. 30, 1868, will be $5,794,491, from which are to be deducted the payment of three regular coupons, July, 1867, January, 1868, and July, 1868, $1,552,590, leaving $4,241,901 for the payment of the past due coupons, or providing for the payment of nearly eight coupons, leaving only four, or not to exceed five, of the past due coupons unpaid.

Since there seems at present no doubt that the Pacific Railroad will also be sold this Winter, and will realize at least four millions, it may be safely stated that the State of Missouri can enter upon the next fiscal year with all past due coupons paid in cash, and a debt at the utmost of $17,251,000.

Finances of St. Louis.

From the semi-annual report of the Comptroller, recently issued, it appears that the total receipts for the first half of the present fiscal year ending October 1, 1867, were $1,425,360 35; of which $838,000 were borrowed, and $240,000 are proceeds of bonds sold—leaving $352,360 35 as receipts from revenue proper. The total expenditures during the same amounted to $1,369,040 14.

The bonded debt of the city April 1, 1867, was		$5,584,000
There have been issued since—		
500 bonds under ordinance 6,053	$500,000	
300 bonds under ordinance 6,250	300,000	
1,000 bonds for St. Louis Water Works	1,000,000	
50 bonds of $500 each for purchase of Soulard Market	25,000	
		1,825,000
		$7,409,000
Bonds matured and paid	$14,000	
Retired by sinking fund	74,000	
		88,000
Making the amount of the bonded debt of the city October 1, 1867		$7,321,000

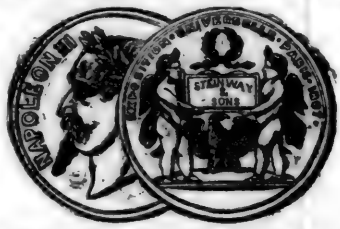
During the next six months bonds to the amount of $143,000 will mature, viz.: in November, $18,000; in Deceber, $27,000; and in March, 1868, $98,000. As no provision has yet been made for the payment of these bonds, and as it will be impossible to pay them out of the year's revenue, the Comproller requests the passage of an ordinance, at an early day, authorizing the Mayor and Comptroller to issue a sufficient amount of new bonds to redeem the maturing ones. The city owns real estate, exclusive of wharf land, valued at $3,097,160. The Harbor Master's report for the above-mentioned time shows the arrivals of steamboats to be 17,112; tonnage 552,077.

Finances of Tennessee.

The Comptroller of this State in his report to the Legislature for the fiscal year ending September 30, makes the following statement of income and expenditure:

Receipts for taxes		$1,405,364
Railroads, for interest		818,772
Miscellaneous receipts		112,309
Together		$2,336,445
Paid interest on State debt	$777,114	
State Guard (military)	194,595	
State criminal prosecutions	175,284	
Civil expenses and charities	629,524	
		1,776,617
Difference for July interest		$559,928

The Tennessee State bonds issued to and which are a first mortgage lien upon the railroads of the State are as follows:



The entire amount of State Bonds loaned to railroad companies up to October, 1861, was		$18,959,000
From which amount is to be deducted, bonds cancelled by the "Sinking Fund for Railroads," and bonds returned by the Louisville and Nashville and Edgefield and Kentucky, in full, for their indebtedness to the State, total amount		737,000
Total		$18,222,000
All bonds of the State loaned to railroad companies, since March, 1866, amount to		8,172,000
Total		$21,894,000
The State has endorsed the bonds of railroad companies to the amount of	$2,350,000	
Of these the Sinking Fund has canceled this amount	143,000	
		2,207,000
Total		$23,601,000
And bonds for funding arrears of interest to Jan. 1, 1866		3,732,000
Total		$27,333,000
Tennessee bonds, old	$13,222,000	
New to railroads	8,172,000	
New for interest	3,732,000	
Total Tennesse bonds	$25,126,000	
Indorsements	2,207,000	
		27,333,000

The old State debt proper, 5@6 per cents and arrearages of interest thereon funded to Jan. 1, 1866, amounts to $4,717,762.

☞ We learn from Omaha that the five-hundredth mile of the Union Pacific Railroad was completed on the 28th ult. Seventeen miles more will carry the track to Cheyenne, at the eastern base of the Rocky Mountains.

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

THE ELNATHAN SAMPSON

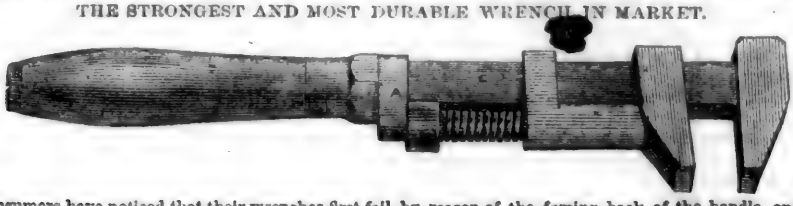
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fall by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

Steamers from Valparaizo to Liverpool.

A letter to the N. Y. *Herald*, dated Valparaizo, October 8, says that the preliminaries for the early establishment of a line of steamers between Valparaizo and Liverpool have been arranged, and a subsidy of $100,000 granted by the Chile government to the Pacific Steam Navigation Company, already running a large number of steamers on the coast. The conditions of the contract with the government of Chile are as follows:

1. The navigation by way of the Straits is to be commence within a year, counting from the date of the contract, and the company engages to pay a fine of $5,000 for every month's delay.

2. Inasmuch as the English company is without the necessary means for the immediate establishments of a regular traffic by a monthly steamer, it will during the first year be required to make only one trip every two months.

3. The company likewise engage to maintain the Southern line of steamers in operation as far as Port Mouta, and to keep it in at least as good condition as it is at present.

4. The subsidy agreed upon by the government and the Pacific Steam Navigation Company is $100,000 annually, and it is understood that this amount is to be paid for twelve trips a year. So long as the line makes only one trip every two months the subsidy is to be $50,000.

Under these, which seem to be the main conditions of the contract, the new steam line will go into active operation in September, 1868, making one trip every two months until September, 1869, and a monthly trip thence forward.

New England Express Co.

We learn from the Boston *Transcript* that considerable attention has been directed toward a new enterprise now being established to operate on the New England Railroads. The new organization is entitled the "New England Express Company," the stock for which is being promptly and liberally subscribed for by the merchants in the cities and manufacturing towns on the line of the railroads which terminate in Boston. The new organization is intended to operate in connection with the "Merchants' Union Express Company." Up to this time the existing Express Companies in New England have worked in the interest of the old monopolies—turning over to them their entire business to points beyond the city. To the Merchants' Union Express Company, therefore, this change is most important, and cannot fail to largely increase their receipts, as it brings the immense business of the New England towns and cities directly into their interests. The whole subject in all its bearings has created quite a flutter in express circles, and is conceded to be the severest blow which the old Express Companies have yet received.

In addition to this new enterprise for the New England States, some large capitalists are organizing for a company in the Southern States, and will be assisted therein by many prominent merchants, who find themselves large gainers in their freight expenses by the opposition in the express business.

☞ The first section of the Leavenworth, Lawrence and Galveston Railroad, 80 miles, will be completed to Ottawa by the 1st of January next. The route of the road passes through the great pine region of the Illinois, Arkansas and Red Rivers.

☞ An engine and train of cars crossed the Kansas river at Lawrence on the 1st inst.

Memphis and Charleston Railroad.

The earnings of this road for the fiscal years ending June 30, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$852,157 64	$910,799 03
" freight	589,916 62	636,886 85
" mail	20,506 43	27,799 62
" express	51,092 50	76,720 00
" rents, etc	30,633 91	9,406 93
	$1,274,307 10	$1,661,612 43
Expenses, viz:		
Conducting transportation	$303,488 08	$334,095 09
Motive power	379,866 61	338,848 52
Maintenance of way	577,631 37	329,427 00
Maintenance of cars	92,078 30	111,984 36
	$1,353,064 26	$1,114,354 97
Excess of receipts	.....	$547,257 46
Excess of expenses	$78,757 16	.....

Of the expenses of 1866, $650,164 93 were ordinary, and $702,899 33 extraordinary. Of the extraordinary expenses, $87,229 74 were incurred in operating the road; $233,343 05 for materials on hand at the close of the year; and $382,326 54 for extraordinary expenses of the engineer department. Deducting these from the gross expenses of that year, and the net earnings will be $624,142 17.

In addition to the above expenses for operating the road in 1867, the sum of $475,697 77 has been expended for extraordinary purposes, such as bridges, trestles, iron rails, chairs, locomotives, etc., which being deducted from the net earnings, leaves a balance of only $71,489 69. The President, in his report, says:

While the above report is not such as your Board had hoped at the beginning of the year to be able to make at its close, yet, when we consider the extraordinary difficulties and casualties with which the road has had to contend, it is a source of great satisfaction to know that under such adverse fortunes it should be able to sustain its credit and pay its liabilities—meeting every expense, both ordinary and extraordinary, as they matured—continually adding largely to the value of your property in permanent works and equipment—paying promptly the interest due to the State of Tennessee—and also providing for the payment of the past due coupons on your first mortgage bonds, which are now being paid in New York.

Here follows a statement of the extraordinary circumstances attending the business of the last year, viz: the prevalence of the cholera in the cities of Memphis and Nashville during the first three months of the fiscal year; a general failure of crops on the line of the road; serious floods causing derangement in the trains on the western division in the month of November; the falling, about the same time, of the west span of the bridge over Big Bear Creek; the long continued rains and extraordinary floods in the Tennessee River in the spring of this year, causing disastrous results; and lastly, "the unprecedented legislation of the county, placing under military government ten of the Southern States, had a tendency to destroy all confidence, and give alarm to business men and capitalists to such an extent that the business of the county had become prostrated, paralyzed, and reduced to the actual wants of life." The report continues:

Notwithstanding all these interruptions and difficulties thrown in the way of the business of your road for the past year, (which combination can hardly ever occur again,) the net receipts of your road have been sufficient to pay interest on all of your bonded debt, and the debt due to the State of Tennessee—say

7 per cent. on $1,294,000 1st mortgage company bonds	$90,580 00
6 per cent. on $1,595,530 Tennessee bonds	101,838 00
	$192,418 00
Less balance of interest received from other sources	23,865 38
Leaving	$168,552 62

Deduct this amount from the net earnings of the road, to wit, $547,187 46, will leave a net profit of $378,634 84, which is over seven per cent. on the entire capital stock of your company, after paying interest on your funded and floating debt, and under ordinary circumstances should have been declared as dividends to the stockholders; but your large floating debt, and heavy expenditures in construction and equipment, rendered it necessary to use these means for the accomplishment of these objects without increasing your floating debt.

By reference to the General Balance Sheet you will find that your floating debt has been reduced since your last annual report $540,527 05, and your funded debt increased as follows:

Sales of 7 per cent. 2d mortgage bonds, at 18 years	$237,000
Settlement of interest and sinking fund account with the State of Tennessee	3,540
Total	$240,540

Your present funded debt consists as follows:

First mortgage 7 per cent. bonds, due in 1880	$1,294,000
Second mortgage 7 per cent. bonds, due in 1885	237,000
Debt to the State of Tennessee, due in 1890	1,595,530
Making a total of	$3,126,530

Your floating debt is nominally $921,787 32; in this is included the following items, for which payment has already been provided:

Past due company coupons	$156,957 00
Due the United States Government	272,403 02
	$429,378 02

Deducting this amount from the gross floating debt will leave balance of $492,409 30.

Provision has been made for the payment of the past due coupons in New York, to be refunded from sales of second mortgage bonds. An agreement has been made with Government for the liquidation of their debt, by the application as credits on same monthly, of all services performed by your company, and a cash payment of $10,000, to be paid monthly. This will give you about twenty months in which to pay this debt, allowing about one-third of it to be paid in transportation.

Of the remainder of this floating debt, there is:

On old unpaid dividends	$34,218 98
Due on unpaid pay-rolls	58,837 55
Due to individuals	138,012 42
Due to railroads	7,953 33
	$239,022 38

Most of this amount is the result of the monthly expenses being passed to the credit of individuals and pay-rolls each month, and is fully provided for and paid monthly from cash on hand, and amounts due from railroads, agents and individuals, which are usually collected in time to meet these liabilities; and the amounts standing to the credit of these accounts being repeated every month, there will rarely ever be a less amount at any given time, and it cannot properly be considered as a part of the floating debt. A very considerable amount to the credit of dividends and pay-rolls are accumulations from the beginning of the operations of the road, a large proportion of which will probably never be called for. Deduct this amount of $239,022 38 from $492,490 30, will leave a balance of floating debt actually to be provided for of $253,886 92; of this sum, $100,000 included in bills payable, is on a permanent loan, with collaterals which would more than pay the debt at any time—the payment of which, however, it is not expected will be required for several years.

Since your last annual meeting, in accordance with a resolution then passed, the Board of Directors have caused to be issued $1,000,000 in second mortgage bonds, bearing seven per cent. interest, payable January 1, 1885, in the city of New York. $237,000 of these bonds have been disposed of to our own stockholders and capitalists along the line of your road. It is the intention of the board to dispose of the remainder of these bonds at the earliest practicable moment, so as to liquidate the entire floating debt of the company; so that hereafter the net receipts of the road will be applied to paying dividends to the stockholders.

From the General Balance Sheet it will be seen that you have on hand coupon bonds bearing interest, as a part of the assets of your company, $1,178,500, as follows:

State of Tennessee six per cent. bonds	$610,000
First mortgage bonds of other railroad companies	367,000
Second mortgage bonds of other railroad companies	199,000
Bonds of the State of Alabama,	2,500
	$1,178,500
To which add your 2d mortgage bonds still on hand	763,000
This will give you	$1,941,500

in coupon bonds on hand for negotiation to meet your liabilities, and to meet your engagements for permanent improvements in roadway and rolling stock, which have already been contracted for.

It will not be necessary to negotiate your Tennessee bonds, as your other means will be ample to meet your engagements, as heretofore shown, thereby reserving these bonds for the purpose of handing over to the State, reducing your funded debt to that extent when it is no longer necessary to hold them to use as collaterals in raising money.

In accordance with a resolution of the stockholders at their last meeting, the Board of Directors have made arrangements to relay your entire road with the improved double-lipped wrought iron rolled chair, twenty-four inches long, one hundred miles of which will be laid during the present year, and the remainder will be put down next year. They have made arrangements to pay for these chairs in the securities of the company, thereby relieving them of the necessity of paying cash for these purchases. From a more thorough investigation of this improvement, the Board are the better convinced of the wisdom of its adoption, believing that it will prove a great saving to the company in the expense of keeping up its roadway and the reduction of wear and tear of machinery, as well as the securing of much greater safety to trains, by lessening the liability to run off at joints, enabling the road to run at much higher speed in safety, to meet all competition.

A statement is here given showing in detail the actual cash cost of the roadway and equipment under their proper headings, the aggregate amount of which is stated at $7,286,186 60, after deducting and charging off all loss and damage for destruction of property by the war amounting to near $1,250,000, excepting the losses incident to the non-use and neglect of the road, structures, etc., for nearly four years. The repairs of these damages have been made and charged to road expenses. The road is now in good order, the buildings restored, and cuts ditched out, enabling the trains to make about as fast time as they ever did. This shows that the road has been built, and almost rebuilt, and fully equipped for business at a cost of $25,000 per mile. It is believed that the road could not now be constructed and equipped for less than 12 or 13 millions of dollars. The property of the company consists of: 290 miles of road; 20 miles side track; 2 machine shops at Memphis and Huntsville; 38 depot buildings; 4 engine houses; 37 division houses; 55 locomotives; 23 first-class passenger, 17 second class and mail, 6 baggage, 269 box freight, 117 platform freight, 1 wrecking and 85 road and hand cars; 2,240 acres woodland; 1 hotel building at Huntsville; 20 water stations; 1 steam saw mill; 200 town lots in Huntsville; 30 lots and 17 acres of depot grounds in Memphis, with ample depot grounds at all other stations, and right of way throughout the entire length of the road. The real estate of the company, which originally cost $64,419 32, is now worth at least $1,000,000.

The gross receipts of the past year are larger than any annual receipts the company ever had previous to the war, and show most clearly that with a fair average crop and an ordinary business season, the receipts must be largely increased. Hence the board look confidently look forward to a very satisfactory increase in the net receipts for the future.

It cannot reasonably be doubted that the company's present means, by negotiating its securities on hand, will enable it to meet all its liabilities, and the stockholders may rely with confidence on the net earnings of the road hereafter going to pay dividends.

The now excellent prospect for a crop on the line of the road gives a very satisfactory assurance of a heavy and profitable business this fall, and the Board see no reason to doubt that a cash dividend will be paid to the stockholders by the first of January next, with every assurance that it will continue to be paid every six months thereafter, and your stock become an available source to which you may look for a steady income in the future.

The high prices of mechanical labor, as well as most of the material, comprising a large part of the expense of operating railroads, and the low price of freights and passage compared with those prevailing before the war, together with the decreased aggregate business, renders it impossible that the net receipts of Southern railroads can be as large as formerly. The cost of keeping up

and operating your road is now very nearly as much, and the number of trains and mileage of engines, as great, as if your business was double what it now is. The remedy for this is to increase your business. The question of profits on railroads depends more upon the extent of business than the price you get for it. When you are so situated that you can run full loaded trains both ways, it can be done at much less cost and with greater profit to the company.

The building of the lines of road to Louisville, and the more direct line to Nashville by way of the Memphis and Ohio and the Nashville and Northwestern Railroads, *via* the junction of their roads at McKenzie, as well as the completion of the latter road to Hickman, Kentucky, thereby giving the Nashville and Chattanooga road a direct all rail line to the Mississippi River will reduce your business to Nashville, as well as your through business to Georgia from St. Louis.

It would be folly to try to disguise these facts, so patent to all who will examine them. Is there a practical remedy for them? Your Board think there is, and one by which you will not only reclaim all the business you have lost, but increase it four-fold; and it is one of the necessities that will not only force itself upon you, but the roads in Georgia and South Carolina in connection with you—that is, the building of a road from some point on the line of your road in North Alabama to Atlanta, Georgia.

From Decatur, Ala., to Atlanta, a practicable line of road can be built within 150 miles, at not above the average cost of your road. This would give you practically an air line road from Memphis to Charleston and Savannah, on the shortest line that a railroad can be built between the city of Charleston and the Mississippi River, not exceeding 650 miles, and to Savannah not exceeding 635 miles. The completion of this link of road would secure to you a line which could forever successfully compete with all competitors, built or to be built, for the great through business from New York and all the manufacturing districts in New England, and for all imported or manufactured goods to be consumed in the Mississippi Valley at or south of Memphis, as it is the shortest rail with the cheapest water connection that can ever be made between the points named.

It would also secure to you almost the entire trade from St. Louis, the great granary of the West, to supply with Western produce the whole of the States of Georgia and South Carolina. You would have the cheapest water transportation known from St. Louis to Memphis, time only two days, and at a cost of not over 20 cents for 100 pounds. The distance from Memphis to Atlanta would be only 340 miles, or at least 120 miles nearer than any other all rail route from Atlanta to the Mississippi River—Atlanta being the distributing point for Georgia and South Carolina. These advantages must secure you this vast trade, almost without a competitor. By running a day and night through freight train, the time from St. Louis to Atlanta would be reduced to not over four days, and the cost of freight to about one-half or two-thirds of its present cost. If this road was finished, it would reduce the time on freight between New York and Memphis to from five to five and a half days. These results, in both time and cost, would certainly secure a very heavy business to the line, and your cars would go and come fully loaded, both east and west, at remunerating rates, and you would be secure against all competition.

Since your last annual meeting, and in conformity to a resolution of your body, I have corresponded, and had personal interviews, with all the roads in Georgia and South Carolina, that are equally interested in the completion of this road, and I found them not only willing but anxious to co-operate with you in its building, and your Board cannot recommend too strongly, as soon as the political status of the Southern States is sufficiently settled to justify it, that you go vigorously to work, in connection with the roads above named, and complete this road as rapidly as possible. When this is done, no road in the United States will be more secure from competition, or have a better prospect of a large and profitable business than yours.

The next most important connection for your road to look to for a large and permanent increase of business, is that of the completion of the line from Decatur to Montgomery. This line would bring you in direct contact with the extensive coal and iron fields of Central Alabama, within 75 miles of the central portion of your road, which would certainly give you a very large tonnage, both for coal and iron, for local consumption along the line of your road. It would also enable you to secure an immense lumber trade from the pine forests on Sand Mountain, within 25 to 30 miles of your road, the lumber from which is so much needed, and is in so much demand, in the Tennessee Valley.

The opening up of a direct line of railway to this vast field of mineral wealth, at no distant day destined to be the Birmingham of America, will open up new sources of wealth and employment that will draw to it millions of capital, and an immense population of industrious and enterprising citizens, for its development, that must create a large demand for Western produce to support them, from which source you will derive a large and profitable business by way of Memphis, as well as by the Tennessee River. You should not hesitate, at the proper time, to aid and assist in a material way the building of this road, as it will be one of your most productive connections for the increase of your business on a permanent basis.

The opening up of new competing lines, the heavy losses sustained by you last winter, and the great additional charges on your traffic for want of a direct connection with the river at Memphis, should admonish you that no time ought to be lost in remedying this crying evil. If it cannot be obviated in any other way, the Board would recommend that a short and cheap branch be built from Iuka to the Tennessee River at Eastport, eight miles, connecting there with deep water, where goods can be transferred directly from the boats to the cars, thereby saving the heavy cost and uncertainty of transferring, as it has been done heretofore. This done, inducements could be offered to lines of steamers that would secure certain and cheap transportation from Cincinnati, Louisville, and St. Louis, and would give you a large business to East Tennessee and Georgia, that is now lost to you by the heavy expense and delays of transferring one-half a mile over streets almost impassable in the winter season. It is hardly believed, however, that in this enlightened age the people of Memphis will longer stand out against this measure, as it is one calculated to greatly benefit the road, without damaging the city one dollar, by securing a heavy traffic to the road that is now lost to it, as well as to the city, by the building up of competing lines.

The balance to debit of Profit and Loss June 30, 1866, was	$111,914 23
Sundry charges during the year	23,633 74
Total	$135,547 97
Dividend No. 8, declared payable in Confederate Treasury notes, charged off	57,083 33
Balance to debit June 30, 1867	$78,464 64

When the entries are made to close the business of the past fiscal year, Profit and Loss account will stand as follows:

Balance, as above	$78,464 64
Road expenses for the year	1,114,424 97
Interest on State bonds	101,838 00
Interest on company bonds	90,580 00
Discount on State bonds sold	138,445 00
Discount on 2d mort. bonds sold	41,400 00
Balance to credit July 1, 1867	120,325 20
Total	$1,685,477 81
Road receipts	$1,661,512 43
Interest and exchange	23,865 38
Total, as above	$1,685,477 81

The number of miles run by engines with passenger trains during the year was 359,192; with freight trains, 272,318; with other trains, 154,821—total, 786,331, an increase over the previous year of 381,280. Average cost per mile run: for repairs, 7.8 cents; for wood, 9.9; for oil, tallow and waste, 1.1; for enginemen and firemen, 9.7—total, 28.5, against 41.6 for the previous year. Total cost for repairs, wood and stores, enginemen and firemen, $269,428 60.

Number of passengers carried east, 103,685; do., west, 111,298; commuters, 8,835—total, 223,818.

The number of bales of cotton transported over the road, was 88,731; of which there were received at Memphis, 65,451; at Corinth and Tuscumbia, 81; at Decatur, 2,962; at Huntsville, 610; at Stevenson, 331; and at Chattanooga, 19,296.

CONDENSED BALANCE SHEET.

Construction proper	$5,959,003 62

President.—SAM TATE.

Directors.—By the stockholders, Sam Tate, George P. Beirne, James I. Donegan, Joseph C. Bradley, Samuel D. Weakley, R. C. Brinkley, Pitser Miller, M. J. Wicks, William Dickson. By the City of Charleston, William S. Hastie, Edw. Willis. By the State of Tennessee, John C. Humphreys, F. S. Richards.

Gen'l Superintendent.—W. J. ROSS.

Master of Machinery.—M. BURKE.

Wilmington and Weldon Railroad.

The Raleigh *Sentinel* says that Hon. R. R. Bridgers, the energetic president of this road, has succeeded in funding the debt of his road to the amount of $500,000 in seven per cent. bonds, running thirty years, at eighty-five and interest added. This is considered very favorable. The loan was effected in Baltimore.

☞ The annual meeting of the stockholders of the Mississippi Central Railroad was held at Water Valley, Miss., last week. All the Board was re-elected, with the exception of Col. Latimer, of Canton, who resigned. The Hon. L. Q. C. Lamar was elected his successor. A resolution suspending payment of interest on the mortgage bonds of this road until 1871 was passed.

Flour and Grain Trade of Buffalo.

The eastward movement of flour and grain through Buffalo from the West from Jan. 1 to Nov. 1 this year, as compared with last year, shows an increase of 82,005 barrels of flour and a decrease of 8,686,188 bushels of grain.

The following will show the imports of flour and grain into Buffalo from the West by lake and Grand Trunk Railway for the month of October, and from Jan. 1 to Nov. 1, 1867, as compared with previous years:

FOR THE MONTH OF OCTOBER.

	Flour, bbls.	Grain bush.	Grain, including Flour, bush.
1867.....	400,521	10,487,015	12,489,620
1866.....	270,414	7,879,424	9,231,494
1865.....	291,963	7,885,690	9,345,505
1864.....	229,048	4,731,044	5,876,284
1863.....	454,041	7,121,913	9,392,118
1862.....	390,710	9,777,654	11,731,204
1861.....	434,446	10,311,567	12,483,797
1860.....	224,398	5,378,874	6,500,864
1859.....	295,604	4,045,428	5,523,448

FROM JAN. 1 TO NOV. 1.

	Flour, bbls.	Grain, bush.	Grain, including Flour, bush.
1867.....	1,118,027	35,975,905	41,566,040
1866.....	1,036,022	44,662,093	49,842,203
1865.....	1,478,175	36,656,680	44,047,655
1864.....	1,691,164	34,898,325	43,354,445
1863.....	2,348,707	43,547,787	55,291,322
1862.....	2,300,036	51,423,814	62,923,994
1861.....	1,772,860	43,104,842	51,969,142
1860.....	953,720	26,069,032	30,837,632
1859.....	1,172,538	10,854,701	16,717,391

CANAL EXPORTS.

The following will show the canal exports of Flour and Grain, from the opening of the canal May 1, to Nov. 1, from 1865 to 1866, inclusive, and from May 6, 1867, to Nov. 1:

	1865.	1866.	1867.
Flour, bbls.....	128,325	30,450	11,974
Wheat, bushels.	7,739,159	5,311,551	7,258,930
Corn, bushels...	15,991,418	23,061,603	13,736,733
Oats, bushels...	7,051,483	7,515,375	7,570,666
Barley, bushels.	367,276	713,282	992,557
Rye, bushels....	374,678	685,916	697,050
Total grain bush.	31,524,014	37,287,677	30,255,936

It will be seen from the foregoing exhibit that the receipt of flour and grain in bushels for the month of October, 1867, have been larger than in any previous year, being 5,823 bushels more than for October, 1862. The number of boats cleared this year to Nov. 1, is 3,144 less than in 1862. The tolls this year to Nov. 1, which amount to $1,845,344 96, are $57,426 26 less than in 1866, and $719,827 80 less than in 1862.

Northern Pacific Railroad.

An Olympia letter of October 11th states that the Northern Pacific Railroad survey of Cedar river pass, in the Cascade mountain, is completed. The pass is reported to be 4,100 feet high, one thousand higher than Snowqualamire pass, and is impracticable for railroad purposes. Three passes are now reported open, Cowlitz, Snowqualamire and Carr river. Two engineers are still n the mountains, one at Cadiz pass and the other at Squankill pass. They are expected to return daily. Major Felton left Olympia about the first of November for Washington, that he may report the explorations before the directors of the company.

Savannah and Charleston Railroad.

It affords us sincere pleasure to chronicle a further extension of this railroad and the prospect of its early completion. The cars are now run to Coosawhatchie, carrying passengers and freight, at which point there has been constructed a permanent, substantial bridge over the river, enabling transportation to be safely and expeditiously effected to Gillisonville, Grahamville and Purysburg, and the adjacent country. This has been accomplished by the indomitable energy and liberality of the present influential direction, who have spared neither pains nor expense to hasten the day when Charleston shall again be connected with bonds of iron with Savannah. To them our business community owes a debt of gratitude, and we hope that the patronage of the road will amply justify the continuance of the enterprise.—*Savannah Republican.*

Lynchburg and Danville Railroad.

Friday, November 1, was the day appointed for the opening of the bids for contracts on this road, but as some parties who propose putting in propositions were not quite ready to do so, the matter was postponed until Wednesday, when the board of directors will be in session. We understand that some five or six bids, by responsible parties, have been submitted. One gentleman of large means, from Canada, is here with reference to undertaking a contract.—*Lynchburg Virginian.*

Virginia State Bonds.

The Treasurer and Auditor of Virginia having been informed by letter that "the impression prevails in the Northern market, and to a very limited extent it appears to exist in Richmond, that the State will be unable to pay its January interest," and requesting such assurances as they can consistantly give "that this impression is without foundation;" state in reply that they "know of nothing financially to warrant any such impression. A sufficient tax was levied by the last General Assembly to meet all the obligations of the State on the 1st of January next. The greater part of this tax is payable at the Treasury on the 15th day of December, which, of itself, will be sufficient to meet those obligations on the first of January aforesaid, interest included."

☞ We learn from the St. John *News* that the contract tor the construction of the branch line of the "Western Extension" has been concluded with Messrs. Burpee and Pickard & Co. The work is to be proceeded with immediately, and a party of engineers under Mr. Chas. Gregory, have commenced the location of the line. The ceremony of turning the first sod was to have taken place on the 6th inst., in the vicinity of Elmcraft.

☞ The line of the Utica, Chenango and Susquehanna Valley Railroad has been re-located so as to run through Bridgewater, Winfield, Columbia, to within about one mile of Richfield Springs, and then diverges off and follows down what is called Mink Creek and Oak Creek Valley, west of Schuyler's Lake, to or near Clintonville. This route shuns Cooperstown.

☞ The Government claim on the State of Georgia for rolling stock, and other railroad machinery purchased by the State at the close of the war, to restock and organize the Western and Atlantic Railroad, amounting to $370,000, was paid in full on the 26th ult.

☞ The Memphis and Charleston Railroad Company has paid up all indebtedness to the government, amounting to about half a million of dollars.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JUNE 30, 1867.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines have been		£609,121
Deduct ordinary working expenses (being at the rate of 70.53 per cent		429,792
Leaving a balance of		£179,329
Deduct the renewals of the permanent way and works in the half-year (all debited to revenue)		54,973
		£124,356
Dednct amounts paid for loss by fires at Sarnia and Toronto		10,274
Leaving an available net balance of		£114,082
From this amount, to which has to be added the balance from last half-year, viz., £325, in all		£114,407
Has to be deducted for loss on American currency		21,554
Leaving a cash balance of		£92,853
From this again has to be deducted for amount of postal and military revenue for half-year due to the holders of the postal and military bonds		18,150
Leaving the balance of		£74,702
As against this sum there has been paid out, or is payable—		
For interest, &c., on lands	£1,763	
Interest on mortgage to Bank of Upper Canada	4,424	
Interest on loans, bankers' balances, promissory notes, European exchange, &c.	3,658	
Interest on British American Land Company's debentures	616	
Interest on Montreal Seminary debentures	616	
Inter'st on Island Pond debentures	2,700	
Half-yearly instalment on Portland sinking fund	2,312	
	£16,089	
For proportion due to Champlain Company	6,051	
For proportion due to Buffalo Co.	15,424	
	£37,564	
For Atlantic and St. Lawrence lease (in full)	32,787	
For Detroit line lease (in full)	11,250	
For equipment bond interest	10,779	
		92,379
Leaving a debit balance against the half-year's net revenue of		£17,677

As under the "Arrangement Act, 1862," the accounts are annual, and have to be made up to the 31st of December, and as the gross revenue of the second half-year has averaged 14½ per cent. more than the first half, this balance will be carried forward, and the rents and interest on the leased lines and equipment bonds will be paid when due. The following figures give the details of gross revenue in the first and second halves of the years 1862-'6:

1862—June.	£382,992	Excess of		per cent.
" Dec...	439,361	2d half-yr.	£56,369	or 14.71
1863—June.	456,222			
" Dec..	510,580	"	54,358	or 11.91
1864—June.	528,301			
" Dec..	618,238	"	89,937	or 17.02
1865—June.	614,786			
" Dec..	714,780	"	99,904	or 16.24
1866—June.	637,425			
" Dec..	719,370	"	81,945	or 12.85

It will also be observed that but for the increased charge for renewals of £28,667 as compared with the corresponding period of 1866, there would be a balance to the credit of the net revenue account of £10,990; and, but for the wholly exceptional debit for losses by fire mentioned below, this credit balance would be increased to £21,769. It is gratifying to find that during the last few weeks the traffic has again exhibited the rates of increase usual in the autumn months. Considering the prolific harvest just secured, both in Canada and the Western States, there is every reason to believe that these favorable returns will be maintained. The exceedingly defective harvest of 1866 throughout the United States, and also in Canada, has, beyond question, been the chief reason of the smaller gross earnings of the present year. By the aid of the financial arrangements reported at the last meeting, the directors have been enabled to contract for the delivery in Canada, during the next few months, of 25 new locomotives engines, to meet increase of traffic.

In comparing the results of the half-year's working with the corresponding period of 1866, the following facts are arrived at:

1st. The gross traffic is less by about £28,000. From this sum must, however, be deducted a lesser share of receipts due to the postal and military bondholders of £12,000, leaving about £16,000 as the falling off in the "through freight" traffic.

2d. The working expenses are more by about £26,000. This increase is due in part to enhanced price of fuel, and an augmented rate of wages, and in part to the disordered state of the country, and the cost and loss of time involved in arming and drilling the company's employes in support of the Queen's authority.

3d. The whole of the renewals are charged to revenue in accordance with the views of the last half-yearly meeting. A total length of 55½ miles has been relaid in addition to the ordinary maintenance of way. This causes a special and extra deduction from available revenue of £28,000. And,

4th. It will be seen that the losses already paid in connection with the serious fires at Toronto and Sarnia have absorbed no less a sum than £10,000. The claims arising out of these fires were resisted by the company, and up to a certain point with success.

It should be mentioned, in connection with the falling off in this company's gross receipts, that nearly the whole of the American lines show heavy decreases for the half-year ended June last as compared with the same period for 1866; 10 of Trunk lines, including the Erie, the Michigan Central and Southern, and Ohio and Mississippi, the Illinois Central, and the Chicago and Fort Wayne, showing in the aggregate a decrease in their gross revenue of £214,369. As regards fuel, an increased quantity of coal is being sent out, and experiments are being made with peat and petroleum. Reports have been made which would indicate that peat will be found to be available at a considerable reduction on the present price of wood, but a lengthened experience only can solve the question. In regard to charging the whole cost of the renewals, the directors have assumed, in making up the accounts, that the bond and stockholders consider that the time has come when revenue must bear all expenditure of every kind, in strict accordance with the Arrangements Act. It may be mentioned in connection with the losses by the fires at Toronto and Sarnia that arrangements have been completed for a floating policy of insurance so as to cover goods *in transitu*, and in warehouses, &c.

The average receipt from passengers in the half-year was 6s. 8d. per head against 7s. in 1866—and the average receipt per ton of freight was 15s. 8d. as compared with 15s. 10d. in June, 1866.

The amount of loss for discount on the American currency is again very heavy, being £21,554 against £14,264 in the corresponding half of last year. The total loss sustained by the company from 1862 to 30th June last in American currency amounts to no less a sum than £311,938, and the directors cannot refrain from again referring to this most serious but inevitable and unforeseen loss as the real origin of most of the recent difficulties of the company. The price of gold during the half-year fluctuated between 132 and 140½. It will have been observed that the price has lately been rising, but there is ground for believing that with the movement of the crops, which must shortly be taking place, there may be an equally steady decline.

By the Arrangements Act, 1862, the interest on the preference bonds and stocks, not paid in cash for the June half-year, remains undealt with until the close of the December half-year.

In accordance with the resolution passed at the special meeting of the company on the 30th May last, a draft bill has been prepared for submission to the Canadian Parliament during the coming session. This bill embodies the several matters contained in the resolution then almost unanimously adopted, but provision is made in it for the existing equipment mortgage bonds to remain in all respects undisturbed, and not to form part of any new issue of similar bonds as was at first proposed. Power is also taken, subject to the necessary sanction and previous approval of the bond and stockholders of proposals to be submitted to them, to consolidate the preference bonds and stocks by conversion into an uniform preference debenture stock, as well as to vary the terms of the agreement with the Champlain and Buffalo and Lake Huron Companies. But the board propose that the act, if passed, shall be subject to thorough sanction on the part of the bond and stockholders before it can come into operation. Practically, it will be simply a permissive act. The Canadian Parliament, it is expected, will meet for a short session in November next, when the bill will be introduced.

The heads of the proposed agreement with the Great Western Railway Company are printed herewith for the consideration of the Proprietors, who will have to adopt, or refuse to confirm, such agreement.

It will be remembered that Captain Tyler, R. E., was, at the suggestion of the board, unanimously invited by the Bond and Stockholders attending the last half yearly meeting to proceed to Canada to consider on the spot the various questions raised at that meeting. Captain Tyler having assented to undertake this important duty—associated with Mr. Eborall—these gentlemen are now in Canada carefully considering the matters referred to them. The board cannot now expect their report in time for the ensuing meeting. The meeting on the 31st instant will therefore be only held *pro forma* to be adjourned to an early future day, when the report of Captain Tyler and Mr. Eborall, together with the other business, may be fully considered.

On behalf of the Board,
EDWARD W. WATKIN, President.
London, Oct. 9, 1867.

Winchester and Potomac Railroad.

The annual meeting of the stockholders of this company was held at Winchester, Va., on Saturday last. Joseph H. Sherrard, Esq., was re elected president of the road, and Robert Y. Conrad, Wm. L. Clark, John Glaize and Wm. B. Baker, directors. The Winchester *News* says:

The report of the president and directors of the company's operations for the past year exhibited highly gratifying evidence of the increase of revenue from the transportation of passengers and freight. It was shown that the gross earnings of the company for the first eight months of the present year, to September 1st, 1867, (the latest date to which the returns had been received,) exceeded by several hundred dollars the entire amount which had accrued within the whole of the year preceding; and it was estimated that the business of the remaining four months might reasonably be expected to run up the total of the gross earnings for the year to $100,000, against sixty-one thousand some hundreds of dollars for the year 1866.

It was also stated that the amount expended during the year in reconstruction and repairs of the road, and for the use and repairs of machinery, cost of transportation, &c., and other incidental expenses, were in excess of the amount of income by about $40,000; and that as about one-third of the road remained to be ballasted, and the trestling near Harper's Ferry and the bridges on the road would require to be rebuilt, a further large outlay for these objects would yet be demanded before the road could be placed in thorough and complete condition. The contemplated improvement designed to connect the Winchester and Potomac Railroad with the Manassas Gap road at Strasburg was adverted to in the report, and the hope expressed that nothing might occur to retard its execution. After some allusion to negotiations which had been pending between the board of directors and the Baltimore and Ohio road, looking to a lease of the road to the latter company, and other topics, the question upon the report was submitted, when it was unanimously adopted.

Barryville and White Lake Railroad.

The Port Jervis *Union* says that the survey for this road was completed on the 15th of October by Mr. Kerby, of Newburgh; that the grades are favorable to its construction at a comparatively moderate cost; and that Mr. Williamson, of New York, has offered to take a contract for the building of the entire road for $100,000, and will sell $70,000 of the stock in New York city, leaving but $30,000 to be taken by the people along the route. The *Union* then adds:

The prospect is that the committee having this important matter in hand will accept of Mr. Williamson's offer; and, if so, the road will be speedily constructed. There are men enough in Shohola, Barryville, Black Lake and at White Lake ready to take the $30,000 so that there need be no delay in breaking ground for this important branch, and we say important because it will bring to market with great dispatch and facility the lumber, leather and other articles manufactured in that section. Should the Belvidere Delaware Railroad be built (and there is every reason to believe it will be), the transportation of lumber to Philadelphia would be more greatly remunerative to dealers that it now is. We urge the people along the route to take hold of this matter with energy, and secure to themselves the benefits which must certainly arise from the construction of this railroad.

Tennessee Railroad Bonds.

The Governor of Tennessee has addressed a circular to every President and Receiver of a railroad in the State, advising them of the amounts due on account of the January interest of the State debt incurred for their benefit, and the amount of arrears, and notifying them at the same time that if the interest due the State, or a reasonable portion of it, is not met, he will proceed to take possession of the roads, under the law. The January, 1868, interest as shown elsewhere, is $762,985. The average for July, 1866, January, 1867, and July 1867, is about $730,000 according to the books of the Comptroller, before the adjustment of the July accounts with the Fourth National Bank of New York. Of this sum over $200,000 is due by the Nashville and Northwestern road, the president of which road has promised $100,000 at once, besides providing his $91,946 for the January interest.

☞ The Knoxville and Kentucky Railroad is nearly completed to the State line, and trains run regularly on the road.

American Railroad Journal.

Saturday, November 9, 1867.

Stock Exchange and Money Market.

Money has been in rather more active demand, since our last, at from 6@7, generally at 7 per cent. on call, and 7@10 per cent. per annum, for mercantile purposes. At these rates, there has been a less extensive floating supply available, as the banks and private capitalists have been less liberal of accommodation. The cash reserve in the Goverment office has been materially reduced, chiefly by disbursements of coin interest. The reduction for the week ending last evening was nearly eleven million dollars, of which about nine millions were of coin interest on the public indebtedness. The banks gained in nearly all the averages, last week. The deposits were increased over five millions, the specie reserve was augmented nearly three millions; the legal tender reserve, over a million. The loans were enlarged nearly half a million, and the circulation was increased about $78,000. The West is returning less currency to the East; while the South is drawing on this point, on an increasing scale. The main local speculative borrowers come from the Gold Board. The discount market is quite close at the rates named above, on all current grades of business paper. The next debt statement, it is intimated, will show a further liquidation of the unfunded obligations, and a further contraction of the legal tender circulation. The specie reserve of the banks is now $8,974,535, against $9,186,623 same time last year. The city bank deposits are now $178,209,724, against $224,841,695 week ending Oct. 27, 1866. The legal tender reserve amounts to $57,396,066, against $74,990,842 same time last year. The circulation now stands at $34,037,076, against $30,446,207 same time last year. The loans are now $247,227,488, against $271,790,435 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $80,226,050 a day, against a daily average of $85,027,776 the preceding week, and $98,027,118 the week ending with Oct. 12. The current week's exchanges average about $95,103,690 a day. The city banks, last week, gained $5,145,596 in deposits, and $2,813,371 of specie, and $1,014,123 of legal tender. They increased their loans, $416,770; and their circulation, $77,996.

National Bank notes to the amount of $132,800 were issued last week, making the total issue to 1,671 banks thus far, $304,287,641, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,048,796, leaving, with the existing 1,630 banks, (having an aggregate capital of $419,500,000,) an actual circulation at this date, of $299,235,796. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,720,250; and for the public deposits, $38,170,450—making a total of $378,870,700. The Treasury Department last week redeemed and destroyed $351,000 of worn and mutilated fractional currency, and issued $259,602 of new.

The Philadelphia Bank movement the past week shows an increase in loans, of $8,525; an increase of $57,844 in specie; an increase in legal tenders of $102,670; an increase of $65,590 in deposits; and an increase of $5,913 in circulation. The Bank Clearings show a decrease of $673,103, and the balances, a decrease of $710,739.

The U. S. Sub-Treasury receipts, week ending with Nov. 2, were $22,525,094, including $1,686,123 from customs duties; payments, $35,904,751, including $8,253,600 of coin interest balance at the close of the week, $101,254,567, against $114,634,225, at the close of the preceding week, showing a decrease of $13,379,657. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $6,637,429 including $377,000 from customs; and payments, $5,184,045; on Tuesday, receipts, $3,868,636 including $410,000 from customs, and payments, $3,515,108. The balance at the close of business on Tuesday stood at $102,781,479, against $113,356,517 a week previous.

The aggregate issue of gold notes by the Sub-Treasury up to Oct. 31, was $225,519,920 aggre-

gate redemptions, $193,816,000; leaving outstanding at the close of the month, $26,703,920.

Government revenues have been decidedly more liberal, since our last, chiefly in the line of excises, which are again yielding handsomely. The excises, last week, yielded $6,250,000, against $2,290,892, the preceding week; customs at the port of New York $1,686,123, and at the outports, about $600,000 (in coin) more, making the grand total income for the week equal about $9,456,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $74,000,000.

Government received $6,215,000 from customs, through the port of San Francisco, from Jan. 1, to Oct. 5, 1867, against $5,718,000 same time in 1866.

Gold has been much more abundant in the open market, since our last, and, under a pressure to sell, partly on account of the *bear* operations, the prices has been depressed to 138⅛. This point was touched on Wednesday, partly under influence of the election news, which was interpreted as more favorable to the harmonious action of the national legislative and executive branches of the Government, through the remainder of the term of service of President Johnson. The latest figures on Wednesday were 139⅛. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,848,204, against $8,461,738 same time last year. The customs demand for Gold last week, averaged $281,000 a day; thus far, this week, it has been equal to $393,000 a day, or equal to a weekly aggregate of $2,361,500. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $147,318, and from California, $516,857. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $104,679,466, against $117,353,333 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $24,969,433, against $36,616,385 same time last year, showing a decrease this year, of $11,646,952. The exports of specie from this port, last week, were $579,964. The total outflow of specie from the port, since Jan. 1, 1867, has been $44,837,332, against $55,585,777 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $8,852,600, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $51,816,681, against $40,309,710 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to Oct. 1, reached $31,726,940, against $34,689,705 same time last year, showing a decrease, in 1867, of $2,962,765.

Foreign exchange has been in good demand, since our last, at firmer and buoyant prices, though closing rather tamely on Wednesday. The ease in Cash Gold greatly facilitates the operations in Bankers' Exchange; but the negotiation of Merchants' Bills against cotton is not yet very free. Exchange based on grain and flour shipments is in better credit; not so much because present prices are safer than cotton at less than 20 cents, but on account of the character of the houses drawn upon in London and Liverpool. Bankers' 60 day bills on London closed at 109⅛ @109¾, and on Paris to 5.15⅝@5.15; sight bills on London to 109¾@110¼; and on Paris to 5.13⅛@5.12½. The offerings of produce bills have been again rather heavy this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,597,023, making the total value of exports since Jan. 1, 1867, $156,808,171, against $161,362,447 same time in the preceding year.

Government securities have been variable in price, during the week, on a comparatively moderate demand, but left off buoyantly on Wednesday, on an improved inquiry, particularly for the later issues of the Five-twenties, as also for the Ten-forties, which latter were on Wednesday called for the first time at the London Stock Exchange, and were thereupon more sought after in the local market, for shipment to London. The three per cent. certificates have been in demand for banking purposes at a premium of ⅞@1 per cent. Government has thus far issued about twelve millions and a half of these certificates. The conversions of Seven-thirties at the Sub-Treasury, since Oct. 15, have amounted to about twenty million dollars. U. S. sixes of 1881 closed here on Wednesday at 112@112¼; U. S. Five-twenties of 1862, 108¼@108⅜; U. S. Five-twenties of 1864 at 105⅜@105½; U. S. Five-twenties of 1865 at 106⅛@106¼; U. S. Five-twenties of 1865, consolidated, 107½@107⅝; U. S. Five-twenties of 1867, 107½@107⅝; U. S. Ten-forties at 100⅞@101, and U. S. Seven-thirties at 105½@105⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864..119⅛	September, 1865..116
May, 1865 .....117⅝	October, 1865....115¾
August, 1865....116¾	

Since the foregoing was written, we have received the official debt statement for November 1, showing a further net reduction of $3,874,981 in the aggregate indebtedness of the Government, and a further contraction of precisely four millions in the line of plain legal tender circulation, which stood at $357,164,844 at the close of October, against $361,164,844 at the beginning of the month. The amount of the coin in the Treasury was increased $8,241,657 in October, it now being $111,543,317, against $103,298,650 a month ago. The debt bearing coin interest was increased $32,914,850, while the debt bearing currency interest was decreased $35,306,000. The aggregate coin bearing debt on the 1st inst., was $1,778,110,992, against $1,745,196,142 on the 1st ult. The currency interest bearing debt fell from $461,074,680 on Oct. 1, to $426,768,640 on Nov. 1. The private deposits of coin in the Treasury, were $14,514,200 on Nov. 1, against $14,867,820 on Oct. 1. The compound interest notes were reduced about sixteen and a quarter millions in October, or from $78,839,580, to $62,558,940. Nearly thirty-one millions of Seven-thirties were retired, through conversions, or direct purchases, during the month; leaving the amount outstanding on the 1st inst., only $334,607,700 of all issues, against the original aggregate of $830,000,000, showing that Secretary McCulloch has already funded some five hundred millions of this popular loan, and this too, in less than three months from the maturity of the first series of three hundred millions, which was nearly all provided for before it became due, Aug. 15.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 22.	Oct. 30.	Nov. 6.
Consols.....	93 5/16	94 5/16	94½
U. S. 5-20's of 1862....	69¼	69 11/16	70¾
Erie.....	45¾	46½	46½
Ill. Central.....	78¼	79¼	82¼

Railway stocks have been much less active, particularly toward the close, though prices have been generally quoted lower. Of the miscellaneous share property, Pacific Mail, and the several express stocks, have been most freely dealt in at comparatively buoyant rates. The general market closed dull and heavy.

General business has been fairly active, chiefly in the breadstuff and cotton lines. Flour, wheat and corn closed in favor of purchasers. Rye, barley, and mess pork were firmer. Middling cotton closed rather briskly on Wednesday at 18@19½ cents, as the extremes per lb. The stock of cotton now here is estimated at about 36,500 bales. The receipts at the port this week, have averaged about 3,000 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; last year; estimated stock at close of the year, 80,296 exports, 1,554,664 bales, against 1,557,054 bales bales, against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 165,000 bales, against 182,300 bales same time last year; exports, same time, 50,300 bales, against 78,000 bales same time last year; stock on hand at latest dates, 115,000 bales, against 251,500 bales same date last year. There has been more call for beeves at the live stock market, this week, at from 9@17c., as extremes. For veal calves, at 10@13c. For sheep and lambs, 4@6½c., and 5@7½c., respectively, and for swine, at 5½@6¾c. per lb., all live weight, showing a generally firmer range of prices. This week's receipts include 6,150 beeves, 1,347 calves, 32,386 sheep and lambs, and 42,392 swine. Foreign merchandise has been in moderate request. Dry goods have been depressed in price, under a continuous pressure to realize, extending to nearly all classes of fabrics. Groceries have been held with rather more firmness. Metals have been very heavy in price. The total imports of foreign dry goods, last week, were $1,018,957, and the total amount marketed $1,090,136. The value of foreign merchandise imported last week, was $2,483,057—making the grand total specie value of last week's imports of dry goods and merchandise, $3,497,014, and since Jan. 1, 1867, $209,724,158, against $249,368,236 same time in the preceding fiscal year. The ocean freight market has been less active, since our last, and rather less firm with 527 vessels of all classes in port. For Liverpool we quote flour at 2s. 9d. @3s. per bbl. grain at 9c.@10d. per bushel; cotton at ¼@⅜d. per lb.; and heavy goods at 25s.@35s. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for

the week ending Nov. 5, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,093,780	$4,597,023
Prev. reported	158,268,667	152,211,148
Since January 1	$161,362,447	$156,808,171

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,339,840	$1,013,957
Gen. merchandise	2,607,216	2,483,057
Total for the week	$3,947,056	$3,497,014
Previously reported	245,421,180	206,227,144
Since January 1	$249,368,236	$209,724,158

The balance in the Sub-Treasury on Wednesday as $103,442,694 35.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Brooklyn 6s, W. L., 95½; Jersey City W. L., 93; Georgia 6s, 73; do., 7s, 83; N. Y. The Public Debt.

The following is a comparative statement of the Public Debt of the United States October 1, and November 1, 1867:

	Oct. 1, 1867.	Nov. 1, 1867.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$198,431,350.00	$198,845,350.00
Six per cent. bonds of 1867 and 1868	14,707,941.80	14,690,941.80
Six per cent. bonds of 1881	283,676,100.00	283,676,600.00
Six per cent. Five-twenty bonds	1,235,380,750.00	1,267,898,100.00
Navy pension fund	13,000,000.00	13,000,000.00
Total	$1,745,196,141.80	$1,778,110,991.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$16,746,000.00	$18,042,000.00
Three-year compound ⅝ interest notes	78,839,580.00	62,558,940.00
Three-year seven-thirty notes	365,489,100.00	334,607,700.00
Three per cent. certificates	.....	11,560,000.00
Total	$461,074,680.00	$426,768,640.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 15, 1867	$4,250,000.00	$3,371,100.00
Compound interest notes matured June 10th, July 15, Aug. 15, and Oct. 15, '67	7,483,100.00	9,316,100.00
Bonds of Texas indemnity	262,000.00	262,000.00
Treasury notes, acts July 17, 1861, and prior thereto	164,511.64	163,661.64
Bonds, April 15, 1842	54,061.64	54,061.64
Treasury notes, March 3, 1863	959,380.00	868,240.00
Temporary loan	5,012,203.55	4,168,375.55
Certificates of indebtedness	36,000.00	34,000.00
Total	$18,221,256.83	$18,237,538.83
DEBT BEARING NO INTEREST.		
United States notes	$361,164,844.00	$357,164,844.00
Fractional currency	29,818,713.37	30,706,433.39
Gold certificates of deposit	14,867,820.00	14,514,200.00
Total	$405,897,377.37	$402,385,677.39
Total debt	$2,630,389,456.00	$2,625,502,848.02
AMOUNT IN THE TREASURY.		
Coin	$103,298,659.69	$111,540,317.35
Currency	31,813,349.55	22,458,080.67
Total	$135,112,009.24	$133,998,398.02
Amount of debt less cash in the Treasury	$2,495,277,446.76	$2,491,504,450.00

By comparing this with the statement of October 1, it is shown that the debt bearing coin interest has increased $32,914,850; the debt bearing currency interest has decreased $34,306,040; the matured debt not presented for payment has increased $16,282; and the debt bearing no interest has decreased $3,511,699 98—making the decrease in the total debt since October 1, 1867, $4,886,607 98. The amount of coin in the Treasury during the same period has increased $8,241,657 66, and the amount of currency has decreased $9,355,268 98—leaving the amount of debt less cash in the Treasury on November 1, $3,772,996 76 less than on Octob

Railroad Earnings.—Weekly.

The earnings of the Chicago and Alton Railroad for the fourth week in October, 1867, were $103,712 21
Corresponding period previous year.. 90,800 48

Increase..... $12,911 73

The earnings of the Atlantic and Great Western Railway for the fourth week in Oct., 1867, were..... $123,581 00

Decrease..... $3,211 00

The earnings of the Chicago and Rock Island Railroad for the fourth week in Oct., 1867, were..... $131,300 00
Corresponding week of previous year. 95,495 00

Increase $35,805 00

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in Oct. 1867, were..... $188,411 00
Corresponding week of 1866..... 169,766 00

Increase $18,645 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in Oct., 1867..$49,054 00
Corresponding week previous year.... 39,568 00

Increase $9,486 00

The earnings of the Virginia and Tennessee Railroad for the fourth week of Oct., were $15,925, a decrease of $3,781 on the same week last year. Total for the fiscal year commencing 1st of July, $313,249, an increase of $57,177 on same time in 1866.

Dorchester and Delaware Railroad.

We have already noticed the formal breaking of ground on this road at the Cambridge end. The Wilmington *Commercial* says that all arrangements have been made, and that work will be commenced in a few days on the Seaford end, the Delaware Railroad Company having agreed to build the road from that point, its northern terminus and place of its junction with the main stem of the peninsular system, the Delaware railroad. The people interested in this road are in earnest about it and have energy and the means to carry it through, so we may soon expect to see it completed.

Washington County Railroad.

The following gentlemen have been elected directors of this road for the ensuing year: Johns Hopkins, Galloway Cheston, Robert Fowler, Peter B. Small, Jacob A. Miller, Edward Mealy and Geo. S. Kennedy. It is expected that the road will be completed from Keedysville to Hagerstown, and ready for use, early in December.

☞ The double track of the Delaware, Lackawanna and Western Railroad has been extended to Stroudsburg. The Scranton *Register* says there will soon be a double track to the Junction, and, when once laid, it will enable them to increase their carrying and coal trade to an unlimited amount.

The New Tehuantepec Route.

On the 7th of October, the Mexican Government granted a new concession to M. Emile La Sere for the re-establishment of a route across the Isthmus of Tehuantepec. M. La Sere, as President of the old Tehuantepec route, has had great experience, and the immediate commencement of work on the road by those New York capitalists whom he represents is anticipated. The following are the main features of the decree granting the concession above alluded to:

The company of M. Emile La Sere is authorized to open inter-oceanic communication by the Isthmus of Tehuantepec, said communication to be by water along the navigable part of the river Goatzacoalcos, thence by railroad to the port of La Ventosa or any other port on the Pacific that may be deemed more suitable. The company may, if they choose, begin the railroad at the mouth of the Goatzacoalcos. Until the railroad is finished M. La Sere shall establish a wagon road and shall keep it, as well as the bridge, in good enough condition to allow the passage of passenger and merchandise wagons of light burden.

The plans and surveys of the railway and wagon road shall be submitted to the approbation of the general Government before being acted on.

The company of La Sere shall notify Government before the surveys begin, so that it may appoint a commissioner or commissioners to represent it during their execution. The salaries of said commissioners to be paid by the company. The same proviso is made as to the surveys of the public lands that are to be ceded by Government to the company.

The plans and surveys are to be finished and submitted within eighteen months from the date of this decree, and notice must be given within six months that the company are ready to survey.

The work of building the railway and telegraph shall begin within the ensuing six months after the approbation of the plans and surveys, and at least fifteen leagues of rail must be laid every year, until the completion of road, which must be done in three years from the beginning of the work.

The wagon road shall be begun at the same time as the railway, and shall be completed within one year, at the most.

Government grants to the company the strip of land necessary for both roads; and, besides, half of the public lands situate within a league laterally on both sides of the railway throughout its whole length. Said lands shall be divided, when possible, into sections of one square league each. When these lands have less than two leagues in length along the railway (and in all fractions of less than two leagues in area) they shall be divided in halves—one for the nation, the other for the company. The sections shall be numbered as follows: Beginning on the north side and following on southwards so that No. 1 on the west side of the road shall stand opposite No. 1 on the east side. Of course the interruption caused by the intersection of private property may disarrange this enumeration, which, however, shall be resumed on arriving at the next public lands. Hence the nation reserves to itself all the odd numbered sections on the west side and all the even numbered ones on the east side. The others go to the company in case they complete the roads. Should more public lands be found on one side than on the other of the railroad the excess of that side shall be equally divided in such manner as to preserve as much as possible the alternation.

Government concedes the land necessary for building docks, moles and other necessary works in the ports of Goatzacoalcos and Ventosa. The company binds itself to build said works within two years from the completion of the railway. It shall also build such works as are necessary for the proper discharging of vessels and protection of goods from damage.

The company can take from the public lands whatever material it may need; but Government reserves the right to sell said lands, not conceded, when and how it may choose.

The company bind themselves to build first class lighthouses and keep them in repair at both ends of the route, said lighthouses to belong afterwards to Government. These lighthouses are to be completed within three years after the termination of the railway.

The company shall give bonds in $100,000 within ninety days, from the date of this decree, to the Mexican Minister at Washington, or his representative. Said $100,000 shall be forfeited should the company fail to comply with the terms for the presentation of the plans, surveys, &c.

The material, machinery, hardware, coal, wagons and utensils necessary for the construction of the road and its appurtenances, as well as the articles of prime necessity not to be got on the Isthmus, for the support and clothing of the company's employes shall be admitted free of duty. After the completion of the road only machinery, coal, cars and rails shall be free of duty for seventy years. The Minister of the Treasury shall determine the rules and regulations to govern this exemption.

The company bind themselves to dredge the river Goatzacoalcos so as to render its navigation easier.

The tariff of the route by railway and water shall be fifty cents per league for every passenger, three cents per league for every arroba of goods (twenty-five pounds,) one per cent. on the value of all precious metals and jewelry. Ten cents a word shall be charged for telegrams.

During the seventy years above referred to no import shall be levied by Government on goods or passengers in transit or on the capital of the company sunk in the lines of railroad or telegraph. Goods consumed on the Isthmus or produced there shall not be exempt.

No other company shall be chartered during seventy years with equal privileges between Goatzacoalcos and Ventosa, or whatever port on the Pacific may be chosen in place of the latter.

Government shall erect Goatzacoalcos and Ventosa, or whatever port the company shall select in place of the latter, into ports of entry for seventy years.

The company cannot open any mercantile houses on the Isthmus.

This concession is for seventy years from the completion of the railway, and Government shall receive fifteen per cent. of the net profits, and at the end of seventy years shall enter into possession of the road and all its appurtenances, which must consist of at least trains enough to transport five hundred passengers and ten thousand arrobas (one hundred tons) of goods. The cars, rails, engines, &c., must also be of average utility, but the company shall retain their vessels and steamers.

Moreover, the company shall pay to Government monthly twelve cents for every passenger or package transported across the road.

Mails shall go free on the road. Government property shall pass at half rates. Government officials, troops, &c., on duty shall pass free. The telegraph shall forward all public messages free, whether of the general or State Government. The metals, agricultural and manufacturing products of the republic shall be transported at 30 per cent. below the regular tariff. All these subjects to be regulated by the Minister of the Treasury.

Transit shall be free to the world; but 25 per cent. shall be added to the tariff for the goods of nations failing to make a treaty with Mexico guaranteeing the neutrality of the Isthmus transit.

Foreign mails shall be transported under seal.

Government shall appoint one-fourth of the Board of Directors; it may also appoint a commissioner to watch over the execution of this contract.

The steamers and vessels of the company shall have the right to navigate the river Goatzacoalcos during seventy years, but under the Mexican flag, and they shall be officered and manned as

fully as national vessels by men of Mexican birth or naturalization. This does not preclude other vessels from navigating the river subject to the laws of the republic. The company's vessels shall be free of tonnage dues on through goods, way goods to pay dues.

The company binds itself to pay Fras. P. Falconett whatever may be due on the Sloo contract, thus leaving the Government free of all future responsibility in that matter.

This enterprise is and shall always remain exclusively Mexican, and the Company La Sere, although formed abroad, shall be considered as now constituted in the Mexican republic, the same as if it had been formed here and under Mexican laws. But it may organize companies for the execution of any of the branches connected with this enterprise either within this republic or in the United States, but said companies must be bound by and subject to this law. Hence all who share in the enterprise, whether as shareholders, employes or in any other character, shall be regarded in so far as Mexicans. They shall be precluded from alleging their foreign citizenship in relation to any matter connected with the enterprise. They shall have only equal rights with Mexicans and must vindicate their claims before Mexican tribunals.

This restriction does not refer, of course, to disputes between foreigners and shareholders outside of the republic; but no decision of foreign tribunals shall effect in any manner the prescriptions of this decree or the Company La Sere, which is considered as Mexican or Mexican interests.

The company shall not alienate or mortgage any concession connected with the enterprise without previous consent of the Government; and in no case can such alienation or hypothecation be made in favor of any foreign Government. Nor can any foreign Government be admitted to partnership or interest in the enterprise.

Mr. Emile La Sere may establish the board of directors at New York or any other point of the United States, but he shall be obliged to appoint an attorney in Mexico, fully empowered and authorized to deal with the general Government on all matters connected with this contract.

The Company La Sere is authorized to establish a coal depot at Huatulco, as well as workshops for the repair of its vessels, but the land so occupied shall not be considered as a grant.

The obligations of this contract may be suspended in case of events beyond control or fortuitous circumstances directly and absolutely impeding their fulfilment, and such suspension shall last only during such impediment. Mr. Emile La Sere must, however, present to the general Government notice and proof of such obstacles within three months after they have begun to occur. He must also give notice or proof of the resumption of work at least within two months after the obstacles have been removed. He will be entitled only to the time during which the impediment lasts, or at most to two months more.

The following restrictions are put upon the company:

First—No fort shall be erected.

Second—No armed body shall be organized; but the employes may carry arms for personal defence.

Third—No foreign armed body shall be transported without express authority from Government.

Fourth—No goods declared contraband of war by Mexican laws shall be transported without express authority from Government.

Fifth—No armed body of the nation or national war material shall be transported without express authority from Government or other competent authority.

Sixth—The company shall dismiss any employe who shall aid or countenance contrabandage or commit any other crime, and shall aid Government in his prosecution.

Seventh—The company shall carry out all the measures ordered by Government so as to make passengers observe the revenue laws of the republic.

The concessions herein granted shall be forfeited for any of the following causes:

First—Failure to give the bonds required by article fifteen—$100,000 within ninety days from the date of this law.

Second—Failure to present the plans and surveys or to complete the divisions and whole road within the required time.

Third—For building any fire on the Isthmus.

Fourth—For organizing any armed force.

Fifth—For allowing transit to any foreign armed force without express authority from Government, except in case of clearly being overpowered.

Sixth—For transporting without express authority from Government the contraband material of any belligerents so declared by the laws of the Mexican republic.

Seventh—For allowing any national armed force to pass or transporting any national ammunition without express authority from Government, except in the case of clearly being overpowered.

Eighth—For suspending during one year consecutively the work on the road.

Ninth—For infringing any of the clauses of this law prohibiting the alienation or hypothecation of any of its concessions without previous consent of Government, and its alienation or hypothecation in any case to a foreign Government, or the admission of any foreign Government to a partnership in the enterprise.

In case of the abrogation of this concession, for due cause, the Company La Sere shall be allowed to claim only the buildings they may have built, the portion of the road finished, the engines, trains and other objects in their employ; but the Government, or the individual, or company succeeding to their privileges, shall purchase the above at a fair valuation to be ascertained by arbitration.

The company shall give the Minister of Fomento every year all the information on the state of the work and the road that Government may ask.

All controversy about the terms or meaning of the law shall be decided by the competent tribunals of the Mexican republic.

The above decree was signed October 6, 1867, by Benito Juarez, and countersigned October 7, 1867, by J. Balcarcel, Minister of Fomento.

Philadelphia and Reading Railroad.

The traffic receipts of the Philadelphia and Reading Railroad in the month of August, 1867, were $693,103; and the expenses, including transportation, roadway, dumpage, renewal fund, and all charges, $539,720—making the net profit for the month $153,383. In August, 1866, the receipts were $1,252,385, the expenses, $641,396—and the net profits, $610,988. This shows a decrease in receipts, in August, 1867, as compared with August, 1866, of $559,382, in expenses, $101,676, and in net profits, $457,605. The net profit for the nine months ending August 31, 1867, were $1,790,279, against $3,129,511 in the corresponding period of 1866—a decrease of $1,439,232. The London Railway *Times*, in commenting upon the above return, says it "is certainly very discouraging. Month by month the net earnings of this road have decreased, until at last the profit is only about one-fourth of the amount realized in 1866. It appears strange to us that, notwithstanding this falling off in traffic, the price of the stock is so well maintained in America; as in May last it was quoted 99 to 100, and it is now about 101. The lower freights charged for coal have no doubt militated severely against the road, but it is a fair question for shareholders how far it is prudent to reduce freights to such an extent as to jeopardize regular payment of dividends."

Tennessee Railroads.

The following is a list of the railroads in Tennessee that are under mortgage to the State for the principal and interest of the bonds issued in aid of their construction, and for their relief and extension since the termination of the war:

	Bonds.	Half yearly interest.
East Tennessee and Virginia.	$2,688,000	$86,193
Memphis and Charleston	1,644,000	49,319
Nashville and Decatur	2,115,000	63,445
Nashville and Chattanooga...	395,000	11,850
East Tennessee and Georgia..	1,690,000	54,484
Cumberland Gap and Charles.	986,000	29,570
Knoxville and Kentucky.....	1,353,700	40,596
McMinville and Manchester .	851,400	25,541
Memphis and Ohio.....	2,396,100	71,883
Clarksville and Memphis....	1,894,000	56,888
Mobile and Ohio.....	1,684 800	50,544
Nashville and Northwestern .	3,065,000	91,946
Mississippi and Tennessee...	307,800	9,534
Edgefield and Kentucky	1,070,000	32,105
Mississippi Central	1,079,000	32,369
Winchester and Alabama....	1,098,200	32,948
Knoxville and Charleston ...	300,000	9,000
Rogersville and Jefferson	393,000	11,795
Memphis and Little Rock ...	105,000	3,015
Total.....	$25,126,000	$762,985

It is reported that the Louisville and Nashville Company, the Hon. James Guthrie, President, have agreed to become responsible for the use of the Memphis and Ohio and Clarksville and Memphis Railroads, forming part of the Louisville and Memphis direct connection. And the Memphi end of the line (known as the Memphis and Ohio, has been taken out of the State Receivership by this arrangement. The State lien upon the two roads is $4,290,700; half yearly interest thereon, $128,721.

International Telegraph Co.

We understand that it is the intention of the company now operating in the Gulf of Mexico to extend their line from Panama to Peru and Chili. The Chilean Government agrees to loan the company the sum of $200,000 in Government bonds, at an interest of six per cent. per annum, from the date of the completion of the line, and grants a further subsidy of $16,000 per annum for the term of twenty-two years, so that the line will be established as soon as the cable can be got ready. Bolivia and Ecuador have not as yet made known what amount of subsidy they will give, but it will not be less than $5,000 each; but whether they subsidize or not, the line will be carried out, so that the International Telegraph Company of New York have secured the whole of the west coast of South America. Should Bolivia and Ecuador grant $5,000 each, the company will have an income of $50,000 per annum guaranteed, and a loan of $400,000 to begin with.

Montgomery and Selma Railroad.

The energetic contractors, Messrs. Boyle & Co., are rapidly pushing this important road to completion. The heaviest portion of the grading on the entire line (that near the river bank in Montgomery,) is nearly completed. In a few months more, the entire grading of the whole line to Selma will be completed, and as Colonel Pollard, the President, has arranged for the iron, it will not be long before the iron horse will be leaving Montgomery westward. We learn it is the intention of the President that the road shall be running through to Selma by May next. This is an extension of the West Point road, and we learn it is the intention of the company that trains shall run through from West Point to Selma without change of cars.—*Montgomery Mail.*

Philadelphia and Erie Railroad.

The difference in the settlement of the accounts of the Pennsylvania Railroad Company and the Philadelphia and Erie Railroad Company, the former being the leasee of the latter, was brought to a conclusion on the 29th ult. The amount in dispute was originally fourteen hundred thousand dollars. Committees of the respective companies have been negotiating the matter for nine months, and their conclusion has at length been accepted as mutually satisfactory. By the terms of settlement the Pennsylvania Company becomes, next to the city, the largest stockholder in the Philadelphia and Erie.

Memphis and Little Rock Railroad.

Information has reached us that Mr. R. C. Brinkley, President of the Memphis and Little Rock Railroad, a short time ago accepted a proposition of Northern capitalists to complete the road from St. Francis River to Duvall's Bluff (forty-six miles) by January next, for $1,500,000 taking a mortgage on the stock for security; that this proposition has been voted down by the directors (Col. Sam Tate being absent,) and that Mr. Brinkley will in due time submit the same proposition to the stockholders.—*Memphis Avalanche.*

Cape Cod Central Railroad.

The Cape Cod *Gazette* says that a movement is on foot among the members of the Cape Cod Central Railroad Company, to assume the management of their own road which has been since its completion under the control of the Capo Cod Railroad Company. It is said that cars and rolling stock are soon to be purchased, a new Superintendent to be appointed and other steps to be taken to enable them to transact business on their own account.

☞ The Jacksonville *Mercury* says: We learn that the directors of our railroad have appointed a committee to confer with the Pensacola and Georgia railroad, in reference to the proposed consolidation and mutual operations of the two rail roads.

☞ The East Alabama *Monitor* states that the county commissioners of Tallapoosa county have subscribed $200,000 to the capital stock of the Savannah and Memphis Railroad, and it is confidently believed it will be ratified by a majority of the property holders of the county.

☞ The transfer books of the New York Central Company will be closed on Saturday, the 9th inst., preparatory to the annual election, to take place at Albany on the 11th of December. The books will reopen on the day following the election.

☞ The work upon the Selma, Rome and Dalton Railroad is about to be commenced. Col. E. G. Barney the Superintendent, has procured the necessary implements, and the labor will commence at both Blue Mountain and Rome. He intends having cars running through to Rome by the first of next July.

☞ The Pittsburg and Steubenville (Pan Handle) Railroad was sold under foreclosure on the 6th inst., and purchased by the Pennsylvania R. R. Co. for $1,960,000.

☞ The work on the railroad between Schoharie Court House and Middleburgh is progressing rapidly.

STEINWAY & SONS

TRIUMPHANT,

Having been Awarded

The FIRST GRAND GOLD MEDAL

for American Grand, Square, and Upright Pianos: this Medal being distinctly classified *first* in order of Merit, *over* all other American exhibitors, and *over* more than 400 Pianos entered by nearly all the celebrated manufacturers of Europe.

In proof of which the following

OFFICIAL CERTIFICATE

of the President and Members of the International Jury on Musical Instruments (Class X) is subjoined:

PARIS, July 20, 1867.

I certify that the FIRST GOLD MEDAL for American Pianos has been unanimously awarded to Messrs. Steinway by the Jury of the International Exposition. First on the list in Class X.

MELINET, President of International Jury.

GEORGES KASTNER.
AMBROISE THOMAS.
ED. HANSLICK
F. A. GEVAERT.
J. SCHIEDMAYER.
} Members of the International Jury.

This *unanimous* decision of the International Class Jury, *endorsed* by the Supreme Group Jury, and *affirmed* by the Imperial Commission, being *the final verdict* of the *only tribunal* determining the rank of the awards at the Exposition, places THE STEINWAY PIANOS AT THE HEAD OF ALL OTHERS.

The "Societe des Beaux Arts,"

(Society of Fine Arts, of Paris, known throughout Europe as one of the highest authorities on Music and Art Matters) *unanimously* awarded their *only* annual Testimonial Medal for 1867 to STEINWAY & SONS for the highest degree of perfection, most valuable inventions, and as exhibiting the greatest progress in the art of Piano-making, above all other exhibitors, at the Universal Exposition in Paris.

STEINWAY & SONS

Were also awarded a FIRST PRIZE MEDAL at the great International Exhibition, London, 1862, for powerful, clear, brilliant, and sympathetic tone, with excellence of workmanship as shown in Grand and Square PIANOS, in competition with 269 Pianos from all parts of the world.

STEINWAY & SONS, in addition to the above, have taken thirty-five First Premiums, Gold and Silver Medals, at the principal Fairs held in this country from the year 1855 to 1862 inclusive, since which time they have not entered their Pianofortes at any Local Fair in the United States.

EVERY PIANO is WARRANTED for FIVE YEARS.

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

L. MORTON MONTGOMERY, Agent and Importer,
Office 27, Nos. 40 & 42 BROADWAY, N. Y.

OIL! OIL!! OIL!!!

FIRST PREMIUM.....PARIS, 1867.
EXPOSITION UNIVERSELLE!

PEASE'S IMPROVED OILS!

Acknowledged the Best in the World! The Highest Award over all others!

Grand Silver Medal and Diploma!
The Only One to the United States awarded to
F. S. PEASE,
For the Greatest Excellence in Oils for Lubricating and Burning.

London.....1862.
WORLD'S FAIR—TWO PRIZE MEDALS
Awarded to **F. S. PEASE** for Improved Engine, Signal, Lard, and Premium Petroleum, as the **Best made!**

These Improved Oils cost no more than many of the common oils in market, while they are endorsed by the greatest experience and highest authority in the United States and Europe, and offered to the public upon the most thorough, reliable, and practical tests as the Best Oils made fr
Railroads, Steamers, and for Machinery and Burning.

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof,
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

PUMPS.

37tf **1,340 Beach St., Philadelphia.**

THE ELNATHAN SAMPSON

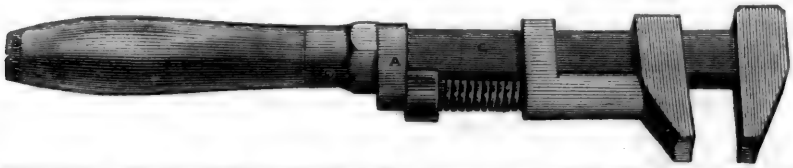
NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.



Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address.

COLLINS & CO., 212 Water Street, New York.

BOYNTON'S CELEBRATED FURNACES.

FORTY-EIGHT DIFFERENT SIZES and PATTERNS, of PORTABLE and BRICK SET FURNACES for COAL or WOOD, suitable for all classes of PUBLIC and PRIVATE BUILDINGS.

ALSO,

American Kitcheners
Progressive and Morning Star Ranges,
Combination Range and Heater,
Baltimore Fire Place Heaters,
Laundry Ranges and Flat Heaters,
Parlor, Office and Cooking Stoves.

New York, Saturday, November 16, 1867.

Louisville, Cincinnati and Lexington R. R.

The contractors upon the Cincinnati Branch of the Louisville, Cincinnati and Lexington Railroad are pushing their work uninterruptedly. The cost for graduation and masonry will be about $1,400,000. Of this amount, there will have been disbursed at the end of the present month $450,000 to $500,000, being about thirty per cent. of the whole amount of the item of graduation. The cross-tie contracts have been let, and the contractors are now getting fairly under way. In carrying forward this great enterprise, the managers have adopted a plan as wise and advantageous as it is unusual. The work has been so expended on the more heavy and difficult portions of the road, that the whole is now sufficiently in hand to secure its completion in the contract time. The foundations of all the most important bridges have been put in this season, and the masonry is well advanced. The most noteworthy bridge along the line is that across the Kentucky River, at Worthville, about seven miles above Carrollton. It will be seven hundred feet in length. The foundations of this bridge are said to be marvels of engineering skill. They are sunk in deep water, and in a manner entirely original. The masonry is now above water, and is going regularly forward. It is expected that the road will be finished and opened to travel in the spring of 1859.

Northwestern Connecticut Railroad.

A survey is now being made for a contemplated railroad, to be called the "Northwestern Connecticut," to start from Springfield, Mass., and intersect the Canal Railroad at Granby, Conn.; the Naugatuck Railroad at Winsted; the Housatonic at Canaan: the Harlem at Sharon, and terminating at Washington Hollow, N. Y., on the Dutchess and Columbia Railroad, with a contemplated branch from New Hartford to Hartford, Conn. The whole length of main line is about seventy-five miles. Enthusiastic meetings in favor of the road have been held at Winsted, and the money for the survey has been raised by towns along the route.

Fredericksburg & Gordonsville Railroad.

At the recent annual meeting of this company in Fredericksburg, Va., the old officers were re-elected, viz: President, C. M. Braxton; Secretary and Treasurer, A. A. Little; Directors, M. Slaughter and W. T. Hart. The President's report states that the capital stock was increased to $1,000,000 and the privilege of issuing bonds and borrowing money was granted by the Legislature, and permission also to make Charlottsville the western terminus, if desired. The present value of work already done is estimated by an instrumental examination at $450,000, and the outlay of $140,000 would make the road bed for forty miles ready for the superstructure. Several parties are anxious to enter into contract for the future. If all the private stock is relinquished, arrangements can be made to secure the completion of the road.

Boston and Albany Railroad.

The consolidation of the Boston and Worcester and the Western Railroads will take place on the 1st of December; though the January dividend, which it is understood will be five per cent., will be paid by the respective Treasurers of the two corporations. The terms of consolidation are not yet agreed upon, and should the new Board of Directors fail to settle the question, Commissioners will be appointed by the Supreme Court.

Georgia Railroad and Banking Co.

The receipts from operations of the road of this company for the fiscal year ending March 31, 1867, have been as follows:

From passengers		$429,024 92
" freight		676,509 31
" mail		80,607 72
		$1,186,141 95
Ordinary expenses, viz:		
Conducting transp.	$142,524 79	
Motive power	249,265 21	
Maintenance of way	163,605 92	
Maintenance of cars	67,677 34	
		623,073 26
Income, 45 per ct. of gross earnings.		$513,068 69
Disbursed as follows, viz:		
Paid for new depots	$23,588 82	
Rebuilding engines	35,000 00	
New tools for shops	5,974 17	
Timber for renewing track	38,953 75	
Extra labor in laying same	9,610 00	
New iron	36,585 84	
New bridges	42,846 26	
Houses at water stations	1,350 00	
Rebuilding cars	15,500 00	
Building new cars	28,100 00	
Government tax	29,204 23	
		266,713 07
Net profits over all payments		$246,355 62

The gross earnings of the previous year (from May 15, 1865, to March 31, 1866,) were $1,155,397 92; and the expenses, including $85,688 90 for new work, taxes, etc., were $640,478 95—leaving as net profits over all payments, $514,918 97.

It will be seen from the above that for the two years succeeding the war, the road has made, over and above all ordinary expenses of management, $1,113,676 56, or about 25 per cent. upon the capital stock and bonded debt of the company. But as the company had at the close of the war no available funds on hand, a large amount of these net earnings, shown above to have been $352,401 97, has been used in paying for the extraordinary work of renewing track, rebuilding bridges, depots, locomotives, cars, etc., leaving as net profits over all payments the sum of $761,274 59, of which amount $625,306 have been used in redeeming the notes of the Georgia Railroad and Banking Co., and the balance has been paid to

the stockholders in dividends, of which 6½ per cent. has been declared. The President, in his report, says:

The business of the year has been somewhat better than anticipated in last year's Report. As will be seen the receipts, both gross and net, are about equal to those of that portion of the previous year for which an available currency was received.

The profits of the two years compare thus:

Gross profits for 1865–'66	$1,155,397 92
" 1866–'67	1,136,141 95
Decrease in gross profits	$19,255 97
Net profits for 1865–'66	$514,918 97
" 1866–'67	513,068 69
Decrease in net profits	$1,850 28

This is a very small decrease in profits for the year, though it may be here remarked that the previous year was made to commence on the 15th of May, and in that year no Mail Pay was credited.

It will be seen that in the 22½ months, from the 15th of May, 1865, to the 31st of March, 1867, the net earnings of the road have exceeded 12½ per cent. per annum upon the capital stock. There is no mistake or deception about these profits, and if the money is not in the Treasury, or all available for dividends, it is accounted for by the payment of the debts of the company, and the restoration of the road and rolling stock, impaired or destroyed by the war. It is known to the stockholders that the ample current effects of the company provided to redeem the current liabilities of the bank, were mostly absorbed in Confederate currency, leaving the debts of the company, including more than one million of circulation, unpaid and unprovided for. The State Bonds and Treasury Notes, to a large amount, were repudiated, and "Bills of other Banks," to the amount of near $400,000, have also become almost worthless. In fine, the ample means provided by the company for the payment of its liabilities, both funded and floating, have been swept away by the war and its incidents, and the heavy expense of restoring the road and outfit from a ruined condition, and paying its liabilities, has been thrown mainly on profits. The stockholders will doubtless agree that they could not have been better appropriated than to these essential purposes, and the Directors have very reluctantly yielded to the pressing wants of the stockholders in paying any dividends, before a complete restoration of property, and the full payment of the floating debt. Much has been done towards these important objects, and much yet remains to be done. Since the return of peace the property of the company has been greatly improved—

1st. By a more thorough ditching and drying the road bed—a very important work which had been much neglected during the war.

2d. By a very expensive, but absolutely essential, renewal of timbers, especially cross ties. In the last two years there have been 283,900 new cross ties put in the track—an equivalent of material for 107½ miles of new road! To this may be added $72,489 for new track.

3d. By two new and expensive bridges—one of iron—nine new depots to replace those burnt, and a new machine shop at Atlanta.

4th. By rebuilding and repairing cars, and building new ones. The number of cars "in running order" at the close of the war was about 70. It is now 399, a large number of which are entirely new or thoroughly repaired. This does not include passenger and baggage cars.

5th. From 12 engines "in running order," we now have 28 "in good order." Some of them entirely rebuilt and as good as new, besides four others in a state of forwardness in progress of reconstruction.

6th. By the purchase of a very valuable set of constructing and repairing tools, of Seller's make. As labor saving instruments these tools were very important, in fact almost absolutely necessary, with the heavy and increased labor in the machine shop.

These heavy expenditures have been made and paid from the resources of the company, and mainly from its profits. Not an engine or a single car has been purchased or ordered—the policy of the company being, as far as possible, to give employment to our own suffering laborers and mechanics. This policy has been the more readily adopted as, from close calculations, it is believed to be consistent with a sound economy.

The amount of expenditure for these objects may be seen in detail elsewhere, and they have been made and paid without the use of credit, and without any increase of debt. On the contrary, the debt of the company has been largely reduced. In this connection, we may briefly refer to the second principle demand upon the Treasury, to account for the profits of the last two years.

In May, 1865, the bonded debt was	$254,500
At the same period the bank circulation was	941,901
Bonds and circulation	$1,196,401
On the 31st March the bonded debt was	$386,000
Do. Circulation was	185,095
	571,095
Reduction of debt since May, 1865	$625,306

Thus it will be seen, that whilst the bonded debt has been increased only $131,500, the circulation has been reduced $756,806, making an aggregate reduction of debt of $625,306 as above stated. This too is omitting any notice of deposits, and large amounts of back interest on bonds, the coupons on which were held back during the war. It may be proper here to state, that the company has declined to issue any bonds, except in renewal, and to fund the bank circulation. This circulation, being a large and immediate demand, has been very embarrassing to the company in its crippled condition. It will be seen that it is reduced to a small amount. It now comes in slowly, and will not it is hoped hereafter very materially interfere with the financial policy of the company.

The Superintendent refers in detail to the ruined condition of the road, its rolling stock and other property, at the end of the war. The heaviest and most pressing demands for renovation and repair have been met, but other expenditures should not be delayed longer than consistent with the resources of the company. A round house for the protection of engines, and a freight depot at Atlanta, are pressing wants, and will cost from $40,000 to $60,000, according to the plans that may be adopted. The Superintendent also estimates that $60,000 per annum should be appropriated for new iron, until the remainder of the main line shall be relaid. The rebuilding of the rolling mill at Atlanta, of which there is now flattering prospects, would greatly simplify this important job, and reduce the expenditure to the cost of re-rolling the old material.

With the aid of some effects (the remains of the old reserved fund) of uncertain value, all these demands may be met—together with small dividends, provided the profits of the last two years can be maintained. Can they be relied upon for the future? All calculations are idle, in the present condition of the country, in which nothing is certain but uncertainty. Some speculations, however, can do no harm, if they do no good. The Superintendent, refers to new and unexpected competition from Atlanta to the Northern cities. Are we likely to suffer hereafter as much or more by this "unnatural competition?" The difference in line of railroad is about 450 miles, and the difference in grades full 40 feet to the mile! Many early calculations on the capacity of railroads to carry bulky freights long distances have been disappointed, but there are still some disadvantages in competing with water carriage that cannot be overcome. What has caused this diversion of cotton from Southwestern Georgia, Macon, Atlanta, Rome, and other points South, directly to New York over the Virginia and Western route? It is simply the power of capital. Business will follow capital. This is especially true of the cotton trade. Buyers will ship to almost any point where they can get advances. The banking and business capital of Augusta was destroyed by the war. The same may be said of Charleston and Savannah. Charleston, before the war, had large and increasing resources. Its shipping was ample, and so was its commercial capital. Its wholesale establishments furnished ample supplies to the country merchant. Cotton was largely sold there, and supplies freely purchased. For this legitimate business the roads extending West were the natural feeders and outlets, and had no competition. The merchants West, within reasonable range, sold and bought there to a large extent, because they found they could do better there than elsewhere. There was ample business, and the roads running from the interior to the sea coast had it at remunerating rates, because it naturally belonged to them. All this for the present has been changed by the war. Two disastrous fires, and four years siege, have destroyed the shipping—the commercial capital, and the wholesale trade of Charleston. In like manner the business capital of Augusta has been swept away by the effects of war and collapse of Confederate credits. In fine, the business attractions of Augusta and Charleston have been weakened for the present by the loss of capital, and the tendency is to follow capital directly North, from all points West, whose location offers the least chance of competition, even at great disadvantage in transportation.

This unnatural competition cannot continue long after the country becomes settled, and trade falls into its natural channels. The Superintendent truly remarks that Charleston is rapidly reviving. Its location will attract to it foreign capital, so soon as confidence is restored. Capital, like labor, will always be attracted to the point where it can be most profitably employed. The same may be said of Augusta, which from its choice of ports and markets, has always been known as one of the best interior cotton markets in the South.

This competition over 750 miles of railroad of high grades, against 307 miles of low grade, cannot continue long. It will cease when the capital and business attractions are restored to Southern ports and markets. These Northern ports are not the natural Atlantic outlets tor the cotton even of Memphis—the great trade centre of the valley. Hence the restless anxiety of the energetic and able President of the Memphis and Charleston Railroad for a road, from Decatur direct by way of Atlanta to Charleston. He is now running in connection with the Norfolk route, and finds it will not do. In his last report he again calls the attention of his stockholders to the importance of the direct Charleston route. He is willing to throw out the use of one half his road, to give the other the advantage of direct connection with a South Atlantic port. The report is very able and very instructive, and of especial interest to every stockholder in our company. We have only time and space to add here, that if ever the contemplated line shall be built, (of which Col. Tate is confident) it will not only pay well itself, but will permanently fix the prosperous destinies of every road constituting a portion of the line.

It may be safely assumed, then, that this competition for cotton at Atlanta will not continue long, for it wont pay. If shippers persist in the wish to ship through to New York, this can be done quicker and at a much less cost of transportation by way of Charleston, in connection with the boats, than over the Virginia line. We shall not likely suffer hereafter, from any cause, a larger loss by reduced cotton receipts than we suffered the past year. In 1860 the road transported 219,774 bales. The last year we carried 55,714! This great reduction was in part owing to the competition complained of, but mainly it is believed from the very short crop in that portion of the country tributary to our road. To

say nothing of the effect of a change in our labor system, and a season unfavorable almost beyond all precedent, it is known that the section of country alluded to was greatly devastated and exhausted by the conflicting armies near the close of the war. It has not yet recovered, but it is recovering, and it is not likely that we shall have a less cotton crop to transport, at any time hereafter, than we had the past year.

It may perhaps be safely admitted, however, that we shall suffer still further by competition for distant or "Through Travel." Roads continue to multiply, and especially in the Southwest, and the tendency is to cut off every angle, and take the most direct route between important points. This travel is already divided between so many competing lines, that it is perhaps scarcely worth the cost of competition. As a general rule, the conviction is gaining strength, that no road should be built as an investment, unless its local business will pay an interest on the cost. The only exceptions will be a few great thoroughfares—the shortest and most direct between certain important points, and presenting such advantages in distance and business attractions, as to shut out all competition.

Connected with this view, it is important to consider whether the local business of the Georgia Railroad will pay fair dividends to the stockholders? With anything like an approach to the former prosperity of the country, no doubt could be raised upon this question. A reference to the business in past years, will clearly show that the local business would pay, and pay well. In truth, the profits of the company for several years past have not been large from distant or "through business." It is generally carried at low rates, and against strong competition, and often costs more than it is worth. It is not likely that the competition for the through travel will be greatly increased. Taking the Northern cities and New Orleans as points, we have had the routes by Grand Junction and by Atlanta to compete with. Taking the same cities and Mobile as points, we have had the routes by Corinth, and also by Knoxville and Atlanta, to compete with. Taking the same cities and Atlanta as points, we have had the Lynchburg and Knoxville routes to compete with. Taking Charleston and Montgomery as points, we had the route by Savannah and Macon; and with Augusta and Montgomery as points, we have had the route by Macon and Columbus as competitors. On all these competing lines the competition is close—time and distance about the same—sometimes rather against us, and it may be well questioned, whether for years past the net profits of the company have been much increased, if at all, by competing for and surrendering its schedules to this "through travel."

But admitting all this, the stockholders have been sometimes discouraged, and the price of the stock affected, by an apprehension of reduced production in the country contiguous to, and tributary to our road. "Old Georgia," it is said, is much worn, and moreover, since emancipation, great numbers of the able-bodied laborers have emigrated to other parts, where labor is better paid, and more profitably employed. This is true to some extent, but do we not sometimes attach too much importance to these acknowledged truths? An annual exodus of the laboring population has been going on for many years, and yet the product and population have continued to increase. No doubt many fine counties have suffered by wasteful and injudicious cultivation, and a certain class of our restless people, were constantly seeking change and fresher lands. On the other hand, the more judicious and observing planters discovered years since, that it was more to their advantage to remain upon the old homestead, and preserve and improve the land, than to lay them waste by skimming, and go to the forest. The consequence was that, for some time before our civil troubles, some of the oldest counties were increasing in the cotton product, as well as in all the elements of material wealth. Though perhaps not so fertile as some parts of the Southwest, Georgia lies within that belt of the temperate zone which Mr. Ellsworth called emphatically "the cotton region." In soil and climate it is especially adapted to the nature of the plant, and the planter in this favored region has this advantage, that with moderate fertility, and proper and judicious culture, he will always make a crop. Comparatively short it may be, according to seasons, but he will rarely fall short of expenses, and may generally rely on a fair interest on his capital. He rarely met with those entire failures which so often brought ruin on the planter of the more fertile region of the Southwest. This was the only secret, which explained the progressive wealth of the planting interest of Georgia, beyond other States, thought to be blest with a more exhuberant fertility.

In years long past, the stockholders were occasionally reminded of the threatened decline in products, by the exhaustion of the soil and loss of population in the region tributary to the road. The best answer to these apprehesions was found in the progressive business of the road, and in the statistics of the country.

The first year after the road reached Atlanta—say in 1846—the entire receipts of the road were $315,342, and the cotton transported, 56,821 bales. The receipts continued to increase, and so did the number of bales of cotton transported, with trifling fluctuations, until in 1860, the last year of peace, when the receipts were $1,159,188, and the bales of cotton carried, 219,774! This was a small increase over the receipts of 1859, when 219,218 bales were carried. And, but for the war, there is no doubt that the quantity would have continued to increase up to the present time. The truth is, there is much life in the old land yet, and if we had peace, and a Government, with constitutional guarantees—giving assurance to the citizen that he would enjoy the fruits of his labor, there are many elements of wealth in Georgia besides cotton, which would be very rapidly developed.

A noted feature in the cotton culture of the present year is believed to be, a reduced area planted, but a careful selection of the best land and a free use of fertilizers. With a fair season, the result will probably be, a good crop in proportion to land planted; and though it may fall much short in quantity, compared with average crops before the war, yet the advanced price will perhaps bring as much money into the country, as an average crop previous to 1860. Such is our hope. Time alone can prove whether our hopes are to be realized.

At present the business is very small, and what we have, grows out of the wants, rather than the exchangeable wealth of the country. The people are too poor to travel, and the fragments of exports left by the ravages of war, and the small crop of last year, have been nearly exhausted; the little remaining is being expended for a scanty supply of provisions, which furnishes at present the principal business of the road.

Accounts of the wheat crop are universally favorable, and reports from the cotton prospect are not discouraging. An ample supply of provisions of home production, and a fair crop of cotton, would do much to change the present state of affairs, and revive the business of the road.

Pressed by the urgent wants of the stockholders, the Board has declared two dividends from the profits—the one of 3½, and the other of 3 per cent. These dividends were perfectly legitimate, as they were fully covered by the profits and reserved fund, notwithstanding the heavy depreciation of the investments of which the reserved fund is mostly composed. But for the consideration named, however, it would have been a sounder and more commendable policy to pay no dividends until the property of the road shall be restored to its former condition, and the floating debt of the company fully paid.

A detailed statement of the assets and liabilities of the company, may be seen in the statement of the Cashier. From this it will be seen, that every demand against the company may be met, even at present ruinous prices, leaving the stock whole, with a handsome surplus.

The company have 46 engines, of which 25 are in good order, 10 in bad order, 5 being repaired, 4 being rebuilt, and 2 out of use; 25 passenger, 8 baggage, 220 box, 115 platform, 16 cab, 8 coal, 13 shanty and 27 stock cars. Miles run by engines during the year, 585,338. Bales of cotton transported, 55,714. Bushels of grain, 265,241. Barrels of flour, 3,623.

The following statement will show the gross earnings, expenses and net profits from April 1, 1859, to March 31, 1867:

	Miles of road.	Gross Earnings.	Total Expenses.	Net Profit.
1859–'60	231	1,159,188	631,144	528,044
1860–'61	231	860,460	704,751	155,709
1861–'62	231	859,598	521,390	338,208
1862–'63	231	1,120,313	469,836	650,476
1863–'64	231	2,275,354	1,916,348	359,006
1864–'65	231	3,342,017	3,056,949	285,068
1865–'66	242	1,155,397	640,478	514,919
1866–'67	242	1,136,141	623,073	513,068

The following is a condensed statement of the condition of the Georgia Railroad and Banking Co., on the 31st of March, 1867:

The road and its outfit		$4,156,000 00
Real estate		186,958 66
Banking House and lot		35,000 00
Road expenses	$973,306 80	
Incidental expenses	9,760 53

President.—JOHN P. KING.

Directors.—Elijah E. Jones, Benj. H. Warren, John Bones, N. L. Hutchins, Edward R. Ware, John Cunningham, Wm. D. Conyers, Samuel Barnett, James W. Davies, Geo. W. Evans, Richard Peters, Stevens Thomas, Jas. S. Hamilton, Antoine Poullain, Geo. T. Jackson, M. P. Stovall.

Gen'l Superntendent.—E. W. COLE.

Treasurer.—J. MILLIGAN.

Honduras Railway.

A loan of £1,000,000 to the Honduras Railway has been introduced in the London Market. This loan looks to the construction of a railway through Honduras, C. A., from Porto Cabello, on the Atlantic, to the Gulf of Fonseca, on the Pacific, the surveys of which were made under the old Squier's grant about eight years ago by a party of English engineers. The proposed route is about two hundred and fifty miles long, and the cost of construction will be about £6,000 per mile.

Commerce of New York.

The foreign imports at New York for the month of October, are officially stated as follows:

	1866.	1867.
Entered for consumpt'n.	$13,812,206	$10,224,405
Do. for warehousing....	8,113,869	7,096,411
Free goods	1,471,951	754,881
Specie and bullion	1,434,158	362,789
Total entered at port...	$24.832,184	$18,438,486
Withdrawn fr. wareh'use	8,789,838	7,728,761

The foreign imports at New York for the ten months from January 1st, were:

	1866.	1867.
Entered for consumpt'n.	$144,665,021	$112,931,660
Do. for warehousing...	101,782,061	98,411,215
Free goods.....	11,180,054	9,197,009
Specie and bullion.....	8,422,999	2,862,004
Total entered at port..	$266,050,135	$223,401,888
Withdrawn fr. wareh'se	89,489,721	95,195,569

The following statement will show the revenue from Customs at New York for the month of October, and for the ten months ending October 31:

	1866.	1867.
1st quarter.	$35,618,902 52	$32,916,085 09
2d quarter.....	31,929,287 26	26,438,603 81
3d quarter.....	36,105,092 08	33,840,898 17
In October.....	11,002,048 08	8,682,889 05
Total from Jan. 1.	$114,655,329 94	101,878,476 12

The exports from New York to foreign ports in the month of October, were:

	1866.	1867.
Domestic produce	$14,593,664	$16,679,540
Foreign free goods.....	32,061	4,446
Do. dutiable.....	186,108	797,235
Specie and bullion	1,463,450	1,182,031
Total exports.....	$16,275,283	$18,663,252
Do. exclusive of specie.	14,811,833	17,481,221

The exports from New York to foreign ports for ten months from January 1, were:

	1866.	1867.
Domestic produce.....	$156,186,890	$144,711,692
Foreign free goods....	598,217	845,446
Do. dutiable	4,146,845	6,999,386
Specie and bullion.....	55,489,740	43,214,139
Total exports	$216,421,692	$195,270,663
Do. exclusive of specie	160,931,952	152,056,524

Indianapolis, Crawsfordville and Danville Railroad.

The County Commissioners have rendered a decision allowing the appropriation to secure a right of way for the Indianapolis, Crawfordsville and Danville Railroad through the county, from the west bank of White River to the western line of the county. The work on this road has begun at Crawfordsville, from which point the contractors are working in this direction, and also at Pekin and Danville, Illinois. It is now intended to let the whole line between this city and Crawfordsville on the 16th inst., and it is confidently predicted that the work will be completed and the cars running by the middle of next summer. Montgomery county donates one hundred and twenty-five thousand dollars towards it, and other points are equally liberal. We understand that no stock has been taken in this county, and as the city subscription of forty-five thousand dollars is not payable until the road is completed and the cars running forty miles west of the city. Having provided for the building of the road, and having secured the right of way everywhere on the line except from White River to the county line, it was eminently wise and proper that the necessary amount to secure this should be appropriated by the County Commissioners. The sum is said to be fifteen thousand dollars, which will add but an iota of weight to the tax duplicate.—*Indianapolis Journal.*

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of October, were:

ENTERED FOR CONSUMPTION.

	1866.	1867.
Manufactures of wool.....	$2,494,378	$818,472

☞ Edward L. Du Barry, Esq., has been appointed Assistant General Superintendent of the Northern Central Railway—the office to be located at Harrisburg. The appointment dates from the 1st inst.

☞ Mr. Jesse Burdett has been appointed General Superintendent of the Hudson River Railroad, in place of Mr. A. F. Smith, resigned.

Atlantic and Great Western Railway.

TO THE BOND AND STOCKHOLDERS OF THE ATLANTIC AND GREAT WESTERN RAILWAY.

Having carefully read the report of the committee to the bond and stockholders of the Atlantic and Great Western Railway, and since the statements made by Mr. Cave at a public meeting held in London, I feel it my duty to reply, as the statements then made are calculated temporarily to injure the property. At first sight the report of the committee is calculated to give the impression that all the works on the line are imperfect, and that vast sums are still required to make the railway first class. A broad assertion that the embankments are all too narrow and the bridges all uncovered, would naturally give this impression. I do not propose to call in any evidence to contradict these statements, and will frankly admit that some of the cuttings and embankments are too narrow and that all the bridges should be covered. I will state, however, a fact, which I can at any time prove by figures, that the whole cost of the earthworks from Salamanca to Dayton bear a proportion of one-fourteenth part of the whole sum expended on the line; and, admitting the fact that a considerable number of cuttings and embankments do require attention, the outlay to accomplish this dwindles down to an insignificant sum; and when I further state the fact that the estimate for the receiver for covering all the bridges amounts to about £3,000, the bond and stockholders will be able to form a tolerably correct opinion of the object of the committee, which seems to me to be a desire to disparage the whole concern, so as to enable them to take credit for making a first class railway in about six months with an outlay of say £1,000 pounds per mile, of which two-thirds should be spent on extra rolling stock to develop extra traffic.

Having made these remarks, I shall proceed to state why I did not construct the embankments and cuttings some two feet wider, and why in several place I put up trestle work in place of solid banks. Almost as soon as I put the first shovel into the ground the civil war was upon me, and with five hundred miles of railway to build before me, I saw the price of labor run up to an alarming extent. I therefore decided to adhere strictly to all my gradients and curves, but to economize on earthworks as much as possible, leaving the trestles to be filled up by steam excavators and the banks to be widened from the cuts where needed, when the track should be completed, and thus vast sums saved. In this way I did succeed in constructing the whole line at the rate of one mile per day of working days. I did also provide the steam excavators; and what is now being done would have been done more than a year ago, but for the panic in England, which, as all know, stopped these works and depreciated the value of the securities of the road to an extent ten times as much as the value of the works in question. When I state that to execute the earthworks in question I had to import ninety per cent. of all the labor, and that a legion of army recruiting agents were hovering round me all the time, offering from five hundred to one thousand dollars per man bounty to join the army, the difficulty of the situation will be apparent to all. Nor must it be supposed that the line when opened was not substantial. I have only to call attention to our time tables of the speed made by our trains almost immediately after the line was opened. There the fact stands for all time that we did run express trains at express speed in successful competition with other long established lines; and it is also a fact that extremely few accidents

occurred, and that up to the present time only one passenger has lost his life on the line.

With reference to Mr. Cave's remarks as to half the amount of the capital being applied to extra lines, I will only state that the actual sums are represented by $151,147, as follows:

Catawissa Railway	$56,557
Morris and Essex Railway	69,025
Sharon Branch	25,564
Total	$151,147

—in addition to which there will be my professional services, amounting to a considerable sum, on the new surveys through Pennsylvania, on account of which I am personally under very heavy advances.

As to the remarks in reference to the management of the traffic and abuses, this not being in my department, I shall only state that the purchasing agent of the line whose integrity was specially questioned, was and is in my opinion, as highly honorable as any man in the United Kingdom; and that though he (Mr. Cave) may be larger, there are or were men on the Atlantic and Great Western Railway who will not forgive him for making statements reflecting on their integrity.

T. W. KENNARD, Engineer-in-Chief.

New York, November 5, 1867.

Taxation of State Railroads.

At the request of the Commissioner of Internal Revenue, the Secretary of the Treasury submitted the following question to the Attorney General for his opinion:

First. Whether railroads owned exclusively by a State, and operated by its agents, fall within the provisions of the internal revenue act of June 30, 1864, which provides that any person, firm, company, or corporation, owning or possessing, or having the care or management of any railroad, canal, steamboat, ship, barge, canal boat, or other vessel, or any stage coach or other vehicle engaged or employed in the business of transporting passengers or property for hire, or in transporting the mails of the United States, or any canal, the water of which is used for mining purposes, shall be subject to and pay a duty of two and one-half per centum upon the gross receipts of such railroad, &c. (section 103), and which further provides that any railroad, canal, turnpike, canal navigation or slackwater company indebted for any money for which bonds or other evidence of indebtedness have been issued, payable in one or more years after the date upon which the interest has been stipulated to be paid, or coupons representing the interest of any company that may have declared any dividend in scrip or money, due or payable to its stockholders, as a part of the earnings, profit, income, or gains of such company, and as profits of such company carried to the account of any fund, or used for construction, shall be subject to and pay a tax of five per cent. on amount of all such interest or coupons, dividends, or profits, whenever the same shall be payable. (Section 122.)

Second. Whether articles manufactured by convict labor in the penitentiary or prisons of a State for the State, come within the nineteenth section of the act of June 30, 1864, which declares that 'there shall be levied, collected, and paid,' certain duties upon the articles, goods, wares, and merchandise thereinafter mentioned, which shall be produced and sold, or be manufactured, made and sold, and be consumed or used by the manufacturer or producer thereof, on removal for consumption or for delivery to others than agents of the manufacturer or producer, within the United States and Territories thereof.

The Attorney General has given it as his opinion that a State is not embraced by the declaratory clause of section 44 of the act of July 13, 1866, which is as follows: "And any words in any and all parts of this act and all acts to which this is additional, indicating or referring to a person or persons, shall be taken to include partnership firms, associations, bodies corporate and politic, or any other party whatsoever, when not otherwise designated or manifestly incompatible with the intent thereof—and that neither railroads owned by a State, or the gross eanings thereof, or the profits accummulated therefrom, or the dividends paid upon its bonds, nor articles manufactured by convict labor in the penitentiary of a State, for the use of the State or on account of the State, are subject to taxation, either under the act of 1864 or any other of the internal revenue acts."

Central Pacific Railroad.

The work of grading the Central Pacific Railroad over the summit of the Sierra Nevada is fast approaching completion, and before the snow or winter envelopes the lofty range most of the line of track will have been prepared for the iron rails. From Cisco, the present terminus of the road, 95 miles from Sacramento, across the summit to Donner Lake Valley, the road is almost entirely graded, and, in fact, it could all be completed this fall and rails put down, but the company propose to let the winter snow and spring thaws try the cutting and filling, which will give the road when laid the advantage of this test. From Donner Lake, on the eastern side of the summit, a large amount of grading has been done, whilst on the Truckee River the track is laid for several miles and a locomotive and construction train now in running order. The great tunnel, 1,700 feet in length, will be finished by the latter part of October, but the track will not be laid through it until spring. During the present season the depot for freight and point of commencing staging will be at Cisco, where a large warehouse has been constructed in which to safely store goods whilst waiting for teams. Last year the cuts for several miles this side of Cisco filled in with drifting snow, which seriously impeded travel, but by a system of sheds over the road in the cuts this disadvantage is confidently expected to be removed. It is estimated that some ten miles of this kind of protection has been built over the various cuts of the line, and the heavy nature of the structures will doubtless be sufficient to protect the track from falling, sliding or drifting snow. Over four thousand laborers are busy at and near the summit finishing the grading, and when the winter sets in and stops work there, they will remove down into the low lands on the eastern side, where there is no severe weather to hinder labor in the open air. It is confidently believed by the fall of next year that the rails will be laid some fifty miles east of the State line, and that the cars will run from Sacramento to the terminus of the road. Wherever this winter shall demonstrate the fall of snow shall be too heavy for removal by the snow plough, the road will be protected by roofing of heavy timber, under which the cars may run unimpeded. A visit along the line of the railroad is necessary to get a correct idea of the great magnitude of the work, and the wild character of the natural obstacles which have been overcome. Once out of the Truckee Valley, the labor of construction is comparatively easy, and to avail of the advantage of comparative level ground, vast quantities of railroad iron are now being teamed over the mountains, so as to lay the track during the winter months, when the summit of the Sierras shall have been fast bound with winter snows.—*Alta California, Oct.* 1.

☞ Large quantities of new iron are being shipped to different points along the Louisville, New Albany and Chicago Railroad, to be laid down. The Southern division of the road is to be laid with new iron as rapidly as the work can be done.

☞ Work has been commenced on the Dutchess and Columbia Counties Railroad.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to 31st Oct., inclusive, during the years 1866 and 1867, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1866	213,700	3,893,900	23,135,900	3,210,600
1867	286,500	5,999,100	14,009,100	2,303,500
Inc.	72,800	2,105,200	*9,125,800	907,100

* Decrease.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease of 493,840 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of Oct., in the years indicated:

Canal opened—	1865. May 1.	1866. May 1.	1867. May 6.
Flour, bbls.	650,700	213,900	286,500
Wheat, bushels.	6,707,800	3,893,000	5,999,100
Corn, bushels	14,897,200	23,135,900	14,009,100
Barley, bushels.	2,864,900	3,210,600	2,302,500
Oats, bushels	8,071,400	7,786,400	5,819,100
Rye, bushels.	642,600	857,500	625,100
Malt, bushels	444,900	868,900	251,200
Beef, bbls.	8,563	100	.....
Pork, bbls.	15,050	18	898
Bacon, lbs.	1,273,100	.....	34,400
Butter, lbs.	386,400	410,600	295,100
Lard, lbs.	1,991,400	70,400	1,059,900
Cheese, lbs.	9,915,000	3,818,800	3,046,200
Wool, lbs.	527,600	441,600	336,200

Western and Atlantic Railroad.

The Atlanta *Opinion* says that the payment by the State of Georgia of the Government claim against this road for rolling stock, etc., "places the road clear of debt, so that its future earnings can go to replenish the Treasury of the State. When we consider this important fact in connection with the additional fact that the road is now in better condition, and has a better supply of rolling stock than almost any other road south of the Potomac, it is no ordinary commendation of its efficient management. When Maj. Wallace was appointed Superintendent of this road, he found it in a very indifferent condition; most of the bridges were temporary and unsafe affairs; the rolling stock, was scant and of an indifferent quality, and the road was greatly in debt to the Government. Now it is in superior condition, well supplied with stock; and is out of debt. No higher commendation could be pronounced in favor of the ability and efficiency of that officer."

Virginia State Bonds.

If there is any cause of trouble with reference to the Virginia bonds just now, it is from the fact that no provision is made for the future beyond the January interest. The Legislature is not likely to meet next month, because the Convention, under the reconstruction acts of Congress will be in session at that time, and the constitution which it will form will have to go the people, and run the doubtful chances of adoption or rejection. Therefore the whole matter of taxes and finances as regards the future in Virginia is unsettled. The good intent and integrity of the people of Virginia cannot be doubted. They only need to be allowed the opportunity to pay their debts, and they will do it.—*Baltimore Sun.*

☞ The New Brunswick and Canada Railway has been seized for a debt of £7,200, and is to be sold at Frederickton, New Brunswick, on the 7th of December next.

Stock Exchange and Money Market.

The changes in the Money Market, since our last, have not been important. The banks, while reporting a loss in their deposit and legal tender averages, have enlarged their loans and circulation moderately. They have also made a handsome addition to their specie hoard. The augmentation of the loan averages has been mainly in the form of temporary, controllable advances on the pledge of the public funds, and other prime or acceptable stock collaterals, the rates on which have been uniform at 6@7 per cent. On Saturday, a few of the more prominent of the Government houses had round sums deposited with them on call at the exceptionally low price of 5 per cent. Both the banks and private lenders continue to give the preference to call loan applications, which have been rather more numerous and perhaps a trifle more urgent. Not much more favor has been shown to mercantile calls for aid. The failure of an old and respectable dry goods firm (that of Messrs. Tracy, Irwin & Co.,) through the embarrassments resulting from the extraordinary dullness of trade, and the severe depression of values, together with the circulation of reports adverse to the solvency of a number of other houses, chiefly in the same line, served to check any tendency on the part of lenders to deal more freely in commercial paper, which has been discounted to only a moderate extent on the basis of 7@10 per cent. per annum, for all really current grades. The influx of currency from the West has been increasing, particularly since Monday, and larger numbers of Western merchants have been in market, for the purposes of purchasing supplies, which they could no longer conveniently dispense with, bringing with them more or less means, to be expended and left here. Against this influx, there has been an outflow of currency to the South, but, thus far, not of a disturbing magnitude. The Sub Treasury business, last week, was on an unusually extensive scale, in both receipts and disbursements, the former having been the heavier by over four million dollars, adding thus much to the available cash balances of the office. There has been a further gain in this particular thus far, this week, on a reduced rate of disbursements. The city banks have increased their liabilities, in the face of slightly diminished resources. Since Aug. 3, they have lost 24 millions of deposits, and 21 millions of legal tenders; while gaining only 6 millions of specie. The specie reserve of the banks is now $12,816,984, against $13,146,[illegible] same time last year. The city bank deposits are now $177,849,809, against $226,825,817 week ending Nov. 3, 1866. The legal tender reserve amounts to $55,540,883, against $71,512,495 same time last year. The circulation now stands at $34,069,908, against $39,968,940 same time last year. The loans are now $247,719,175, against $275,698,288 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $85,898,658 a day, against a daily average of $80,226,050 the preceding week, and $85,027,776 the week ending with Oct. 19. The current week's exchanges average about $89,500,000 a day. The city banks, last week, gained $3,842,449 of specie, but lost $1,855,184 of legal tender, and $359,915 of deposits. They increased their loans, $491,687; and their circulation, $32,827.

National Bank notes to the amount of $80,330 were issued last week, making the total issue to 1,671 banks thus far, $304,367,971, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,084,745, leaving, with the existing 1,630 banks, (having an aggregate capital of $419,500,000,) an actual circulation at this date, of $299,283,230. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,684,250; and for the public deposits, $38,030,450—making a total of $378,714,700 The Treasury Department last week redeemed and destroyed $416,403 of worn and mutilated fractional currency, and issued $755,952 of new.

The Philadelphia Bank movement the past

week shows a decrease in loans, of $347,154; an increase of $6,244 in specie; a decrease in legal tenders of $340,832; an increase of $344,075 in deposits; and an increase of $5,692 in circulation. The Bank Clearings show an increase of $1,418,911, and the balances, an increase of $494,514.

The U. S. Sub-Treasury receipts, week ending with Nov. 9, were $40,771,790, including $1,923,857 from customs duties; payments, $36,595,770, including $2,724,000 of coin interest; balance at the close of the week, $105,430,588, against $101,254,567, at the close of the preceding week, showing an increase of $4,176,020. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $6,955,414 including $300,528 from customs; and payments, $6,836,564; on Tuesday, receipts, $2,037,761 including $326,661 from customs, and payments, $1,328,141. The balance at the close of business on Tuesday stood at $106,259,058, against $102,781,479 a week previous.

The United States Sub-Treasury, Boston, held cash balances of $6,796,670 on Saturday. Customs at Boston, last week, yielded $266,876.

In the line of Government revenues, there has been a slight improvement in the customs, but this has been more than offset by a decrease in the excises. The aggregate falling off, for the week, is equal to nearly two millions in currency. The excises, last week, yielded $4,031,050, against $6,250,000, the preceding week; customs at the port of New York $1,923,857, and at the outports, about $700,000 (in coin) more, making the grand total income for the week equal about $7,640,275 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $77,500,000.

Government received $6,215,000 from customs, through the port of San Francisco, from Jan. 1, to Oct. 13, 1867, against $6,150,000 same time in 1866.

The fluctuations in gold have been comparatively unimportant. The *bulls* have straggled earnestly to inflate the price, but they have met with no compensating success. An elaborate letter from Mr. Stevens, of Pennsylvania, advocating practical repudiation, by urging the liquidation of the funded debt of the country in greenbacks, instead of coin, as had been substantially agreed upon, in the original compacts between the Government, and its fund holders, or rather between the National Treasury and its legitimate creditors, was given to the public in a local paper on Saturday, and was expected to help the inflationists. The letter, however, produced no impression in the street, adverse to the credit of anybody but its author. Nobody seems to attach the slightest importance, in a business point of view, to the extreme "garrulity" of the "old man" of Pennsylvania, on a subject of which his acquaintance is not very profound, obviously. The less assuring political news from Europe tended slightly to strengthen the market, and business was more active toward the close. The range of the price of gold through the week was 138⅜@140⅛, and the latest dealings on Wednesday were at 140. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,870,374, against $9,018,582 same time last year. The customs demand for Gold last week, averaged $320,643 a day; thus far, this week, it has been equal to $350,000 a day, or equal to a weekly aggregate of $2,100,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $22,170, and from California, $333,363. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $106,722,466, against $119,447,333 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $25,302,796, against $37,175,953 same time last year, showing a decrease this year, of $11,873,157. The exports of specie from this port, last week, were $298,112. The total outflow of specie from the port, since Jan. 1, 1867, has been $45,135,444, against $56,623,627 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,724,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $54,540,681, against $44,021,710 for the preceding fiscal year. The specie exports from San Francisco, from Jan. 1, to Oct 1, reached $31,726,940, against $34,689,705 same time last year, showing a decrease, in 1867, of $2,962,765.

An increase of the offerings of foreign exchange has operated against the price, very pointedly. Though rates have been reduced, chiefly on sterling drafts, the demand has been less animated, if anywise changed. Bankers' 60 day bills on London closed at 109½@109¾, and on Paris to 5.15⅝@5.15; sight bills on London to 109¾@110¼; and on Paris to 5.13⅛@5.12½. The offerings of produce bills have been quite extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,663,445, making the total value of exports since Jan. 1, 1867, $161,471,616, against $164,317,268 same time in the preceding year.

Government securities have been in fair demand. There has been an increased call for the six per cents of 1881, and the Ten-Forty five per cents, which have improved in price. A few millions of the Ten-Forties have been bought for export to Europe, mainly to London, where these bonds are now not only regularly dealt in, but are in decided favor. The Five-Twenties of the several issues have been mostly sought after by home purchasers, for investment purposes. There has not been much business of a speculative nature transacted. Some *short* sales of the Ten-Forties were reported. They were generally protected by purchases on a rising market (consequently at a loss to the *shorts*) on Monday and Tuesday. The Seven-Thirties have been less buoyant, having been least sought after. It was announced on Tuesday that President Johnson heartily endorsed the policy of Secretary McCulloch, and peremptorily declines to make any change in his department. This announcement tended to strengthen confidence in the fund values, which close quite firmly and buoyantly. U. S. sixes of 1881 closed here on Wednesday at 112⅞@113; U. S. Five-twenties of 1862, 108⅜@108½; U. S. Five-twenties of 1864 at 105½@105⅝; U. S. Five-twenties of 1865 at 106⅜@106½; U. S. Five-twenties of 1865, consolidated, 107¾@107⅞; U. S. Five-twenties of 1867, 107¾@107⅞; U. S. Ten-forties at 102⅛@102¼, and U. S. Seven-thirties at 105½@105⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864..119¼	September, 1865..116
May, 1865 .....117⅝	October, 1865....115¾
August, 1865....116¾	

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Oct. 30.	Nov. 6.	Nov. 13.
Consols	94⅝	94½	94⅝
U.S. 5-20's of 1862....	69⅓	70¾	70¾
Erie.....	46½	47	47
Ill. Central.....	79¼	82¼	84¼

There has been unusual variableness in the General Stock Market. The railways have been in moderate speculative demand at momentarily fluctuating prices, though no very decisive changes occurred. In the miscellaneous line, there has been greater activity, chiefly in Express Stocks, and in Pacific Mail, which have fluctuated widely, the latter influenced by the manipulations of the rival factions, who are endeavoring to secure permanent control of the property, each faction for itself, of course. An opposition line was announced on Tuesday, and the announcement operated to the serious depression of the price of the stock, whence there was a sharp recovery late on Tuesday, which was however not maintained on Wednesday. The market closed buoyantly for the railways, and the express stocks, on an improved demand.

General business has been less active, since our last. There had been less doing in breadstuffs and provisions, until near the close, when a more active demand set in for flour, wheat, oats, pork, and bacon which closed buoyantly. Cotton has been less freely dealt in, partly on account of the three days silence of the cable, and partly because of the unfavorable advices which came to hand, on the resumption of telegraphic communication, between Livepool and New York, on Monday. The closing transactions indicated a heavy and yielding market. Middling cotton closed heavily on Wednesday at 18¼@19½ cents, as the extremes per lb. The stock of cotton now here is estimated at about 26,500 bales. The receipts at the port this week, have averaged about 2,850 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; last year; estimated stock at close of the year, 80,296 exports, 1,554,664 bales, against 1,557,054 bales bales, against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 202,000 bales, against 228,000 bales same time last year; exports, same time, 65,400 bales, against 87,300 bales same time last year; stock on hand at latest dates, 135,800 bales, against 268,400 bales same date last year. Beeves have been more freely offered and have been in less demand, since our last, at 8@16c., as extremes. Calves have been salable and firm at from 10@13c. Sheep and lambs have been in large supply and

moderate request at the reduced figures of 3¾@6c., and 5@7c., respectively. Swine have been fairly active at from 6@6¾c. per lb., live weight. The week's receipts have been 6,970 beeves, 1,255 calves, 35,891 sheep and lambs, and 39,771 swine.

In Foreign merchandise some increase of activity can be noted in dry goods and groceries; but as rule, the market for imported articles has been ame and weak. The total imports of foreign dry goods, last week, were $1,381,967, and the total amount marketed $1,090,136. The value of foreign merchandise imported last week, was $3,270,755—making the grand total specie value of last week's imports of dry goods and merchandise, $5,102,722, and since Jan. 1, 1867, $214,826,880, against $254,614,660 same time in the preceding fiscal year. The ocean freight market has been moderately active, since our last, with 498 vessels of all classes in port. For Liverpool we quote flour at 2s. 6d. @2s. 9d. per bbl.; grain at 8½c.@9d. per bushel; cotton at ¼@$\frac{5}{16}$d. per lb.; and heavy goods at 30s.@40s. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Nov. 12, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$2,954,821	$4,663,445
Prev. reported	161,362,447	156,808,171
Since January 1	$164,317,268	$161,471,616

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,851,683	$1,381,967
Gen. merchandise	3,394,741	3,720,755
Total for the week	$5,246,424	$5,102,722
Previously reported	249,368,236	209,724,158
Since January 1	$254,614,660	$214,826,880

The balance in the Sub-Treasury on Wednesday was $107,641,022 28.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Another Mexican Railway Grant.

The Mexican Government has chartered a company, headed by Senores Abdon Morales Montenegro and Manuel B. da Cunha Reis, who are to construct a railway from the north side of the city of Mexico, *via* Tlalnepantla, Cuantitlan, Zumpango, Tizayuca, Tulancingo, Huanchinango and Hico, to the river Tuxpan. From this point on the Rio Tuxpan steamboats are to connect the road with the ports of Tuxpan and Tampico. A branch road is to be built also to Pachuca. A telegraph line is also to be constructed along the road. The whole work is to be finished in five years. The concession of public lands, &c., is for sixty years. The main features of the grant are like those of the Tehuantepec road. It is dated October 16, 1867.

☞ Hon. Emilie La Sere, through whose instrumentality authority has been obtained from President Juarez for the opening of interoceanic communication on the Isthmus of Tehuantepec, arrived in New Orleans from Vera Cruz on the 28th ult. The enterprise excites unusual interest in that part of the country.

☞ The following gentlemen have been elected directors of the Atlantic Mail Steamship Co. for the ensuing year: Geo. B. Hartson, Spencer K. Green, Chas. A. Meigs, O. W. Joslyn, Fred. Butterfield, William H. Seward, Jr, and A. W. Dimock.

Railroad Earnings.—Weekly.

The earnings of the Chicago and Alton Railroad for the first week in November, 1867, were $89,753 00
Corresponding period previous year... 77,325 00

Increase..... $12,428 00

The earnings of the Michigan Central Railroad for the 1st week in Nov., 1867, were.. $96,842 69
Corresponding week of previous year.. 97,142 28

Decrease..... $299 59

The receipts of the Des Moines Valley Railroad for the fourth week in October, 1867, were $23,557 89; same time in 1866, $21,396 65; increase, $2,161 24, and for the quarter ending Oct. 31, 1867, $221,806 95; same time in 1866, $189,203 29; increase, $32,603 66.

The earnings of the Virginia and Tennessee Railroad for the first week of Nov., were $19,487, an increase of $655 on the same week last year. Total for the fiscal year commencing 1st of July, $332,687, an increase of $57,832 on same time in 1866.

☞ A suit against the Southern Express Co., has just been decided at Blountsville, Tenn., in which the plaintiffs claimed damages for goods destroyed by the Federal troops on an express car in Virginia. The Express Company plead that their bills provided against damages for loss by fire or the common enemy. Judge Butler decided that the Federal troops were not a common enemy, and rendered a verdict for sixteen thousand dollars against the company.

☞ The survey of the branch route of the Wilmington and Birdsboro' Railroad has just been completed. It will form a junction with the Westchester Railroad a short distance below their depot at Westchester.

Journal of Railroad Law.

THE RIGHT OF RAILROAD COMPANIES TO KEEP SEPARATE WHITE AND BLACK PASSENGERS—DECISION BY THE PENNSYLVANIA SUPREME COURT.

A decision was rendered in the Supreme Court at Pittsburgh, Penn., on the 4th inst., in a case involving the right of railroad companies or carriers to keep separate black and white passengers. The case in which the question originated was that of a colored woman being compelled to occupy a different seat in a railroad car of the defendants than the one she had selected. She soon after brought suit for damages, and obtained a verdict in the lower court, but the defendants appealed and the case was fully argued before the Supreme Court, which has just announced its decision, reversing the judgment of the court below, and ordering a new trial. The opinion of the Court was delivered by Judge Agnew, which was sustained by Chief Justice Woodward, and Judges Thompson and Strong. Justice Reed alone dissenting. Below we give the opinion of the Court in full:

Philadelphia and West Chester Railroad Co., vs. Mary E. Miles. Eastern District. Error to Common Pleas of Philadelphia Co.

AGNEW J. It is admitted that no one can be excluded from carriage by a public carrier on account of color, religious belief, political relations, or prejudice. But the defendants asked the Court to say if the jury believed that the seat which the plaintiff was directed to take, was in all respects a comfortable, safe and convenient seat, not inferior in any of these respects to the one she was directed to leave, she could not recover. The case, therefore, involves no assertion of the inferiority of the negro to the white passenger; but conceding his right to be carried precisely on the same footing with a white man, it appears to be not unreasonable to assign places in the cars to passengers of each color. The simple question is, whether a public carrier may, in the exercise of his private right of property, and in due performance of his public duty, separate passengers by any other well defined characteristic than that of sex. The ladies' car is known upon every well regulated railroad, implies no equal cost of right on the part of the excluded sex, and its propriety is doubted by none.

This question must be decided upon reasonable grounds. If there be no clear and reasonable difference to base it upon, separation cannot be justified by mere prejudice. Nor is merit a test. The negro may be proud of his service in the field as a defender of his country. But it was not thought indefensible to separate even white soldiers from other passengers. There is a clear and well founded difference between the civil and military character, and the separation of soldiers from citizens implied no want of inequality, but a sound regulation of the right of transit.

The right of the carrier to separate his passengers is founded upon two grounds—his right of private property in the means of conveyance and the public interest. The private means he uses belong wholly to himself, and implies the right of control for the protection of his own interest, as well as the performance of his public duty. He may use his property, therefore, in a reasonable manner. It is not an unreasonable regulation to seat passengers so as to preserve order and decorum, and to prevent contacts and collisions, arising from natural or well known customary repugnances, which are likely to breed disturbances by a promiscuous sitting. This is a proper use of the right of private property, because it tends to protect the interests of the carrier, as well as the interests of those he carries. If the ground of regulation be reasonable, courts of justice cannot interfere with his right of property. The right of the passenger is only that of being carried safely, and with a due regard to his personal comfort and convenience, which are promoted by a sound and well regulated separation of passengers. An a[nal]ogy and an illustration are found in the case of an inn-keeper, who, if he have room, is bound to entertain proper guests; and so a carrier is bound to receive passengers. But a guest in an inn can not select his room or his bed at pleasure; nor can a voyager take possession of a cabin or berth at will, or refuse to obey the reasonable orders of the captain of the vessel. But, on the other hand, who would maintain that it is a reasonable regulation, either of an inn or a vessel, to compel the passengers, black or white, to room or bed together? If a right of private property confers no right of control, who should decide a contest between passengers for seats or berths? Courts of justice might interfere to compel those who perform a business concerning the public, by the use of private means, to fulfill their duty to the public; but not a whit beyond.

The public also has an interest in the proper regulation of public conveyances, for the preservation of the public peace. A railroad company has the right and is bound to make reasonable regulations to preserve order in their cars. It is the duty of the conductor to repress tumults as far as he reasonably can, and he may on extraordinary occasions, stop his train and eject the unruly and tumultuous. But he has not the authority of a peace officer to arrest and detain offenders. He cannot interfere in the quarrels of others at will merely. In order to preserve and enforce his authority as the servant of the company, it must have a power to establish proper regulations for the carriage of passengers. It is much easier to prevent difficulties among passengers by regulations for their proper separation than it is to quell them. The danger to the peace engendered by the feeling of aversion between individuals of the different races, cannot be denied. It is the fact with which the company must deal. If a negro takes his seat beside a white man, his wife, or daughter, the law cannot repress the anger or conquer the aversion which some will feel. However unwise it may be to engender the feeling, human infirmity is not always proof against it. It is much wiser to avert the consequence of this repulsion of race by separation than to punish afterward the breach of the peace it may have caused. These views are sustained by high authority. Judge Story, in his Law Bailments, stating the duty of passengers "to submit to such reasonable regulations as the proprietor may adopt for the convenience and comfort of passengers as well as for their own proper interests," says, "the importance of the doctrine is felt more strikingly in cases of steamboats and railroad cars." S. 691 *a* see also, S. 476 *a*. Angel on Claims, S. 528; 1 American Railway Cases, 393, 394.

The right to separate being clear in proper cases, and it being the subject of sound regulation, the question remaining to be considered is whether there is such a difference between the white and black races within this State, resulting from nature, law and custom, as makes it a reasonable ground of separation. The question is one of difference, not of superiority or inferiority. Why the Creator made one black and the other white, we know not; but the fact is apparent, and the races distinct, each producing its own kind, following the peculiar law of its constitution. Conceding equality, with natures as perfect and rights as sacred, yet God has made them dissimilar, with those natural instincts and feelings which He always imparts to His creatures when He intends that they shall not overstep the natural boundaries He has assigned to them. The natural law which forbids their intermarriage, and the of social amalgamation which leads to a corruption of races, is as clearly Divine as that which imparted to them different natures. The tendency of intimate social intercourse is to amalgamation contrary to the law of races. The separation of the white and black races upon the surface of the globe is a fact equally apparent. Why this is so, it is not necessary to speculate, but, the fact of a distribution of men by race and color is as visible in the providental arrangement of the earth

...nat of heat and cold. The natural separation ...eraces is therefore an undeniable fact, and ...organizations which lead to their amalgama... ...ate repugnant to the law of nature. From ...amalgamation it is but a step to illicit in... ...course, and but another to intermarriage. But ...assert separateness is not to declare inferiority ...ither—it is not to declare one a slave and the ...er a freeman; that would be to draw the il... ...gical sequence of inferiority from difference ...ty. It is simply to say that following the or... ...of Divine Providence, human authority ought ...to compel these widely separated races to in... ...mix. The right of such to be free from social ...tact is as clear as to be free from intermar... ...ge. The former may be less repulsive as a ...tion, but not less entitled to protection as a ...t. When, therefore, we declare a right to ...intain separate relations, as far as reasonably ...acticable, but in a spirit of kindness and charity, ...t with due regard to equality of rights, it is ...prejudice, nor caste, nor injustice of any kind, ...simply to suffer men to follow the law of ...es, established by the Creator himself, and not ...compel them to intermix contrary to their in... ...ess.

...or can we disregard the laws and customs of ...State. Indeed, these must be our guide, ...ing it to the Legislature to correct the errors ...the law, or its departure from that justice ...ich should ever be its foundation. It is u...essary to recur to the original condition of ...oes as slaves in Pennsylvania, or to trace the ...slation of the provinces distinguishing them ...freemen. Nor need we, for the purpose of ...ing the *status* of the negro, refer to that great ...of emancipation in 1780, whose preamble, the ...t beautiful and expressive ever prefixed to a ...an statute, only professed to extend to the ...k race a "portion" of our own freedom. ...have a later and an authoritative guide, the ...an decision of this Court, in 1837, in the case ...Hobbs *vs.* Fogg, 6 Watts, 553. The opinion ...e from the pen of the late C. J. Gibson, and ...s the imprint of his remarkable intellect. It ...here shown from the laws, constitutions and ...ons of the State, and from a former decision ...e High Court of Errors and Appeals, that the ...of the negro never fell within the term ...ten" in the several constitutions; and that ...mancipation act of 1780 did not elevate him ...citizenship of the State. And in 1838 the ...e of this Commonwealth, by an express ...dment of their Constitution, drew the line ...tly between the white citizens and black ...bitants of the State.

...is clear, therefore, that under the Constitu... ...and laws, the white and black races stand in ...parate relation to each other. We find the ...difference in the institutions and customs of ...State. Never has there been an intermixture ...e two races, socially, religiously, civilly or ...tically. By uninterrupted usage the blacks ...Court, visit and entertain among themselves, ...separate places of public worship and ...ment, and fill no civil or political stations, ...en sitting to decide their own causes. In ...here is not an institution of the State in ...they have mingled indiscriminately with ...ites. Even the Common School Law pro... ...r separate schools when their numbers are ...ge. In the military service, also, they were ...ermixed with white soldiers, but were ...ed into companies and regiments of color, ...not by way of disparagement, but from ...of wisdom and prudence, to avoid the ...isms of variant and unmixable races. ...d custom having sanctioned a separation ..., it is not the province of the judiciary to ...e it away. We cannot say there was no ...ce in fact, when the law and the voice of ...ple had said there was. The laws of the ...e found in its constitution, statutes, insti... ...and general customs. It is to these ...Judges must resort to discover them. If ...ndon these guides, they pronounce their ...ions, not the laws of those whose officers ... Following these guides, we are com... ...pelled to declare that at the time of the alleged injury, there was that natural, legal and customary difference between the white and black races in this State which made their separation as passengers in a public conveyance the subject of sound regulation, to secure order, promote comfort, preserve the peace and maintain the rights both of carriers and passengers. The defendants were therefore entitled to an affirmative answer to the point recited at the beginning of this opinion. It only remains to add that this cause arose before the passage of the act of 22d March, 1867, declaring it an offence for railroad companies to make any distinction between passengers on account of race or color, and our decision pronounces the law only as it stood when the case arose, leaving the act to operate upon such cases as shall fall within its provisions. Indeed, the act itself is an indication of the legislative understanding of how the law stood before.

Iron Railroad.

This road is about 13 miles in length connecting at Ironton on the Ohio river, and extending *via* La Grange, Vesuvius, Pine Grove, Etna, Lawrence Furnace and Bartles' to Centre, in Lawrence Co., Ohio. It is now proposed to extend this road to a connection with the Portsmouth Branch of the Marietta and Cincinnati Railroad, some 10 or 12 miles further. For the purpose of raising the necessary means to accomplish this object, a meeting of the stockholders and citizens of Ironton was held on the 28th ult., at which a proposition from the directors of the company was submitted by the President, accompanied by a statement that "the lowest possible value that could be placed on the property now owned by the Iron Railroad Co. is equal to the sum $138,650 (incumbered by $35,000 in bonds), and that it is just the kind of property which a new company would require if an entire new railroad was projected. This property the directors now offer to new stockholders, for the reduced sum $134,778, being the net amount of stock held by the present stockholders, which stock, the Directors, if they desire it, have no power or authority to reduce, or destroy; but which they now tender to citizens wishing to extend their road, and place the city of Ironton and Lawrence county in connection with the traveling world; thereby securing to them those advantages, in railroad communications, the want of which has so much retarded the growth and prosperity of the city, on terms as liberal, in their opinion, as the law will permit."

The plan proposed by the directors, as subsequently modified by them, at the suggestion of the Citizens' Committee, reads as follows:

1st. That the sum of $150,000, and as much more as may be obtained, of responsible subscription to new stock, be subscribed, which, with the proceeds of $200,000 in bonds to be issued, shall be applied to the construction of said road, and the liquidation of the present mortgage debt.

2d. That said subscription shall be paid in on calls of 10 per cent. every two months. The first installments of the 10 per cent. being payable as soon as $150,000 is subscribed.

3d. That the work shall be so prosecuted as to insure a completion of the entire road to such connection, as soon as practicable.

4th. The stock subscriptions to be binding when $150,000 is subscribed.

5th. The present stock of the Iron Rail road company, amounting to the sum of $134,778, subject to a deduction of $1,558 84 unpaid of original subscriptions, leaving $133,189 17 of actual paid up stock, now in said company, to be share and share alike with the new stock.

The above plan was adopted, and the sum of $52,000 subscribed, with the understanding that the subscriptions were to be binding only when the whole amount of $150,000 was obtained.

Swaged Wrought Iron Chairs.

We ask the special attention of railroad men to the New Swaged Rail Chair just introduced into market by the VAN ANDEN RAIL CHAIR COMPANY, of Poughkeepsie, N. Y., whose advertisement appears in our columns.

Mr. Van Anden, the inventor, is well known in this business as the patentee of a wrought chair which for many years past has deservedly maintained its claims of superiority.

His new chair is the result of many years of practical experience and observation, and combines the merits of strength and durability of the wrought iron chairs now in use with the improved form of the rolled chair.

Illinois Central Railroad.

The statement of this Company for the month ending October 31, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	22,339.14 for	$206,547 65
Acres Int. Fund Lands sold	1,085.36 for	14,364 07
Acres Free Lands sold	6,698.67 for	83,365 08
Total sales during month of October, 1867	30,123.17 for	$304,276 80
To which add Town Lot Sales		1,030 00
Total of all	30,123.17 for	$305,306 80
Cash collected in October		$474,457 85

TRAFFIC DEPARTMENT.

Receipts from Freight		$480,241 00
do. Passengers		160,900 21
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		110,000 00
Total Receipts in October, 1867		$761,499 54
Total Receipts in October, 1866		$639,194 67

Running Horse Cars on Sunday.

The Supreme Court of Pennsylvania, sitting at Pittsburg, has dissolved the injunction, granted some months since, by Justice Strong, at *nisi prius* in the case of Sparrowhawk et al. *vs.* the Union Passenger Railway Co. of Philadelphia, restraining the passenger railway companies of that city from running their cars on Sunday. The justices who concurred in dissolving the injunction are Woodward, Thompson and Read; the dissenting justices being Strong and Agnew. The opinion of the Court is that the remedy of those who oppose the running of the cars is by action at law, and not in equity, as in the present suit. Justice Read, in a lengthy opinion, takes the broad ground that the running of cars on Sunday is "a work of necessity and charity."

Chile and Buenos Ayres Railroad.

A company has been formed in Buenos Ayres for the purpose of constructing a railway from that city to the Chilean frontier. The proposed road is under the direction of a German Engineer named Otto von Armen. The route will be from Chivilcoy, Buenos Ayres, in a straight line to the Planchon Pass, in the Andes, connecting the present Western Railroad of Buenos Ayres with the Southern Chilean Railroad.

☞ A horse railroad is soon to be opened between Newark and Clinton.

Owensboro' and Russellville Railroad.

We learn from the Owensboro', Ky., *Monitor* that the preliminary surveys of the proposed routes of this road between that city and Cahoon, have been completed. Owensboro' is in Daviess County, on the Ohio River, and Russellville, in Logan County, is a point on the Memphis Branch of the Louisville and Nashville Railroad, about 25 miles south of the junction with the main stem. The whole length of the road will be between 60 and 70 miles. The surveys were conducted by Mr. H. W. Scott.

☞ In the matter of the application of John McDonald *vs.* the Commissioners of Emigration, on the motion for mandamus to compel them to admit the relator to the Emigrant depot at Castle Garden, as the Agent of the Pennsylvania Railroad Co., Judge Barnard has decided that—"The Pennsylvania Railroad Company, being a foreign company, has no standing in court, as the act expressly prevents such corporations from having an agent in Castle Garden. The motion, as far as they are concerned, is denied with costs."

☞ The officers of the Boston and Albany Railroad elected at the meeting of the new board of directors on the 30th ult., are as follows: President, Chester W. Chapin, of Springfield; Treasurer, Charles E. Stevens, of Boston; Clerk, James A. Rumrill, of Springfield.

500 MILES

OF THE

Union Pacific Railroad

Running West from Omaha

Across the Continent,

ARE NOW COMPLETED.

The Union Pacific Railroad Company have built a longer line of railroad in the last eighteen months than was ever built by any other company in the same time, and they will continue the work with the same energy until completed. The Western Division is being pushed rapidly eastward from Sacramento by the Central Pacific Company of California, and it is expected that

THE ENTIRE GRAND LINE

will be open for business in 1870. MORE THAN ONE-THIRD OF THE WORK HAS ALREADY BEEN DONE, MORE THAN ONE-THIRD OF THE LINE IS NOW IN RUNNING ORDER, AND LABORERS ARE NOW EMPLOYED IN GREATER NUMBERS THAN EVER BEFORE. More than

Forty Million Dollars in Money

has already been expended by the two powerful companies which have undertaken the enterprise, and there is no reason for its most vigorous prosecution.

The Union Pacific Company therefore offer their First Mortgage Bonds to the public with the assurance that they are based upon the largest and most valuable corporate property in the world. The first question asked by an investor is, "Are the bonds safe?"—the second, "Are they profitable?" To answer, in brief:

1. The early completion of the whole line is as certain as any future business event can be.

2. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3. The net earnings of the sections already finished are *several times greater* than the gold interest upon the First Mortgage Bonds upon such sections, and if not another mile of the road were built, the part already completed would not only pay interest and expenses, but be profitable to the Company.

4. The Union Pacific Railroad Bonds can be issued only as the road progresses, and therefore can never be in the market unless they represent a *bona fide* property.

5. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a *second* lien as its security. This amount put upon the first 517 miles west from Omaha is only $16,000 per mile.

6. The fact that the U. S. Government considers a second lien upon the road a good investment, and that some of the shrewdest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

7. Although it is not claimed that there can be any better securities than Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who sell their Governments to re-invest in these bonds—thus securing a greater interest.

8. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accrued interest, they are the cheapest security in the market, being more than 15 per cent. less than U. S. stocks.

9. At the current rate of premium on gold, they pay

OVER NINE PER CENT. INTEREST.

FIRST MORTGAGE BONDS whose principal is so amply provided for, and whose interest is so thoroughly secured, must be classed among the *safest* investments. They pay

SIX PER CENT. IN GOLD,

and are offered for the present at NINETY CENTS ON THE DOLLAR, and accrued interest at Six Per Cent. in Currency from July 1.

Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.

STEINWAY & SONS

TRIUMPHANT,

Having been Awarded

The FIRST GRAND GOLD MEDAL

for American Grand, Square, and Upright Pianos: this Medal being distinctly classified *first* in order of Merit, *over* all other American exhibitors, and *over* more than 400 Pianos entered by nearly all the celebrated manufacturers of Europe.

In proof of which the following

OFFICIAL CERTIFICATE

of the President and Members of the International Jury on Musical Instruments (Class X) is subjoined:

PARIS, July 20, 1867.

I certify that the FIRST GOLD MEDAL for American Pianos has been unanimously awarded to Messrs. Steinway by the Jury of the International Exposition. First on the list in Class X.

MELINET, President of International Jury.

GEORGES KASTNER,
AMBROISE THOMAS,
ED. HANSLICK,
F. A. GEVAERT,
J. SCHIEDMAYER,
} Members of the International Jury.

This *unanimous* decision of the International Class Jury, *endorsed* by the Supreme Group Jury, and *affirmed* by the Imperial Commission, being *the final verdict* of the *only tribunal* determining the rank of the awards at the Exposition, places THE STEINWAY PIANOS AT THE HEAD OF ALL OTHERS.

The "Societe des Beaux Arts,"

(Society of Fine Arts, of Paris, known throughout Europe as one of the highest authorities on Music and Art Matters) *unanimously* awarded their *only* annual Testimonial Medal for 1867 to STEINWAY & SONS for the highest degree of perfection, most valuable inventions, and as exhibiting the greatest progress in the art of Piano-making, above all other exhibitors, at the Universal Exposition in Paris.

STEINWAY & SONS

Were also awarded a FIRST PRIZE MEDAL at the great International Exhibition, London, 1862, for powerful, clear, brilliant, and sympathetic tone, with excellence of workmanship as shown in Grand and Square PIANOS, in competition with 209 Pianos from all parts of the world.

STEINWAY & SONS, in addition to the above, have taken thirty-five First Premiums, Gold and Silver Medals, at the principal Fairs held in this country from the year 1855 to 1862 inclusive, since which time they have not entered their Pianofortes at any Local Fair in the United States.

EVERY PIANO is WARRANTED for FIVE YEARS.

Warerooms, First Floor of Steinway Hall,
Nos. 109 and 111 East Fourteenth Street,
(Between 4th Ave. and Irving Place,) NEW YORK

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

L. MORTON MONTGOMERY, Agent and Importer,
Office 27, Nos. 40 & 42 BROADWAY, N. Y.

NEW YORK.

W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

Is a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

THE ELNATHAN SAMPSON

NEW AND IMPROVED

RAILROAD CAR WHEEL.

PATENTED, MAY 7, 1867.

This Car Wheel contains a lateral and conical Tread combined with the guiding flang, and being so constructed as to move the truck and cars over and past any curve in the Railway track with as much ease and freedom as though the entire Road were constructed upon an air line. The cone tread will take the track rail, against which the wheel seems to be pressed, while passing any curve, and the diameter increasing, of course the circumference increases, and therefore the greater distance over the outer rail will be gained without any sliding of the wheels upon the track or undue strain upon the car axle, journal boxes or bearings, truck frame, car wheels, or other parts of the running gear of the cars or of locomotive engine. The hitherto great amount of friction caused by the use of the usual or old car wheels upon long trains of passenger, or heavy freight trains is avoided or prevented, of course there will therefore be a great saving in the use of oil. There is much less wear of the track rail, and the lateral thrusts of cars against the track rails being done away with by the new wheel, there is much less liability to displacement of the rails, or of the loosening of the spike by which the rails are fastened.

This wheel will cost no more to manufacture than the old wheel, while it is certain that a much better and more reliable chill of the tread portion of the wheel is had than by the old way of casting wheels. This wheel can be put upon the old axles and trucks of Railroad Cars—there being nothing required to be new save the wheel.

Rights to Manufacture this Car Wheel can be had upon the most liberal terms of the owners of the Patent, ELNATHAN SAMPSON, EDWIN CHAMBERLIN and MARCUS P. NORTON, of the City of Troy, N. Y.

Several Licenses have already been granted for the manufacture of this Car Wheel.

The owners of this Patent have appointed, as a matter of convenience, EDWIN CHAMBERLIN, Troy, N. Y., Corresponding Secretary, to whom all communications for information should be addressed, which will receive prompt attention.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other Wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

Virginia and Tennessee Railroad.

General Wm. Mahone has been elected to the Presidency of the Virginia and Tennessee Railroad Company. The whole number of votes cast was 7,107, of which 2,665 were by the State, and 4,442 by private stockholders. Of these Gen'l Mahone received 5,298 votes, viz: 2,665 by the State, and 2,633 by the private stockholders. The conditions upon which the election was proceeded with, is embodied in an order from Gen'l Scofield authorizing of the same to be held, viz:

1st. That none of the officers so elected shall be installed in or exercise the functions of their offices, until the prohibition, by the United States Government, of any change in the management of said road, shall be removed. 2d. That if the claims of the United States shall not be adjusted, and the prohibition above referred to removed, on or before the 1st day of December, 1867, the above election shall be null and void.

The committee appointed to visit Washington to ask that the order prohibiting them from electing a President be recinded, say they are satisfied that the original action of the Secretary of War was had upon *ex parte* representations made to him, and would never have been taken if the facts of the whole matter had been as fully understood by him then as they are at this time. They therefore recommended that the election be held in accordance with the terms of Gen. Schofield's order, feeling confident that the officers of the company will have no difficulty in making an early and satisfactory adjustment of said claim, and removing said order.

Gen'l Mahone, in accepting the position, expressed the hope that as the struggle was now ended, the passions and excitements to which it had given origin would be permitted to subside, and all move forward shoulder to shoulder in the great work of regenerating the State of Virginia.

Railways in New Brunswick and Nova Scotia.

The St. John (N. B.) correspondent of the Montreal *Herald*, writing under date of November 9, says that considerable progress is being made in the development of the Railway system of which the St. John and Shediac line forms the first link. From Moncton to the Nova Scotia boundary the grading and bridging is making rapid progress. Under almost any circumstances this portion of the line must form a section of the Intercolonial, and every care is being taken by the contractors to render it fit for that purpose. Westward of St. John the so-called Western Extension line, to join the American Railroad system at Bangor, is being pushed forward with great vigor, and this will without doubt be the first route by which direct railway communication between the Maritime Provinces and Quebec and Ontario will be made. This system of Railroads will connect the cities and towns of Halifax, Truro, Windsor, St. John, Fredericton, Woodstock, St. Andrews, and St. Stephen with each other and with Bangor, in the State of Maine, and by means of the Grand Trunk with Montreal, Quebec, and the cities of the West. While this line does not in the least obviate the necessity for the Intercolonial, yet it is evident that so long as we are permitted to run our traffic through the United States in the same manner as the Grand Trunk now does, it will prove a formidable rival to the Intercolonial proper, and this constitutes a powerful argument for taking the Intercolonial by the Central Route—where the settlement of the country will be certain to develope a large and increasing local traffic. The first sod of the Fredericton Branch of Western extension was turned on Wednesday with much *eclat*. The Lieutenant-Governor, the Mayors of St. John and Fredericton, with other celebrities assisting. The whole of the line is under contract, and will be pushed forward without delay.

Mississippi, Ouachita and Red River R. R.

At a meeting of the stockholders of this road on the 21st inst., it was voted that the road, with all the rights, titles, privileges and franchises of the company, should be sold, and that a board of three commissioners should be appointed for that purpose, with instructions not to sell for a less sum than the entire indebtedness of the company. They were also instructed not to sell the road to any person or company unless they were satisfied that it was the *bona fide* intention of said purchaser or purchasers, and that they had the ability, to build said road in a reasonable time from date of sale.

At a subsequent meeting of the directors, the above action of the stockholders was approved, with the distinct understanding that said board of commissioners should not sell and dispose of said road about without first requiring the purchaser or purchasers to enter into a bond with approved security in the sum of one hundred thousand dollars, conditional that they should build and complete, or cause to be built and completed, said road, from the Mississippi river to Camden within seven years, and to the Red river within ten years from the date of sale.

The commissioners appointed by the President are: T. P. Dockery, B. W. Martin and T. J. Eliott.

Steel Rails.

Twelve hundred tons of steel rails have been laid, in place of iron ones, on the Boston and Providence Railroad. At Roxbury, near the repair shop, they have been in use upwards of a year, at a point where one hundred and twenty trains or locomotives pass over them daily, and as yet there is no perceptible wearing away. Iron rails had to be relaid seventeen times a year at the same place. As fast as the iron rails wear out, on any portion of the route, the company intend to replace them with steel ones.

Wilmington, Charlotte & Rutherford R.R.

The Eastern Division of this road is 109 miles in length, extending from Wilmington, N. C., to Sand Hills. The earnings of the road for the fiscal year ending August 31, 1867, have been as follows:

From freight	$158,792 26
" passengers	23,951 36
" mail	11,445 83
	$194,189 45

And the expenses were:

Transportat'n department	$30,514 38	
Mechanical department	40,722 38	
Road department	68,851 78	
General expenses	27,129 03	
		179,992 44
Leaving a balance of		$14,197 01

Included in the above expense are $75,162 34 classed as "permanent;" excluding these, the net earnings will be $89,359 35.

The Western Division, extending from Charlotte to Sharon, is 25 miles in length, the earnings upon which were $30,168 44, and the operating expenses, $16,924 02—leaving a balance of $13,244 42.

The total receipts of the Western Division, including $29,862 91 from the Eastern Division, were $60,031 82; and the expenditures, including the operating expenses of the past year, together with payment of debts that accrued before, during and subsequent to the war, were $55,745 21—leaving a balance August 31, 1867, of $4,286 11.

The engineer of the Western Division in his report says that the graduation is completed, except at two unimportant intervals, to the town of Shelby, 10½ miles, and the sills laid to Buffalo Creek, a distance of 7 miles. If the rails are obtained to complete the road to either point, this division will at once become remunerating.

Referring to the above statements, it will be seen that the earnings of the whole road for the past year have been $224,357 89; the operating expenses, $121,754 04—and the clear profits $102,603 87. This shows an excess of receipts above those of the previous year of $29,573 76; with a decrease in operating expenses of $13,925 90—making the increase of clear profits $43,499 66. The operating expenses have been only 54 per cent.

The increase in tonnage carried over the road has been 234 per cent.; in freighting business, 72 per cent.; in receipts from transportation, 16 per cent.; and in clear profits to the company, 74 per cent.

The large increase of tonnage is accounted for by the difference in the character of the freights offered for transportation during the past year. The comparatively small increase of receipts from transportation was caused by a reduction of more than one-third in the rates; and the large increase of profits by the diminution of the operating expenses of the road.

The whole result, which is decidedly gratifying, is due to the gradual development of the country through which the road passes. The President, in his report, says:

In our last annual report, we gave full statements showing the condition of the company, and the amount of money required to complete the road and pay off all of its liabilities. We do not think it necessary to repeat these statements in full, but respectfully refer to them. The earnings of the road have been applied to the improvement of rolling stock and machinery, and to graduation. Our debt is a little larger than it was last year; but we have expended some $60,000 in graduation, which reduces, to that extent, the cost of completing the road. There will be no material change, therefore, in the figures which we then submitted to you. It will require $2,300,000 to construct the road, equip it, and pay its entire floating debt.

To enable us to raise this amount of money, in accordance with your instructions, application was made to the General Assembly of North Carolina for power to issue bonds to be secured by a mortgage of the entire property of the company. The General Assembly responded by the passage of the annexed Act, which was submitted to, and accepted by, a special meeting of your body, called in accordance with your Charter and By-Laws, and held in Wilmington on the 25th day of last February.

In accordance with your instructions we have executed the mortgage under this act, and prepared the bonds for market; but, in the face of the general distrust which prevails against all Southern securities, we have not thought it best to press them to a sale. We have preferred to suspend the work of construction until a more favorable time; and—to relieve the company of its pressing liabilities—to borrow money on the deposit of the bonds as collateral. This we have found no difficulty in doing; and we are assured that, as soon as public confidence is restored we will find as little difficulty in negotiating a sufficient number of the bonds at their intrinsic value, to complete the work in the shortest possible time.

But for the restoration of public confidence, and the consequent successful negotiation of any Southern security, there are two conditions essentially prerequisite, which must be fulfilled. The first is, that the State shall resume her constitutional relations with the general government—the second, that she shall re-establish her own credit, by providing for the payment of the interest on her own debt. The first is dependent upon the action of the Congress of the United States. In the State of North Carolina, we confidently believe that the second will follow promptly on the first. The present attitude of the State is practically that of repudiation. Repudiation is dishonesty; and, aside from the moral question, North Carolina can not afford to be dishonest. Her works of Internal Improvement; her corporations of all kinds; all of her citizens feel the evil consequences of the impeachment of her credit; and we say, without hesitation, that they will not long tolerate such legislation as must, in the end, bring ruin on themselves. Just so soon, then, as our political troubles are settled, and certain and fixed laws, common to all the States, are enacted for our government, so that our people may have some permanent prospect before them, some future of hope and promise, some security of property and the fruits of industry, of life and the pursuit of happiness, the representatives of the people will require no compulsion, and but very little time to do that which the common welfare requires should be done. Believing this confidently, we have been unwilling to submit to the sacrifice which the surrounding circumstances would have required of us, and which certainly would not have been lessened by the failure of the last General Assembly to protect the public credit.

An eight per cent. bond, well secured, with an assurance of the prompt payment of its interest, ought, at the least, to command its par value in the market. This is the test of the value of the bond, the ability to meet the interest, and the security of the mortgage. On both of these points our company can offer assurances which ought to be satisfactory.

We do not propose to issued all of our bonds at one time; but only so many as we can manage, and as may be necessary, from time to time, to pay for construction. Our clear profits, for the past year, would pay the interest of $1,800,000 of these bonds. Our reasonable expectations for the next year, will pay the interest on $2,000,000; and the proceeds of that amount of bonds would fill the gap beetween our present terminus and Charlotte. This gap being completed, there would be no question of our ability easily to pay the interest on the entire mortgage. But this will become more apparent as we proceed.

The second question is as to the security of the mortgage. The test of this security is the cost of the road, and the resources of the country through which it passes, the quantity and value, and character of its productions.

The road has cost, already, at ante-war prices, before one single dollar of the money to be derived from this mortgage is expended upon it, about $3,600,000. At the present prices of labor and material, it is worth at least $6,000,000. When completed and fully equipped, it will own property, independent of the franchise, to the full value of three times the amount of the mortgage; and will possess an income sufficient to pay a dividend of eight per cent. to its individual stockholders, and its entire debt in ten years.

This assertion may be verified by any one who will take the trouble to examine the United States census statistics of 1860. Allowing the productiveness of the country to be reduced one-half by the results of the war—giving full army rations to the entire population, and all the horses, mules and cattle, allowing one-third of the surplus to seek some other outlet to market, while, in point of fact, by far the greater part is dependent upon our transportation alone, and charging upon the remainder only one-half of our present rates of freight, we have an annual income of $827,000. Add to this the receipts from travel and from return freights, and freights from other sources, and we have an income exceeding one million of dollars per annum; and this, we say, is sufficient to pay a dividend of eight per cent. to our stockholders, and lay aside a sinking fund which will pay our entire debt in ten years. We regard these figures as beyond any probable contingency. We believe the result will be even more gratifying and profitable.

And this revenue will be yielded by the produce of the country as it now stands, undeveloped—in its present imperfect state of cultivation—from the fruits of the surface of the earth which has been drained for ages of its natural fertility, with comparatively no return, such as skillful labor and science afford to increase its productiveness. But no part of the country is susceptible of a higher degree of improvement—no part of the country will yield more readily, or more cheaply, the certain means of improvement—no part of the country has been more bountifully blessed with those extensive and valuable mineral deposits which are destined to make the State rich, and great, and populous, and powerful.

* * * * * *

But great as is the future which is opened before us by this magnificent country, it does not begin to comprehend the full measure of that which is in store for us. Reaching the Tennessee line, no matter which route may be selected, we are brought into immediate connection with other great roads, through Tennessee and Kentucky, to the West and the Northwest; and the contributions of freight and passengers which we will receive from those roads, without saying anything of our immense local business, will more than justify the construction of our road.

From Asheville, in Buncombe County, *via* the Paint Rock, to Morristown in Tennessee, we meet a leading road from Louisville, Kentucky. This road is already in operation from Louisville to Crab Orchard, a distance of 115 miles. It is under contract to London, a distance of 47 miles farther, to be completed this fall; and it will make its southern terminus either at Knoxville, or by way of Cumberland Gap, at Morristown. The leading object of its projectors was a connection with the Atlantic coast by means of the system of railroads chartered by North and South Carolina. Like the road from Morristown to Paint Rock, it is in the hands of energetic and accomplished railroad men, who are fully alive to

the importance of the connection, and who have the means of completing their end of the line long before we can complete ours, even under the most favorable circumstances. Nothing, then, is needed to induce them to come to Morristown but the assurance that we can and will meet them at the Tennessee line. The very moment that we reach that point the connection is ready for us; and the slightest attention to the country will convince any one that it is a connection of the very first importance. We will have almost an air line from the Atlantic Ocean to the Ohio River. We will pass through a great and growing country, rich in all the productions of commerce; and we offer them a route to market as good as, if not the very best, which the country can afford. For the productions of Eastern Tennessee, and for those of all Kentucky intended for the Southern Atlantic coast, we will stand without a competitor; and we can present, by far, the shortest, quickest, and in every way the most attractive route to passengers from the same section of country, to the North Western States, to the Territories, and to California, by way of Louisville, St. Louis, and the great Pacific Railroad.

Joining the Western North Carolina road in its extension to Ducktown, with the completion of the short link between Ducktown and Cleveland, for which a charter and aid has been granted by the State of Tennessee, we have direct communication with the city of Memphis, *via* the East Tennessee and Georgia and the Memphis and Charleston Railroads. Trace this route upon the map, and you will find it as straight as could be built, even if we started out for the purpose of connecting that city with our eastern terminus. The completion of the projected line between Nashville and Knoxville would be another step to improve our position, for we will have close communication with Knoxville by the Morristown route. In either case, the line from the Atlantic to the Mississippi will not vary more than one degree north or south of an air line; and gives us an advantage which is not possessed by any other through line in the country. Looking beyond the Mississippi, then, we can offer the very best line in the whole country, to the Southern Pacific, by way of Memphis, Little Rock and El Paso—a route in which the Ohio River States are deeply interested, and which beyond El Paso, being merged into the South Western Pacific, with the Government grant, is certain to be pushed to completion long before the Southern Pacific, through Texas, can possibly be built.

In the direction of the Cranberry Iron Works, by availing ourselves of the privileges of the charter to the North Western Railroad Company, passed by the last General Assembly, we have a connection with the East Tennessee and Virginia Railroad; and, have the advantage of its connections. A road has been chartered, and surveyed from Bristol to the Cumberland Gap; but its progress seems to be dependent, in some way, upon the consolidation of certain Virginia and Tennessee roads—a measure which has exercised the minds of the stockholders of these companies for some time past, but which has not yet been decided. With the aid of this road, our communication with the Ohio would be quite as direct as by the routes of which we have already spoken; but our communication with the Mississippi would be much less direct; and in this point of view, this route is much less desirable for us. But there are facts, connected with it, which are well worthy of your most attentive consideration. The country which our own road would cross is of well ascertained great natural wealth; and, within our own State, we would be without a competing line for the transportation of its products. In a national point of view, as a military measure, as a source of great wealth and strength to the whole country, the development of its immense iron interest, at some future day, will commend itself to the General Government; and the road upon which it depends for transportation, to a certain extent, will be invested with a national character.

These connections being made—and, in process of time they will all be made as surely as self-interest governs man—our seaport terminus will then be nearer to Nashville, Knoxville, Memphis, Louisville, Indianapolis, Cairo and St. Louis than any other on the Atlantic coast. It will be as near to Cincinnati as Baltimore is, and as near to Chicago as New York; and, though we do not expect to compete with these great cities in the carrying trade of the world, yet there are thousands of tons of freight, which are shipped first to these cities, thence to our own seaports, and thence to the interior, which must, and will come over these roads direct to their destination. The city of Wilmington, then, may furnish the whole of Western North Carolina, and Eastern Tennessee and Kentucky with West India produce, for New Orleans itself cannot compete with us beyond those points which are watered by the Mississippi, and its navigable tributaries.

Nor, is there any valid reason why we should not do a fair proportion of all that freighting business, outward and inward, which is intended for foreign commerce. The capabilities of our port were fully tested during the late war. It is a significant fact that of the thousands of vessels which ran the blockade, selecting always the darkest night for their arrival and departure, not one was lost except she was driven on shore by the vigilance of the blockaders. The conclusion is that the dangers of our navigation have been greatly exaggerated, and that prudence and skill have learned to avoid them. If the Insurance Companies would underwrite none but first class vessels, leaving always a fair margin for the risk of owners, the proverbial storms of Hatteras would be much less dreaded, and their attendant disasters materially decreased.

Much more might be said on the important topics which we have selected to present to you; but we have already far exceeded the limits of such a report as this. We hope, however, that we have said enough to convince you that our road is destined to form a part of a great national highway over which an immense traffic will pass, and that it constitutes an important link in a great chain, which cannot be omitted without materially damaging, if not destroying, the chain itself. We have, thus, a future of boundless prosperity opened before us; and our road becomes an indispensable public necessity. No matter, then, what changes may take place in the country, or the Government, or among the people—no matter what disasters may befall us, or to what delays and losses we may be subjected, we feel an abiding confidence that this very road, eventually, must and will be built. If we should fail from the combination of circumstances which are operating against us—if the road should pass into other hands, and every dollar of our investment be lost to us—if all which we have done should be undone—if every man, woman and child should be driven out of the country, and strangers fill their places, THIS ROAD WILL STILL BE BUILT, BECAUSE THE PUBLIC NECESSITY DEMANDS IT.

But we will not fail. Judging the future by the past, we cannot fail. The whole history of our road incontestibly proves that we deserve, and must eventually secure, success. We have passed through three terrible financial crises and one devastating war; we have seen our work wantonly destroyed; we have seen our credits shamelessly repudiated; we have seen our available means, at one time abudant for the entire completion and equipment of the road, depreciated to an extent which rendered them valueless for our purposes; but the intrinsic merit of the work, its necessity, its boundless future, its certain prosperity have triumphed over all difficulties, and sustained us under every disadvantage. We stand before the moneyed world to-day with a credit as fair as that of any Southern railroad; and with a prospect of completion contingent only upon the restoration of the prosperity of the country itself. When the Union shall have been reconstructed—when political agitation shall cease—when peace and quiet shall be restored to the land—when labor shall become subordinate to discipline—when business shall flow back into its accustomed channels, and prosperity shall again reward the industry of the people—all of which are certain, and present only a question of time—then, and not till then, we may look for the certain, early and complete success of our enterprise. And when our road shall be extended farther into the interior, where the country is still more fertile, still richer in mineral wealth than that which it now passes through, and whence the products must come to market by our transportation, or not come at all—even then, without waiting for its completion, the greatest work of Internal Improvement in the State of North Carolina, which she has so wisely fostered, so anxiously watched, and from which she has a right to expect so much, will pour her rich treasures into the markets of the world, and bountifully repay her for her enlightened liberality.

There are upon the Eastern Division 8 engines, (6 of which are in good order,) 2 first class and 2 second class passenger coaches, 2 mail and baggage, 43 box, 62 flat, 11 lumber, 2 crank, and 21 section cars. Miles run by engines, 99,033. Number of passengers carried, 8,141.

The receipts from all sources on the Eastern Division, including $449 76 from the previous year, were $565,862 35; and the payments, $562,836 89—leaving a balance of cash on hand, Aug. 31, 1867, $3,025 49.

President.—ROBT. H. COWAN.

Directors.—R. H. Cowan, J. A. McDowell, S. W. Cole, A. G. Logan, S. J. Person, W. L. Steele, S. H. Walkup, C. E. Henderson, A. R. Homesby, R. S. French, H. W. Guion, J. M. Hutchinson and John D. Taylor.

Sup't Eastern Division, WM. I. EVERETT.

Sup't Western Division, B. S. GUION.

Treasurer.—I. T. ALDERMAN.

The Oshkosh Railroad.

Col. J. L. Dorrance, of Oshkosh, has just returned from New York, where he has had a hearing before the Directors of the St. Paul road relative to the new road from Omro to Oshkosh, connecting that place with this city. He found the Directors of the St. Paul road ready to listen to propositions relative to the road, and an agreement was drawn up to build it as soon as the people of Oshkosh raised the sum of $50,000 in aid of the enterprise. Col. D. thinks he can raise the money in thirty days, and felt very sanguine that we should soon have railroad communication with Oshkosh. The directors of the St. Paul road also instructed Manager Merrill, as soon as the $50,000 was raised by Oshkosh or anybody else, to go forward with the road, and Mr. Merrill, with his accustomed earnestness, says as soon as that is done the ten miles of road shall be laid and be in complete running order sooner than the same amount of road was ever built in this country, when there was grading to do. The report will be satisfactory to our business men who have long desired to have railroad connection with Oshkosh, and it will also be satisfactory to the people of Oshkosh, who have long desired such connection with Milwaukee.—*Mil. Wisconsin.*

Ohio and Mississippi Railroad.

The re-organization of this road is now complete. The new Board of Directors are: Wm. H. Aspinwall, Joseph W. Alsop, Allan Campbell, Wm. Whitewright, Jr., S. F. Odell, Wm. W. Scarborough, Larp Anderson, Wm. D. Griswold, Alexander H. Lewis, John H. Ross, Samuel Gaty and Lewis B. Parsons. Wm. D. Griswold has been elected President, Alexander H. Lewis, Vice President, John W. Coulogne, General Superintendent. The new corporation have had a settlement of all the difficulties with the City of Cincinnati, and have secured all desirable accommodations in the city.

The Open Board of Brokers.

ITS RIGHTS TO SUSPEND OR EXPEL MEMBERS FOR NON-COMPLIANCE WITH ITS RULES.

In the Court of Common Pleas, on the 14th inst., Judge Van Vorst, before whom the motion was argued, rendered his opinion in the case of Cumberland G. White *vs.* John L. Brownell, President of, and representing the Open Board of Brokers of this city. This was a motion for a permanent injunction against the defendant, restraining him from carrying out a decision of a regularly constituted Committee of the Board, suspending the plaintiff from his privilege of membership on account of his failure to fulfill a contract made with another member.

The Judge prefaces his opinion with a detailed statement of the case, of which the following is a brief synopsis: Plaintiff became a member of the Open Board of Brokers in 1865, and like other members pledged himself to abide by the constitution and by-laws of the association, which, as amended in May, 1867, required the Committee on Membership to report to the President of the Board any defalcation of contract on the part of a member, or refusal or inability to pay differences, whereupon it became the duty of the President to suspend the member thus reported, who, however, had the privilege of appealing within sixty days to the Executive Committee, and if they reported the complaint as just, the suspension was confirmed. In accordance with these rules and regulations, plaintiff was reported by the Committee on Membership, in September, 1867, as a defaulter, in having refused to fulfill a contract made with Currie, Martin & Co. in January, 1867, for the purchase and sale of 1,000 shares of Hudson River Railroad stock. [The reasons why plaintiff refused to comply with the contract are set forth at length, and are claimed by him to be sufficient and valid; but as they do not affect the point on which the decision rests they are omitted.] Plaintiff appealed from the decision of the Committee on Membership to the Executive Committee, and a meeting was called to consider his case, but was adjourned for want of a quorum. Before another meeting was held, plaintiff commenced the action in this Court for an injunction. While the motion was pending in this Court a meeting of the Executive Committee was held, before which plaintiff was cited to appear and did appear, but refused to prosecute his appeal, and protested against and forbid the Committee taking any further action on the appeal. Plaintiff charges that several members of the Arbitration Committee were prejudiced against him, and had expressed an opinion in the case before taking any official action; also, that the delay in the meetings of the Executive Committee was caused by Currie, Martin & Co., and other members, who sought to prevent justice being done him. He disputes all claims made by Currie, Martin & Co., and insists that his original contract with them is still in force. He claims that his suspension was unjust, and calculated to injure his vocation as a broker, and asks that the Board be enjoined from interfering in any manner with him in the enjoyment of his rights as a member of the association.

The President of the Board in his answer denied that he or any other officer or member of the Association were instigated by Currie, Martin & Co. to take the action they did, or that they sought or desired in any way to deny the plaintiff justice; they affirm that they merely acted in accordance with the constitution and by-laws of the Association, and without prejudice or malice. The following is the opinion of

VAN VORST, J.—The Open Board of Brokers is not a corporation; the obligations and rights of its members are not determined or fixed by any statutory enactment, general or special. It is not a joint stock association. There has been no contribution of capital by its members for the prosecution of business of any kind by the association. There has been no stock issued to its member, nor can the individual members claim any rights of property in it as stockholders. The association engages in no business and does not devote its funds to the prosecution of any undertaking to produce profit or gain to its members. Nor is it a co-partnership. In its organization the essential features which characterize a partnership are wholly wanting. There are no profits earned to be divided among its members, nor are there losses to be borne. The constitution, the contract between the parties, does not establish co-partnership relation between the members. The associates do not hold themselves out to the world as co-partners, nor is there anything to show that they regard themselves the one to the other in that relation. The association looks to a continued existence unaffected by the death, resignation, suspension or removal of its members. If it was a simple co-partnership the death or a retirement of an associate would dissolve it. It is an established principle in the law of partnership, that if it be without any definite period any partner may withdraw at a moment's notice, when he pleases, and dissolve the partnership, and the civil law contains the same rule. (Kent's Com., vol. 3, p. 53.) The death of either party is, *ipso facto*, from the time of the death, a dissolution of the partnership, however numerous the association may be. But in this organization, although individual members retire, die or are expelled, the body lives. The status, rights and obligations of this plaintiff are not therefore to be determined by a consideration of this association in the light of its existence either as a corporation, joint stock association or co-partnership.

The Open Board of Brokers is a voluntary association of persons, who, for convenience in the transaction of business with each other, have associated themselves to provide a common place for the transaction of their individual business, agreeing among themselves to pay the expenses incident to the support of a "mart" in which each for himself, at stated hours of the day, and for his individual profit, may prosecute his own business and enter into separate engagements with his fellow members. The association does not share in the losses of the individual associates; each member takes his own gains, and individually sustains the losses incident to his engagements.

The organization of this Board grew out of a necessity for "new and greater facilities for exchange and negotiation incident to the rapidly developing interests of the country and the increasing number and value of its commercial securities." As the number of these securities had been largely augmented, so too, the body of persons who dealt in them as purchasers and sellers for others had greatly increased, and new organizations have required to be formed, and new places of business appointed to meet the wants of a growing and increasing business. The persons who formed this association were brokers. It is stated in the constitution that no person was eligible to membership unless he possessed a Government license as a broker.

A broker is an agent simply. He transacts business not for himself, but for another. He is a middleman, a negotiator between other persons for a compensation. A stockbroker deals in stock of moneyed corporations and other securities for his principal. It is a calling of great responsibility, in which punctuality, honesty and knowledge are required.

Acting as the stockbroker does for others, it is important that all the engagements he enters into should be both promptly and faithfully fulfilled, both by himself and the party with whom he contracts. Hence the language of the agreement of the original associates is suggestive—"Such business can only be transacted where there is the utmost confidence, and such confidence is begotten only by public, open, fair and upright transactions, where every party interested may and can know where and how such business is done." And hence "a great public 'mart,' open to all the associates," was desirable.

It follows, from the very nature of such an organization, with such objects, intents and purposes, that there must be rules and regulations for the good order of the association, and which rules should be held to be conclusive as to the mode of transacting business between the members, and as to the privilege of admission to and continued enjoyment of membership. As this association is not organized in pursuance of any statute, nor the terms of membership fixed by the principles of the common law, it follows that the agreement which the members make among themselves on the subject must establish and determine the rights of the parties on the subject.

The constitution of the association and its laws, agreed upon by the members, contains all the stipulations of the parties, and is the law which should govern. The members have established a law for themselves. No person is entitled to membership in the Open Board of Brokers except he is approved by the appropriate committee, voted for by the Board, and shall agree to adopt and affix his name to the constitution. And having done this, each member should stand by his contract. Each member is under an obligation to support it himself in all its details, and is under a duty to see to it that it is supported by others. "As a means of mutual protection" it is declared to be the duty of "every member to report to the Board all cases of defalcation of contracts of other members, and all cases of refusal or inability to pay differences." (Article 8 of Laws.)

The very existence of this body depends upon the faithful observance of its organic law by all its members. The Court must regard the constitution and laws of this Board as the contract by which all the members are bound. The Court cannot make any other contract for the parties than they have solemnly made for themselves. It is not the province of Courts of law to make contracts for parties. It may explain, interpret and enforce, and in some instances, when contracts are hard and unconscionable, relieve from them. But there is no claim in this suit that the terms of this constitution, adopted by the plaintiff, are hard and unconscionable. The plaintiff does not ask to be relieved from his membership, he rather demands that he may be allowed to remain in the association under the constitution. He does not wish to be suspended, or have his connection determined and ended.

In an organization of the character of the Open Board of Brokers, with its several hundred members, the business transacted at its rooms being daily large in amount, and the stocks and securities dealt in being ever fluctuating in value, it was most reasonable to apprehend that there would be constantly occurring differences between members, acting as agents for others, in regard to the terms of contracts, and as to the obligations and duties of contracting parties under agreements often hastily made. The temptation to avoid a contract in a rapidly rising or falling market, as the pecuniary interest of a party might prompt, rendered it imperative that some tribunal in the body of the Association should be appointed and agreed upon, to take cognizance of and exercise jurisdiction over all claims and matters of difference which might arise between members of the Board. This appears the more important as confidence in each other, and in the engagements which they might make one with the other, and

in the fairness, openness and uprightness of their transactions, and in the certainty that their engagements would be fulfilled, are announced as causes which led to the organization. To be effective their decisions should be prompt. As these engagements would be constantly maturing, it was eminently proper that a tribunal should be near to render speedy and exact justice. Confidence is the real life of such engagements. Hence the appointment of a Committee on Arbitration is a prominent feature in the Constitution of this Board, and by the expressed assent of each member jurisdiction is awarded to this Committee in advance of all claims and matters of difference which may arise between the members. The associates have argued among themselves that the decisions of this Committee shall have conclusive force, and that the members shall be bound by them; and each member is truly bound by such decisions, so far as they are made the basis of such general action in the Board to secure its good government under its Constitution.

Let us apply the above principles to the case before us. A claim and matter of difference arose between the plaintiff, a member of the Board, and Currie, Martin & Co., also members, growing out of their respective rights and obligations under a contract for the purchase of 1,000 shares of Hudson River Railroad stock agreed to be sold and delivered by plaintiff to them. This contract was made at the Board and between its members. It was in respect to a transaction embraced directly within the objects and purposes for which the association was formed. Currie, Martin & Co. claimed the right under the contract to subscribe for the increased stock proposed by the Railroad Company to be issued, and they elected to do so and looked to plaintiff for the same. This claim to subscribe for the additional stock under the contract was not admitted by plaintiff. Currie, Martin & Co. claimed of plaintiff a deposit of additional margin under the contract, which was refused; they then notified plaintiff that they would under the rules of the Board purchase 2,000 shares of such stock on plaintiff's account, against which proposed action plaintiff protested. The stock was bought by the President of the Board, under the rules of which plaintiff was notified. He refused to recognize the transaction or pay for the stock, and Currie, Martin & Co. paid for it, and made a claim and demand on plaintiff for a large sum of money difference in their favor; the justice of the claim was denied, and its payment refused by plaintiff. This was a claim and matter of difference on which the Arbitration Committee has jurisdiction so soon as the case should be brought before it. It was presented to the Committee by the claimants, and an examination and adjudication upon it demanded; a day for hearing was appointed, and plaintiff summoned to appear and answer and interpose his defence. The plaintiff declined to appear before the Committee, claiming that there was nothing to be submitted, and that there was no difference between him and Currie, Martin & Co. Now, the facts clearly show that there was a real and substantial difference between these parties. Claims were presented on the one side to a large amount growing out of the contract, and denied on the other. If the parties had agreed in regard to their respective rights, then there would have been no claim or difference. But they were very far apart. The question is not whether the claim of Currie, Martin & Co. was right or wrong in itself, just or unjust. There was a difference which was to be adjusted, and of which the plaintiff, when he became a member, had agreed that the Committee should take cognizance. The plaintiff seems to rest in the belief that because he denies that Currie, Martin & Co. had a claim, that therefore there was none in their favor. He would decide the matter for himself. Now, it happens that much of the real business of courts of law arises from the assertion of a claim by the plaintiff and its entire denial by the defendant, yet the action proceeds to trial and final determination, and it is no uncommon occurrence that the party who denies the claim, fails in his defence.

A claim "is a demand of a right, or supposed right, a calling on another for something due, or supposed to be due." (Webster's Dic.) And wherever there is a disagreement in opinion in regard to a contract or a matter in controversy existing between the parties to it, there is a difference such as the Committee might properly adjudiate and of which it was bound to take cognizance.

The Committee, in the absence of the plaintiff, heard and determined the matter upon the statements of the claimants, and rendered judgment in their favor. Plaintiff had a right to appear and make his objections and set up his defence; this he refused to do. After the award was made he could perform it and retain his rights as a member; this he declined to do. He might appeal to the Board of Appeals; and this he refused to do. Having made up his mind that Currie, Martin & Co. had no claim he concluded that he need interpose no defence, not take any steps to reverse the decision, and could treat the award as a nullity. The plaintiff cannot assume this position and still claim the right of membership. He cannot invoke the aid of this court to protect him in all the rights and advantages of the Association, and which he alleges are a great source of benefit to him, and still be allowed to disregard his duties under the Constitution and laws of the Board.

Plaintiff agreed when he became a member that the Arbitration Committee should take notice of all claims and differences between members, and that he would be bound by their decision. He refused either to acknowledge its conclusive force in a case in which he was interested, or to appeal from its decision. The Constitution must be taken as a whole. The contracting power is an entirety. All its obligations are to be assumed and discharged; all its profits are to be enjoyed. The enjoyment of the latter depend upon the performance of the former. Were it otherwise the Association would be of no real advantage to its members. It clearly appears that good faith in the observation of the constitutional obligations of the members was intended to furnish a test for the rights of continued membership.

There was some discussion on the argument of this motion as to the right of the plaintiff to make his consent to the jurisdiction of the Arbitration Committee over the claim and difference in question. In an action in a court of law to enforce the award such question might be raised; for the purposes of this action under the facts of this case it can give him no relief. If the plaintiff would revoke the part of his agreement with his associates which imposes duties and obligations upon him he cannot insist in a Court of Equity that he shall be protected in the enjoyment of rights and privileges created by the same contract. He that would have equity must do equity.

After the action had before the Arbitration Committee, no appeal having been taken, proper steps were taken to bring the facts and circumstances involved in this controversy between the plaintiff and Currie, Martin & Co., and the default of plaintiff before the Committee on Membership. The matter was investigated, and this Committee reported to the President of the Board that plaintiff was in default under the contract. The President of the Board, as was his duty, declared the plaintiff suspended.

This suspension operates as a deprival, during its continuance, of all plaintiff's privileges as a member, including an exclusion from the rooms of the Board. But this declaration of suspension is not final. There is reserved to the plaintiff a right to appeal to the Executive Committee. The jurisdiction of this Committee is ample to render and do complete justice. It has full power to hear and investigate the matter, and to report the result to the Board itself. If it shall appear that the suspension is just, it shall be confirmed, otherwise it shall be annulled. The plaintiff has taken such appeal to the Executive Committee. He has placed his case in a way to be investigated and finally decided by the Board itself. Having gone thus far, he pauses. He fails to prosecute his appeal; in fact has forbidden the appellate tribunal to take cognizance of his appeal. At this step, and with this appeal pending, he asks this Court in effect to annul all that has been done by the Association in the investigation and disposition of this matter by the officers and Committees of the Board. He asks this Court to restore him to and protect him in the enjoyment of all his privileges and rights as a member; to give him regular standing in the organization, although its records show him to be in default, and the decree of his suspension to be unrevoked.

There are allegations in the complaint which claim that some of the members of the Committee had prejudged the plaintiff's case. But in the protest which plaintiff served upon the Committee he does not place his refusal to submit or appear on any such ground. He made no objection to the competency or fairness of the Committee. He expressly assigns for his refusal that no matters of difference have arisen between him and Currie, Martin & Co., and that they have no claim. If any such objections as he now mentions existed, he should have asserted them at the proper time, that appropriate action could be taken by the Association of which he was a member.

The plaintiff also charges the officers, committees, and a portion of its members sufficient to control its action, with a disposition to deny him justice and deprive him of his rights. But all the allegations on the subjects are denied by the answer of the President.

This Court, under its equitable powers, can give the plaintiff no relief under the facts disclosed. Plaintiff has unexhausted remedies for all his complaints and grievances under the constitution and laws of the Board. There is no occasion for the intervention of this Court. When he became a member he submitted to its laws, which offered full and complete relief. The equity of the complaint is denied. Motion to dissolve injunction granted.

Winona and St. Peter Railway.

Into every section of the west and northwest, that great railway Corporation, the Chicago and Northwestern, is now extending its iron arms. By the recent purchase of the Winona & St. Peter Railroad and further contemplated connections therewith, the Northwestern has secured a hold on the trade and traffic of Upper Minnesota that will be a prolific source of profit to that Co. and Chicago for all time to come. This purchase is but the preliminary, it is confidently asserted, to the construction of another road between Madison and Winona through the fertile Baraboo valley, which will give this city a short cut route to St. Paul, through a region of country inexhaustibly rich in agricultural resources, and forming a continuous line in every respect convenient and advantageous.—*Western R. R. Gazette.*

Council Bluffs and St. Joseph Railroad.

The *Omaha Republican* says the Council Bluffs and St. Joseph Railroad is now running to Nebraska City. By the 15th of November an additional twelve miles will be finished, and the cars will then run to Hamburg, Iowa. Track is now being laid at the rate of half a mile per day. All this on the northern end of the route. At the St. Joseph end, all the hands that can be found are employed; and grading is going forward with great and commendable activity. In eight months from date St. Joseph will be in full connection with the Pacific Railroad.

☞ The Columbia and Augusta Railroad Bridge was crossed by trains for the first time on the 16th inst. The Directors of the road, with many of the citizens, crossed in the first train. The bridge is a handsome iron structure of the Fink pattern. The entire length is 1,040 feet. This road, when completed, will be a great through line from the north to the south, and will shorten the distance between Columbia and Augusta over 60 miles. The laying of the track is being pushed forward.

American Railroad Journal.

Saturday, November 23, 1867.

Stock Exchange and Money Market.

A very marked increase of demand from private borrowers has been noted for Money, since our last, especially within the past two days, and rates have advanced a point on call loans, or to full 7 per cent. as the minimum price in the open market. In several instances, a fractional commission, in addition to the legal figure, has been paid; and in a few cases, even 7 per cent. in gold has been exacted from some closely pressed street operators. Treasury gold sales, and drafts on the depositaries of the public funds, have been assigned as the immediate causes of this sudden change in the market. The banks have been concentrating their resources to meet anticipated demands on them, and have thus contributed to the reduction of the floating supply of capital. The influx of currency from the northwest has been offset by the outflow to Cincinnati and the South. The Government office has been augmenting its cash balances, chiefly in the legal tender form. It gained nearly five millions last week, partly through sales of coin and bonds. The banks were deprived of nearly a million and a quarter of legal tender notes, and about $107,000 of deposits, during the week. They added nearly a million to their specie reserve, chiefly from the distribution of coin from the Sub Treasury, for interest and in the way of direct sales. There has been more inquiry for discount accommodation on the basis of 7½@10 per cent. per annum for all really marketable grades of business paper. The stronger city banks have been taking selections from their most responsible customers' notes at the legal rate of 7 per cent. in small amounts; but this has been an exceptional price. Secretary McCulloch is represented as having retired permanently some few millions more of legal tender notes, in furtherance of the contraction policy, which he will defend in his annual report, before Congress, with the hearty endorsement of the President. In the street, however, the impression seems to be spreading that Congress will not only suspend all existing authority for contraction, but will authorize some addition to the national bank circulation. Washington advices are against this theory, and indicate the probability that Congress will not act decisively on the currency question, at a very early day. Forcing a resumption of specie payments, however, does not seem to be popular, just at present, while business is so dull in most branches, all over the country. Secretary McCulloch does not mean to do more than work his way as prudently as practicable back toward a hard money basis, for the trade, commerce, and credit of the country. The specie reserve of the banks is now $13,734,964, against $15,511,124 same time last year. The city bank deposits are now $177,742,853, against $221,892,500 week ending Nov. 17, 1866. The legal tender reserve amounts to $54,329,650, against $66,120,361 same time last year. The circulation now stands at $34,134,366, against $31,238,502 same time last year. The loans are now $248,439,814, against $273,338,390 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $82,536,188 a day, against a daily average of $85,898,658 the preceding week, and $80,226,050 the week ending with Nov. 2. The current week's exchanges average about $98,722,000 a day. The city banks, last week, gained $917,980 of specie, but lost $1,211,233 of legal tender, and $106,956 of deposits. They increased their loans, $720,639; and their circulation, $64,463.

National Bank notes to the amount of $118,850 were issued last week, making the total issue to 1,671 banks thus far, $304,486,551, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,130,025, leaving, with the existing 1,630 banks, (having an aggregate capital of $419,500,000,) an actual circulation at this date, of $299,358,526. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,682,750; and for the public deposits, $38,030,450—making a total of $378,713,200. The Treasury Department last week redeemed and destroyed

$407,660 of worn and mutilated fractional currency, and issued $404,884 of new.

The Philadelphia Bank movement the past week shows a decrease in loans, of $322,910; a decrease of $52,791 in specie; a decrease in legal tenders of $55,014; a decrease of $18,346 in deposits; and a decrease of $5,514 in circulation. The Bank Clearings show a decrease of $2,238,126, and the balances, a decrease of $454,936.

The U. S. Sub-Treasury receipts, week ending with Nov. 16, were $19,827,827, including $1,732,656 from customs duties; payments, $14,963,838, including $2,440,300 of coin interest; balance at the close of the week, $110,295,077, against $105,438,588, at the close of the preceding week, showing an increase of $4,864,489. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $9,784,864 including $245,000 from customs; and payments, $[illegible],692,979; on Tuesday, receipts, $795,125 including $346,000 from customs, and payments, $971,333. The balance at the close of business on Tuesday stood at $110,174,753, against $106,259,058 a week previous.

Government revenues have been quite light, since our last, in the form of both customs and excises. The customs have been unusually low. They give no indication of an early improvement. The excises, last week, yielded $2,050,000, against $4,031,050, the preceding week; customs at the port of New York $1,732,656, and at the outports, about $550,000 (in coin) more, making the grand total income for the week equal about $5,245,718 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,853,195. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $79,150,000.

Government received $6,574,463 from customs, through the port of San Francisco, from Jan. 1, to Oct. 28, 1867, against $6,480,000 same time in 1866.

Gold has been fairly active, since our last, but at a modified range of prices. The speculative demand has been quite confident, but has been promptly met, partly by sales from the Treasury, which needs currency, to approximately equalize its legal tender and coin reserves, so as to be prepared for all calls upon it, in either form. In December, it will have currency interest to pay on the June or second series of the Seven-Thirties. The export inquiry for gold has been very light. The customs call has been on a more than usually restricted scale. The extreme prices, during the week, have been 139¼ and 141¼; while the closing figure on Wednesday was 139⅝. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $2,892,411, against $9,095,798 same time last year. The customs demand for Gold last week, averaged $288,776 a day; thus far, this week, it has been equal to $295,500 a day, or equal to a weekly aggregate of $1,773,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $22,037, and from California, $187,838. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan, 1, 1867, has been $108,516,166, against $121,514,333 same time in the preceding fiscal year. The total receipts of California gold at this port since Jan. 1, 1867, have been $25,409,634, against $37,175,953 same time last year, showing a decrease this year, of $11,685,319. The exports of specie from this port, last week, were $242,285. The total outflow of specie from the port, since Jan. 1, 1867, has been $45,377,729, against $57,150,012 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,440,300, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $56,983,981, against $45,664,710 for the preceding calendar year. The specie exports from San Francisco, from Jan. 1, to Oct. 28, reached $34,197,761, against $37,286,939 same time last year, showing a decrease, in 1867, of $3,089,178.

Foreign exchange suffered considerable depression early in the week, under liberal offerings of bills, and a comparatively light demand for them. Within a day or two past, the market has exhibited increased firmness, on a less extensive supply and fair inquiry. Bankers' 60 day bills on London closed at 109¼@109½, and on Paris to 5.20@5.16¼; sight bills on London to 109½@109⅞; and on Paris to 5.15@5.13¾. The offerings of produce bills have been unusually liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $5,137,914, making the total value of exports since Jan. 1, 1867, $166,609,530, against $168,436,426 same time in the preceding year.

Government securities have been in moderate demand, during most of the week. The main call has been for the six per cent. coin bearing bonds, particularly for the Five-twenties, which, like nearly all the National stocks, have held their own comparatively well, as regards price, despite the pinch in money. Less attention has been given to the Ten-forties, which have been less buoyant in price. Seven-thirties have been slow of sale, save to the Treasury officials, who are buying them in. Some thirty-two millions of Seven-thirties have been retired through the local office, since the 15th of October, a little over a month ago. Compound Interest Notes have been lightly dealt in, as a rule, at barely steady rates. The closing transactions were on a restricted scale at drooping prices. U. S. sixes of 1881 closed here on Wednesday at 113⅛@113¼; U. S. Five-twenties of 1862, 108@108⅛; U. S. Five-twenties of 1864 at 105⅛@105¼; U. S. Five-twenties of 1865 at 106⅛@106¼; U. S. Five-twenties of 1865, consolidated, 107⅛@107⅝; U. S. Five-twenties of 1867, 107⅛@107⅝; U. S. Ten-forties at 101⅞@102, and U. S. Seven-thirties at 105⅛@105¼. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

December, 1864..119¼	September, 1865..116
May, 1865 .....117⅝	October, 1865....115¾
August, 1865....116¾	

Railway and miscellaneous stocks opened very firmly, as a rule, on a lively speculative movement, which was maintained with great energy and measurable success up to Monday. During the past few days, however, the market has been less active; and, influenced by the sudden twist in Money, values have generally declined, closing heavily, in most instances, under a pressure to realize. The *bears* have taken advantage of the monetary activity, to force prices down. The latest dealings were restricted in amount and at drooping figures.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Nov. 6.	Nov. 13.	Nov. 20.
Consols.....	94½	94 9/16	94 9/16
U. S. 5-20's of 1862....	70¾	70¾	70 5/16
Erie.....	46½	47	47½
Ill. Central.....	82¼	84¼	84¾

A fair business has been reported in breadstuffs, which close more firmly and buoyantly than they ruled earlier in the week. Provisions have been less freely dealt in, and have been somewhat depressed. Cotton has picked up considerably, within a day or two, on much improved demand, mainly for the low grades for export; but closed less buoyantly. Middling cotton closed on Wednesday at 18@19½ cents, as the extremes per lb., which is a ½ cent. a lb. above the lowest quotations of the week. The stock of cotton now here is estimated at about 48,000 bales. The receipts at the port this week, have averaged about 5,500 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; last year; estimated stock at close of the year, 80,296 exports, 1,554,664 bales, against 1,557,054 bales bales, against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 284,000 bales, against 293,750 bales same time last year; exports, same time, 101,145 bales, against 108,376 bales same time last year; stock on hand at latest dates, 164,700 bales, against 309,000 bales same date last year. Beeves have been more active and firmer, this week, ranging from 10@17c.; receipts, 5,269. Calves in fair demand and steady at 10@12½c.; receipts, 1,160. Sheep and lambs plenty and heavy, at 4@6c., and 5@7c., respectively; receipts, 35,160. Swine in better request and quoted up to 6⅜@7⅛ per lb., live weight; receipts, 32,755. Foreign goods of all kinds have been in comparatively light demand, and depressed in price. While domestic cottons and woolens have been more freely purchased, there has been very little call for imported dry goods, through private channels, and prices have been irregular, generally favoring purchasers. The total imports of foreign dry goods, last week, were $1,008,189, and the total amount marketed $926,773. The value of foreign merchandise imported last week, was $2,641,293—making the grand total specie value of last week's imports of dry goods and merchandise, $3,649,482, and since Jan. 1, 1867, $218,476,362, against $258,503,099 same time in the preceding fiscal year. The ocean freight market has been fairly active, since our last, but at yielding rates, with 445 vessels of all classes in port. For Liverpool we quote flour at 2s. 6d.@2s. 9d. per bbl.; grain at 8¼c.@8¾d. per bushel; cotton at ¼@5/16d. per lb.; and heavy goods at 27s. 6d.@35s. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for

the week ending Nov. 19, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$4,119,158	$5,137,914
Prev. reported	164,317,268	161,471,616
Since January 1	$168,436,426	$166,609,530

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$1,377,716	$1,008,189
Gen. merchandise	2,510,723	2,641,293
Total for the week	$3,888,439	$3,649,482
Previously reported	254,614,660	214,826,880
Since January 1	$258,503,099	$218,476,362

The balance in the Sub-Treasury on Wednesday was $110,099,681 28.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Baltimore and Ohio Railroad.

The annual meeting of the stockholders of this company was held in Baltimore on the 18th inst. On motion of Miles White, Esq., Albert Schumacher, Esq., was chosen chairman, and Joshua I. Atkinson, Esq., secretary. J. W. Garrett, Esq., president of the company, presented the thirty-ninth annual report of the president and directors to the stockholders, being for the fiscal year terminating 30th September, 1865. Mr. G. stated that such progress had been made in the adjustment of the accounts as would enable the board to furnish the remaining reports within a few months. The report was then read by the secretary. This report is being printed in pamphlet form, and will be ready for distribution at an early period.

After the reading of the report, no other business being presented, the stockholders' meeting adjourned for the election of directors to serve for the ensuing twelve months, Messrs. A. Schumacher, M. White and W. J. Albert acting as judges. On counting the ballots, the following gentlemen were found to be unanimously re-elected by a vote of 33,066 shares:—Johns Hopkins, Samuel W. Smith, Francis Burns, John Gregg, Galloway Cheston, Wm. W. Taylor, John Spear Nicholas, C. Oliver O'Donnell, James Harvey, Wm. Heald, Samuel Kirby and Allen A. Chapman.

Cattaraugus County Railroad.

A new railroad company, styled the Cattaraugus County Railway Company, to connect the Lafayette coal branch of the Erie road with the Buffalo and Washington road, was organized at Buffalo on the 13th inst., by electing the following directors: Alexander S. Diven, John S. Eldridge and D. R. Eaton, of New York city; General Thomas L. Kane, of Pennsylvania; A. G. Rice, Eleazer Harmon and A. D. Scott, of Ellicottsville, N. Y.; John C. Devereaux, of Utica; George Brewer, of Great Valley; Rufus L. Witcher, of Machias; Bronson C. Rumsey, Myron P Bus and Henry A. Richmond, of Buffalo

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 2nd week in Nov., 1867, were.. $86,938 73
Corresponding week of previous year.. 94,046 05

Decrease..... $7,107 32

The earnings of the Chicago and Northwestern Railroad for 2d week in Nov., 1867 .. $280,029 07
Corresponding week previous year .. 252,416 50

Increase $27,612 57

The earnings of the Detroit and Milwaukee Railroad for the week ending November 14, 1867, were $42,457 00
Corresponding week of 1866..... 39,854 00

Increase $2,603 00

The earnings of the Chicago and Rock Island Railroad for the second week in Nov., 1867, were..... $99,200 00
Corresponding week of previous year.. 83,185 00

Increase $16,015 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Nov., 1867, were..... $104,882 00
Corresponding week of 1866..... 102,927 00

Increase $1,955 00

The earnings of the Western Union Railroad for the second week in Nov., 1867..... $19,180 71
Corresponding week previous year..... 18,910 81

Increase $269 90

The earnings of the St. Louis, Alton and Terre Haute the 1st two weeks in November have been as follows:

	1st week.	2d week.
1867	$42,056 27	$37,847 73
1866	50,613 68	50,228 60
Decrease.....	$8,557 41	$12,380 87

The earnings of the Toledo, Wabash and Western Railroad for the 2d week of Nov., 1867, were..... $80,228 09
Same week in 1866.. ..... 89,116 19

Decrease $8,888 10

The earnings of the Chicago and Alton Railroad for the second week in November, 1867, were $100,949 70
Corresponding period previous year.. 84,188 19

Increase..... $16,761 51

☞ Mr. William Richardson, President of the Dry Dock, East Broadway and Battery Railroad, of New York, has leased for forty years the Atlantic street and Fifth Avenue Railroads, Brooklyn. It is reported that the price paid is $35,000 per annum for the first five years, $40,000 for the next five, and $45,000 for the third five.

☞ The Oskaloosa (Iowa) *Conservator* says that the grading on the Iowa Central Railroad, between that city and Eddyville is progressing finely, and between Eddyville and the south line of the State the work is approaching completion as fast as vigorous work can be brought to bear upon it.

☞ The Springfield (Mo.) *Patriot* says that a combination of forty-seven capitalists, the wealthiest ever organized in this country for railroad purposes, will, on the assembling of the Legislature, submit a proposition to the State for building the Southwest Pacific Railroad.

☞ It is expected that the European and North American Railway will be opened to Oldtown in January.

Portland and Kennebec Railroad.

The directors of this company accompanied by a large number of invited guests, composed almost exclusively of railroad men, made an excursion over the road on the 14th inst., from Portland to Skowhegan. A correspondent of the Boston *Journal* says that the object of this excursion was to demonstrate the feasibility of an amalgamation or consolidation of the lines of road from Skowhegan to Boston, the Portland and Kennebec Railroad being now in the market.

Not long since the Supreme Judicial Court of Maine gave a decision in the famous case of the Kennebec and Portland Railroad Company *against* the Portland and Kennebec Railroad Company, a bill in equity, claiming possession of the road, in favor of the old stockholders, against the present holders of that line, who claim possession under the mortgage of October 15, 1852.

The Kennebec and Portland Railroad originally cost about $3,000,000. About $1,200,000, or to speak accurately, the stock paid in, amounted to $1,188,673. It received $800,000 on the loan of credit by the cities and towns on it route. On the 15th of October, 1851, a mortgage of $230,000 was created and on the 15th of October, 1852, a second one of $250,000. The balance of funds required for its completion, with security on the rolling stock, was advanced by the Hon. Ruel Williams of Augusta. The Yarmouth extension, costing $202,400 was raised by a special loan, on the security of the Yarmouth section.

The first and second mortgages were made to the same Trustees, who took possession of the road and gave notice of foreclosure on both mortgages.

Before the foreclosure of the second mortgages two of the Trustees and four of the Directors united with other parties, including the Superintendent, and purchased of Mr. Williams all his interest, which gave them control of the rolling stock, and a majority of the second mortgage bonds. These parties now claim the road under the second mortgage—the first mortgage having been extended twenty years, without foreclosure.

Allen Lombard, President of the railroad, brought a bill in equity to redeem the second mortgage, claiming that the funds in the hands of the Trustees should be applied to the payment of the interest due on the second mortgage bonds. This bill was dismissed by vote of the four Directors interested in the Williams' purchase—Darius Alden, N. M. Whitmore, Geo. F. Patten and Wm. D. Sewall.

The Legislature then interfered, and authorized a calling of a meeting of the old stockholders, who made choice of a new Board, among whom were Hon. Geo. Evans of Portland, and Benjamin D. Reed of Boston. This new Board brought a bill in equity for the redemption of the road, claiming that the Williams purchase was paid for out of the earnings of the road in the hands of the Trustees.

After a full consideration the Court overruled the demurrer of the defendants, and required the parties to answer. The old stockholders are confident of regaining possession of their line, as it is admitted that the Williams purchase, giving them control, has been paid for from the accumulated earnings of the company—the purchase, by the Trustees and Directors, being made for the benefit of the corporation, in equity.

A few weeks ago an arrangement for uniting the Kennebec road with the Portland and Rochester Railroad was regarded as a fixed fact, but it was defeated in the Board of Directors of the Portland and Kennebec Railroad, for reasons which can be readily explained in view of the present movement. The enterprising managers of the Eastern Railroad have their eyes on Skowhegan as the proper end of their line in place of Portland.

Vermont Central and Vermont and Canada Railroads.

The trustees and managers of these corporations have just made their annual report to the bondholders of the Central and the stockholders of the Vermont and Canada. From this it appears that the gross earnings of both roads in the year ending May 31, 1867, were $1,783,991 44; and the total expenditures $1,300,862 99—leaving net earnings of $483,128 45. Of this last sum, $307,605 has been applied to the payment of Vermont and Canada rent, interest on equipment loan, U. S. tax and general interest. The remainder has been paid for extraordinary expenses and the purchase of real estate, including $132,015 on account of purchase of S. S. and Chambly Railroad.

The earnings of the five months since June 1, 1867, show a gain over the corresponding months of last year of $42,724, and as the track and rolling stock are now in high condition, as the business of roads is steadily and healthfully increasing, and as the improvement in facilities at Ogdensburg are many and important, it will be safe to estimate for the year ending May 31, 1868, a fair improvement in net earnings over the year just passed. The sum required to pay the 8 per cent. dividends on Vermont and Canada, on the S. S. and Chambly loan, on the equipment loan, and on the first mortgage Vermont Central bonds, is $525,000 per annum. This is sufficient for the interest on the whole of the above securities issued and unissued.

The trustees and managers now hold in reserve, to meet maturing liabilities, $446,896.

Cash.....	$71,944
Vermont and Canada stock	112,400
S. S. and Chambly loan.....	116,450
Equipment loan unsold.....	113,000
	$413,794

When the foregoing are sold and issued, the Vermont Central and Vermont and Canada will stand as follows:

Vermont and Canada 8 per cent. stock.	$2,500,000
Equipment loan 8 per cent.....	1,000,000
S. S. and Chambly loan 7 per cent....	500,000
First mort. Vt. Central bonds 7 per ct.	3,000,000
2d mort. Vt. Central bonds 7 per cent..	1,500,000
	$8,500,000
